OM Hen PCB-nya sdh saya kirim ... Alhamdulillah senang sekali ketemu dengan Pak Syarif dan sangat meyenangkan beliau ajak ngobrol apalagi tentang AR wah sangat semangat, sayang waktunya sangat singkat tadi malam beliau hanya sempat makan konro bakar, katanya ikan kudu2 sdh di coba di hotel (tolong OM jangan dibocorkan saya orang sini tdk tahu yang namanya ikan kudu2 mungkin sdh sering saya makan tapi nama makassar atau bugisnya lain hihihi)

OM Yani,
Trafonya gak usah deh, saya baru dapat kiriman beberapa trafo & mata bor 0,8mm dan 1mm dari surabaya.

Sempat ketemu OM Syarief gak di makassar, beliau sudah coba ikan kudu2 yg saya rekomendasikan untuk dicoba.

tnx
hen

Alamat masih seperti di QRZ.com.
Kalau bisa lebih bagus apalagi sudah disiapkan jalur dan lubangnya di PCB khan tinggal pasang saja.
Cuma yg saya masih agak ragu adalah posisi lubang trafonya, apakah pas atau perlu sedikit modifikasi. Karena kawat kaki trafo yg saya miliki gak terlalu panjang. HI.

Semoga pas, tapi kalo harus bor lagi rasanya juga gak majalah koq ya.

Tnx

Om Joni,
Baik om kabarnya, cuma bisa Mode Data aja yang bisa pakai power kecil.
Kalau SSB gak kuat PSUnya.

Kalao pakai band tersebut masih berat buat saya, sbb 40/80 belum ada
antennanya.

7165. RDF or DOPPLER DIRECTION FINDER KITS PROJECT by YB6AR

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-05-02 07:57:29 UTC
From: budi santoso
Topic: 7165 Message: 7165

http://www.yf1ar.com/2013/05/rdf-or-doppler-direction-finder-kits.html

RDF or DOPPLER DIRECTION FINDER KITS PROJECT by YB6AR

This is a new project DDF Doppler Direction Finder
in other words, RDF Radio Direction Finder
Previously this project doppler already been done, by
making 30 units by the PCB YC6BRS very large and requires a large box anyway.
Now I make more doppler work perfectly with a more accurate designation
of the box measuring 14 x 9 cm and thick 3.5 to
5 cm with material size aluminum plate 2mm.
This new product design will be on the raft 100 units by YB6AR
These tools work the same way as is done by other Amateur Radio, we only develop the
existing circuit system.
Basically it came from a string of WA2EBY and was
developed by RAMSEY order in many products.
Many of the amateur radio world also make a similar thing with his hobby and make
himself happy with the hunt signal because the signal (RF) can not be seen with the
naked eye especially smell, the tool that helped us in the hunt signal.
Do not be afraid to assemble this circuit because it uses low voltage 12vdc, of course
you do not get electrocuted.
One hundred percent safe.

BUET GET Electronica manufactures kits and finished products.
BUET GET ELECTRONIC helping a friend to hunt as a good signal, and can be installed in
cars as well as base station.
Can be used VHF, UHF frequencies from 70MHz - 800 MHz depending on antenna

The workings of the circuit as in the diagram blog.

For a more detailed explanation can be downloaded DDF1 RAMSEY Product ...or YOUTUBE

MAIN BOARD PCB DOPPLER

Om Hendro Sore

Jangan pesimis om
Hunting Hunting hunting
I believe Your Dream will come true,

Saya sampai hari ini baru beruntung punya 1 QSO dengan Zone 2.
Call sign nya VE8PW dari Northwest Territories
Hasil QSO tahun 1997,,(lumayan ya,,sudah 16 tahun yg lalu)

Tadi malam (waktu NJ) ,
om Steve W2FB ajak klem 5B WAZ tp yg basic (minimal 150 zones aja) dan nanti akan dapat 5 Band Zone Certificate.
Jika kita endor terus sampai genap 200 Zone baru dapat 5 Band Plakat,,
Katanya WW baru +/- 800 AR yg klem 5 Band Zone
YB land kayaknya hanya YB0WR dan YB5QZ. (Siapa lagi ya, mungkin Hendro tahu).

Om Hendro

Saya juga baru tahu hari ini
Lewat W2FB.
Tp emang sih kalo belum 200 zone dengan 5 band belum ƀišª klem pakatnya...

Nah ini baru jadi mimpi benar om Hendro..
Zone 2 , Zone 40 dan semua Zone SA + AF susah banget di 80m pasti..

OM Joni,
WAZ buat saya masih impian karena Zone 2 dan Zone 12 blom punya.
Yang gampang cuma 1 Zone saja yang di Sorong = Zoni alias Joni - baik sekali operatornya cepat kirim QSL cardnya. HI

Iya, waktu saya kebetulan berkunjung ke Jalan Garuda - QTHnya OM Ucok-YB0WR saya lihat beliau punya antena Yagi 80M full size - gak dibonsai dan harus indent belinya dulu.

Dikasih lihat juga foto2 waktu pemasangan antena itu, orang yg masang berjalan di atas boom nya, lihatnya aja udah ngilu & merinding - apalagi kalo dikasih tahu harganya.

Om Hendro

Saya juga baru tahu hari ini
Lewat W2FB.
Tp emang sih kalo belum 200 zone dengan 5 band belum ƒiš^a klem pakatnya...

Nah ini baru jadi mimpi benar om Hendro..
Zone 2 , Zone 40 dan semua Zone SA + AF susah banget di 80m pasti..

Selamat sore/malam OM Joni,

Gak pesimis koq - saya tetap berusaha walaupun masih tetap sulit untuk memperolehnya ...> mendengar, memanggil, worked, confirmed. HI

Wah untuk 5B WAZ saya kira masing2 band itu harus komplit semua zones dimiliki.

Om Hendro Sore

Jangan pesimis om
Hunting Hunting hunting
I believe Your Dream will come true,

Saya sampai hari ini baru beruntung punya 1 QSO dengan Zone 2.
Call sign nya VE8PW dari Northwest Territories
Hasil QSO tahun 1997,,(lumayan ya,,sudah 16 tahun yg lalu)

Tadi malam (waktu NJ) ,
om Steve W2FB ajak klem 5B WAZ tp yg basic (minimal 150 zones aja) dan nanti akan dapat 5 Band Zone Certificate.
Jika kita endor terus sampai genap 200 Zone baru dapat 5 Band Plakat,,
Katanya WW baru +/- 800 AR yg klem 5 Band Zone
YB land kayaknya hanya YB0WR dan YB5QZ. (Siapa lagi ya, mungkin Hendro tahu).

http://www.yf1ar.com/2013/05/spider-beam-antenna-homemade-for-dx.html

SPIDER BEAM Antenna homemade for DX-Pedition by YB6AR
BASIC

Antenna spider beam is basically yagi antenna.
This is not a log periodic antenna, differing only slightly in the
reflector and director, while the driver is almost like the same.
By bending the reflector and director elements are also in each band
To make the spider beam antenna on 20m, 15m, 10m then just need an arm length of
5 meters is enough.To make the 40m band then takes at least 10m arms
In one cable feed line we've been able
to play in many bands.Usually from 5 bands, 3 bands even mono band
Basically this antenna in a square shape with equal sides and we only need
4 length sleeves are the same size anyway.
Suitable for expeditions to the islands even portable for traveling and easy for the raft.

BASIC MATERIAL

Here we only make the material available, we happen to have fishing
rods measuring 7m, 8m even 10m long, actually there are some material that is discarded
or unused but out of the rest of the term can also be used for the 10m band,
antenna yagi even kind of Ground Plan.
Total length when packed only 2 meters long all the material in the pipe size of 4
inches unless mounting breaket

Examples of material

Basically this material is very good quality, with tubing size 1 1/2 "at the base of the
arm and the arm tip size 3/4", it can both support
the cable already wired antenna elements.

ASSEMBLE

How to tie a very simple cable element, where we use
a coaxial cable wrapping leather 1 "plastic air and teflon very well against the
weather.We cut up the skin coaxial cable 1 "in order to clamp the cable from the
antenna elements on each band or maybe the other way
We give you a glimpse into consideration the basic

Picture of how binding the knot stack on each element of the antenna band.
We added a little swivel in order to maintain order
not tangled wires during installation and also when the wind hit.
http://www.youtube.com/watch?v=VwLBUHufs7I

Binder pole and antenna support arm sleeves
Pole and sleeve arm binder buffer using the antenna in the

split pipe and welded die stacking and are not afraid to blow in the wind.You can do your own installation of a total of at least 10-15 kg with both hands you can do the founding of the antenna.

http://www.youtube.com/watch?v=VlFwF4n9jvA My spiderbeam under wind storm http://www.youtube.com/watch?v=XTlBzpP6A_M

You cheer when the antenna is assembled as you wish and you can even dance in the air DX

The beauty of your spider beam and ready to dance in the air with DX’ers

When all are assembled and then we just wrap the antenna stayed where the expedition set out for the place where the default is not too heavy.

By crossing islands for QRV with DX Aceh Group

http://www.youtube.com/watch?v=xEFEx7IsqUs
Bunta Island On The Air Fun DX-Pedition Feb 15 17.avi

we are making things so smooth communication

Thank hopefully writing can be beneficial to your friends and your friends like Expeditionary hobby DX'er
Hope see you again in the air

If you want to get the material can be ordered through Such material spiderbeam arms, V di pole and Vertical from 10m to 160m antenna hexlical, We help design

Now we've got a lighter antenna and do not need a tow truck to install the antenna ...

Contact.
Call 0821 648 55 669 or via email. tower_siregar@... YB6AR Rohadi Siregar

Pagi Ko Seno,

Emang agak lemah signalnya,,
Terus ada QRM stn yg kerja dekat freqNya..
Saya coba panggil , ee 1x aja dia dgr panggilan saya ko Seno.
Sayang bukan new band buat saya,,

OM Joni,
Sayang ya, padahal yang kepingin dapat banyak tuh - termasuk saya.
Kira2 nanti QRV di 10M/15M SSB gak ya ?

OM Joni,
Sayang ya, padahal yang kepingin dapat banyak tuh - termasuk saya.
Kira2 nanti QRV di 10M/15M SSB gak ya ?

Pagi Ko Seno,

Emang agak lemah signalnya,,
Terus ada QRM stn yg kerja dekat freqNya..

Saya coba panggil , ee 1x aja dia dgr panggilan saya ko Seno.
Sayang bukan new band buat saya,,

7194. YD9RQX dan YD9NXP di 14.238.50

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-05-05 12:53:37 UTC
From: w7nz
Topic: 7194 Message: 7194

Barusan di Southern Cross DX Net di 14.238.50 saya mendengar 2 stations dari daerah 9, YD9RQX (Pak Lucky) dan YD9NXP (Pak Wiro?).
Lalu saya masuk ikutan DX net nya setelah yakin net control memanggil mereka sebagai Yankee Delta.

Saya lalau contact net control nya langsung, dan memberi tahu kalo prefix YD tidak berlaku di freq. 14.238.50, they're out of the band saya bilang.

Setelah itu mereka tidak di sebut2 lagi dan ke 2 stations dari daerah 9 tsb, tidak muncul lagi.

Nah, kalo ada yg merasa kenal kepada ke 2 bapak tsb, apa bisa di confirm mereka masih YD or sudah YB? SOalnya ini bukan yg pertama kali saya lihat spotting mereka di cluster, cmiiw.

73,

Iwan

Kalau benar mereka msh yankee delta dan di diamkan saja Lama kelamaan YD lain main di sini nih .. Sama spt frek 7.025 mhz sampai 7.035 mhz di pakai qso mode ssb...
Parah ...

Nanti trus merembet lagi ke WARC band...

Hahahhahahahahaha...

Betul Bang,

Tapi siapa yang mesti di salahkan....dan
Siapa pula yang harus Menindak sekali Gus menghukum Mereka...?
Karena selama ini banyak sekali sesama kita yang melakukan Hal-hal yang salah.
Tak ada Pembinaan.....
Tak ada Teguran.....
Dan Tak ada Tindakan...!
Bahkan kita tidak tau ELEGI ESOK HARI.

Kalau benar mereka msh yankee delta dan di diamkan saja Lama kelamaan YD lain main di sini nih .. Sama spt frek 7.025 mhz sampai 7.035 mhz di pakai qso mode ssb...
Parah ...

Nanti trus merembet lagi ke WARC band...

Hahahhahahahahaha...

Subject: [YBDXC_News] YD9RQX dan YD9NXP di 14.238.50

Barusan di Southern Cross DX Net di 14.238.50 saya mendengar 2 stations dari daerah 9, YD9RQX (Pak Lucky) dan YD9NXP (Pak Wiro?).
Lalu saya masuk ikutan DX net nya setelah yakin net control memanggil mereka sebagai Yankee Delta.

Saya lalau contact net control nya langsung, dan memberi tahu kalo prefix YD tidak berlaku di freq. 14.238.50, they're out of the band saya bilang.

Setelah itu mereka tidak di sebut2 lagi dan ke 2 stations dari daerah 9 tsb, tidak muncul lagi.

Nah, kalo ada yg merasa kenal kepada ke 2 bapak tsb, apa bisa di confirm mereka masih YD or sudah YB? SOalnya ini bukan yg pertama kali saya lihat spotting mereka di cluster, cmiiw.

73,

Iwan

7207. Re: Bls: Bls: [YBDXC_News] YD9RQX dan YD9NXP di 14.238.50

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-05-05 14:45:20 UTC
From: Tarunodjojo
Topic: 7194 Message: 7207

Hello Rekan2 DXers,

Dah ga usah pusing2.. Klo orong2 di 40M memang susah di "usir" ;(.. Klo call signers yang rookie atau yg baru dapat call sign (YD) "nyasar" paling kita memberitahukan saja atau memberikan "warning".. Mungkin mereka saat bergabung di ORARI tidak sempet atau lupa mempelajari Band Plan. Saya pernah ketemu satu Rekan YD0 di Mirusa Jakarta yg sedang membeli aksesoris radio dan rupanya beliau ini sangat entusias dengan DXing. Wah seneng sekali menemui rekan muda yg lebih suka main radio daripada nge FB, nge tweeet atau Skype atau cuma chatting pula..Lalu saya tanya beliau sering buka warung dimana saja? Dia dengan PD menjawab 15M !! Saya tanya apa beliau seneng main di CW atau digital n sekali lagi dia menjawab dengan PD, wah males kalo CW atau Digital, mainya di Phone saja ?!?! Sy cuma memberikan pengarahan bahwa sesuai Band Plan sebagai YD tidak diperkenankan di Phone di 15m dan akibatnya QSL card yg didapatkan tidak boleh dipakai tuk peningkatakan ke YC. Arti kata bahwa dia bukan saja melanggar peraturan pemerintah, tapi selama ini usaha beliau tuk mendapatkan QSL card dari negara asing cuma a "Big Waste of Time n money"..Dia cuma menjawab "O Ya Mas ???!! Terima kasih yaa atas info nya".. Tuh kan, di YB Land mendapat IAR seperti mendapat SIM.. Hehehe, yaitu kadang a licensed amateur radio operator di YB Land cuma bisa operate tapi tidak belajar theory nya.. Tapi tetap Lulus !! Banyak kali saya mau menyebrang di Penyebrang Zebra (zebra crossing) hampir ditabrak sama mobil atau motor. Bahkan saya dimaki-maki oleh mereka sepertinya saya yg melanggar peraturan Lalin. Apalagi kalao kita bicarakan masalah Hukum Lalin dan pengemudi motor di Jakarta, berjam-jam juga ga selesai !! hehehe..

Lebih baik kita kejarin FOC75 (First Class CW Operators' Club) sepanjang bulan Mei dan mendapatkan sertipikat menarik dari mereka.. :)

Salam,
JOY/YB0NSI.

iPhone is Cool !

Hello Rekan2 DXers,

Dah ga usah pusing2.. Klo orong2 di 40M memang susah di "usir" ;(.. Klo call signers yang rookie atau yg baru dapat call sign (YD) "nyasar" paling kita memberitahukan saja atau memberikan "warning".. Mungkin mereka saat bergabung di ORARI tidak sempet atau lupa mempelajari Band Plan. Saya pernah ketemu satu Rekan YD0 di Mirusa Jakarta yg sedang membeli aksesoris radio dan rupanya beliau ini sangat entusias dengan DXing. Wah seneng sekali menemui rekan muda yg lebih suka main radio daripada nge FB, nge tweeet atau Skype atau cuma chatting pula..Lalu saya tanya beliau sering buka warung dimana saja? Dia dengan PD menjawab 15M !! Saya tanya apa beliau seneng main di CW atau digital n sekali lagi dia menjawab dengan PD, wah males kalo CW atau Digital, mainya di Phone saja ?!?! Sy cuma memberikan pengarahan bahwa sesuai Band Plan sebagai YD tidak diperkenankan di Phone di 15m dan akibatnya QSL card yg didapatkan tidak boleh dipakai tuk peningkatakan ke YC. Arti kata bahwa dia bukan saja melanggar peraturan pemerintah, tapi selama ini usaha beliau tuk mendapatkan QSL card dari negara asing cuma a "Big Waste of Time n money"..Dia cuma menjawab "O Ya Mas ???!! Terima kasih yaa atas info nya".. Tuh kan, di YB Land mendapat IAR seperti mendapat SIM.. Hehehe, yaitu kadang a licensed amateur radio operator di YB Land cuma bisa operate tapi tidak belajar theory nya.. Tapi tetap Lulus !! Banyak kali saya mau menyebrang di Penyebrang Zebra (zebra crossing) hampir ditabrak sama mobil atau motor. Bahkan saya dimaki-maki oleh mereka sepertinya saya yg melanggar peraturan Lalin. Apalagi kalao kita bicarakan masalah Hukum Lalin dan pengemudi motor di Jakarta, berjam-jam juga ga selesai !! hehehe..

Lebih baik kita kejarin FOC75 (First Class CW Operators' Club) sepanjang bulan Mei dan mendapatkan sertipikat menarik dari mereka.. :)

Salam,
JOY/YB0NSI.

iPhone is Cool !

Kwkwkwk , ini akibat waktu ikut ujian atau masuk Amateur Radio, buku pedoman tidak di baca, dan boleh jadi ujiannya pakai JOKY...atau diwakili sama tetangga.
Yah...hitung hitung antara Kwalitas dan Kwantitas lah... si Amateur Radio...
Kalau di pilih Kwalitas tak ada luit...tapi ilmu segudang....Kalau di pilih Kwantitas bisa beli radio FT9000dx dan antenna tapi begitu radionya On langsung dibabat DX...apalagi ada suara dari planet Mars...tanpa mempelajari slot band Perizinan, ...
Alhasil yah begini...harap maklum...
Tinggal pilih Amateur Radio yang Berkwalitas atau Berkwantitas...kwkwkwkwk
Do re mie fa so la si doooo...

Ya tadi juga sebelum join ke DX net nya saya monitor kira2 15 menitan, sampe saya sure kalo NCS nya panggil mereka Yankee Delta, berkali2 ... kaya nya saya juga pernah lihat callsign mereka di spot di dx cluster sebelum nya, bulan lalu kalo ngga salah?

Saya inform NCS nya langsung dan sesudah itu ngga pernah di panggil lagi mereka, NCS nya tanya sama saya, apa saya mau join net nya? Saya bilang OK, saya stand by dan ngga berapa lama saya di panggil sama KD0ACR dari South Dakota, nah sapa yg butuh tuh, besok join net nya aja hehehehe

Sayang nya saya lupa rekam mereka :P

Ini info ttg net nya:
Southern Cross DX Net
14.238.5 MHz
Begins at 1215 Zulu and runs to 1400 Zulu, propagation
permitting.

Targets VK's, ZL's, and island stations.

Often picks up ZS's long path over Australia.

Connects in Europeans when they show up and want to join, which is frequently. Also
Caribbean and South
American stations.

Jack W1FDY is stateside net control and Chic VK6ZAI is
Australian net control.

73,

Iwan

7213. Kisah Hubungan Indonesia-Belanda Melalui Radio

Kisah Hubungan Indonesia-Belanda Melalui Radio

BANDUNG, KOMPAS.com - Hubungan Indonesia-Belanda melalui komunikasi radio yang diawali pada peresmian Radio Malabar tanggal 5 Mei 1923 diulangi kembali 90 tahun kemudian, Minggu (5/5/2013).
Dengan keterbatasan peralatan maupun dibayangi masalah teknis, dua tempat yang berjarak 12.000 kilometer berhasil terhubung.
Kontak dilakukan menggunakan kode morse, seperti dilakukan Gubernur Jenderal Hindia Belanda, Dirk Fock, kepada Ratu Wilhelmina di Stasiun Kootwijk 90 tahun lalu. Pesan disampaikan pukul 19.00 atau pukul 14.00 di Belanda.
Stasiun Kootwijk awalnya mengirim pesan "Hallo Bandung" sebanyak tiga kali dan dibalas kode 599 yang berarti pesan diterima dengan jelas.
Posko di Gunung Puntang mengirimkan ulang pesan Fock yakni mengabarkan bahwa hubungan telefaks Indonesia-Belanda bebas dari intervensi negara lain.
Begitu pesan tersebut juga dibalas kode 599, anggota tim di Gunung Puntang serempak berteriak girang dan saling menyalami.
Balasan kembali diterima dari Stasiun Kootwijk berupa ucapan semoga sukses.
Manajer Proyek 90 Tahun Radio Malabar, Tomi Prakoso, menjelaskan bahwa inisiatif tersebut dilakukan untuk memperingati hubungan dua negara.
Awalnya, mereka berniat menggelar peringatan dengan lebih besar melalui berbagai kegiatan.
"Karena keterbatasan dana, kami memilih fokus ke kegiatan utama," kata Tomi.
QSL Manager, Agus Gunarso, menjelaskan bahwa mereka menyiapkan enam frekuensi untuk mendapatkan komunikasi paling jelas dengan Belanda. Hubungan didapatkan pada frekuensi 21.009 megahertz.
Kendala teknis juga sempat dialami yakni masalah pada daya listrik sehingga hanya bisa menggunakan 100 watt dari sebelumnya 400 watt.
"Tak disangka, justru disanalah keunggulan kita karena bisa menggelar komunikasi dengan jernih," kata Agus
.

Join Sothern Cross DX Net..??
Gak ah, OM Iwan - saya gak mau karna gak boleh juga sih...!
Saya cuma boleh di batas pagar 14.150MHz. HI HI

Hayo... yang ngebet sama South Dakota, North Dakota silahkan join - tempat yg dinginnya ekstrem, AR-nya yg tinggal disana cuma yg "gila" menurut temannya OM Seno-YB2LSR.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).
2013 AFD
In celebration of the 63rd anniversary of Armed Forces Day (AFD), the Army, Air Force, Navy, Marine Corps and Coast Guard are co-sponsoring the annual Military/Amateur Radio Crossband Communications Test. Although Armed Forces Day is traditionally celebrated on the third Saturday in May -- May 18th -- the AFD Military/Amateur Crossband Communications Test will be conducted on May 11th to prevent conflict with the Dayton Hamvention, scheduled for May 17-19th.
The annual celebration features traditional military-to-amateur crossband communications SSB voice and Morse code tests. These tests give Amateur Radio operators and short wave listeners an opportunity to demonstrate their individual technical skills and to receive recognition from the appropriate military radio station for their proven expertise. QSL cards will be provided to stations making contact with the military stations.

Military-to-amateur crossband operations will take place on the dates and time in UTC on the frequencies listed for the Army, Air Force and Navy/Marine Corps and Coast Guard MARS stations. Voice contacts will include operations in single sideband voice (SSB); some stations will use CW to provide the opportunity to check in by Morse code.
Depending on propagation and staffing, some stations may not operate the entire period. Participating military stations will transmit on selected military MARS frequencies and listen for Amateur Radio stations in the amateur bands. The military station operator will announce the specific amateur band frequency being monitored. Duration of each voice contact should be limited to 1-2 minutes. The annual Secretary of Defense message will be transmitted via digital modes, including RTTY, PACTOR, AMTOR, PSK-31, MFSK and MT63 from certain stations. Check the MARS Armed Forces Crossband Test website for schedules and frequencies of participating military stations, including a list of stations that will be transmitting the annual Secretary of Defense message at:
http://www.usarmymars.org/home/announcements
Instructions on how to copy and submit the message are also included.
3D2, FIJI
Laci, HA0NAR, will be active as 3D2AR from Viti Levu Island (OC-016, WLOTA 0055), in the Fiji Island group, sometime in October. Activity will probably be on all HF bands, 160-10 meters using CW, SSB and RTTY. QSL via his home callsign. For updates, watch:

YE30, INDONESIA (Special Event)
Members of the Organisasi Amateur Radio Indonesia (ORARI) will be active as YE30P from Merauke between 0000z, May 15th and 2400z, May 17th. Activity is to celebrate the 30th Anniver- sary and Provincial Congress of "ORARI Daerah Papua". Operations will be on all modes (CW/SSB/RTTY) by 2 stations on at the same time. QSL Manager is YB9WR. All qsl card should be addressed ONLY to: PO BOX 1096, Jakarta 10010 Indonesia (see details on QRZ.com). For more details, see their Web page at:
http://ye30p.wordpress.com
YB8/YE8, INDONESIA (IOTA Op)
Operators John/YB5NOF, Anton/YB5QZ Anton and possibly two others will activate two IOTA islands in Indonesia. The tentative days, callsigns and IOTAs are as follows:
May 16-19th - Callsign YE8P; Banggai Island (OC-208), located at the far eastern end of Central Sulawesi, Indonesia.
>May 22-26th - Callsign YB8P; Togian Island (OC-213), in the Gulf of Tomini, off the coast of Central Sulawesi, Indonesia.
Watch the IOTA frequencies. QSL Manager will be announced soon.

Join Sothern Cross DX Net..??
Gak ah, OM Iwan - saya gak mau karna gak boleh juga sih...!
Saya cuma boleh di batas pagar 14.150MHz. HI HI

Hayo... yang ngebet sama South Dakota, North Dakota silahkan join - tempat yg dinginnya ekstrem, AR-nya yg tinggal disana cuma yg "gila" menurut temannya OM Seno-YB2LSR.

Judul: [YBDXC_News] Re: YD9RQX dan YD9NXP di 14.238.50

Ya tadi juga sebelum join ke DX net nya saya monitor kira2 15 menitan, sampe saya sure kalo NCS nya panggil mereka Yankee Delta, berkali2 ... kaya nya saya juga pernah lihat callsign mereka di spot di dx cluster sebelum nya, bulan lalu kalo ngga salah?

Saya inform NCS nya langsung dan sesudah itu ngga pernah di panggil lagi mereka, NCS nya tanya sama saya, apa saya mau join net nya? Saya bilang OK, saya stand by dan ngga berapa lama saya di panggil sama KD0ACR dari South Dakota, nah sapa yg butuh tuh, besok join net nya aja hehehehe

Sayang nya saya lupa rekam mereka :P

Ini info ttg net nya:
Southern Cross DX Net
14.238.5 MHz
Begins at 1215 Zulu and runs to 1400 Zulu, propagation
permitting.

Targets VK's, ZL's, and island stations.

Often picks up ZS's long path over Australia.

Connects in Europeans when they show up and want to join, which is frequently. Also Caribbean and South
American stations.

Jack W1FDY is stateside net control and Chic VK6ZAI is
Australian net control.

73,

Iwan

Kuat sekali saya terimanya 10dB over S9 - gak pengaruh dg hujan yg lagi turun deras. Saya ngotot panggil karna signalnya kuat, ingat2 lupa utk San Marino di 15M dulu sudah dapat T77T dan kemarin ini saya kira juga baru dapat cuma 15M lagi - ternyata 10M juga sudah worked - jadi malu deh dia bilang sdh QSO sebelumnya - saya sih jawabnya sudah di 15M. HI HI.

http://www.foldingantennas.com

Welcome at foldingantennas.com
Makers of the unique collapsible HF multiband beam antenna.
The story... Every ambitious ham has experienced this:
When operating portable, on holiday or from a weekend qth, on a fieldday or DXpedition, simple wire antennas are always a compromise. You get lost in the pileup or QRM, and you can't blank out interference. Especially when running low power or participating a contest, a beam antenna is always helpful.

Over the years many light weight wire beams have been developed for this purpose, with spreaders made from fiberglass. Performance wise these antennas are on par with conventional beams. In the U.S., UK, Australia, NZ etc. the "Hexbeam" has gained great success, and later Steve Hunt G3TXQ did further research and came up with the optimized "broadband" design. Many broadband hexbeams have been home made and sold by professional builders since. The small turn radius, the simple "wire only" multiband concept, the low weight, wind load and visibility profile has convinced a vast amount of hams, I also use a homemade 5 band broadband hex at my QTH. Further information:

G3TXQ broadband hex website: http://www.karinya.net/g3txq/hexbeam/broadband/

Selamat pagi juga OM Joni,
Iya malam itu saya masuk setelah OM Uun/YB1UUN yg bikin T77LA ketawa karna bingung gimana cara baca yg benar utk namanya OM Uun. Dan setelah saya memang saya sempat dengar OM Iwan YE1NZ.
Saya sempat tetap coba masuk waktu dia persilahkan YB, tapi setelah sayup saya juga dengar memang ada prefix YB yg mau masuk, saya tunggu dulu - setelah itu baru deh YC0QR lalu YE1NZ yg bukan YB. HI HI HI

Gaya DXer itu macam2 ya - kadang bikin gemas juga seperti T77LA ini yang dg gaya santainya QSO sementara yg antri nunggu giliran cukup banyak. Apalagi dia bekerja simplex dan EU yg bandel tetap masuk walaupun sementara "direm" utk EU station.
Malahan beberapa JA station sepertinya QRO, bikin Angy-T77LA terkekeh2 karena signal yg diterima sampe 30-40dB.

Beberapa hari yll, lupa saya QSO dg VU7KV atau VK9NT yg gayanya seperti kejar tayang. Sepertinya saya blm lepas tombol PTT, dia sudah pencet PTT dan bicara. Saya sempat menyangka kita on air berbarengan dan tabrakan di udara, tapi ternyata tidak.

7229. PULAU EDAM : 'kolaborasi' rekreasi dan edukasi

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-05-08 05:17:30 UTC
From: Yb land Dx club
Topic: 7229 Message: 7229

http://www.facebook.com/groups/397361513680020/permalink/459217930827711/

Jeffrey Lou
PULAU EDAM : 'kolaborasi' rekreasi dan edukasi
Rekreasi dan edukasi,inilah kesan yang akan kita dapatkan bila berkunjung wisata ke Pulau Edam atau dikenal juga dengan Pulau Damar Besar,yang meliliki luas +/- 36 Ha.Pulau yang menyimpan banyak sejarah dan masih menyisakan peninggalan yang patut kita ketahui,terutama untuk bahan pengetahuan.Ada beberapa peninggalan kolonial Belanda yang ada di pulau ini,baik yang masih utuh berdiri atau yang sudah rusak,antara lain dibagian timur adalah bekas benteng yang menyerupai bunker dan mercu/menara suar yang masih berdiri kokoh.

Menara Suar
Inilah salah satu obyek wisata edukasi yang sangat menarik,selain karena sampai saat ini masih kokoh berdiri,dari atas menara suar ini kita dapat melihat keindahan bahari di sekitar Teluk Jakarta.Tertulis di papan nama yang ada 2 jenis,yang satu tertulis Menara Suar Edam DSI 1720,Departemen Perhubungan Direktorat Jenderal Perhubungan Laut Distrik Navigasi Klas I Tanjung Priok,yang satu lagi tertulis secara rinci dekat menara suar,yaitu Menara Suar Damar Besar DSI 1720,posisi : 05-57-30 S / 106-50-30 T,periode FL (4) 20 Sec,Warna Putih,tinggi menara 52 meter,elevasi 56 meter,jarak tampak 20 mil laut,dibangun tahun 1879 oleh Raja Willem III dari Kerajaan Belanda.Jadi,Menara Suar Edam sama atau nama lainnya Menara Suar Damar Besar.

Galeri Jepret (foto-foto lengkap) : Menara Suar Pulau Edam
Memasuki menara suar ini untuk mengetahui lebih dekat,dapat kita lihat dari lantai 1 sampai lantai 16,dari anak tangga yang berjumlah 272 buah,dinding menara,bangunan/ruangan di tengah yang berbentuk tabung, dan lantai, semuanya dibuat dari plat baja,dengan pengikat baut-baut yang besar.Memiliki tiga buah pintu : di lantai satu,terdapat pintu utama dan pintu tengah di ruangan berbentuk tabung,dan satu lagi di lantai 16 untuk keluar ke teras,dekat lampu suar.Memliki 30 buah jendela luar terbuat dari besi menggunakan kaca,yang sebagian kaca-kaca sudah banyak yang pecah,jadi yang berjendela hanya lantai 2 sampai 16,dengan masing-masing 2 buah setiap lantai.
Ruangan berbentuk tabung,yang berada ditengah menara suar,menghubungkan lantai satu sampai 16,tidak jelas fungsinya untuk apa,namun menurut kami sebagai pembantu penyangga menara agar lebih kokoh,dan disini kami melihat ada 2 buah kabel besar yang terikat kawat baja (seling) sebagai penyalur aliran listrik dari genset yang ada diluar menara suar ini,sampai lantai 16.Di atas lantai 16,terdapat ruangan lampu suar dengan dinding kaca berangka besi dan disinilah peralatan suar,yang antara lain lampu suar berdaya 1.000 watt,dengan motor yang berputar,sehingga bila pada malam hari, terlihat lampu akan berputar dan berkelap-kelip.

Lingkungan Sekitarnya
Terdapat beberapa bangunan,yang antara lain untuk tempat tinggal penjaga menara suar,bangunan untuk genset,dan beberapa bangunan yang kosong,terkesan tidak terurus lagi.Dapat kita temukan banyak aneka jenis pohon-pohon,yang antara lain pohon damar sebagai 'icon' pulau ini,sehingga disebut Pulau Damar. Pantai dengan pasir putih,bersih serta air yang jernih,dapat kita lihat di dekat dermaga,dengan beberapa buah perahu kayu

milik nelayan yang tertambat di pinggir dermaga atau dipinggir-pinggir pulau ini.Kita dapat menikmati keindahan alam bahari disekitar pulau dari pantai,memandangi gugusan pulau yang lainnya, serta keindahan birunya laut yang bersih.

Galeri Jepret (foto-foto lengkap) : Pulau Edam : dermaga dan area sekitarnya
Panorama dari atas Menara Suar
Inilah sensasi yang patut Anda coba bila berkunjung ke Pulau Damar,menaiki tangga dengan 16 lantai dengan ketinggian menara suar 52 meter,keluar menuju teras berpagar besi,terasa cukup melelahkan dan bikin jantung cukup berdebar-debar,tetapi sampai di puncak melihat panorama bahari di sekitar pulau ini dan Teluk Jakarta,yang sangat indah,pastinya pengorbanan untuk mencapai puncak ini tidak akan sia-sia.Sungguh menakjubkan,dan sangat mengesankan melihat keindahan alam bahari dari puncak menara suar ,satu pengalaman yang menyenangkan dan pastinya tak akan terlupakan.Pastikan hal ini tidak terlewatkan oleh Anda bila berkunjung ke pulau ini,usahakan naik ke atas dan abadikan keindahannya dengan kamera Anda.

MRP40 Morse Code Decoder & Sender

Deutsch Japan

MRP40 is a powerful and highly-effective ham radio software program that decodes received CW audio that has been fed to a computer’s sound card. The decoded text is displayed on the computer’s monitor. For transmitting CW, the program encodes keystrokes from the computer’s keyboard. Hams use MRP40 to send and read QRQ (high-speed) CW, to help read weak DX signals, and to improve CW contest scores.
... With MRP40 you are number one on the air! ...

Subject: Valid FAKE qso

Halo temans !

Ada pengalaman lucu nih...
2 hari yang lalu ketika check eQSL, ada permohonan konfirmasi QSO dari
VK6*** di 160m band.
Setelah saya check, ternyata tidak ada di log, alias FAKE !
Lha iya laaaaah. Mana mungkin saya QSO di 160m? Antena saja
nggak punya !!!

Iseng-iseng saya confirmed saja request tsb.
Tadi pagi, data fake QSO tsb iseng (iseng yang ke-2) saya upload datanya ke
LoTW.
Dan ternyataaaaaa CONFIRMED juga !!!

Waaaaah, jadi nambah 1 deh DXCC saya di 160m. Hahaha....
Cara QSL yang canggih ini makin lama makin mantab ya
!?
Kalah tuh OVJ.

Anak-anak, jangan meniru adegan ini di rumah ya. Berbahaya.

Adhi YB3MM
yb3mm@...

P/S: Data QSO di eQSL bisa dihapus, tapi bagaimana menghapus data QSO di
LoTW ?

Fixing Your Log

Data is never removed or deleted from LoTW.

If you made a mistake with a QSO such as wrong band or mode, etc simply fix the QSO in your log. Export and sign the corrected log file and upload to LoTW. (Use the date range option when signing so you do not upload the entire log again.)

Logbook of The World is a QSO matching service where users upload QSO data and the system compare the data with QSO data uploaded by all LoTW users to find matches. These matches (QSLs) can be used as credit toward awards. Because LoTW is only concerned with matched data extra or erroneous QSOs are not an issue.
You must make a station location in TQSL

7233. LoTW - Logbook of The World

Yahoo group: YBDXC_News (2013-05 — 2013-12)

http://www.xmlog.com/help/LOTW.htm

LoTW - Logbook of The World
The ARRL's Logbook of the World is a system that allows stations to verify QSOs online without having to send QSL cards. For more information check the ARRL home page at www.arrl.org
LoTW Log Fields
There are two LoTW fields displayed as part of the "QSO/QSL Info" for each log record: LoTW Sent and LoTW Rcvd.
* LoTW Sent - This date field is used to record when LoTW info for the entry was submitted to the ARRL. This date can be set manually or can optionally be set when using the Import/Export ADIF File menu item (see below).
* LoTW Rcvd: This date field is used to record when LoTW info for the entry was credited by the ARRL. This date can be set manually and is also set when using the Import/Apply LoTW Data to Log menu item (see below).
The LoTW Sent Field
So, how should the LoTW Sent field be used? Since setting this field does not affect any DXCC or WAS reports it isn't really necessary that you set it - it is only useful if you want to track your LoTW submissions to the ARRL.
Typically the first step in making an LoTW submission to the ARRL is to select a subset of your log and then create an ADIF file using the Import/Export ADIF File menu item. The resulting ADIF file is then submitted to the ARRL. When you create this ADIF file you can choose the Set LoTW Sent Field to Current Date option or the Set eQSL Sent Field to Current Date option. Setting these options will update the LoTW Sent (or eQSL Sent) field for all log entries that were included in the ADIF file.
The LoTW Rcvd Field
The LoTW Rcvd field can be set manually but is normally set by the Import/Apply LoTW Data to Log menu item.
For each LoTW record applied to your log the LoTW Rcvd field will be set to the value from the LoTW record. If the LoTW record does not contain a QSL Sent date the LoTW Rcvd field will be set to the current date.
Step 1: Downloading LoTW Data
The ARRL provides a web page that allows you to select records from the LoTW database and download them to your PC as an ADIF file. You can use this feature to retrieve your LoTW data or you can use the XMLog Import/Download and Validate LoTW Data menu item. To use this menu item you must enter your LoTW user ID and password. When you use XMLog to download LoTW data you can optionally provide a "posted since" date which restricts the downloaded entries to those that have been added to the ARRL LoTW database since the specified date - this feature allows you limit the retrieved records to those added since your previous download.
By default the downloaded ADIF files are saved in a folder named LoTW which is created in your XMLog install folder. Typical files created by XMLog would be:
* All-2007-12-21.adi - The file name will start with "All" if you downloaded with no "posted since" date specified. The date in the file name is the date the request was made.
* Since-2007-10-31.adi - The file name will start with "Since" if you provided a "posted

since" date. The date in the file name is the "posted since" date.
After the data has been successfully downloaded a report will be produced that compares the downloaded LoTW QSO info against info in your current log. See the "Validating LoTW Data" section for details on this report.
Multiple Callsigns - Ignoring QSOs Made When Using Specific Callsigns
It is possible that a downloaded LoTW file will contain records that represent QSOs you've made using more than one callsign. Typically this is not a problem because these calls are previous calls you've held and the QSOs matching these LoTW records will be found in your log file.
However, it is possible that QSOs made using some of these calls are not in your log file. To handle this case XMLog allows you to ignore those QSOs. Whenever you choose the Validate LoTW Data or the Apply LoTW Data to Log menu items and XMLog discovers that more than one callsign was used a list of the callsigns will be displayed. At this point you can "un-select" the appropriate callsigns.
Step 2: Validating LoTW Data
The Validate LoTW Data report compares LoTW data in an ADIF file against the data already in your log. This report is automatically produced if you use XMLog to download LoTW data using the Import/Download and Validate LoTW Data menu item. Once you've downloaded the data you can use the Import/Validate LoTW Data menu item to produce another copy of the report (or to validate LoTW data that was downloaded using the ARRL LoTW web page).
Matching LoTW Records to Entries in Your Log
When XMLog searches your log for an entry matching a LoTW record it tries to match the "Call", "Date", "Time, "Band", and "Mode". Here's the strategy used for matching these fields:
* Call - The calls PJ4/W1AW and W1AW/PJ4, etc. are considered to be a match as well as the calls W1AW and W1AW/4, W1AW/MM, etc.
* Date/Time - XMLog looks for a match within a +/- ten minute range around the time given in the LoTW record.
* Frequency - Frequencies are matched on the basis of band, not exact frequency.
* Mode - Modes like PSK and PKS31 or SSB and USB are considered equivalent. If no match can be found using this strategy any mode of the same "type" will be considered a match (The mode types are: CW, Phone, and Data).
Validation Problems
The validation report displays information for LoTW records having the following problems:
* Not in Log - The call/date/time/band/mode from a LoTW record is missing, is badly formatted, or doesn't match any QSO in your log.
* Bad Data - LoTW data other than the call/date/time/band/mode is badly formatted.
* Conflicting Values - The state/zone/country/etc. from a LoTW record does not match the value in your log (both values are displayed).
I have found that it is not unusual for downloaded data to conflict with data in your log. The most common discrepancies are "State" values. I suspect that this is because some users select their entire log when submitting LoTW data to the ARRL and specify their current QTH - this causes older log entries from previous locations to be incorrect. The second most common error seems to be for "Zone" values. Zone problems can be caused in the same way as State errors or by confusing the ITU and CQ zone values when submitting LoTW data to the ARRL.
Step 3: Applying LoTW Data to Your Log
Before you apply LoTW data to your log you should first make a copy of the Verify LoTW Data report and decide how you want to handle records that were flagged as having some kind of problem. Once you have a copy of this report you should:
* Check any records that were flagged as having values conflicting with values in your log.

The Apply LoTW Data to Log operation will run more smoothly if you have already decided on how you want to handle any conflicts. During the Apply LoTW Data to Log operation you will be asked how you want to treat each record containing conflicts; keep the current log value, replace the current value with the LoTW value, skip this "problem" record, or abort the operation.
* Check for records that were flagged as "Not in Log". Since downloaded LoTW records are based on log entries you have previously submitted to LoTW this should not happen unless you have subsequently modified or deleted the log entry. Try to determine if the problem was due to a bad call, date, time, or mode value in your log entry. Make any appropriate corrections to your log and re-create the validation report to make sure the problem has been corrected. Note that any LoTW records flagged as "Not in Log" during validation will not be applied to your log. XMLog does not create new log entries based on LoTW records.
* Check for records that were flagged as having "Bad Data". Again, the Apply LoTW Data to Log operation will run more smoothly if you have already decided upon the "correct" values. During the Apply LoTW Data to Log operation you will be asked how you want to treat each record with bad data; edit the value in error, skip this "problem" record, or abort the operation.
Assuming you have checked the LoTW entries that were flagged as having problems and fixed any obvious errors in the log, how should the remaining conflicts be resolved? For conflicting values there is a special dilemma; if your log has one value and LoTW has another which do you use? You might have a "real" card on hand or there may be other reasons that you're sure the value in your log is correct, but, on the other hand the LoTW record might be good for a new state or country!
Here's a summary of what happens when you select the Apply LoTW Data to Log menu item:
* A prompt is displayed that requests the ADIF file name and allows you to set options.
* A prompt is displayed for each record having an error/conflict. This prompt allows you to apply, edit, or ignore the data.
* A status report is displayed that includes the number of records applied, skipped, etc.
For each LoTW record applied to your log the LoTW Rcvd field will be set to the value from the LoTW record. If the LoTW record does not contain a QSL Sent date the LoTW Rcvd field will be set to the current date.
Reports and LoTW
The reports produced by the Awards/DXCC and Awards/WAS menu items provide an Include LoTW Confirmations option. This option controls whether log entries that have the LoTW Rcvd date set are treated as confirmed QSOs (equivalent to having the QSL Rcvd field set).
The Awards/DXCC Totals and Awards/WAS Totals menu items now provide a Show QSL card and LoTW Totals option. This option will display card and LoTW counts for each band and mode. Note that the sum of these two values may be greater than the value in the "Confirmed" column since some countries (or states) may be confirmed by both QSL cards and by LoTW.
The Awards/DXCC Checklist and Awards/WAS Checklist menu items provide a Show Confirmation Sources option. This option will display additional info for each country (or state) that indicates how each band or mode has been confirmed. The flags used are "C" for confirmed by QSL card, "L" for LoTW and "E" for eQSL.

Hallo OM,
Saya juga lihat di QRZ logbook ada 3 data QSO yang gak ada di log saya, 2 QSO di PSK31 dan 1QSO di SSB.
Memang di tanggal dan jam sekitar itu saya juga on air, tapi karna gak ada data di log saya ya saya gak berikan konfirmasi.
Sempat terpikir juga apakah saya yg salah karena terlewat masukkan ke log - berdasarkan pengalaman saya sendiri yg mengalami data QSO tdk ada dalam log teman QSO (FM5AN, E51JD).

OM Joni,
Saya QSO dg TO2D waktu kontes dulu tgl. 28/07/2012 di 15M - confirmed via LoTW - juga paper QSL. Paper QSL lebih dulu terima dibanding LoTW maka kartunya sekarang sedang ada di DXCC Desk utk endorsement 15M.
Kirim ke QSL mgr (HB9EOU) tgl.02/08/2012, terima balasan tgl.29/11/2012

JX9JKA untuk 15M sudah confirmed - saya kirim QSL kesana tgl. 04/05/2012 dan tgl. 05/09/2012 sudah terima balasannya.
Tapi yg QSO di 10M, sudah saya kirim tgl. 31/10/2012 sampai sekarang belum ada balasannya - saya tanya via email koq malahan "tidak ada alamat email tsb".

Om Hendro pagi,

Tnx infonya
Berarti saya lagi apes.
Kirim 2x sesuai petunjuk di QRZ.COM
Sampai sekarang belum terima.

Tp beberapa minggu yg lewat, pernah saya ngobrol dengan YC0IEM om Hotang , beliau juga ngeluh belum dapat balas JX9JKA.
Apa kehabisan QSL card ya om Hendro.

Subject: Bls: [YBDXC_News] QSL

OM Joni,
Saya QSO dg TO2D waktu kontes dulu tgl. 28/07/2012 di 15M - confirmed via LoTW - juga paper QSL. Paper QSL lebih dulu terima dibanding LoTW maka kartunya sekarang sedang ada di DXCC Desk utk endorsement 15M.
Kirim ke QSL mgr (HB9EOU) tgl.02/08/2012, terima balasan tgl.29/11/2012

JX9JKA untuk 15M sudah confirmed - saya kirim QSL kesana tgl. 04/05/2012 dan tgl. 05/09/2012 sudah terima balasannya.
Tapi yg QSO di 10M, sudah saya kirim tgl. 31/10/2012 sampai sekarang belum ada balasannya - saya tanya via email koq malahan "tidak ada alamat email tsb".

GM ALL

Mohon tanya, mungkin ada teman-teman yg pernah QSO dengan stn-stn berikut : TO2D (st.barthelemy) dan JX9JKA (jan mayen)
Apakah sudah ada teman-teman yg terima QSL Cardnya??

Untuk TO2D sudah lotw tp karta QSO satu-satunya saya pengen paper QSL.. Hehehe

Mungkin Sven kehabisan QSL card ya... HI.
Atau mungkin dia lagi sibuk, masih betah di Jan Mayen dan belum kembali ke Norway untuk check postbox di rumah yg sudah banyak QSL card masuk dan belum sempat/bisa membalasnya.
Semoga besok Pak Pos datang antar QSL card dari dia - (ngarep).

Kemarin saya terima QSL card dari CT9/DJ8OG-Madeira Isl. gratis 100% - LoTW nya blm diapproved ARRL jadi dia kirim kartunya dan saya gak perlu balas karna dia gak koleksi QSL card utk DXpedition nya atau yg dia QRV di luar negaranya.

Om Hendro pagi,

Tnx infonya
Berarti saya lagi apes.
Kirim 2x sesuai petunjuk di QRZ.COM
Sampai sekarang belum terima.

Tp beberapa minggu yg lewat, pernah saya ngobrol dengan YC0IEM om Hotang , beliau juga ngeluh belum dapat balas JX9JKA.
Apa kehabisan QSL card ya om Hendro.

Nah, ini yang saya agak curiga (boleh gak ?).
Sepertinya ada beberapa DXer yg sebenarnya LoTW user tapi hanya memberikan konfirmasi di LoTW kepada AR yg sudah mengirimkan QSL cardnya ke dia.

Beberapa kali hal itu terjadi pada saya, konfirmasi hanya via LoTW padahal saya kirim QSL card sesuai persyaratan yg diminta. Akhirnya saya tanyakan via email - ada yang mengatakan sudah kirim tunggu dalam 2-3 minggu ke depan dan akhirnya saya terima juga.
Ada juga yg bilang gak terima QSL card saya - ada yg mengubah alamat di QRZ.com, ada yg semula direct ke ybs tapi beberapa waktu kemudian harus via manajer.

Dua hari yll saya kirim email ke brazil "menginfokan" bahwa QSO saya dg dia (T30PY) pada tgl/jam/freq/mode ini sudah confirmed via LoTW - saya sudah kirim QSL card direct tapi belum terima balasan (sudah kirim QSL card lama nih) - akhirnya dibilang akan segera dikirim. Semoga segera sampai.

Lalu bagaimana dg HV0A, OM Har sudah kirim QSL cardnya, LoTW - OK, tapi QSL card balasan belum.
Saya gak kirim QSL card hanya upload di LoTW - ternyata belum ada konfirmasi via LoTW.
Not on the log ..?? Wallahualam.

Mungkin Sven kehabisan QSL card ya... HI.
Atau mungkin dia lagi sibuk, masih betah di Jan Mayen dan belum kembali ke Norway untuk check postbox di rumah yg sudah banyak QSL card masuk dan belum sempat/bisa membalasnya.
Semoga besok Pak Pos datang antar QSL card dari dia - (ngarep).

Kemarin saya terima QSL card dari CT9/DJ8OG-Madeira Isl. gratis 100% - LoTW nya blm diapproved ARRL jadi dia kirim kartunya dan saya gak perlu balas karna dia gak koleksi QSL card utk DXpedition nya atau yg dia QRV di luar negaranya.

OM Joni,
Saya QSO dg TO2D waktu kontes dulu tgl. 28/07/2012 di 15M - confirmed via LoTW - juga paper QSL. Paper QSL lebih dulu terima dibanding LoTW maka kartunya sekarang sedang ada di DXCC Desk utk endorsement 15M.
Kirim ke QSL mgr (HB9EOU) tgl.02/08/2012, terima balasan tgl.29/11/2012

JX9JKA untuk 15M sudah confirmed - saya kirim QSL kesana tgl. 04/05/2012 dan tgl. 05/09/2012 sudah terima balasannya.
Tapi yg QSO di 10M, sudah saya kirim tgl. 31/10/2012 sampai sekarang belum ada balasannya - saya tanya via email koq malahan "tidak ada alamat email tsb".

Nah, ini yang saya agak curiga (boleh gak ?).
Sepertinya ada beberapa DXer yg sebenarnya LoTW user tapi hanya memberikan konfirmasi di LoTW kepada AR yg sudah mengirimkan QSL cardnya ke dia.

Beberapa kali hal itu terjadi pada saya, konfirmasi hanya via LoTW padahal saya kirim QSL card sesuai persyaratan yg diminta. Akhirnya saya tanyakan via email - ada yang mengatakan sudah kirim tunggu dalam 2-3 minggu ke depan dan akhirnya saya terima juga.
Ada juga yg bilang gak terima QSL card saya - ada yg mengubah alamat di QRZ.com, ada yg semula direct ke ybs tapi beberapa waktu kemudian harus via manajer.

Dua hari yll saya kirim email ke brazil "menginfokan" bahwa QSO saya dg dia (T30PY) pada tgl/jam/freq/mode ini sudah confirmed via LoTW - saya sudah kirim QSL card direct tapi belum terima balasan (sudah kirim QSL card lama nih) - akhirnya dibilang akan segera dikirim. Semoga segera sampai.

Lalu bagaimana dg HV0A, OM Har sudah kirim QSL cardnya, LoTW - OK, tapi QSL card balasan belum.
Saya gak kirim QSL card hanya upload di LoTW - ternyata belum ada konfirmasi via LoTW.
Not on the log ..?? Wallahualam.

DXpedition Antennas for Salt Water Locations
A study on 20m Antennas
By Kenny Silverman, K2KW

Which is better a 20m antenna for an island DXpedition: Yagi at 25', or a vertical or two on the beach? (Hint, You are on a web site dedicated to vertical antennas - this is a trick question!)

"Conventional Wisdom" would say that Yagi (typically a tribander or 2 element full-size Yagi) would be a great choice of antennas for a DXpedition on a beach. What makes the Yagi so great? Lets examine the reasons to use a Yagi?

The Top 10 Reasons to use a Yagi on a DXpedition, even when you are on the beach:
You have used Yagis at your home station
You understand how they work
Yagis have directivity
Everyone else uses Yagis on DXpeditions, so the must be great
and?

Hmm. I can't think of any other reasons! But everyone knows that any antenna by the ocean works great, or at least "conventional wisdom" tells you so.

Banyak bahasa gaul DXers ya - harus ngerti dan yg saya blm ngerti mau tanya dulu supaya gak ketinggalan gaooolll...

Barusan baca di DXWatch ada yg lagi marahan :

KC4TVZ 28425.0 [LoTW] we know who dog is..YOU 0055z 10 May
KD4BVG 28425.0 [LoTW] HAM since SPOT was considered DOG 0038z 10 May

hen

7274. Re: Paper QSL & DXCC field checker

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-05-10 01:49:19 UTC
From: Donny Sirait
Topic: 7274 Message: 7274

Dear teman teman,
Masalah paper QSL memang ribet. Kalau kita berbagi pengalaman pasti banyak sekali hal hal yang aneh yang terjadi dan kadang sangat spesifik terhadap seseorang.
-Ada yang complain karena sudah berkali kali dikirimin QSL plus GS atau IRC tetapi ngga dibalas, ketika di tanya langsung dibilang ngga diterima.... bisa bisa saja terjadi karena surat tersebut sudah berpindah tangan berkali kali dan terkadang jatuh ketangan yang kurang bertanggungjawab sehingga hilang.
-Ada yang lapor tidak ada masalah dengan QSL manager tertentu tetapi yang lain selalu bermasalah, contoh dulu di tahun 80an F6FNU sangat terkenal karena menjadi QSL manager atas berbagai stasiun DX (tetapi oleh salah seorang teman saya V85RM yang QSLnya di handle oleh F6FNU, dia tidak pernah minta agar di manajerin ama F6FNU tetapi sdh langsung di umumkan di DX buletin dan dikirimin surat untuk minta logsheetnya si V85RM) selalu berubah ubah kebijakannya untuk return postagenya.... kadang dia minta 2 GS tetapi di lain kesempatan dia minta hanya 3 IRC jadi bingung... tapi saya ngga pernah ada masalah dengan beliau, karena selalu dibalas ama dia. Teman yang lain selalu complain dan malah ada usulan untuk mem "ban" QSL yang berasal dari dia untuk DXCC, untungnya usulan itu tidak dilakukan.
-Saya sendiri sering dicomplain karena tidak membalas.... padahal sudah saya balas dengan perangko yang cukup dan di poskan.... salahnya dimana ya saya ngga tahu.... masa saya harus balas dengan registered mail padahal dia hanya kirim 1 IRC.
Paper QSL memang kenangan tersendiri tetapi menurut saya fungsinya saat ini lebih condong kepada koleksi pribadi, karena kembali lagi ribetnya confirming DXCC dengan paper QSL saat ini (dimana kita tidak punya field checker) sehingga LOTW lah menjadi pilihan.

Kapan ya kita punya field checker??? persyaratannya tidak sulit kog... hanya diperlukan commitment untuk mau menghadiri hamfest, melaksanakan admin DXCC, paling tidak punya 150 entities yang confirmed serta ujian open book dari ARRL. Bagi saya persyaratan yang paling sulit adalah kesediaan untuk menghadiri hamfest agar yang datang bisa untuk memeriksa QSL cardnya... terutama karena hamfest kebanyakan adanya di Jawa hi hi...

Nah, ini yang saya agak curiga (boleh gak ?).
Sepertinya ada beberapa DXer yg sebenarnya LoTW user tapi hanya memberikan konfirmasi di LoTW kepada AR yg sudah mengirimkan QSL cardnya ke dia.

Beberapa kali hal itu terjadi pada saya, konfirmasi hanya via LoTW padahal saya kirim QSL card sesuai persyaratan yg diminta. Akhirnya saya tanyakan via email - ada yang mengatakan sudah kirim tunggu dalam 2-3 minggu ke depan dan akhirnya saya terima juga.
Ada juga yg bilang gak terima QSL card saya - ada yg mengubah alamat di QRZ.com, ada yg semula direct ke ybs tapi beberapa waktu kemudian harus via manajer.

Dua hari yll saya kirim email ke brazil "menginfokan" bahwa QSO saya dg dia (T30PY) pada tgl/jam/freq/mode ini sudah confirmed via LoTW - saya sudah kirim QSL card direct tapi belum terima balasan (sudah kirim QSL
card lama nih) - akhirnya dibilang akan segera dikirim. Semoga segera sampai.

Lalu bagaimana dg HV0A, OM Har sudah kirim QSL cardnya, LoTW - OK, tapi QSL card balasan belum.
Saya gak kirim QSL card hanya upload di LoTW - ternyata belum ada konfirmasi via LoTW.
Not on the log ..?? Wallahualam.

Mungkin Sven kehabisan QSL card ya... HI.
Atau mungkin dia lagi sibuk, masih betah di Jan Mayen dan belum kembali ke Norway untuk check postbox di rumah yg sudah banyak QSL card masuk dan belum sempat/bisa membalasnya.
Semoga besok Pak Pos datang antar QSL card dari dia - (ngarep).

Kemarin saya terima QSL card dari CT9/DJ8OG-Madeira Isl. gratis 100% - LoTW nya blm diapproved ARRL jadi dia kirim kartunya dan saya gak perlu balas karna dia gak koleksi QSL card utk DXpedition nya atau yg dia QRV di luar negaranya.

OM Joni,
Saya QSO dg TO2D waktu kontes dulu tgl. 28/07/2012 di 15M - confirmed via LoTW - juga paper QSL. Paper QSL lebih dulu terima dibanding LoTW maka kartunya sekarang sedang ada di DXCC Desk utk endorsement 15M.
Kirim ke QSL mgr (HB9EOU) tgl.02/08/2012, terima balasan tgl.29/11/2012

JX9JKA untuk 15M sudah confirmed - saya kirim QSL kesana tgl. 04/05/2012 dan tgl. 05/09/2012 sudah terima balasannya.
Tapi yg QSO di 10M, sudah saya kirim tgl. 31/10/2012 sampai sekarang belum ada balasannya - saya tanya via email koq malahan "tidak ada alamat email tsb".

http://www.arrl.org/dxcc-field-checking

Field Checking of QSL Cards

QSL cards for new DXCC awards and endorsements may be checked by an approved DXCC Card Checker. This program applies to any DXCC award for an individual or station, except those specifically excluded.

1) Entities Eligible for Field Checking:

a) With an exception for 160 meters, cards for all current and deleted entities dating back to November 15, 1945 can be checked. Cards for 160 Meters can only be checked by card checkers who currently hold an active 160 Meter DXCC. The complete list of card checkers who are elibible to check 160 meters can be found at this site...160 Meter authorized checkers are noted in RED:
http://www.arrl.org/160-meter-card-checkers

b) The ARRL Awards Committee determines which entities are eligible for Field Checking.

2) DXCC Card Checkers:
a) Nominations for Card Checkers may be made by:

i) The Section Manager of the section in which the prospective checker resides.

ii) An ARRL affiliated DX specialty club with at least 25 members who are DXCC members, and which has DX as its primary interest. If there are any questions regarding the validity of a DX club, the issue shall be determined by the division director where the DX club is located. A person does not have to be a member of a nominating DX club.

iii) By Division Director.

b) Appointments are limited to one per section, one per DX club, and one per Division.

c) Qualifications:

i) Those nominated as a Card Checker must be of known integrity, and must be personally known to the person nominating them for appointment.

ii) Candidates must be ARRL members who hold a DXCC award endorsed for at least 150 entities.

iii) Candidates must complete an open book test about DXCC rules concerning QSL cards and the Card Checker training guide.

iv) The applicant must be willing to serve at reasonable times and places, including at least one state or Division ARRL Convention each year.

v) The applicant must have e-mail and internet capabilities, and must maintain a current e-mail address with DXCC Desk.

d) Approval:

Applications for DXCC Card Checkers are approved by the Director of the ARRL Division in which they reside and are appointed by the Membership and Volunteer Programs Manager.

e) Appointments are made for a two year period. Retention of appointees is determined by performance as determined by the DXCC Desk.

3) Card Checking Process:
a) Only eligible cards can be checked by DXCC Card Checkers. An application for a new award may contain any number of QSL confirmations from the list and shall not contain any QSLs that are not eligible for this program. The application may contain any number of cards, subject to eligibility requirements and fees as determined by Section I, Basic, 15.

b) It is the applicant's responsibility to get cards to and from the DXCC Card Checker.

c) Checkers may, at their own discretion, handle members' cards by mail.

d) The ARRL is not responsible for cards handled by DXCC Card Checkers and will not honor any claims.

e) The QSL cards may be checked by one DXCC Card Checker.

f) The applicant and DXCC Card Checker must sign the application form. (See Section I no. 11 regarding altered, forged or otherwise invalid confirmations.)

g) The applicant shall provide a SASE addressed to ARRL HQ, or, sufficient postage, to the DXCC Card Checker for mailing applications to ARRL HQ. The applicant shall also provide the applicable fees (check or money order payable to ARRL; credit card number and expiration date is also acceptable. Cash is OK, but not recommended).

h) The DXCC Card Checker will forward completed applications and appropriate fee(s) to ARRL HQ.

4) ARRL HQ involvement in the card checking process:
a) ARRL HQ staff will receive field-checked applications, enter application data into DXCC records and issue DXCC credits and awards as appropriate.

b) ARRL HQ staff will perform random audits of applications. Applicants or members may be requested to forward cards to HQ for checking before or after credit is issued.

c) The applicant and the DXCC Card Checker will be advised of any errors or discrepancies encountered by ARRL staff.

d) ARRL HQ staff provides instructions and guidelines to DXCC Card Checkers.

5) Applicants and DXCC members may send cards to ARRL HQ at any time for review or recheck if the individual feels that an incorrect determination has been made.

http://www.arrl.org/dxcc-card-checker-search

yb land still vacant, any interesting? hihihi

Subject: [YBDXC_News] Re: Paper QSL & DXCC field checker

Dear teman teman,
Masalah paper QSL memang ribet. Kalau kita berbagi pengalaman pasti banyak sekali hal hal yang aneh yang terjadi dan kadang sangat spesifik terhadap seseorang.
-Ada yang complain karena sudah berkali kali dikirimin QSL plus GS atau IRC tetapi ngga dibalas, ketika di tanya langsung dibilang ngga diterima.... bisa bisa saja terjadi karena surat tersebut sudah berpindah tangan berkali kali dan terkadang jatuh ketangan yang kurang bertanggungjawab sehingga hilang.
-Ada yang lapor tidak ada masalah dengan QSL manager tertentu tetapi yang lain selalu bermasalah, contoh dulu di tahun 80an F6FNU sangat terkenal karena menjadi QSL manager atas berbagai stasiun DX (tetapi oleh salah seorang teman saya V85RM yang QSLnya di handle oleh F6FNU, dia tidak pernah minta agar di manajerin ama F6FNU tetapi sdh langsung di umumkan di DX buletin dan dikirimin surat untuk minta logsheetnya si V85RM) selalu berubah ubah kebijakannya untuk return postagenya.... kadang dia minta 2 GS tetapi di lain kesempatan dia minta hanya 3 IRC jadi bingung... tapi saya ngga pernah ada masalah dengan beliau, karena selalu dibalas ama dia. Teman yang lain selalu complain dan malah ada usulan untuk mem "ban" QSL yang berasal dari dia untuk DXCC, untungnya usulan itu tidak dilakukan.
-Saya sendiri sering dicomplain karena tidak membalas.... padahal sudah saya balas dengan perangko yang cukup dan di poskan.... salahnya dimana ya saya ngga tahu.... masa saya harus balas dengan registered mail padahal dia hanya kirim 1 IRC.
Paper QSL memang kenangan tersendiri tetapi menurut saya fungsinya saat ini lebih condong kepada koleksi pribadi, karena kembali lagi ribetnya confirming DXCC dengan paper QSL saat ini (dimana kita tidak punya field checker) sehingga LOTW lah menjadi pilihan.

Kapan ya kita punya field checker??? persyaratannya tidak sulit kog... hanya diperlukan commitment untuk mau menghadiri hamfest, melaksanakan admin DXCC, paling tidak punya 150 entities yang confirmed serta ujian open book dari ARRL. Bagi saya persyaratan yang paling sulit adalah kesediaan untuk menghadiri hamfest agar yang datang bisa untuk memeriksa QSL cardnya... terutama karena hamfest kebanyakan adanya di Jawa hi hi...

7278. The Paper Chase Award Hunting

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-05-10 02:17:41 UTC
From: Yb land Dx club
Topic: 7278 Message: 7278

http://www.qsl.net/zl3dw/The%20Paper%20Chase%20-%20Award%20Hunting.pdf

The “Paper Chase”, award hunting, by Andrew Barron ZL3DW.

Ever since I started in the hobby, I have aspired to have the DXCC hanging on the wall of my shack. The DX Century Club certificate is awarded by the ARRL in recognition of confirmed contacts with 100 countries. It can be awarded for mixed bands and modes or for individual bands and modes. 5 band DXCC is recognised as one of the highest DX achievements in amateur radio. Working towards DXCC certificates sparked my interest in other awards and over the years I have applied for quite a few. Award hunting can be very addictive.

Many ham radio awards do not require QSL cards, a certified log can be submitted. Some awards, including all NZART awards, do not require confirmed contacts and rely on the honesty of the operator. You only need you to supply a list of the relevant contacts you have made. After all if you cheat, you are only fooling yourself. So it is possible to get some nice wallpaper, without having stacks of QSL cards. If you are only active on 80m or VHF there are many local awards available. (Check out the Call Book and join the awards net on 3.677 MHz at 08:00 UTC).

With the HF bands in poor shape, opening late and closing early, I found myself sitting in the shack wondering why all the bands were dead. With time on my hands I decided to check out the Internet and my log to see what other awards I could decorate the walls with. There are hundreds of awards available for all sorts of ham radio activity, check out http://www.dxawards.com/ or http://www.ac6v.com/hamawards.htm for a fairly comprehensive list. But the first place you should check out is the NZART Call book which has an excellent section on awards. The cover of the 2008-09 Call book features some of the New Zealand awards available.

I believe that there are three main classes of ham radio awards;
1. serious DX awards
2. special event awards
3. revenue awards

Serious DX awards are issued by national organisations, established ham radio magazines, and some clubs. These include CQ, ARRL, BARTG, eQSL, WIA, NZART, RSGB and many others. Generally they are not excessively expensive and are reasonably challenging to complete. There are awards for CW, SSB, digital modes, RTTY, PSK, SSTV, VHF, UHF, 6m, 10m, Maidenhead grids, islands, lighthouses, post codes, cities, regions and areas.

Special event awards are more of a fun thing, but they can still be good value. They include awards like the NZART Railways and Captain James Cook awards. Often special event awards are issued by clubs with special interests for example the, 4X2K award is for promoting historical sites relevant to the beginning of Christianity. The Sydney Gold award is for contacts with Sydney based VK hams during the 2000 Olympic Games and the “50th Anniversary of The Republic of Korea Award” is self explanatory.

Revenue awards are often issued by smaller clubs as a fund raiser. While I would not discourage anyone from working towards these awards, I would recommend checking out the cost of the certificates for overseas revenue awards. I have seen some up to 15 Euros or 5x IRCs which is a lot, for a piece of paper confirming that you have worked 10 Castles in Europe or similar.

The major overseas DX awards include; DXCC "DX Century Club" and WAS "Worked all States" from the ARRL, CQ DX, WPX "Worked all prefixes", WAZ "Worked all Zones", and the CQ Field Award for Maidenhead fields (1st two letters of the grid), all from CQ magazine, WAC "Worked all Continents from the IARU, the BARTG awards for RTTY and PSK digital modes and WAE "Worked all Europe".

You no longer have to send your precious QSL cards overseas to the ARRL for DXCC and WAS awards. You can send them to a local approved card checker in your country or use LoTW. Having a local card checker has improved the turn around time for DXCC awards a lot and I was always a bit worried about sending some of my rare and hard earned cards away. Some groups such as BARTG will now accept photocopies of your cards which is also much less risky.

The major New Zealand awards available to local hams include; NZ Counties, NZ regions, NZART Century award, VHFCC, WAD "Worked all Districts", WAP "Worked all Pacific", ZL1, 2, 3 and 4 awards, WAZL "Worked all New Zealand, IARU Region III, and the 5x5 award, for 5 band operation. Alan Chapman ZL3GX is the co-ordinator for NZART awards, he is very helpful and is happy to answer any questions via awards@....

If you have been heard to say, "Oh goodie another QSL card" from Italy, Russia, or Japan and have added it to the 200+ other QSL cards from that country, consider applying for one of the region or city awards offered by the local ham organisations. It can add a bit of interest to working not so rare DX countries, when suddenly you need a rare Italian region or Russian RDA.

The two Internet based QSL systems LOTW and eQSL both have awards that can be achieved based on electronic QSL confirmations. Contacts confirmed via LOTW can not be used for eQSL awards and vice-versa.

LOTW "Logbook of the World" is sponsored by the ARRL and your LOTW account can be linked to your DXCC account so that QSL cards can be combined with LOTW credits to count towards ARRL DXCC and WAS certificates (and now the CQ WPX award).
QSL cards that have been checked and approved by the ARRL will show on your LOTW score card. Logbook of the World is a very secure system with all log uploads being encrypted with special software. A photocopy of your licence must be posted to ARRL before you can get a logon to the system. Records once uploaded can not be edited or deleted by the user. Apparently the reasoning for all this security is to ensure no fraudulent logs are uploaded or records changed to fix busted calls etc., however the complexity does limit the number of users on the system. Many dxpeditions load their logs on to LOTW after a few months or years, or on receipt of your QSL card and / or a donation. A lot of contest stations, who are generally less interested in QSL cards, also load their logs on to LOTW. LOTW is free, but charges do apply when applying for DXCC, WAS or CQ WPX credits.

eQSL is much easier to set up and operate. Some log & digital mode programs will do the upload automatically. Users can be 'authenticated' by sending a scanned copy of their licence to eQSL by email. eQSL offers a series of awards, but as far as I know you can't combine eQSLs with paper QSL cards. eQSL is free but a small donation is

required before applying for your first award.

Another electronic system for awards is offered by the European PSK Club (EPC). Membership of the EPC is free and the PSK awards that the club issues are also free. You do not need to hold QSL cards for these awards. There are 36 classes of awards with many more sub-classes, 98 awards in total. Of course tracking credits towards all of these awards manually would be nearly impossible, but the club has a free computer program called, “Ultimate EPC Award Management Software” written by DK5UR. Download the small program then simply create an ADIF copy of your station log and feed it to the Ultimate EPC software. It summarises your status for all awards and lets you apply online for the awards you already qualify for. In a couple of days your certificates are ready to download and print. I know this sounds a “bit too easy”, but in reality it is little different to supplying a list of QSOs for an NZART award. The certificates have great graphics and are high quality. I laminated mine to stop them curling up at the edges. In addition to the EPC awards, the program can check and apply for the Croatian Digital Group’s Worked all Continents award (any digital mode) and two other awards. If you work a lot of PSK, have a look at the EPC web site http://eu.srars.org. The EPC awards are very well designed and a lot of fun.

There is other software around for award hunters; The Paper Chasers log by N0OKS, WAP for Antarctica awards by IK6CAC and IOTAmem4Win for IOTA awards. Most awards have a log sheet that can be downloaded from the Internet. To track my progress, I usually use a spreadsheet based on the log form. When you have enough contacts or QSLs to qualify for the award you can print out the spreadsheet as a check list. IK6CAC also has software for IOTA, EURA, and WAIZ awards but it will not work satisfactorily unless you change your PC time format to hh.mm.ss instead of hh:mm:ss. Also there is no function for inputting your existing log data.

Have a trawl through your logbook and QSL cards and see what awards you can apply for.

http://www.arrl.org/dxcc-field-checking

Field Checking of QSL Cards

QSL cards for new DXCC awards and endorsements may be checked by an approved DXCC Card Checker. This program applies to any DXCC award for an individual or station, except those specifically excluded.

1) Entities Eligible for Field Checking:

a) With an exception for 160 meters, cards for all current and deleted entities dating back to November 15, 1945 can be checked. Cards for 160 Meters can only be checked by card checkers who currently hold an active 160 Meter DXCC. The complete list of card checkers who are elibible to check 160 meters can be found at this site...160 Meter authorized checkers are noted in RED:
http://www.arrl.org/160-meter-card-checkers

b) The ARRL Awards Committee determines which entities are eligible for Field Checking.

2) DXCC Card Checkers:
a) Nominations for Card Checkers may be made by:

i) The Section Manager of the section in which the prospective checker resides.

ii) An ARRL affiliated DX specialty club with at least 25 members who are DXCC members, and which has DX as its primary interest. If there are any questions regarding the validity of a DX club, the issue shall be determined by the division director where the DX club is located. A person does not have to be a member of a nominating DX club.

iii) By Division Director.

b) Appointments are limited to one per section, one per DX club, and one per Division.

c) Qualifications:

i) Those nominated as a Card Checker must be of known integrity, and must be personally known to the person nominating them for appointment.

ii) Candidates must be ARRL members who hold a DXCC award endorsed for at least 150 entities.

iii) Candidates must complete an open book test about DXCC rules concerning QSL cards and the Card Checker training guide.

iv) The applicant must be willing to serve at reasonable times and places, including at least one state or Division ARRL Convention each year.

v) The applicant must have e-mail and internet capabilities, and must maintain a current e-mail address with DXCC Desk.

d) Approval:

Applications for DXCC Card Checkers are approved by the Director of the ARRL Division in which they reside and are appointed by the Membership and Volunteer Programs Manager.

e) Appointments are made for a two year period. Retention of appointees is determined by performance as determined by the DXCC Desk.

3) Card Checking Process:
a) Only eligible cards can be checked by DXCC Card Checkers. An application for a new award may contain any number of QSL confirmations from the list and shall not contain any QSLs that are not eligible for this program. The application may contain any number of cards, subject to eligibility requirements and fees as determined by Section I, Basic, 15.

b) It is the applicant's responsibility to get cards to and from the DXCC Card Checker.

c) Checkers may, at their own discretion, handle members' cards by mail.

d) The ARRL is not responsible for cards handled by DXCC Card Checkers and will not honor any claims.

e) The QSL cards may be checked by one DXCC Card Checker.

f) The applicant and DXCC Card Checker must sign the application form. (See Section I no. 11 regarding altered, forged or otherwise invalid confirmations.)

g) The applicant shall provide a SASE addressed to ARRL HQ, or, sufficient postage, to the DXCC Card Checker for mailing applications to ARRL HQ. The applicant shall also provide the applicable fees (check or money order payable to ARRL; credit card number and expiration date is also acceptable. Cash is OK, but not recommended).

h) The DXCC Card Checker will forward completed applications and appropriate fee(s) to ARRL HQ.

4) ARRL HQ involvement in the card checking process:
a) ARRL HQ staff will receive field-checked applications, enter application data into DXCC records and issue DXCC credits and awards as appropriate.

b) ARRL HQ staff will perform random audits of applications. Applicants or members may be requested to forward cards to HQ for checking before or after credit is issued.

c) The applicant and the DXCC Card Checker will be advised of any errors or discrepancies encountered by ARRL staff.

d) ARRL HQ staff provides instructions and guidelines to DXCC Card Checkers.

5) Applicants and DXCC members may send cards to ARRL HQ at any time for review or recheck if the individual feels that an incorrect determination has been made.

Subject: [YBDXC_News] Re: Paper QSL & DXCC field checker

Dear teman teman,
Masalah paper QSL memang ribet. Kalau kita berbagi pengalaman pasti banyak sekali hal hal yang aneh yang terjadi dan kadang sangat spesifik terhadap seseorang.
-Ada yang complain karena sudah berkali kali dikirimin QSL plus GS atau IRC tetapi ngga dibalas, ketika di tanya langsung dibilang ngga diterima.... bisa bisa saja terjadi karena surat tersebut sudah berpindah tangan berkali kali dan terkadang jatuh ketangan yang kurang bertanggungjawab sehingga hilang.
-Ada yang lapor tidak ada masalah dengan QSL manager tertentu tetapi yang lain selalu bermasalah, contoh dulu di tahun 80an F6FNU sangat terkenal karena menjadi QSL manager atas berbagai stasiun DX (tetapi oleh salah seorang teman saya V85RM yang QSLnya di handle oleh F6FNU, dia tidak pernah minta agar di manajerin ama F6FNU tetapi sdh langsung di umumkan di DX buletin dan dikirimin surat untuk minta logsheetnya si V85RM) selalu berubah ubah kebijakannya untuk return postagenya.... kadang dia minta 2 GS tetapi di lain kesempatan dia minta hanya 3 IRC jadi bingung... tapi saya ngga pernah ada masalah dengan beliau, karena selalu dibalas ama dia. Teman yang lain selalu complain dan malah ada usulan untuk mem "ban" QSL yang berasal dari dia untuk DXCC, untungnya usulan itu tidak dilakukan.
-Saya sendiri sering dicomplain karena tidak membalas.... padahal sudah saya balas dengan perangko yang cukup dan di poskan.... salahnya dimana ya saya ngga tahu.... masa saya harus balas dengan registered mail padahal dia hanya kirim 1 IRC.
Paper QSL memang kenangan tersendiri tetapi menurut saya fungsinya saat ini lebih condong kepada koleksi pribadi, karena kembali lagi ribetnya confirming DXCC dengan paper QSL saat

ini (dimana kita tidak punya field checker) sehingga LOTW lah menjadi pilihan.

Kapan ya kita punya field checker??? persyaratannya tidak sulit kog... hanya diperlukan commitment untuk mau menghadiri hamfest, melaksanakan admin DXCC, paling tidak punya 150 entities yang confirmed serta ujian open book dari ARRL. Bagi saya persyaratan yang paling sulit adalah kesediaan untuk menghadiri hamfest agar yang datang bisa untuk memeriksa QSL cardnya... terutama karena hamfest kebanyakan adanya di Jawa hi hi...

* ARRL 160, Phone Sweeps, and Rookie Roundup Online
* RF Simulators - How They Do It
* A Lofty Look at Batteries
* Calling Any QP
NEW HF OPERATORS - THINGS TO DO
Just outside the ham bands this weekend, listen for the military stations calling CQ and listening somewhere inside the ham bands. This might be a real good time to learn how to operate split since QRMing a station with a call sign like WAR - outside the ham bands, to boot - doesn't sound like a really great idea. However, all of those stations will QSL automatically - don't worry, of course they know where you live!
BULLETINS

From: hendro s.joedho
Topic: 7274 Message: 7284

Seperti yg dikatakan OM Donny, F6FNU memang menjadi QSL Manager banyak DXer terutama yg memang orang Perancis, kebanyakan juga yg QRV di Afrika.
Alhamdulillah saya juga gak pernah bermasalah dg QSLing beliau dan seingat saya waktu itu hanya minta 1GS atau 1 IRC yg ukurannya masih cilik seperti kupon (IRC saat ini seukuran tiket KA, HI).

Kalo ada card checker di YB-land, lumayanlah bisa lebih hemat dan terasa lebih aman atas nasib QSL card yg kita peroleh dg "darah dan airmata" (lebaayyyy....!!).

Sahabatku..OM Ucok,

Jika di call area yg sama, kita menumpang QRV di stasiun teman (peralatan bukan punya kita) maka pakai "slash call areanya". Seperti jika OM Ucok QRV di rumahnya OM Efendi YB6EI dgn radio dan antenanya OM Efendi maka OM Ucok menyebutkan dirinya di frekuensi sebagai YB6AR/6.

Tetapi jika OM Ucok membawa peralatan semuanya termasuk antena sampai dengan radio di halaman rumahnya OM Efendi maka yg dipergunakan adalah YB6AR/P.

Kalau OM Ucok QRV di mobil dan kendaraannya tidak bergerak (sengaja diparkir) utk QRV dalam kurun waktu yg cukup lama misal selama kegiatan kontes atau sengaja DX di pantai atau di gunung namun masih di area 6 dan walaupun semua peralatannya ada di mobil tetap saja menjadi YB6AR/P dan bukan slash Mobile.

Tetapi jika OM Ucok di mobil dan kendaraannya bergerak mondar mandir keliling kota atau keluar masuk desa sambil transmit maka callsignnya YB6AR/M.

Tapi kalau slash SK.. Itu gak perlu di diskusikan.. Sayapun suatu saat nanti juga akan pakai slash SK.. Ha ha ha

Salam 73 de YB4IR Imam

Ya mereka memang CQ Award Checker tetapi bukan DXCC field checker.... yang kita perlukan adalah DXCC award checker, karena sebenarnya untuk award dari CQ kecuali 5BWAZ dan 160m WAZ cukup dua orang amatir radio yang tanda tangan men testify award bisa di issue kog.

Tugas seorang DXCC field checker lebih dari sekedar memeriksa QSL card tetapi mencakup juga mengirimkan aplikasi baru atau endorsement dari orang yang diperiksa QSLnya....

Dan syarat2 yang di posting sebelumnya adalah untuk USA, untuk diluar USA bisa di ajukan oleh club, atau ORARI, dan untuk Asia tenggara masih belum ada... sehingga paling dekat ke Jepun atau mungkin Australia. Kalau harus kirim via pos ke sana biayanya cukup mahal juga... kemudian keamanan kartu ngga dijamin.

Dave salah seorang dari ARRL HQ pernah mengatakan kepada saya bahwa sangat berisiko untuk mengirim kartu QSL saat ini, jadi bagi orang seperti saya yang konfirmasinya banyak dari paper QSL hal itu menjadi dilema.

Ayo siapa yang bersedia? Kita rame rame ajukan kalau bisa lebih dari satu orang lah...

Waktu itu: karakter " / " sering di ucapkan "stroke" demikian halnya dx-station tetep aja sampe hari ini pengucapannya "stroke"

Tp entah kenapa sekarang ini di Indo terutama, enggan menyebutkan "Stroke", misal : YB4IR/2 = "yangkee bravo four italy radio slash two" bukannya "yangkee bravo four italy radio stroke two"
Apa orang2 pada takut kena "stroke" betulan?
Ya kalo "stroke" betulan bukan karena pengucapan di amatir radio, tp memang karena faktor lain.

Wkwkwk .....

Sahabatku..OM Ucok,

Jika di call area yg sama, kita menumpang QRV di stasiun teman (peralatan bukan punya kita) maka pakai "slash call areanya". Seperti jika OM Ucok QRV di rumahnya OM Efendi YB6EI dgn radio dan antenanya OM Efendi maka OM Ucok menyebutkan dirinya di frekuensi sebagai YB6AR/6.

Tetapi jika OM Ucok membawa peralatan semuanya termasuk antena sampai dengan radio di halaman rumahnya OM Efendi maka yg dipergunakan adalah YB6AR/P.

Kalau OM Ucok QRV di mobil dan kendaraannya tidak bergerak (sengaja diparkir) utk QRV dalam kurun waktu yg cukup lama misal selama kegiatan kontes atau sengaja DX di pantai atau di gunung namun masih di area 6 dan walaupun semua peralatannya ada di mobil tetap saja menjadi YB6AR/P dan bukan slash Mobile.

Tetapi jika OM Ucok di mobil dan kendaraannya bergerak mondar mandir keliling kota atau keluar masuk desa sambil transmit maka callsignnya YB6AR/M.

Tapi kalau slash SK.. Itu gak perlu di diskusikan.. Sayapun suatu saat nanti juga akan pakai slash SK.. Ha ha ha

Mungkin betul juga anggapan bahwa saat ini lebih banyak yang menggunakan "slash" dibandingkan "stroke" - karena kesan stroke itu = penyakit yg sangat menakutkan.

Tapi kalo saya perhatikan kedua istilah itu mulai populer dan banyak digunakan masyarakat umum pada tahun2 yang hampir bersamaan.

Istilah stroke utk penyakit - yg sebelumnya suka juga disebut "mati sebelah" seingat saya mulai muncul sekitar tahun 1985-86
Istilah slash - yg sebelumnya orang lebih sering memakai istilah "garis miring" - sepertinya populer setelah banyak orang menggunakan program2 komputer, khususnya Lotus 123 - yang menunya dimunculkan dg mengetik "slash". Ini juga khan sekitar tahun 85an.

Hi Teman2,
Saya masih bingung penggunaan YC1BPO/P pada IOTA OC-236.
Setahu saya seharusnya dia pakai YC1BPO/8 bukan YC1BPO/P
Kecuali dia QRV di kepulauan yang masih wilayah One (1).

Apakah saya yang salah ya?

Hari ini saya terima WAJA 28Mhz dari JARL
Ternyata klem JARL award sekarang lebih gampang.
Tidak perlu tanda tangan oleh siapapun.
Tidak perlu kirim QSL segala.
Cukup tanda tangan kita saja..
Sudah cukup.
Dan tentunya paling penting sampai dimana letak kejujuran kita..
Kalo mau rekayasa ßišª aja juga.. Hehehehe

Om Joni,
Awardnya pakai amplop atau tabung dibungkusnya?

Selamat ya OM Joni,
Award khan utk kebanggaan dan kebahagiaan hati kita.
Tapi kalo mendapatkannya dg cara "gak benar" - hati kecil kita akan selalu mengejek kita sendiri.

Utk WAJA yg saya idamkan (sama dg alamat QTH), saya masih perlu banyak :

1. Ibaraki, Tochigi, Yamanashi (buntut "I" semua) = belum confirm
4. Tottori (belum work sama sekali)
5. Kagawa (blm worked)
6. Nagasaki, Oita, Kagoshima (blm worked)
7. Aomori - blm confirm.

Nunggu AADXC aja deh, diseriusin. HI HI
Eh, apa nunggu OM Syarie QRV di prefectures itu semua ya..?

Om Zaini,
Isi dalam tabung kartun,
tp kalo ketimpa barang berat penyot juga,,
tidak seperti DXCC punya..

Om Hendro
Terima kasih ucapannya.
Cuma mau sharing kalo sekarang JARL award lebih gampang,
hanya modal sebuah kata "kejujuran" ..
Beberapa tahun yg lalu masih saya minta tanda-tangan 2 AR. Hehehe

Sebenarnya aplikasi ini sudah saya lama siapkan dan baru tahun ini saya kirim karna mau habisin IRC hehehe

Semoga om Hendro ßišª dapat ke9 prefecture dalam waktu dekat,
Dari ke9 tsb, mungkin agak jarang hanya Tottori pref.
Tp ßišª la,,
Kejar dalam kontes aja seperti Asia kontes dan Jepan kontes mendatang, belum lagi ditambah kontes lain IARU , IOTA , WWDX.

Hello Om Hen n Om Joni,

Pf om Joni, tambah lagi satu Bingkai dengan Awardnya tuk di pajang di Radio Shack..mantap !! Hehehe

Klo tidak keliru, Yg WAJA lebih sulit karna bnyk perfecture di Jepun.. Yg tuk JARL award cuma perlu 10 area code (0-9) n buruan pake IRC yg sdh mau expire tuk ngeklaim award tsbt dan prinsip hidup manusia yaitu "Honesty is d best Policy.. " :)

Good Luck tuk WAJA..sy mau ngumpulin kartu QSL dari Jepun n mudah mudahan dah lengkap tuk ngeklaim WAJA.. ;)

Have a good weekend everyone..good DX !!!

Salam,
Joy/YB0NSI

iPhone is Cool !

ßišª om Zaini,

karena dalam award manapun tidak pernah ada keterangan harus pake IRC negara tertentu,

Tp hanya mencantumkan IRC atau GS atau Euro atau mata uang negara asal award tsb terbit,

YB6LD is definitely not qualified.... ha ha ha, kalau bs yang muda lah tapi dengan pengetahuan yang cukup karena akan lebih gampang mobile... melayani para DXer's di Nusantara bahkan mungkin merambah ke ASEAN.... karena ASEAN setahu saya belum ada....
Beberapa waktu yang lalu seingat saya beberapa orang dari ARRL HQ pernah ikut SEANET convention dan mereka pada umumnya DXCC field checker...
Juga kalau beruntung ada si Fred Laun yang sering datang ke HS land... dia juga field checker... (untung DXer Thailand ya).
Semoga saja dalam waktu dekat ini ada, dan sebenarnya kalau YB1GJS bersedia (saya ngga tahu persyaratan teknisnya dia mencukupi atau ngga ya) dia adalah kandidat yang bagus karena sekaligus pengurus ORARI Pusat.... :)

OM Joy,
Kalo AJD saya sudah dapat, karena relatif mudah, tapi WAJA agak sulit buat saya yg masih malas2an ini.
Seperti OM Joni bilang Tottori agak susah didapatnya, tapi semoga sesulit North/South Dakota utk WAS.

Semoga dalam waktu dekat Ninja Hattori bisa QRV di Tottori prefecture.
(Ninja Hattori = tokoh kartun film anak2).

Hello Om Hen n Om Joni,

Pf om Joni, tambah lagi satu Bingkai dengan Awardnya tuk di pajang di Radio Shack..mantap !! Hehehe

Klo tidak keliru, Yg WAJA lebih sulit karna bnyk perfecture di Jepun.. Yg tuk JARL award cuma perlu 10 area code (0-9) n buruan pake IRC yg sdh mau expire tuk ngeklaim award tsbt dan prinsip hidup manusia yaitu "Honesty is d best Policy.. " :)

Good Luck tuk WAJA..sy mau ngumpulin kartu QSL dari Jepun n mudah mudahan dah lengkap tuk ngeklaim WAJA.. ;)

Have a good weekend everyone..good DX !!!

Salam,
Joy/YB0NSI

Om Hendro,
Mungkin dimasukin ke kantong posnya/atau paket dari Pos Pusat ke Bengkulu
terus ke Kabupaten ditumpuk sama paket lainnya.
Jadi rada-rada berlipatlipat.

Aduh, sayang juga ya.
Tapi cuma penampilannya saja sedikit kurang rapih - tapi yg penting sdh dapat.
Kalo saya yg Golden Jubilee nya malahan kerendam banjir waktu rumah direnovasi dulu, rusak, jamuran sebagian nempel ke kaca bingkai.

Arigarto Om Hen for info.. Sy masih kurang belasan perfecture lagi tuk dapat award WAJA.. Mudah mudahan dari CQ WPX contest bln Maret lalu bisa tambah perfecture lagi.. Hehehe

Klo award AJD sdh di bingkai n dipajang di radio shack sy, hehehe.. Waktu itu sy ajukan dengan menggunakan IRC yg sdh mau jatuh tempo di akhir th 2011..

Saya ada salah tulis juga tuh di bawah maksudnya semoga Tottori gak sesulit ND/SD. HI (dengan demikian kesalahan tulis telah kami perbaiki).

IRC saya juga ini tinggal beberapa bulan lagi, kalo gak salah bisa utk klaim DUF khan ya.

Om Hendro

Kalo ninja Hatori ƒgišª bantu bagus juga ya,,
Tp tanpa bantu ninja Hatori ɾasanya Jepan dengan YB land masih gampang.

Rajin CQ Jepang aja
Selain kumpulin Prefture ƒgišª kumpulin buat JCC , JCG , AJA , WACA , WAGA dan WAKU

WACA , WAGA dan WAKU kan award belum lama
Effective sejak 2010 apr,

Sayang tidak ada 5 Band WAJA tidak seperti WAS ada 5 Band , hehehe

Halo Om Joy
Apa kabar ??

Tnx om.
Saya sih simpan award-award dalam clear holher/book ,
Kalo yg agak besar kayak DXCC, saya pake Bantex 3163 (ukurannya 30x40cm)
Cuma kayak Jakarta award dan WAIA tetap aja tidak ßišª masuk..
Nah terpaksa pake bingkai deh,. Hehhee

Subject: Bls: Bls: [YBDXC_News] JARL Award

OM Joy,
Kalo AJD saya sudah dapat, karena relatif mudah, tapi WAJA agak sulit buat saya yg masih malas2an ini.
Seperti OM Joni bilang Tottori agak susah didapatnya, tapi semoga sesulit North/South Dakota utk WAS.

Semoga dalam waktu dekat Ninja Hattori bisa QRV di Tottori prefecture.
(Ninja Hattori = tokoh kartun film anak2).

Hello Om Hen n Om Joni,

Pf om Joni, tambah lagi satu Bingkai dengan Awardnya tuk di pajang di Radio Shack..mantap !! Hehehe

Klo tidak keliru, Yg WAJA lebih sulit karna bnyk perfecture di Jepun.. Yg tuk JARL award cuma perlu 10 area code (0-9) n buruan pake IRC yg sdh mau expire tuk ngeklaim award tsbt dan prinsip hidup manusia yaitu "Honesty is d best Policy.. " :)

Good Luck tuk WAJA..sy mau ngumpulin kartu QSL dari Jepun n mudah mudahan dah lengkap tuk ngeklaim WAJA.. ;)

Have a good weekend everyone..good DX !!!

Salam,
Joy/YB0NSI

iPhone is Cool !

hahaha, bisa dicoba CQing khusus ke JA-land ya.
Selama ini dari sejak saya mulai DXing dulu sampai saat ini, mungkin baru sekitar 10 kali saja buka lapak. HI

Om Hendro

Kalo ninja Hatori ßišª bantu bagus juga ya,,
Tp tanpa bantu ninja Hatori rasanya Jepan dengan YB land masih gampang.

Rajin CQ Jepang aja
Selain kumpulin Prefture ßišª kumpulin buat JCC , JCG , AJA , WACA , WAGA dan WAKU

WACA , WAGA dan WAKU kan award belum lama
Effective sejak 2010 apr,

Sayang tidak ada 5 Band WAJA tidak seperti WAS ada 5 Band , hehehe

Lha, koq gitu OM Zen.

Diamond DXCC saya memang tidak dikirim dalam tabung, tapi amplop coklat biasa agak tebal dan dilapis lembaran karton tebal.

Hi OM Zen,

Iya nih aku sempet sungkan juga, habis gimana, di jalur itu ada yg pake jadi tumpang tindih kaga kebaca di PC ku,
Aku speckulasi aja td confirm 599
Tp kemudian aku sangs aku ulang 2x lg
Tp akhirnya ga aku lanjutkan lagi
Kalo digital ya gitu itu, kalo tumpang tindah kaga kebaca semua :-(

Anyway thanks ya OM Zen atas infonya

https://sites.google.com/site/cqwpxawards/home

CQ Awards Program

Welcome to the CQ WPX Awards Program. The WPX Awards are sponsored by CQ Magazine.
The CQ WPX Award recognizes the accomplishments of confirmed QSOs with the many prefixes used by amateurs throughout the world. Separate, distinctively marked certificates are available for SSB, CW, Digital (RTTY/PSK) and Mixed (CW, SSB/Phone, Digital).

CQ WPX Awards and LoTW

How to Apply

Proceed to your LoTW Awards Tab and select WPX Award Account

- CQ WPX Awards Accounts

- Accounts for CQ WPX Awards operate in a similar manner to DXCC accounts. As matching QSO records (QSLs) are found, a CQ WPX award account is created for each unique combination of call sign and DXCC entity.
- If you have more than one call sign in the same DXCC Entity, you can merge the CQ WPX Award accounts for those calls into one.
- Choose an account from the pull down list and click
Select CQ WPX Award Account to get started.
- This works much like your DXCC Awards table

OM Iwan / OM Zen
Malah yb2lsr sdh masuk log
Kamarin malah aku ga pasti masuk, krn tumpuk2an sbb disitu jg dipake station lain yg jg cq-ing sptnya dr SP-???

Malah call-ku masuk
OM Zen malah tidak on the log,
Padahal sy liat wktu OM Zen qso, sptnya sdh logged,

Heheheheh

ga tahu yg jawab siapa, pas tak cek di log ga ada.
tak pikir juga sudah, mungkin karena numpuk itu kali ya.

From: hendro s.joedho
Topic: 7323 Message: 7338

alhamdlillah, selamat OM Seno.
saya koq blm logged ya ? - karena belum juga ketemu XZ1K.

nah, kasus yg terjadi seperti pada OM Zen pernah saya alami, cuma karena gak ada online log saya gak bisa cek dulu.
akibatnya QSL yg dikirim dapat balasan "not on the log".

saya pernah dengar ada beberapa AR dari EU yg jahil mungkin karna kesal - menjawab panggilan AR lain karna si AR ini TX pada freq. TXnya DXpedition yg sebenarnya bekerja split.

OM Iwan / OM Zen
Malah yb2lsr sdh masuk log
Kamarin malah aku ga pasti masuk, krn tumpuk2an sbb disitu jg dipake station lain yg jg cq-ing sptnya dr SP-???

Malah call-ku masuk
OM Zen malah tidak on the log,
Padahal sy liat wktu OM Zen qso, sptnya sdh logged,

Heheheheh

Hahahahah
Iya aku pernah juga njahilin gitu,
Cuman yg dijahilin tahu, klo bukan station yg di pile up.
Sbb aku kadang juga jengkel juga, sama station ter pile up ginian
Spt kemarin ZK3N, wong jerman gendeng
Wong ta tampa gedhe ra di rewes,
Mungkin takut kalo pulang diminta kembali uang sponsorya.

Nah ini kejadian lucu juga
VK9NT sptnya juga "balas dendam" EU gentian ga di rewes
Hhahah

alhamdlillah, selamat OM Seno.
saya koq blm logged ya ? - karena belum juga ketemu XZ1K.

nah, kasus yg terjadi seperti pada OM Zen pernah saya alami, cuma karena gak ada online log saya gak bisa cek dulu.
akibatnya QSL yg dikirim dapat balasan "not on the log".

saya pernah dengar ada beberapa AR dari EU yg jahil mungkin karna kesal - menjawab panggilan AR lain karna si AR ini TX pada freq. TXnya DXpedition yg sebenarnya bekerja split.

Iya aku pernah juga njahilin gitu,
Cuman yg dijahilin tahu, klo bukan station yg di pile up.
Sbb aku kadang juga jengkel juga, sama station ter pile up ginian
Spt kemarin ZK3N, wong jerman gendeng
Wong ta tampa gedhe ra di rewes,
Mungkin takut kalo pulang diminta kembali uang sponsorya.

Nah ini kejadian lucu juga
VK9NT sptnya juga "balas dendam" EU gentian ga di rewes
Hhahah

alhamdlillah, selamat OM Seno.
saya koq blm logged ya ? - karena belum juga ketemu XZ1K.

nah, kasus yg terjadi seperti pada OM Zen pernah saya alami, cuma karena gak ada online log saya gak bisa cek dulu.
akibatnya QSL yg dikirim dapat balasan "not on the log".

saya pernah dengar ada beberapa AR dari EU yg jahil mungkin karna kesal - menjawab panggilan AR lain karna si AR ini TX pada freq. TXnya DXpedition yg sebenarnya bekerja split.

OM Iwan / OM Zen
Malah yb2lsr sdh masuk log
Kamarin malah aku ga pasti masuk, krn tumpuk2an sbb disitu jg dipake station lain yg jg cq-ing sptnya dr SP-???

Malah call-ku masuk
OM Zen malah tidak on the log,
Padahal sy liat wktu OM Zen qso, sptnya sdh logged,

Heheheheh

Ada no HPnya, tapi tertulisnya di HP saya, sedangkan HP saya sudah rusak.
Harusnya kemarin titip pesan ke Pak JK waktu beliau dan rombongan PMI kesana - sked utk 10M dan 15M khusus utk AR di YBland. Hahahaha band-nya milih yg saya bisa.

Yg saya juga sudah masuk log, soalnya kemaren ngga pake 20-30 watts lagi, langsung full power 100 watts ..soal nya ada VK8 calling CQ di freq yg sama.

Jadi dari pada masuk untung2, pake power yg gede an jadi pasti masuknya hehehe

Mungkin yg OM Zen salah tulis callsign nya, coba aja di email XZ1K nya, sapa tau sudah masuk tapi salah tulis callsign .... kalo nga ya QSO lagi aja, kayanya dia cuma di 20m PSK31 ... ngga ada mode and band lain kalo liat dari description dia di qrz.com
Kaya ZL7 Chatham Island yg kemaren PSK31 only di 20 and 15m doang ...

Iwan

Lhaaaaa.....,

Pak JK kesana kok ya ga bilang2 sama Seno ajak2 gitu kek.
Tau gitu kan aku bawa radio ke sana, spy temen2 ybdxc ehhh ..... Temen2 ORARI bisa boleh dapet XZ.

Ada no HPnya, tapi tertulisnya di HP saya, sedangkan HP saya sudah rusak.
Harusnya kemarin titip pesan ke Pak JK waktu beliau dan rombongan PMI kesana - sked utk 10M dan 15M khusus utk AR di YBland. Hahahaha band-nya milih yg saya bisa.

Hahahahah
Iya aku pernah juga njahilin gitu,
Cuman yg dijahilin tahu, klo bukan station yg di pile up.
Sbb aku kadang juga jengkel juga, sama station ter pile up ginian
Spt kemarin ZK3N, wong jerman gendeng
Wong ta tampa gedhe ra di rewes,
Mungkin takut kalo pulang diminta kembali uang sponsorya.

Nah ini kejadian lucu juga
VK9NT sptnya juga "balas dendam" EU gentian ga di rewes
Hhahah

Yg saya juga sudah masuk log, soalnya kemaren ngga pake 20-30 watts lagi, langsung full power 100 watts ..soal nya ada VK8 calling CQ di freq yg sama.

Jadi dari pada masuk untung2, pake power yg gede an jadi pasti masuknya hehehe

Mungkin yg OM Zen salah tulis callsign nya, coba aja di email XZ1K nya, sapa tau sudah masuk tapi salah tulis callsign .... kalo nga ya QSO lagi aja, kayanya dia cuma di 20m PSK31 ... ngga ada mode and band lain kalo liat dari description dia di qrz.com
Kaya ZL7 Chatham Island yg kemaren PSK31 only di 20 and 15m doang ...

Iwan

SPECIAL NOTE FROM EDITOR (By KB8NW)
There will not be an OPDX Bulletin next week and "possibly the week after". I will be attending the Dayton HamVention (HOPEFULLY!!!!!). It is totally up in the air right now. Over the last several weeks, I have been experiencing shortness of breath. On Tuesday, May 7th, I had a "THALLIUM STRESS TEST" which showed some abnormalities. On May 10th, the Cardiac Doctor told me, or should I say she read me the riot-act, "no traveling or stressful work" until I have a heart catheterization. So some time this Monday before the HamVention, I will be at the Cleveland Clinic to have this procedure. If all goes well, I will be at Dayton. Some may remember that I had a double bypass in 2002. Let's hope I do not go there again.....
"IF" I receive a major announcements, (and if I am able to) I will probably send out a special bulletin. However, PLEASE continue to send your DX information. You never know what I might do.... 73 de Tedd KB8NW
DXCC COUNTRY/ENTITY REPORT
According to the AR-Cluster Network for the week of Sunday, 5th-May, through Sunday, 12th-May there were 228 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9L, VK9N, VP2E, VP2M, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, XZ, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZL, ZP, ZS, ZS8
* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).
5K3, COLOMBIA

Look for special event station 5K3YL to be active Sunday, May 18th, operated by a group of YLs during the "Ladies on the Air Contest". Activity is to honor women participating in amateur radio contests, as well as nationally and internationally. Operators mentioned are Sandra/HK3JJB, Mery/HJ3MCT, Paty/HK3KFM, Janeth/HK3PUE, Dora/HK3IAI, Maria/HJ8MFF, Yolanda/HK7YMF, Laura/HJ7LDV, Yuli/HJ3KMV, Cristina/HK3QYV, Dalia/HK3JI and Patricia/HK3IWL. Operations will be on 40 and 20 meters SSB. QSL via EA3DUF. A certificate is available (see QRZ.com).

OC-237. A group of Indonesian operators will be active as YE3I from Gili Ketapang between June 7-9th. Operators mentioned are Edi/YB3EDD, Eddy/YB3VPP, Samsul/YB3GZS and Andy/YB3BOA. Activity will be on 160-10 meters. QSL via YB3EDD. For more details, see: http://www.iotadx-giliketapang.blogspot.com/

11 May 2013                                                A.R.I. DX Bulletin
                                   No 1149
                          ============================
                          *** 4 2 5  D X  N E W S ***
                          ****  DX  INFORMATION  ****
                          ============================
                           Edited by  I1JQJ & IK1ADH
                         Direttore Responsabile  I2VGW

8Q     - Jim, G3VDB  will  be  active  again  as  8Q7EJ  from  the  Maldives
         (AS-013) on 13-26 May. He will operate holiday style on  20  metres
         CW and possibly SSB. Logsearch on Club Log; QSL via home  call  and
         LoTW.

YB     - Look for YB8RB/p, YB8REY/p, YB8RW/p, YB8STP/p,  YB8TK/p,  YB8TON/p,
         YB8UFL/p,  YC1BPO/p,  YC8RRC/p,  YC8RU/p,    YC8RUC/p,    YC8RUU/p,
         YC8TV/p, YD8ROQ/p and YD8UBY/p to be  active  from  Bunaken  Island
         (OC-236) until 12 May. They plan to operate SSB and  possibly  some
         CW on 160, 80, 40, 20,  17,  15,  10  metres.  QSL  via  operator's
         instructions. [TNX JN6RZM]
YB     - Special event  station YE30P  (http://ye30p.wordpress.com) will  be
         active from the city of Merauke (New Guinea, OC-034) on  15-17  May
         to celebrate  the  30th  anniversary  and  congress  of  the  Papua
         Province branch of ORARI. Plans are to operate CW, SSB and RTTY  on
         80-10 metres with two stations. Logsearch will be provided by  Club
         Log; QSL via YB9WR direct to P.O. Box  4245  JKTM,  Jakarta  12700,
         Indonesia. [TNX YE30P]
YB     - YB3BOA, YB3EDD, YB3GZS and YB3VPP will be active as YE3I from  Gili
         Ketapang (OC-237) on 7-9 June. QSL direct to YB3EDD.

http://www.arrl.org/w1aw-bulletins-archive/ARLP019/2013

SB PROP @ ARL $ARLP019
ARLP019 Propagation de K7RA ZCZC AP19
QST de W1AW
Propagation Forecast Bulletin 19 ARLP019
From Tad Cook, K7RA
Seattle, WA May 10, 2013
To all radio amateurs SB PROP ARL ARLP019
ARLP019 Propagation de K7RA Average daily sunspot numbers remained about the same this week,
with the number nudging up from 120.9 to 121.7. The average of the
daily solar flux numbers went from 136.5 to 137.5. An odd thing happened too. For two weeks in a row the average
planetary A index was the same as the mid-latitude A index. Last
week they were both 9.9, and this week both values were 8. Predicted solar flux for the near future is 125 on May 10, 115 on
May 11-13, 110 on May 14, 105 on May 15-16, 110 on May 17, 120 on
May 18, 130 on May 19-20, 135 on May 21-22, then rising to 160 on
May 28. Predicted planetary A index is 5 on May 10-11, 8 on May 12-13, 5 on
May 14-20, then 15, 10 and 15 on May 21-23, 5 on May 24-27 and 15
and 10 on May 28-29.

OM Imam, OM Karsono, OM Joy, OM Djoko (Tije), OM Seno, OM Hendro, OM Zen, OM Uun dan rekan-rekan lainnya...

Terima kasih banyak atas atensi dan support-nya, mohon maaf baru bisa balas krn sedang ada project di luar kota... Mohon bimbingan dan sarannya sehingga sy bisa menambah wawasan dan pengetahuan dalam DX-ing... Akhirnya selama setahun tertunda, sy mendapat kesempatan untuk belajar menjadi seorang DX-er yang lebih baik di YBDXC.

Semoga menjadi manfaat bagi perkembangan DX-ing di Indonesia...
Amin...

DR OM Irsan,
Welcome on board, bro' ...
If only planet Earth has 6-7- or-even-10 continents, for sure u r der to
chase QSL cards frm ALL those 10 continents (n not only 5), wudn't u?
Quoting Baby Romeo in X-factor: PBSK ... together wid ur uncle I'm proud to
hv u as one of the ham of the next generation.
Ever n ever onward, es b DARE to b a DX-er ...
[ur "another uncle" bam, one of the fading generation]
(old hams never die, they'll just QSB-ing away)

http://www.radio-sport.net/cq-wpx-contest-unlike-any-other/

CQ WPX Contest unlike any other

My friend Tim, KT8K, loves the CQ WPX contests. Why? Because with his prefix, he becomes a sought-after station. There just aren’t that many stations with the prefix KT8, and because every new prefix you work is a multiplier, they are anxious to work him when they hear his call.

Tim is not the only ham who loves the CQ WPX contests. The CQ WPX RTTY, SSB, and CW contests are some of the most popular contests in amateur radio. Last year, for example, 5,365 logs were submitted for the CQ WPX SSB contest and 4.323 logs for the CQ WPX CW contest.

As you can imagine, you’ll hear prefixes in the contest that you almost never hear on the air. How many are there? Well, in the CQ WPX SSB 2012 contest, 204 stations worked more than 1,000 prefixes! Often, even experienced operators don’t know where to point the antenna based on the callsign!

OPDX Bulletin 1112 May 13, 2013
The Ohio/Penn Dx PacketCluster
DX Bulletin No. 1112
BID: $OPDX.1112
May 13, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, NG3K & ADXO, W3UR & The Daily DX, K4UEE, N4AA & QRZ DX, N4JF, N4RR, W4VQ, KH6BZF, W6SZN, KL7JR, AC8G, K8GI, K8YSE, W8GEX & 60m News, K9EL, W9ILY, ARVM, AT International, DK8JB & The DX News Letter, DL1SBF, DL5YWM, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, G3SWH, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK7JWX, JI3DST, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, SV1HER, VA3RJ & ICPO, and the VHF-DX-Portal (MMMonVHF) for the following DX information.
SPECIAL NOTE FROM EDITOR (By KB8NW)
There will not be an OPDX Bulletin next week and "possibly the week after". I will be attending the Dayton HamVention (HOPEFULLY!!!!!). It is totally up in the air right now. Over the last several weeks, I have been experiencing shortness of breath. On Tuesday, May 7th, I had a "THALLIUM STRESS TEST" which showed some abnormalities. On May 10th, the Cardiac Doctor told me, or should I say she read me the riot-act, "no traveling or stressful work" until I have a heart catheterization. So some time this Monday before the HamVention, I will be at the Cleveland Clinic to have this procedure. If all goes well, I will be at Dayton. Some may remember that I had a double bypass in 2002. Let's hope I do not go there again.....
"IF" I receive a major announcements, (and if I am able to) I will probably send out a special bulletin. However, PLEASE continue to send your DX information. You never know what I might do.... 73 de Tedd KB8NW
DXCC COUNTRY/ENTITY REPORT
According to the AR-Cluster Network for the week of Sunday, 5th-May, through Sunday, 12th-May there were 228 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9L, VK9N, VP2E, VP2M, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, XZ, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZL, ZP, ZS, ZS8
* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).
5K3, COLOMBIA

Look for special event station 5K3YL to be active Sunday, May 18th, operated by a group of YLs during the "Ladies on the Air Contest". Activity is to honor women participating in amateur radio contests, as well as nationally and internationally. Operators mentioned are Sandra/HK3JJB, Mery/HJ3MCT, Paty/HK3KFM, Janeth/HK3PUE, Dora/HK3IAI, Maria/HJ8MFF, Yolanda/HK7YMF, Laura/HJ7LDV, Yuli/HJ3KMV, Cristina/HK3QYV, Dalia/HK3JI and Patricia/HK3IWL. Operations will be on 40 and 20 meters SSB. QSL via EA3DUF. A certificate is available (see QRZ.com).

OC-237. A group of Indonesian operators will be active as YE3I from Gili Ketapang between June 7-9th. Operators mentioned are Edi/YB3EDD, Eddy/YB3VPP, Samsul/YB3GZS and Andy/YB3BOA. Activity will be on 160-10 meters. QSL via YB3EDD. For more details, see: http://www.iotadx-giliketapang.blogspot.com/http://www.facebook.com/yethree.india#

Dear OM Bintoro,

salam kenal,
mantap nih, specialist digital operator hihihihi

I just want to have fun with amateur radio.

I am more interested in digital mode like PSK31, PSK63, PKS125, JT65-HF and ROS.

Only works on frequencies 7.076 mhz , 21.070 mhz, 21.076 mhz & 28.076 mhz.

DR OM Bam...

as you said in the beginning while we met in ODJ's workshop years ago, ..."just raise your skills and open wide your knowledge in Amateur Radio...so your willingness to be a DX-er is show up at once". It is a joy and always honored to me to stand side by side with my Elmer to ask anything you need to know about amateur radio.

I am not just a QSL card chaser, i am a simply a human who are hungry for DX-ing. Hi hi....
Surely agreed what u said and showing us as today, an amateur radio will always QRV in many pathway, not even in the frequencies but your humble support is awakening myself
to think 'out of the box' and keep updating for new era of amateur radio..

It always sounds interesting to keep my ears open for a DX station calling CQ CQ and being pile-up in various contest strengthened myself to 'learn and learn' about DX-ing... I preferred not just talking a kind of theory then you failed to proved you are a DX-er, not just raising an antenna but you are so lazy to CQ-ing, but i will try a modest thing..trying to call CQ DX and you are in ACTION!
Today i will starting a new life and focusing in one thing - DX-ing, not even more as learning how to be a proper DX-er, it is purely talking about a way of your life...

Again, i would like to say: "thank u so much Uncle Bam..." for your kindly support and attention to myself and also my beloved uncle who taught me how to be (not just) a good DX-er.... Keep in touch OM...

Warm regards,

Irsan

Om Joni,
Claimnya harus pakai QSL Card gak ya, sebab ga semuanya pakai Lotw.

Sepertinya tidak perlu,
Just for fun aja om.

Banyak short term award seperti :
morse 222 hanya 100 qso cw aja (yg ini om Iwan lagi kejar tu)
terus European Spring award 2013 hanya 10 EU entity (with any band/mode)
Liat aja di dxawards.com om Zen,

Nanti kirim apliaksi lewat email dan dapat pdf award,,
FOC om.. Hehehe

7409. Re: FOC Award

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-05-14 17:17:22 UTC
From: w7nz
Topic: 7394 Message: 7409

OM Zen,

Buat dapetin FOC award harus contact dgn CW (of course) dgn station2 yg pake FOC sebagai suffix or yg cq foc 75.

Untuk lebih jelas nya bisa dilihat disini http://www.g4foc.org/Default.aspx?pageId=1537887

Ngga perlu QSL cards, cuma log doang, ada score sheet nya, biar gampang track nya, tinggal download saja.

Saya sendiri sudah claim award nya dgn 11 stations 140 points, katanya lagi di process. Nah yg masih belum jelas bentuk award nya, saya tanya belum di jawab, ngga tau bentuk pdf (electronic kaya EPC awards) or paper award di kirim ke rumah.

Good luck OM Zen, masih banyak waktu untuk claim, sampe akhir bulan.

73,

Iwan

Om Iwan,
OK tks infonya, saya juga lagi hunting yg FOCnya dulu.
Kalau ga salah cuma 50 point yg paling tinggi.

Iya betul OM Zen,
Cuma saya juga sekalian dapetin QSL mereka masing2 sekalian deh hehehe

Btw kemaren saya monitor anda di CW, kaya nya power supply nya ngga kuat ya OM Zen? Suara tone nya bergoyang2 dangdut hehehe

Iwan

Om Iwan,
Mode CW launchingnya QSO dengan YE90PK...mungkin op. Om Yana kali sbb rada ngebut, pas saya masuk dipelanin.
Hitung-hitung nekat nyoba CW, biar lama lama juga lancar..

OM Zen,

Hari apa itu contact dgn YE90PK nya? Kalo jumat sore, malem sampe sabtu subuh itu YB1ALL di 20m kalo ngga salah, hari2 selanjut nya ada YD1DDB, YB1HDF dan YD1NAA... hari terakhir ada YB1KIZ.

Pak Yana di SSB waktu saya dateng sih, jumat siang. Malem nya baru saya di SSB 15m dan besok nya SSB 10m.

Iwan

Om Iwan,

Boleh lihat contoh form yang untuk claim 75FOC yang om Iwan pakai.
Lumayan udah dapat beberapa Preffiks FOC, yang udah conform LOTW GP4FOC
Kalau GB75FOC tadi saya email koq tdk ada di Log dia, barusan Phill G3SWH
kasih tahu
bahwa dia tulis callsign saya YB0MZ/4 jadi dia janji akan koreksi dan
upload ke LOTW berikutnya.

http://www.g4foc.org/Default.aspx?pageId=1537887

First Class CW Operators' Club 75thAnniversary On-Air Celebration

To commemorate our 75th anniversary in May FOC is holding a month-long on-air event featuring more than 60 special FOC-suffix calls. These will include GB75FOC, a special anniversary call for our club station. (GC4FOC will be used when operating from Wales, GH4FOC from Jersey, GN4FOC from Northern Ireland, GP4FOC from Guernsey, GS4FOC from Scotland, and GT4FOC from Isle of Man). A list of who is on the key of each special UK call each day can be found here. There will be many other FOC calls on the air all month from outside the UK, including some exotic locations such as 4X, 5B, 5T, 7Q, A6, HZ, KH6, V3 and VQ9.

YB8P & YE8P – Banggai OC-208 & Togian OC-213
TUESDAY MAY 14, 2013

UPCOMING: Following on from this info, it’s been confirmed that YB5NOF, YB5QZ, YB9WZJ, YB8NLF and YB8OFU will be active from:
* OC-208 Banggai Island as YB8P from May 16th to 19th
* OC-213 Togian Island as YE8P from May 22nd to 26th.
Furthermore, DX World has learned that John may visit and activate the rare Natuna Selatan OC-109 in June or July.

Just FYI,

Ternyata certificate award FOC dalam bentuk pdf, baru saya terima pagi ini di email.

Kemaren saya ini waktu saya email application nya, di bilang sorry ada delay in certificate production di Louisiana, USA sama Bob G4HZV.
Makanya saya pikir akan di kirim dalam bentuk paper .....

Iwan

Selamat Pagi
Mo nanya ke teman2 apa ada yang berhasil install logger32 dan N1MM software di Ubuntu.

Thanks
Budi - YB5OUB

Ya OM Joni YB9WZJ, berangkat hari ini dr Sorong, baru jam 1735 nanti tiba di Palu, ditunggu oleh OM John, YB5NOF, utk berangkat malam nanti juga ke Banggai.

The main group, siang ini dibawah Pimp OM Anton YB5QZ, sdh menuju Banggai.

Kita support di cluster..
Salam

YB8P & YE8P – Banggai OC-208 & Togian OC-213
TUESDAY MAY 14, 2013

UPCOMING: Following on from this info, it’s been confirmed that YB5NOF, YB5QZ, YB9WZJ, YB8NLF and YB8OFU will be active from:
* OC-208 Banggai Island as YB8P from May 16th to 19th
* OC-213 Togian Island as YE8P from May 22nd to 26th.
Furthermore, DX World has learned that John may visit and activate the rare Natuna Selatan OC-109 in June or July.

http://cqrlog.com/

CQRLOG, the world's best linux logging program!

CQRLOG is an advanced ham radio logger based on MySQL database. Provides radio control based on hamlib libraries (currently support of 140+ radio types and models), DX cluster connection, online callbook, a grayliner, internal QSL manager database support and a most accurate country resolution algorithm based on country tables developed by OK1RR. CQRLOG is intended for daily general logging of HF, CW & SSB contacts and strongly focused on easy operation and maintenance. More details in About section.

Is it for me?
This is an obvious question if you plan to migrate your logbook to another program promising more comfortable operation and less paperwork. Every program has its own preferences and gets its own group of satisfied users who says 'this is the best one, nothing else compares to ***' etc. CQRLOG is not different

http://9m2pju.blogspot.com/2013/05/understanding-propagation-report.html
http://www.hamqsl.com/solar2.html#usingdata

Understanding Propagation Report

SFI index: Solar Flux Index. it is a gauge of how much solar particles and magnetic fields reaching our atmosphere. In other words, this value informs us on solar winds reaching our planet and their influence on creating HF propagation conditions. For this measurement, the higher the number, the better HF propagation show be. The index value also suggest propagation on bands between 10 meter and 20 meter (ie: 10m,12m,15m,17m,20m). It has a scale between 30 and 300, and can be interpreted as follow:

< 70: propagation potentially bad.
80-90: propagation potentially are somewhat low
90-100: propagation tend to be average
100-150: propagation will tend to be good
>150: propagation will tend to be ideal

High SFI values has almost no influence on 30m,40m,80m and 160m bands. SFI value over 150 indicates ideal HF propagation conditions and people with small HF installations can begin exploiting these conditions. At these high SFI values, we might take advantage of these conditions while they last because they are far and few between. It might be here today, gone tomorrow.

Selamat bergabung OM Hari.

Alhamdulillah ternyata keberadaan YBDXC sebagai forum diskusi dan informasi diseputaran DX telah berdampak positif. Hal ini terlihat dengan semakin bertambah banyak anggota ORARI yang sempat terposting pada DX Cluster di hampir setiap Band dengan berbagai Mode dan nyaris selalu ada disetiap harinya.

Begitu juga di setiap event Internasional Contest, peserta dari Indonesia selalu bertambah banyak dan perkembangan positif ini tentulah sangat menggembirakan bagi kita semua pencinta Amatir Radio khususnya di kegiatan DX.

Bagi teman-teman yang lain, kami juga menunggu kehadirannya untuk bergabung di YBDXC sehingga kita bisa selalu saling berbagi informasi dan pengalaman serta diharapkan juga akan menjadi motivasi bagi teman lain untuk kembali mencoba aktif di kegiatan DX.

Sukses selalu dan selamat ber DX.

OM Adrian, Selamat bergabung di YBDXC.

Satu lagi teman kita dengan prefix YD telah mampu menunjukkan bahwa tingkatan di Amatir Radio tidaklah menjadi hambatan untuk menyenangi kegiatan DX dan turut pula aktif mengharumkan nama negara dan organisasi ORARI di mata dunia Amatir Radio Internasional.

Keterbatasan Band Plan juga tidaklah menjadi alasan jika ada keinginan untuk mencoba dan mencoba.

Tentulah suatu kebanggaan dan kualitas tersendiri jika dimulai dari YD sudah berani untuk melakukan komunikasi sesama amatir radio ke seluruh penjuru dunia.

Sukses selalu dan salam hangat,

Siang ini 05.55 UTC, saya terima signal kuat dari Pulau Banggai - OC-208.
YB8P saya terima sampai 10dB over S9 - bukan main menggelegar suaranya OM Joni.
Bersepatu kulit rusa ? Atau barefoot alias nyeker ? HI

Ouw kenapa ya ? Tapi apa waktu yg sama ?
Saat saya kirim email bahwa "tak terdengar" malahan YB8P sudah muncul lagi tapi signal tidak sekuat semula. S8 saja - operator YL.

Salam hormat,

Selamat siang salam sejahtera kepada para sesepuh YBLand

Merupakan kebanggaan bagi saya secara pribadi dapat bergabung pada YBDXC, sehingga memiliki kesempatan berguru pada senior di YBDXC

Terima kasih kepada om hen yc0qr, om imam yb4ir, om martin yb2lsr atas salam serta dukungannya, semoga kesempatan ini mendorong saya untuk lebih giat bekerja pada freq dan mendapatkan right direction

Harapan kedepan YBDXC semakin berkibar kejayaannya dengan prestasi anak bangsa

Salam terbaik, sukses selalu

OM Adrian, Selamat bergabung di YBDXC.

Satu lagi teman kita dengan prefix YD telah mampu menunjukkan bahwa tingkatan di Amatir Radio tidaklah menjadi hambatan untuk menyenangi kegiatan DX dan turut pula aktif mengharumkan nama negara dan organisasi ORARI di mata dunia Amatir Radio Internasional.

Keterbatasan Band Plan juga tidaklah menjadi alasan jika ada keinginan untuk mencoba dan mencoba.

Tentulah suatu kebanggaan dan kualitas tersendiri jika dimulai dari YD sudah berani untuk melakukan komunikasi sesama amatir radio ke seluruh penjuru dunia.

Sukses selalu dan salam hangat,

73 de YB4IR Imam

Ouw kenapa ya ? Tapi apa waktu yg sama ?
Saat saya kirim email bahwa "tak terdengar" malahan YB8P sudah muncul lagi tapi signal
tidak sekuat semula. S8 saja - operator YL.

hen

For OC-208,

Sikaaaat Om John, Om Anton, Om Joni cs.... Papa Foxtrot OC-208-----

OC-236 Bunaken Island hanya kl. 2000 qso in 2 hari 3 malam continue, harapan dan yakin OC-208 YB8P bisa lebih banyak yah dan capai target....dengan operator2 handal dan berpengalaman dan beberapa Mode..... mantap....
Maaf Om John, Om Anton, Om Joni Cs. Din (YB8RW/0) terima kasih ajakannya via YB8OFU by phone, maaf DIN tidak sempat gabung, masih capek dgn Bunaken Island kemaren, din lagi rest di Jakarta bersama keluarga....persiapan Marore, Miangas (pulau terluar) dlm perencanaan segera dalam waktu dekat....

Selamat berjuang...sukses for IOTA Indonesia....

Regards,

Syariefudin Syah - YB8RW/0

RR
Salam hormat,

Selamat siang salam sejahtera kepada para sesepuh YBLand

Merupakan kebanggaan bagi saya secara pribadi dapat bergabung pada YBDXC, sehingga memiliki kesempatan berguru pada senior di YBDXC

Terima kasih kepada om hen yc0qr, om imam yb4ir, om martin yb2lsr atas salam serta dukungannya, semoga kesempatan ini mendorong saya untuk lebih giat bekerja pada freq dan mendapatkan right direction

Harapan kedepan YBDXC semakin berkibar kejayaannya dengan prestasi anak bangsa

Salam terbaik, sukses selalu

OM Adrian, Selamat bergabung di YBDXC.

Satu lagi teman kita dengan prefix YD telah mampu menunjukkan bahwa tingkatan di Amatir Radio tidaklah menjadi hambatan untuk menyenangi kegiatan DX dan turut pula aktif mengharumkan nama negara dan organisasi ORARI di mata dunia Amatir Radio Internasional.

Keterbatasan Band Plan juga tidaklah menjadi alasan jika ada keinginan untuk mencoba dan mencoba.

Tentulah suatu kebanggaan dan kualitas tersendiri jika dimulai dari YD sudah berani untuk melakukan komunikasi sesama amatir radio ke seluruh penjuru dunia.

Sukses selalu dan salam hangat,

73 de YB4IR Imam

OM Joni,
Tapi koq sekarang saya terima 0-0 alias gak terdengar sama sekali.
Atau sudah QRT or QSY ya.

Siang ini 05.55 UTC, saya terima signal kuat dari Pulau Banggai - OC-208.
YB8P saya terima sampai 10dB over S9 - bukan main menggelegar suaranya OM Joni.
Bersepatu kulit rusa ? Atau barefoot alias nyeker ? HI

Ouw kenapa ya ? Tapi apa waktu yg sama ?
Saat saya kirim email bahwa "tak terdengar" malahan YB8P sudah muncul lagi tapi signal
tidak sekuat semula. S8 saja - operator YL.

For OC-208,

Sikaaaat Om John, Om Anton, Om Joni cs.... Papa Foxtrot OC-208-----

OC-236 Bunaken Island hanya kl. 2000 qso in 2 hari 3 malam continue, harapan dan yakin OC-208 YB8P bisa lebih banyak yah dan capai target....dengan operator2 handal dan berpengalaman dan beberapa Mode..... mantap....
Maaf Om John, Om Anton, Om Joni Cs. Din (YB8RW/0) terima kasih ajakannya via YB8OFU by phone, maaf DIN tidak sempat gabung, masih capek dgn Bunaken Island kemaren, din lagi rest di Jakarta bersama keluarga....persiapan Marore, Miangas (pulau terluar) dlm perencanaan segera dalam waktu dekat....

Selamat berjuang...sukses for IOTA Indonesia....

Regards,

Syariefudin Syah - YB8RW/0

RR
Salam hormat,

Selamat siang salam sejahtera kepada para sesepuh YBLand

Merupakan kebanggaan bagi saya secara pribadi dapat bergabung pada YBDXC, sehingga memiliki kesempatan berguru pada senior di YBDXC

Terima kasih kepada om hen yc0qr, om imam yb4ir, om martin yb2lsr atas salam serta dukungannya, semoga kesempatan ini mendorong saya untuk lebih giat bekerja pada freq dan mendapatkan right direction

Harapan kedepan YBDXC semakin berkibar kejayaannya dengan prestasi anak bangsa

Salam terbaik, sukses selalu

ya om maaf, hari jumat ada sahabat yg meninggal.
padahal pagi ngobrol via BBM. siang jam 12.30 berangkat duluan.
saya harus menenangkan istri dan ibunya. ibunya sahabat almarhum ibu saya dulu.
maaf tdk sempat memberikan kabar.
ada perintah om

EU PSK DX CONTEST 2013: RULES

Hello Dear PSK Contesters! The annual EU PSK DX Contest is fast approaching and you need to get prepared to work some really great DX on the BPSK63 mode on all bands but the WARC bands of course.

Remember the date & time: 12:00 UTC on 18.05.2013 to 12:00 UTC on 19.05.2013. The only permissible mode is BPSK63 only so be sure you are in the right mode before you begin and maximum power is 100 watts. As it was with last year's contest, be sure to pay close attention to your Cabrillo log so that it matches exactly the format required. Every station can be contacted once per band. The operator may change the bands without any restrictions. Only one transmitted signal is permitted at any time.

All the very best and see you all in the EU PSK DX Contest 2013!

ARRL Announces New Version of LoTW Software
TAGS: arrl, ARRL management, dave bernstein, group, interested parties, itu zones, lotw, new features, Rick Murphy, small group, volunteer services department
05/16/2013
After much testing, the ARRL will release a new version of Trusted QSL, the open-source development project responsible for developing and maintaining the three Logbook of the World (LoTW) client-side applications: TQSL, TQSLCert and the TrustedQSL library. After six weeks of public beta testing, version 1.14 is ready for official release and will be available for download from the ARRL website beginning Monday, May 20.
In December 2012, Dave Bernstein, AA6YQ, and Rick Murphy, K1MU, recruited a group of volunteer software developers to contribute to this project. After considering input from ARRL management and the ARRL's LoTW user support group in the League's Membership and Volunteer Services Department, as well as the ARRL-LoTW e-mail discussion group on Yahoo! Groups, the volunteer development group put forward a set of priorities that would be addressed by a sequence of incremental software releases.
A small group of testers began exercising version 1.14 in March 2013; this testing exposed several defects, all of which have been corrected. Testing then progressed to an open beta test period that allowed interested parties to download, install and try out this newest version of Trusted QSL.
The initial release in this sequence -- version 1.14 -- includes these new features:
* Log files can be signed and uploaded over the internet to LoTW in one operation.
* Errors in Station Locations are reported (for example, incorrect CQ and ITU zones).
* QSOs that need not be re-submitted ("duplicates") are brought to the user's attention.
* Error reporting has been improved.
* Installation on Windows has been improved.
* Users are notified when a new version becomes available.
* Documentation has been improved.
Upgrading to version 1.14 is not mandatory, but is encouraged. Users who choose not to upgrade will not be able to access the new features in version 1.14, but they will still be able to upload logs into the LoTW system.

OM,
Mau tanya tentang credit utk WPX di LoTW dong.
Masalahnya kenapa dalam perhitungannya ada konfirmasi QSO yang tidak masuk dalam hitungan untuk WPX, seperti salahsatu contohnya adalah :

Dalam data di LoTW, QSO saya sudah confirmed dengan OD5PY, tetapi dalam data prefix utk WPX belum masuk padahal tambahan prefix yg terakhir2 sudah masuk.

Kenapa ya ?

73 es tnx

Udah dipakai sama OD5 yang lain kali om hendro.
Emang udah dapat berapa Prefix om?

OM Ramli,
Maksudnya "salahsatunya saja" gimana ya, OM ? Ternyata saya satupun tidak ada yg masuk.

Saya confirmed via LoTW dg Lebanon di 10M dan 15M keduanya dengan OD5PY.
Tapi di WPX Account saya di WPX Mixed, WPX Mixed 15M, WPX Mixed 10M, WPX SSB 15M, WPX SSB 10M, WPX Mixed Asia - data OD5PY itu tidak ada.

Saya masih bingung nih OM Ramli.

73 es tnx

OM Zen,
Wah masih bingung saya dg maksud "sudah dipakai sama OD5 yang lain".
Kalo toh, saya sudah dapat OD5 dari yang lain selain OD5PY - tentunya di account credit saya sudah ada OD5, tapi ini belum ada seolah blm ada confirmed dg OD5..

Belum banyak yg saya dapat OM Zen, baru 209 prefix saja yang terdaftar di WPX melalui LoTW. Maunya sih hanya dari LoTW saja ah. HI

Om Hendro,
Kirain udah pernah worked sama Lebanon yang lain.
Minimal berapa banyak ya om untuk WPX?
Good Luck dech OM

Dear Teman teman YBDXC saat ini saya sdg bersama om Jeffry YC0LOU di Cibubur Jkt...

Sudah deal.. Bahwa YBDXC akan mengisi slot kongkow kongkow ttg DX ing ... Mulai jam 13:00 sampai selesai...

Saya juga sdh deal menyewa stand utk kita berkumpul (eyeball qso). Saya juga sdh deal bahwa ybdxc akan menjadi salah satu sponsor di Jatinegara Hamfest.. Panitia akan menyiapkan Sebuah spanduk ukuran 3m x 70 cm yg nantinya tercetak logo ybdxc dan akan di taruh di tempat strategis.

Semuanya sudah saya lunasi sore ini.. Semoga teman teman semua bisa hadir memeriahkan acara Jatinegara Hamfest ini...

Regards: Ndut YB0NDT...

OM Hen,

Mungkin OM Hen ngajuin kredit yang lebih besar dari anggunannya?

Lha apa saja yg dianggunkan, coba di negosiasi lg.

Heheheheh

OM Ramli,
Saya sudah coba lagi, karena langkah ini memang yg biasa saya jalankan untuk check confirming yang saya terima - tapi disitu tidak ada kolom untuk dicentang.
Lagipula yang lain - yang sudah masuk hitungan itupun tidak pernah saya centang.

Waduh terima kasih lagi nih dan maaf sudah merepotkan OM Ramli - tapi inilah gunanya kita bergabung di milis ini juga di YBDXC, bisa jadi tempat bertanya.

tnx
hen-yc0qr

OM,
Mau tanya tentang credit utk WPX di LoTW dong.
Masalahnya kenapa dalam perhitungannya ada konfirmasi QSO yang tidak masuk dalam hitungan untuk WPX, seperti salahsatu contohnya adalah :

Dalam data di LoTW, QSO saya sudah confirmed dengan OD5PY, tetapi dalam data prefix utk WPX belum masuk padahal tambahan prefix yg terakhir2 sudah masuk.

Kenapa ya ?

73 es tnx

Mungkin baru di proses OM Hen,

Biasa lah,
Harus survey segala,
Nanti klo survey, ajak ke solo
Ta jajake tenkleng,
Nanti surveyornya merem melek, terus kan kredit OD - nya kan keluar

Hiiiikkzzzzz

Bingo,

Terima kasih OM Ramli, OM Zen - saya tadi salah mengikuti petunjuknya OM Ramli, setelah OM Zen menunjukkan contohnya baru saya mengerti karena pernah juga lihat format itu.
Jadi harusnya masuk dulu ke WPX Credit - lalu ke Your QSOs - dan ke Most Recent QSLs.
Selanjutnya centang yg belum masuk ke kredit - saya coba dengan OD5PY dan setelah saya cek ulang OD5 masuk.

Berarti akan banyak tambahan nih, alhamdulillah.

Sekalilagi hatur thank you untuk semua rekan yang telah membantu juga utk OM Seno yg telah mengganggu. HI

tnx

OM,
Mau tanya tentang credit utk WPX di LoTW dong.
Masalahnya kenapa dalam perhitungannya ada konfirmasi QSO yang tidak masuk dalam hitungan untuk WPX, seperti salahsatu contohnya adalah :

Dalam data di LoTW, QSO saya sudah confirmed dengan OD5PY, tetapi dalam data prefix utk WPX belum masuk padahal tambahan prefix yg terakhir2 sudah masuk.

Kenapa ya ?

Barusan saya sedang centang2 di LoTW sambil monitor rekan dari 9M sedang CQing di 28.480MHz, lalu masuk TZ6BB dengan signal yg cukup kuat.

Kebetulan utk 10M saya blm pernah dapat Mali tapi panggil di frequency 9M2 rasanya kurang enak, maka saya coba cegat TZ6BB di 28.483MHz dengan harapan dia scan ke atas.
Dan alhamdulillah 3 kali saya panggil ternyata betul dia scan ke atas dan mendengar panggilan saya dan short QSO=worked.
Setelah itu TZ6BB mulai dipileup.

Yang belum dapat mali silahkan ke 28.483MHz - saat ini jam 13.21 UTC.

wkwkwkwkwk.....

sampai ketemu nanti tgl 15 Jun nanti ya Om Hen,
mudah2an tidak ada acara lain di solo, sehingga bisa ke Jkt.

thanks and regards
Seno

Bingo,

Terima kasih OM Ramli, OM Zen - saya tadi salah mengikuti petunjuknya OM Ramli, setelah OM Zen menunjukkan contohnya baru saya mengerti karena pernah juga lihat format itu.
Jadi harusnya masuk dulu ke WPX Credit - lalu ke Your QSOs - dan ke Most Recent QSLs.
Selanjutnya centang yg belum masuk ke kredit - saya coba dengan OD5PY dan setelah saya cek ulang OD5 masuk.

Berarti akan banyak tambahan nih, alhamdulillah.

Sekalilagi hatur thank you untuk semua rekan yang telah membantu juga utk OM Seno yg telah mengganggu. HI

tnx

Mungkin baru di proses OM Hen,

Biasa lah,
Harus survey segala,
Nanti klo survey, ajak ke solo
Ta jajake tenkleng,
Nanti surveyornya merem melek, terus kan kredit OD - nya kan keluar

Hiiiikkzzzzz

Saya ajukan KTA - bukan Kredit Tanpa Agunan tapi Kartu Tanda Anggota ORARI.

KTA saya masih berlaku lho, OM Seno.

OM Hen,

Mungkin OM Hen ngajuin kredit yang lebih besar dari anggunannya?

Lha apa saja yg dianggunkan, coba di negosiasi lg.

Heheheheh

OM,
Mau tanya tentang credit utk WPX di LoTW dong.
Masalahnya kenapa dalam perhitungannya ada konfirmasi QSO yang tidak masuk dalam hitungan untuk WPX, seperti salahsatu contohnya adalah :

Dalam data di LoTW, QSO saya sudah confirmed dengan OD5PY, tetapi dalam data prefix utk WPX belum masuk padahal tambahan prefix yg terakhir2 sudah masuk.

Kenapa ya ?

73 es tnx

Siiipp OM Ramli,
Lumayan jadi nambah banyak juga - yang semula baru 209 px sekarang sudah jadi 277 px. tnx.

Sekarang ini di 28.483MHz ada Mali-Tz6BB barusan OM Dani juga baru QSO.
Kebetulan saat ini dia mengkhususkan panggil AF dan AS (OC juga khan), EU station seperti biasa kadang maksa.

73 es tnx

Saya mendapatkan bbm dari YB9WZJ bahwa ibunda dari om Armen (team YB8P) wafat pada sore ini.

Saya turut berduka cita dan prihatin karena beliau tidak bisa melihat ibunda beliau utk yg terakhir kali..

Semoga ibunda Om Armen mendapat tempat yang layak di sisi Sang Maha Pencipta dan om Armen ikhlas menghadapi cobaan ini... Amin...

Alhamdulillah, tapi besok aja ah saya uploadnya.
Fernando *TZ6BB) juga tegas nih dia sudah bilang only Africa & Asia jadinya gak gubris sama sekali EU station yang maksa banget.

Sekarang begitu dia buka utk EU - banjir deh mangkanya sekarang sepertinya split.
Saat ini signalnya sudah tidak terdengar jelas, hanya hawar2 dan signal strength 0 gak ada garis sama sekali tadi bisa 10 over S9.
Rupanya dia tadi optimalkan QSO dgn AS/AF karena propagation sedang bagus, sedangkan kalo dengan EU sehari2 juga gak sulit.

tnx infonya OM Iwan.

Om Hen,

Pf om Hen dapat lagi 1 Negara baru di 10M ;) .

Untuk menambah ilmu DX saya, waktu saat om Hen "mencegat" TZ6 di 28.493 Mhz dengan harapan stn Mali tsbt scan up, maksudnya apa ya? Om Hen buka warung 3kHz diatas 9M2? Kalao iya buka warung, apa tidak mengganggu si 9M2 karna cuma 3 Khz diatasnya? Mohon infonya om Hen..

Kalo saya lebih prefer masuk ke freq 9M2 dalam spasi dan menyebutkan "TZ6 up (or down) 5 please" n mudah mudahan dia dengar n ikut..

Thanks,
Joy/YB0NSI

iPhone is Cool !

Kalo aku dapet 6 slot Pak Uun,

15 ph
15 ry
15 cw
20 ph
20 cw
40 ph

Aku nunggu2 40cw ga ketemu, eman

Klo mau model sperti iwak2 ya susah masuknya (on the log)

Kita harus sabar dikit,
Baru ada kesempatan kita masuk,
Ikan teri kok mau lawan ikan kakap ya jelas kalah,
Tp kalo kita sperti ikan teri prinsipnya harus punya duri yg tajam2, kalo kita dimakan ikan kakap, maka dia akan mati krn tertusuk duri kita

Hahahahahahaha

7550. Bls: Bls: [YBDXC_News] Re: TZ6BB

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-05-19 04:00:49 UTC
From: hendro s.joedho
Topic: 7530 Message: 7550

Hahaha, mungkin cara OM Joy itu yang benar secara prosedur QSO.
Tapi kadang saya gak yakin di frekwensi itu yg sedang ramai panggilan saya bisa terdengar dan dimengerti oleh TZ6BB, jadi setelah monitor sebentar di frequency atasnya lowong, saya gak buka warung disitu tapi langsung saja panggil TZ6BB.

Jadi mungkin masuk katagori blind call ya, tapi gak juga ah...! Mungkin mirip ada jangji (on sked).
Lebih mirip preman/rampok yg menunggu mangsa di luar bank setelah lihat ada nasabah baru tarik uangnya. HI HI HI.
Tapi lapak itu akhirnya dipake juga oleh TZ6BB untuk waktu yg cukup lama, setelah khusus AS/AF dia juga kasih kesempatan EU.

Kalo cara saya itu juga gambling sih, iya kalo dia masih mau on air, scan ke frequency tempat saya nyegat dan memang tipis jaraknya dengan frequency AR Malaysia itu, mungkin harusnya agak lebih jauh lagi ya.

Tapi sepertinya gak saling mengganggu karena keduanya tetap jualan - 9W6DLD tetap melayani pileup di 28.480MHz dan TZ6BB di 28.483MHz.
Tapi kembali ke saya juga - yg seperti OM Seno bilang "kurang PD" - takut gak kedengaran, takut ganggu QSO disitu dll, tapi cara yg sama pernah saya lakukan waktu mencegat HB0CC/Liechtenstein, juga di 10M.

Pagi ini saya upload ke LoTW gak sampe semenit masuk dan confirmed dari TZ6BB seperti OM Iwan bilang plus tambahan 6 px baru. Alhamdulillah.

Om Hen,

Pf om Hen dapat lagi 1 Negara baru di 10M ;) . u

Untuk menambah ilmu DX saya, waktu saat om Hen "mencegat" TZ6 di 28.493 Mhz dengan harapan stn Mali tsbt scan up, maksudnya apa ya? Om Hen buka warung 3kHz diatas 9M2? Kalao iya buka warung, apa tidak mengganggu si 9M2 karna cuma 3 Khz diatasnya? Mohon infonya om Hen..

Kalo saya lebih prefer masuk ke freq 9M2 dalam spasi dan menyebutkan "TZ6 up (or down) 5 please" n mudah mudahan dia dengar n ikut..

Thanks,
Joy/YB0NSI

Kingman Reef – KH5K Can Be Activated!

Posted by ky6r on May 19, 2013
I have confirmed that Kingman Reef is above water at high tide, and is even protected from high surf. The approach and landing is easy – much easier than Clipperton Reef.

I have 100% confirmation from the Scripps Institute and marine biologists who have been there recently doing research. There is only 3 feet left above water at high tide, and an area of about 15′ by 100′ of coral rubble. This means any activation would have to be small. NO BIG TEAMS . . . .

It is in no danger of being deleted from the DXCC List – those 13 year rumors were unfounded. I met with Arne from the DXAC at Visalia, and am confident it will stay on the list. I just heard that Dave Patton from the ARRL announced that Kingman will remain on the list – so its now official from the ARRL.

There are ships that can easily get there from Honolulu, and the distance from Honolulu is similar to going from Kiribati. Kiribati has issues as far as available ships – Honolulu has an abundance of possibilities. Relative to VK0/H, FT5/Z and P5, this one would be less expensive.

The US F&W says that its nearly impossible to gain access, but who knows – miracles sometimes happen.

I can only imagine how incredibly cool it would be to activate . .. and as all of you know – its been my “obsession” for years.

Stay tuned . . . .

http://forums.qrz.com/showthread.php?391641-CQ-announces-2013-Hall-of-Fame-Inductees

CQ announces 2013 Hall of Fame Inductees

CQ magazine today announced its 2013 Hall of Fame inductees, adding two members each to the CQ DX and Contest Halls of Fame along with eight new members of the CQ Amateur Radio Hall of Fame.

The CQ Amateur Radio Hall of Fame honors those individuals, whether licensed hams or not, who have made significant contributions to amateur radio; and those amateurs who have made significant contributions either to amateur radio, to their professional careers or to some other aspect of life on our planet.

The 2013 inductees (listed alphabetically) are:
* Evelyn Garrison, WS7A (SK) - amateur radio industry leader

* Joel Kleinman, N1BKE (SK) - former Managing Editor of QST magazine

* Laurie Margolis, G3UML/GPC3L - Longtime BBC correspondent and contributor to amateur radio magazines

* Michael Owen, VK3KI (SK) - Longtime president of the Wireless Institute of Australia and chairman of IARU Region 3

* Harry Rubinstein (ex-9EEV) (SK) - Inventor of the printed circuit, the slider potentiometer and the combination potentiometer/on-off switch

* Walker Tompkins, K6ATX - Journalist, author and historian, his three dozen books included several well-known ham radio-related novels

* Joe Walsh, WB6ACU - Rock music performer and Rock & Roll Hall of Fame inductee

* William G. (Bill) Welsh, W6DDB (SK) - CQ Novice Editor for 20 years; responsible for helping thousands to get their ham licenses

CQ DX and Contest and DX Halls of Fame
The CQ DX and Contest Halls of Fame honor those amateurs who not only excel in personal performance in these major areas of amateur radio but who also "give back" to the hobby in outstanding ways.

The 2013 inductees to the CQ DX Hall of Fame are:
* Vladimir Bykov, UA4WHX/AC4LN, has visited and operated from over 100 DX entities in the past ten years and operated from all six continents in 2012 alone. Has provided over 700,000 DX contacts for hams around the world (and QSLed them all).
* Robert "Gary" Dixon, K4MQG, is a founding member of the Carolina DX Association and as Founding President of INDEXA, the International DX Association, which has helped support over 200 DXpeditions in the past 30 years.

The 2013 inductees to the CQ Contest Hall of Fame are:
* Dale Green, VE7SV, is a world-class contester who has been hosting teams of new and experienced contesters at his superstation for the past 20 years, and recently helped start a contest group in Chile.
* Charles "Chas" Fulp, K3WW, also a multi-award winning contester and past president of the Frankford Radio Club (FRC), which saysChas "is our role model and sets the standard for other FRC members to strive to achieve."

Formal inductions to the CQ Contest and DX Halls of Fame were scheduled for the Dayton Hamvention.® More detailed descriptions of inductees will appear in the official announcement in the July 2013 issue of CQ magazine.

I have confirmed that Kingman Reef is above water at high tide, and is even protected from high surf. The approach and landing is easy – much easier than Clipperton Reef.

I have 100% confirmation from the Scripps Institute and marine biologists who have been there recently doing research. There is only 3 feet left above water at high tide, and an area of about 15′ by 100′ of coral rubble. This means any activation would have to be small. NO BIG TEAMS . . . .

It is in no danger of being deleted from the DXCC List – those 13 year rumors were unfounded. I met with Arne from the DXAC at Visalia, and am confident it will stay on the list. I just heard that Dave Patton from the ARRL announced that Kingman will remain on the list – so its now official from the ARRL.

There are ships that can easily get there from Honolulu, and the distance from Honolulu is similar to going from Kiribati. Kiribati has issues as far as available ships – Honolulu has an abundance of possibilities. Relative to VK0/H, FT5/Z and P5, this one would be less expensive.

The US F&W says that its nearly impossible to gain access, but who knows – miracles sometimes happen.

I can only imagine how incredibly cool it would be to activate . .. and as all of you know – its been my “obsession” for years.

Stay tuned . . . .

Kingman Reef – KH5K Can Be Activated!

Posted by ky6r on May 19, 2013
I have confirmed that Kingman Reef is above water at high tide, and is even protected from high surf. The approach and landing is easy – much easier than Clipperton Reef.

I have 100% confirmation from the Scripps Institute and marine biologists who have been there recently doing research. There is only 3 feet left above water at high tide, and an area of about 15′ by 100′ of coral rubble. This means any activation would have to be small. NO BIG TEAMS . . . .

It is in no danger of being deleted from the DXCC List – those 13 year rumors were unfounded. I met with Arne from the DXAC at Visalia, and am confident it will stay on the list. I just heard that Dave Patton from the ARRL announced that Kingman will remain on the list – so its now official from the ARRL.

There are ships that can easily get there from Honolulu, and the distance from Honolulu is similar to going from Kiribati. Kiribati has issues as far as available ships – Honolulu has an abundance of possibilities. Relative to VK0/H, FT5/Z and P5, this one would be less expensive.

The US F&W says that its nearly impossible to gain access, but who knows – miracles sometimes happen.

I can only imagine how incredibly cool it would be to activate . .. and as all of you know – its been my “obsession” for years.

Stay tuned . . . .

Jangan lah,

kita kasih kesempatan kepada yg lainnya aja lah,

Dari pada YB2LSR pergi ke P5, bisa2 pulangnya tinggal nama aja nih karena kena rudal/misil disana kan refotttt ...

Dah ahhh
Otw church

See ya

Oh gitu ya

Aku juga sudah lupa,
Kalo P5 cuman dapet 1 slot, entah kapan lagi "dia" qrv lagi.

Ok,
TTDJ ya,
Aku persiapan ibadat dulu,
See you , zai jian

Waktu itu sdh ada cluster belum ya?

Aku masih primitif,
Ga pake PC
Pake logger kertas, tulis tangan.
Ini aja kira2 masih ada mungkin lebih 10K qso yg blm aku masukkan di LoTW / elektronik logging.
Wes awang2en meh nglebokne siji siji

Kingman Reef – KH5K Can Be Activated!

Posted by ky6r on May 19, 2013
I have confirmed that Kingman Reef is above water at high tide, and is even protected from high surf. The approach and landing is easy – much easier than Clipperton Reef.

I have 100% confirmation from the Scripps Institute and marine biologists who have been there recently doing research. There is only 3 feet left above water at high tide, and an area of about 15′ by 100′ of coral rubble. This means any activation would have to be small. NO BIG TEAMS . . . .

It is in no danger of being deleted from the DXCC List – those 13 year rumors were unfounded. I met with Arne from the DXAC at Visalia, and am confident it will stay on the list. I just heard that Dave Patton from the ARRL announced that Kingman will remain on the list – so its now official from the ARRL.

There are ships that can easily get there from Honolulu, and the distance from Honolulu is similar to going from Kiribati. Kiribati has issues as far as available ships – Honolulu has an abundance of possibilities. Relative to VK0/H, FT5/Z and P5, this one would be less expensive.

The US F&W says that its nearly impossible to gain access, but who knows – miracles sometimes happen.

I can only imagine how incredibly cool it would be to activate . .. and as all of you know – its been my “obsession” for years.

Stay tuned . . . .

hahahaha, kalo expert mah gak akan tertatih2 gini OM Joy.
Mencegat DX yang kita "taksir" khan kalo dia yang kebetulan jalan2 dan mampir di warung orang - tapi kalo justru dia yang sedang buka warung terpaksa juga kita harus bertarung dalam big pileup.

Ke VR ya, salam untuk Charly - VR2XMT, HI NHI HI

SB PROP @ ARL $ARLP020
ARLP020 Propagation de K7RA ZCZC AP20
QST de W1AW
Propagation Forecast Bulletin 20 ARLP020
From Tad Cook, K7RA
Seattle, WA May 17, 2013
To all radio amateurs SB PROP ARL ARLP020
ARLP020 Propagation de K7RA This is, after all, the peak of the current solar cycle, or close to
it, so no surprise that solar indices are up. But based on past
solar cycles, many of us expected more. The latest forecast predicts
a peak for this cycle in Fall 2013, but of course that will be
determined afterward, and based on a long running average of sunspot
numbers. So don't miss this one. Don't wait until a year after the
peak, then lament not being on back when. Today may have the best
Spring propagation for a long time.

Ups...design nya udah jadi OM? maaf sekedar tanya aja, apakah ada warna pilihan lain?
 sangat berharap ada kaos (t-shirt) yang enak buat jalan2 traveling/shoping acara semi resmi. apakah ada rencana bikin seperti t-shirt para pe-Golf biasanya design nya sederhana bisa buat acara semi resmi, ga terlalu nyolok.
Thx

73 de Gunarso - YB1LZ

Maaf bagi yang bagi tidak berkenan, pertanyaan saya diabaikan aja.

OM,
Di 21.247MHz ada big pileup banyak yang spot = Zs8Z tapi koq saya dengarnya FR5DZ (Reunion).
Bagaimana OM Zen - YB0MZI/4 - tadi sudah worked - siapa yang bisa didengar tadi ya ?

OM Zen,
Awalnya ZS8Z QSO di frequency itu dengan FR5DZ, sepertinya memang yg CQing FR5DZ.
Mungkin saat itu ada yg sudah monitor dan siap2 sergap karena menyangka FR5DZ yg masuk ke frequency yg digunakan ZS8Z.

Satu aja spotting nulis ZS8Z maka yg berhasil QSO ikutan spotting ZS8Z.
Tapi bagus lho, OM Zen bisa tembus di pileup yg gila2an itu - saya sempat nyoba tapi putus asa seperti biasa karena justru susah terima stasiun yg kita panggil yg ditiban terus. HI.

Rupanya dahulu kala aplikasi yang diajukan bisa digabung antara paper QSL dan LoTW = diajukan sekaligus dalam satu form.

Sekarang pengajuannya harus masing2 antara paper QSL dan LoTW --> tapi totalnya tetap tergabung menjadi satu.
Kalau QSL kita 73 entities berupa paper QSL dan 88 QSL dari LoTW - gak perlu masing2 mencapai 100 entities.
Masing2 diajukan sendiri2 sesuai caranya, dan nantinya kalo semuanya sudah verified dan 100% valid, maka kita akan punya 161 entities dan terima DXCC award plus 1 sticker endorsement 150.

Gitu khan OM Busan, ya..?

OM Busan,
Ada di QST bulan Juni 2013 - FAQ tentang masalah DXCC ini.

Q : Since you no longer accept hybrid applications consisting of both paper and LoTW QSLs,
how do I apply for an award or endorsement when I need both types of confirmations ?

A : Each type of application has its own procedure and is submitted separately.
Please make a note on your submission that your DXCC totals need to be combined if you
are applying for an award.

From: Yb land Dx club
Topic: 2113 Message: 7591

Dear All,

One of the most interesting ways to use Club Log is to join your clubs, so that you can participate in your own leagues against friends. Also, if you are interested in joining in the HF or LF challenges organised by CDXC, then you can join these contests in Club Log and have your score automatically calculated by Club Log.

Note: members must add themselves to this club. Instruct them to click 'Settings' and then go to the 'Clubs' tab to join. This method allows users to opt-out (by default) of leagues and DXpedition charts. The opt-in principle is how Club Log is intended to work.

PS: Only YBDXC registered member who got the number membership will be approved.

http://www.clublog.org/edituser.php goes to settings, goes to clubs, thick YBDXC, goes to join clubs

Subject: Bls: Bls: [YBDXC_News] LoTW and Paper Qsl Card

OM Busan,
Ada di QST bulan Juni 2013 - FAQ tentang masalah DXCC ini.

Q : Since you no longer accept hybrid applications consisting of both paper and LoTW QSLs,
how do I apply for an award or endorsement when I need both types of confirmations ?

A : Each type of application has its own procedure and is submitted separately.
Please make a note on your submission that your DXCC totals need to be combined if you
are applying for an award.
Information can be found at : www.arrl.org/dxcc-forms

Subject: Bls: [YBDXC_News] LoTW and Paper Qsl Card

Rupanya dahulu kala aplikasi yang diajukan bisa digabung antara paper QSL dan LoTW = diajukan sekaligus dalam satu form.

Sekarang pengajuannya harus masing2 antara paper QSL dan LoTW --> tapi totalnya tetap tergabung menjadi satu.
Kalau QSL kita 73 entities berupa paper QSL dan 88 QSL dari LoTW - gak perlu masing2 mencapai 100 entities.
Masing2 diajukan sendiri2 sesuai caranya, dan nantinya kalo semuanya sudah verified dan 100% valid, maka kita akan punya 161 entities dan terima DXCC award plus 1 sticker endorsement 150.

Gitu khan OM Busan, ya..?

Wah saya masih banyak kurang utk AAA.

15M belum dapat ZS1, ZS4 dan ZS6 sedangkan 10M masih blom dapat ZS4 dan ZS5.
Tadi sempat monitor di 10M ada ZS5AY sedang ragchewing dg VK-land - saya tunggu kesempatan untuk panggil ZS5AY saat itu.

Eh, malahan over yg pegang kendali malahan ZS3Y yg saya sudah dapat - tapi gak lama kemudian ternyata yg CQing ZS8Z.
Alhamdulillah berhasil worked dg Marion Island itu, walaupun ditiban2 entah oleh AR mana yang akhirnya David- ZS8Z ngambeg QRT karena JA tetap panggil dia waktu dia panggil satu AR Russia.

7608. Bls: Bls: [YBDXC_News] AAA

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-05-23 11:55:52 UTC
From: hendro s.joedho
Topic: 7596 Message: 7608

OM Zen,
Kalo pileup yg kemarin itu saya pusing, karena saking bertumpukan sampai saya gak bisa mendengar suaranya ZS8Z nya, yg ternyata akhirnya over ke FR5DZ.
Sedangkan tadi itu dia split, jadi yg bertumpukan kita2 saja dan waktu dia panggil saya dg suffix "QR" tetap saja ditimpa2, akhirnya sempat terbaca "Yankee.... QR" sampe akhirnya full callsign.
Yang kasihan khan RA4..Y yg sedang dipanggil tapi karna tertutup terus sampai ZS8Z ngambeg dan QRT, blm sempat worked.

Om Hendro

Akhirnya rx juga QSL JX9JKA.
Terima 2 amplop malah,
Karna saya kirim 2x.. Hehehe

Tinggal TO2D aja yg belum dapat balasan,

Kalo NH8S swains island , apakah sudah ada yg dapat balasan QSL ???
Saya OQRS dan belum dapat jawaban,,

ARLP021 Propagation de K7RA ZCZC AP21
QST de W1AW
Propagation Forecast Bulletin 21 ARLP021
From Tad Cook, K7RA
Seattle, WA May 24, 2013
To all radio amateurs SB PROP ARL ARLP021
ARLP021 Propagation de K7RA Overall, solar activity is still pretty quiet, but one positive sign
was on May 16, when the daily sunspot number was 212. I eyeballed
the records, and had to keep searching further and further back to
find a higher sunspot number. One year, six months and one week earlier, on November 9, 2011 the
sunspot number was nearly that high, at 208. We look clear back
seven years, 10 months and 12 days to July 4, 2005, another near
miss at 192. To find activity beating the May 16 number we have to
go back nearly a decade, to November 1, 2003 when the daily sunspot
number was 277. This was way back on the downward slide of cycle
23, nine years, six months and 15 days earlier than our recent high
number. Let's hope for many more days like this. That seems
likely, as the peak of this solar cycle is predicted for this fall,
which begins about four months from now, on Sunday, September 22.

OPDX Bulletin 1113 May 24, 2013
The Ohio/Penn Dx PacketCluster
DX Bulletin No. 1113
BID: $OPDX.1113
May 24, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Letter/Web Page, K1XN & GoList, NC1L, NJ1Q & W1AW, KH2AR/W4, N200, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, K5WE, K6VVA, KH6BZF, K8GI, K8YSE, W8GEX & 60m News, W9ILY, 9M6DXX, ARVM, AT International, DK8JB & The DX News Letter, DK9IP, DL1MGB, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, HB9ASZ, HS0ZCW, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK1SOW, IK8YFU, NP4G, OZ1BII, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, SU1SK, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF) and YO3JW for the following DX information.
EDITOR'S SPECIAL NOTICE
This week's bulletin was sent out earlier than normal to accommodate the late CQWW WPX CW Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW WPX CW Contest participants.
SPECIAL NOTE FROM EDITOR (Short Dayton HamVention Wrap-Up By KB8NW)
It has been an interesting couple of weeks due to my health issues, but things seem to be better now since my heart procedure, and I was able to attend Dayton. It is always great to see the many DXers from all over the world. It is the special camaraderie I enjoy, visiting and talking to the DXers/Contesters of the world. The NODXA Hospitality Suite is a great place to share this camaraderie with well-known DXers.
Anyway, I did miss the DX Dinner Banquet because of my duties of helping to run the NODXA suite with our hostess Janeen Hire (W8ZET). We did hear, however, that the NH8S Swains Island operation received the "SWODXA (SouthWest Ohio DX Association) DXpedition of the Year for 2012-2013".
The weather was almost perfect for the flea market, but it did not fair too well for my bad knee (with all the walking). This year's DX Forum included talks on:
* DX legend Al Hix, W8AH (SK) - speaker Hal Turley, W8HC
>* Interesting talk on propagation, Cycle 24 and a possible second peak - by Carl Luetzelschwab, K9LA
>* DXpedition to St. Peter & St. Paul Rocks - by George Wallner, AA7JV
>* DXpedition to Yemen (Socotra Island) - by Dave Collingham, K3LP
The 2013 Dayton HamVention in all was a great time and experience.

Kalau saya terima :
1. TO2D Untuk 10/15 M band kirim tanggal 19/10/2012, terima tanggal 14/12/2012
2. JX9JKA untuk 15M band kirim tanggal, 19/10/2012, terima tanggal 17/05/2013
3. NH8S belum worked sbb pada waktu QRV saya baru pasang antenna di Bengkulu, jadi hilang kesempatannya hi..
4. Hari ini terima Endorsement stiker DXCC 150 + QSL papersnya (berkat bantuan Om Steve dan Om Anton, Tu ya Om...)

Mantap om Zen,

Kemarin siang waktu kumpul-kumpul di Living World bersama YB0COU , YB0MWM , YB1TJ , YB1UUN dan YB2EUZ.
Sempat baku ganggu soal DXCC sampai DXCC Challange.
Ternyata salah satu diantaranya barusan klem 9 buah DXCC + DXCC Challenge.. Hebat om Zen, 1 kejar 1 band lagi (80M) sudah ßišª dapat 5B DXCC beliau..

Kapan ya kita berdua ßišª nyusul heheehe

OM Joni,
Koq mau nyusulnya cuma berdua OM Zen saja ?

Selamat OM Zen baru terima amplop putih - dibuka ada amplop coklat kecil - dibuka lagi ada sticker putih huruf merah ada logo sama 150.

Mantap om Zen,

Kemarin siang waktu kumpul-kumpul di Living World bersama YB0COU , YB0MWM , YB1TJ , YB1UUN dan YB2EUZ.
Sempat baku ganggu soal DXCC sampai DXCC Challange.
Ternyata salah satu diantaranya barusan klem 9 buah DXCC + DXCC Challenge.. Hebat om Zen, 1 kejar 1 band lagi (80M) sudah ßišª dapat 5B DXCC beliau..

Kapan ya kita berdua ßišª nyusul heheehe

Bukan pesimis, tapi sementara ini saya bisa ngukur kemampuan, OM Joni. xixixi
Tapi memang lucu juga nih, waktu mulai aktif DXing lagi saya pasang target 10M dapat 100 entities saja.

Khan di jumlah 80an mulai seret, jadi masih berasa seru - tapi begitu dapat 100 an koq lancar sampai sekitar 120an - jadinya targetnya 150 entities - eh malahan sekarang confirmed 177 entities, mau maksain sampe 200an aja deh. Semoga sih bisa tercapai.
Kalo 15M sedapatnya aja deh.

Selamat siang buat pak dani , pak budi n teman2 orari. Sy mohon maaf sebelum nya baru balas email nya.

Saya mau memberikan info masalah pesanan kaos lacoste hitam kombinasi orange. Sebelum nya saya perlu jelaskan bahwa bahan kaos tersebut dr warna hitam yg saya miliki Cotton jenis nya berbeda sedikit sm yg terdahulu, begitu juga warna orange nya , yg sekarang saya miliki lebih tua warnanya.

Jadi dari kwalitas di jamin tidak kalah dengan terdahulu namun dr sisi warna ada sedikit beda.

Masalah order hanya 17 - 20 pcs saya siiap membantu buat teman2 kita di orari. Sy tidak masalah untuk persahabatan n ke bersamaan kita.

Kira nya demikian info ini yg bisa saya berikan ke teman teman.

Salam orari,

Tonny

Welcome to our Website

12 to 27 November 2013

JH3PRR, W6SZN, ZL1GO and ZL3CW are setting up a DXPedition to American Samoa under the Special Events Station Callsign N8A especially for the CQWW CW contest but with extended precontest activity intended to make KH8 widely available.

* Operations on HF 10-160m
* Significant effort on 160 meters
* Focus on EU for the high bands
* CW will be the primary mode with some SSB and RTTY possible
* Location will be well south of Pago Pago to limit mountain low angle blockage

OPDX Bulletin 1113 May 24, 2013
The Ohio/Penn Dx PacketCluster
DX Bulletin No. 1113
BID: $OPDX.1113
May 24, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Letter/Web Page, K1XN & GoList, NC1L, NJ1Q & W1AW, KH2AR/W4, N200, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, K5WE, K6VVA, KH6BZF, K8GI, K8YSE, W8GEX & 60m News, W9ILY, 9M6DXX, ARVM, AT International, DK8JB & The DX News Letter, DK9IP, DL1MGB, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, HB9ASZ, HS0ZCW, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK1SOW, IK8YFU, NP4G, OZ1BII, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, SU1SK, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF) and YO3JW for the following DX information.
EDITOR'S SPECIAL NOTICE
This week's bulletin was sent out earlier than normal to accommodate the late CQWW WPX CW Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW WPX CW Contest participants.
SPECIAL NOTE FROM EDITOR (Short Dayton HamVention Wrap-Up By KB8NW)
It has been an interesting couple of weeks due to my health issues, but things seem to be better now since my heart procedure, and I was able to attend Dayton. It is always great to see the many DXers from all over the world. It is the special camaraderie I enjoy, visiting and talking to the DXers/Contesters of the world. The NODXA Hospitality Suite is a great place to share this camaraderie with well-known DXers.
Anyway, I did miss the DX Dinner Banquet because of my duties of helping to run the NODXA suite with our hostess Janeen Hire (W8ZET). We did hear, however, that the NH8S Swains Island operation received the "SWODXA (SouthWest Ohio DX Association) DXpedition of the Year for 2012-2013".
The weather was almost perfect for the flea market, but it did not fair too well for my bad knee (with all the walking). This year's DX Forum included talks on:
* DX legend Al Hix, W8AH (SK) - speaker Hal Turley, W8HC
>* Interesting talk on propagation, Cycle 24 and a possible second peak - by Carl Luetzelschwab, K9LA
>* DXpedition to St. Peter & St. Paul Rocks - by George Wallner, AA7JV
>* DXpedition to Yemen (Socotra Island) - by Dave Collingham, K3LP
The 2013 Dayton HamVention in all was a great time and experience.
DXCC COUNTRY/ENTITY REPORT
According to the AR-Cluster Network for the week of Saturday, 18th-May, through Saturday, 25th-May there were 217 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5N, 5R, 5T, 5U, 5V, 5W, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9U, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, BV, BY, C3, C6, CE, CE9, CM,

CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FK, FM, FO, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, JA, JD/o, JT, JW, JY, K, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PY, PZ, R1FJ, S5, S7, SM, SP, SU, SV, SV/a, SV5, SV9, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2E, VP5, VP6, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU,

OM Iwan,
Operasinya/QRVnya belum diakui DXCC atau memang license nya yg gak ada (pirate).
Kalo belum diakui khan masih ada harapan nantinya diakui. HI

Entity ini khan beda ya OM Iwan dengan TN2.

Om Iwan

Kalo ßišª panggil 9Q6AL dengan gampang, boleh la.
Kalo Not Valid untuk DXCC , kan boleh pake buat CQ DX award.

Kayak kasus yg saya alamai , 9U5T ditolak cintanya oleh DXCC dan akhirnya dapat jodoh juga di CQ DX award.. Hahahaha

OM Hen,

License nya ngga ada, cuma ada application buat minta license doang.

Wah kurang confirm 100% kalo soal 9Q (Democratic Republic of the Congo, bekas Zaire?) dan TN2 (Republic of the Congo) beda or sama OM Hen.
Kaya nya sih beda kalo liat di peta political border.

Iwan

Yang kasihan baca keluhannya AR Korea (6M0DX) waktu ngejar Honduras (HQ3W) :

6M0DX HQ3W 21260.0 [NA-160] always QRT when we start to hear him... 2341z 29 May
6M0DX HQ3W 21260.1 [NA-160] PSE continue, don't QRT now! 2337z 29 May
6M0DX HQ3W 21260.0 [NA-160] weak but getting better now 2333z 29 May

Dari berharap bisa QSO karna signal HQ3W menguat - eh malahan QRT.

PF OM Uun,
Sebenarnya pileup sepertinya gak rame banget ya, cuma masalah buat saya itu signal dia masih hawar2, saya berharap signalnya makin menguat - atau minimal bila OM Hotang-YC0IEM worked baru saya ikutan panggil.

Semoga nantinya sekalian dibalas QSL card dari CE1A, dimintain ke Nicolas - sang Manager CE1A.

Pagi ini lumayan bisa dengar CE1DY - Domingo di 15M tapi masih hawar2.

Selamat utk OM Uun - YB1UUN yg sudah berhasil worked, sambil monitor beberapa rekan YBland memanggil, saya tunggu sampai jelas dulu deh, kalo nasib lagi gak bagus paling tambah hilang signalnya.

Good luck OM Hotang - YC0IEM..., saya antri di belakang anda. HI

Iya OM Hen, tadi signalnya kuat saya terima, setelah putar antena kesana-kemari ternyata terkuat malah ke arah utara.
Saya sdh email2an dgn OM Nick, katanya sdh kirim tapi kenyataannya nggak sampai2, ya sudah lupakan saja, cari yg lainnya lagi. Mudah2an OM Domingo ini sampai balasannya.

Buat OM Irsan, iseng2 tadi buka cluster sebelum berangkat. Buka radio koq kuat signalnya. Jadi ya manggil dulu sebelum berangkat

PF OM Uun,
Sebenarnya pileup sepertinya gak rame banget ya, cuma masalah buat saya itu signal dia masih hawar2, saya berharap signalnya makin menguat - atau minimal bila OM Hotang-YC0IEM worked baru saya ikutan panggil.

Semoga nantinya sekalian dibalas QSL card dari CE1A, dimintain ke Nicolas - sang Manager CE1A.

Saya beruntung OM Hen berhasil QSO dgn OM Domingo. Ternyata beliau adalah operator dari CE1A yang QSL Card saya sampai 3x blm dibalas juga.
Iseng2 saya lampirkan juga QSL Card buat CE1A kepada beliau, siapa tahu dapat juga.
Demi mendapatkan zone 12 semangat kirim kartu. LoTW cfm Chile di 17m.

Iya OM Uun...

Kebayang masih bisa ikutan pile-up meski ga 'seganas' pile up yg
lain...hehehe

Ok selamat beraktivitas ya Om Uun... semoga nanti sy juga kebagian station
DX yg
langka - langka... setelah beberapa hari lalu berhasil mendapatkan station
Puerto Rico KP4DKE.... sy mulai jadi semangat lagi....hahahaha..

Trims OM...73

7690. QSL Manager

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-05-31 04:24:44 UTC
From: Yb land Dx club
Topic: 7690 Message: 7690

http://www.ybdxc.net/2013/05/qsl-managers.html

Tips for QSL'ers

DX stations, especially the rare ones, receive thousands of QSL cards. So, if you really want a return on your QSL, then it is imperative that you package your outgoing QSL card properly.

Consider who is receiving your card...
Are *you* considered "rare DX" to the person who is receiving your QSL card?
Especially in the case of stateside hams, most times the answer to this question is an emphatic "no". If this is the case, and if you expect a return QSL, you must make provisions for that return. At an absolute minimum, include a self-addressed, stamped envelope (SASE) to help ensure a returned QSL card. If you send your QSL card as a postcard, you can expect not to see a return QSL in most cases. (If you do, consider yourself lucky!)

Packaging your outgoing QSL (direct or via QSL Manager)
Correct date and time on the QSL - It is important that the exact date and time are entered on your outgoing QSL card. If you make an error, you risk getting your card back from the QSL Manager with "NIL" (Not In Log) written on it. If you do get the DX stations' QSL card despite an incorrect date/time, consider yourself fortunate ... the QSL Manager took the time to search the log for your QSO! One of the most common reasons why dates and times are incorrect is that the QSL'er has failed to use UTC date and time!
QSL Card Design - As suggested by Bob Locher, W9KNI, in his book "The Complete DX'er", it is advantageous to have your callsign on the same side of your QSL card as the QSO information. By doing so, the QSL Manager doesn't have to flip back and forth from one side of your QSL to the other as he/she verifies QSO information. This decreases the chance that the QSL Manager might get your callsign wrong. Nobody wants to get back a QSL card from a rare DX station, just to find that it's not YOUR callsign on the card!
Pre-glued SASE Envelopes - Can you imagine having to lick three hundred envelopes in one day? By using SASE's that are pre-glued, you are making the QSL Manager's job much easier. These types of envelopes have a "wax-paper" strip along the pre-glued portion. All the QSL Manager has to do is to peel off the strip and seal the envelope. [Note: For the most part, I have seen such envelopes coming only out of Japan ... it will be nice when they are more readily available in the U.S.]
Use a piece of wax paper - Include a sheet of wax paper on the inside of the nested envelope. This prevents the envelope from "self adhering" during transit to the DX station or Mgr. This is especially useful when sending to tropical areas or when you know the envelope is traveling via air where moisture can be present. (Thanks, Dale H. Cole K9TTT, for the tip!)
Return Address on SASE's - Many SASE's received by QSL Managers do not have return addresses on them. Since the QSL Manager deals with many SASE's, it's unlikely he/she is going to put their own address as a "return address" on the envelope. It is suggested that the QSL'er put the QSL Manager's address on the top-left corner of the SASE. This is cheap insurance to help keep your QSL card out of the postal service's "dead letter" file.

Pre-stamped SASE - If you are able to obtain the correct postage stamps for the country of the card recipient, it is suggested that you affix the stamps to the SASE. There are two benefits to doing this:
(1) You make the QSL Manager's job easier, since he/she will not have the extra task of doing postage for your card
(2) Your card will likely be sent out as soon as it is processed (it won't have wait in a queue for postage).
NOTE: If you pre-stamp your SASE, be sure to affix enough postage. And, if you do not pre-stamp, as always you must include appropriate compensation to cover all postage expense!
Direction of the fold of the SASE- In many cases, you are required to fold your SASE so that it will fit into your outgoing envelope. When you insert the folded SASE into the envelope, do so with the "fold" downwards. In other words, don't allow the fold to be up at the top of the inside of the envelope.
If the fold is at the top, then the SASE could possibly be sliced in half as the QSL Manager uses his/her letter opener. As a QSL Manager, I have sliced several SASE's in half -- although they can be taped back together, it's not much fun to go dig the tape out and perform surgery.
Callsigns on Envelopes - Unfortunately, in some countries, postal workers have earned a less than honest reputation. In these cases, any envelope that is identified as containing "ham radio contents" could be stolen. Apparently, these thieves have discovered that stealing green stamps (dollar bills) that are often included in the envelopes can be a profitable business. So, if your "To" envelope or SASE will travel through potentially "unsafe" postal systems, your envelope will have a better chance at making it through if you avoid putting your callsign on the outside of it.
However, it is a good idea to put your callsign on this INSIDE flap of the SASE. That way if the QSL manager gets your envelope mixed up with another envelope, he doesn't have to research your name to find out what callsign it belongs to. Written inside, under the flap, mail thieves won't see it! (Thanks, N6VHF, for the tip!)
Avoid sending your card as "registered" or "certified" mail- When a card is sent as registered or certified, it is inconvenient for the QSL Manager to have to go down to the Post Office to retrieve it. And, since it takes a bit longer to receive the card (as it awaits the QSL Manager at the local Post Office), this process delays the return of your awaited QSL card. The only time that you should send registered or certified mail is if this process is the only way of guaranteeing that the envelope is handled properly through your country's postal system.
Include collectible stamps in your envelope - If you have any domestic stamps that are less common in your country, and if the QSL Manager, to whom you are sending the QSL request, resides in another country, include these stamps in your envelope. Chances are good that the QSL Manager collects stamps, and he/she will likely appreciate your contribution to the collection.

Barusan baca spotting dari OM Iwan/YE1NZ ada TI8AA DI 21.242mhZ (15M).
Kalo lihat foto di QRZ.com perangkat radionya dan antennanya ada di pantai, bukan di atas kapal.
Tetapi kenapa ya, oleh DXCC - QSL card saya dari TI8AA untuk 10M ditolak dengan alasan "shipboard operation".

Di QRZ.com dan di QSL card gak ada keterangan yg menunjukkan ybs ada di kapal walaupun sedang berlabuh sekalipun. Antenna yg digunakan waktu itu untuk 10M = 4 elements Quad yg rasanya gak umum untuk maritime mobile.
Walaupun ada kontak lain dengan Costa Rica - TI2CC, TI2/AA8VL - saya tunggu kalo ada yg LoTW saja ah.

I will be QRV next time in Market Reef 2.6.-7.6.2013
QSL info: Please DO NOT send your QSL card direct if you are not in my log. I will return your QSL card and you loose your money or IRC!
QSL status: I have uploaded my logbook to LoTW and sent direct QSL cards which I have received until 31.12.2011
If you still need my QSL card PSE contact me!
I am working here in Market Reef with other members of The Finnish Lighthouse Society. We are repairing lighthouse buildings, so I have very limited time to work QSOs. See our diary

FY/F5UII from 5th to 14 june 2013
Posted on Saturday May 25th, 2013 by F5UII
I come back for a business trip to Guiana from 5 to 14 June 2013. I will be active with my TS-480SAT on the HF bands in SSB from the radio club FY5KE Kourou. Of course, since i go to Guiana for a “pro mission”, I could not be QRV more than few hours, some days in compatibility of my others activities. I think to be QRV during the week days mornings about 10z to 11:00z and after 21:00z.
I am considering a new incursion on Isle Royale for FY/F5UII/P activation (IOTA SA-020) with a multiband wire antenna which will allow me to be QRV SSB 80 to 10 meters. This activity is not yet certain. If i travel to Royale Island, it will be the week-end, 8. and 9. june. To keep you informed of the conduct of the activity, you can follow me via Twitter @f5uii.

http://www.qrz.com/db/T46C

The T46A group member we worked to activate this IOTA expedition 13 to June 17, 2013 in Cayo Santa Maria (NA-204), in order to help all the friends in the world to confirm IOTA islands of Cuba, we asked for help to all the friends that listen well iran giving instructions during the activation operators, try to to maintain to 2-3 permanent stationsin the air, 1 - SSB, 1-CW-RTTY one most of the time this does not mean that at times are 2 stations in SSB or CW at the same time on different bands, it's all depending on the spread. For bands of 80 and 160 will be only one band at a time mainly CW as the antenna we have this set for this portion, if possible try on 75 meters SSB but with worse conditions.

Any help on components for future IOTA expedition will be well received as examples a set of bandpass filters orcarbon fiber masts.

For any questions please contact us at: luis.co6lp @ gmail.com

Thanks and regards operators and members of T46A T46C.

http://www.dxuniversity.com/showpage.php?id=25&title=Best_Practices_for_Courteous_and_Efficient_DXing

Best Practices for Courteous and Efficient DXing

1.Know the DX callsign and the location of the pileup by listening carefully to the DX station and the pileup before calling.

2.Beware of erroneous spots: Copy the DX station’s call sign yourself.

3.Be careful never to transmit on the DX frequency – learn how to use your radio properly.

4.Never interfere with an existing exchange of information.

5.Always send your full callsign.

6.Call once and then listen. Then call again, if appropriate. Try not to call during an existing QSO.

7.Respond only if the DX operator calls you. One letter or number of your call is NOT enough reason to call.

8.If the DX operator has sent your call correctly, do not repeat it unless required by licensing regulations.

9.Do not call if the DX operator asks for other geographic areas.

10. To encourage the most courteous and efficient operation, operate in the way that you would expect others to operate.

http://www.dxuniversity.com/showpage.php?id=20&title=Best_Practices_for_DXpedition_Operating

Best Practices for DXpedition Operating

"The nature of a DXpedition pileup mirrors the skill of the DXpedition operator" - OH2BH. A carefully managed pileup will run with little disruption to the band and lots of fun for the DXers. Here are some suggestions that will help you make the most of the pileups. (Click the link for more information.)

1. Check transmit and receive frequencies before starting.

2. Use split operation from the beginning.

3. Maintain a rhythm of regular transmissions – no long silences.

4. Do not use excessive speed on CW. Slow down when signals are weak.

5. Reduce speed further on CW to pass information to the pileup.

6. Sign our call sign at least every minute.

7. Issue calling instructions after every QSO, for example 'UP5 EU' on CW or 'NA UP 5-10' on SSB.

8. Minimize Pileup Width: Suggest Max 5-8 kHz CW and 10-15 kHz SSB.

9. Move receive frequency in a generally regular pattern.

10. Repeat corrected call signs so everyone is confident of being correctly logged.

11. Work and log dupes, it’s quicker.

12. Don't leave the pile-up hanging. Keep the callers informed about QRT/QSY, etc.

13. Maintain a moderate, but “in-charge” attitude.

From: Yb land Dx club
Topic: 2113 Message: 7702

Dear All,

One of the most interesting ways to use Club Log is to join your clubs, so that you can participate in your own leagues against friends. Also, if you are interested in joining in the HF or LF challenges organised by CDXC, then you can join these contests in Club Log and have your score automatically calculated by Club Log.

Note: members must add themselves to this club. Instruct them to click 'Settings' and then go to the 'Clubs' tab to join. This method allows users to opt-out (by default) of leagues and DXpedition charts. The opt-in principle is how Club Log is intended to work.

PS: Only YBDXC registered member who got the number membership will be approved.

http://www.clublog.org/edituser.php goes to settings, goes to clubs, thick YBDXC, goes to join clubs

San Andres & Providencia
Archipelago of San Andrés, Providencia and Santa Catalina (Spanish: Archipiélago de San Andrés, Providencia y Santa Catalina); or colloquially San Andrés y Providencia is one of the departments of Colombia. It consists of two island groups about 775 km (482 mi) northwest of Colombia and 220 km (140 mi) from the coast of Nicaragua, and eight outlying banks and reefs. The largest island of the archipelago is called San Andrés (island) and its capital is San Andrés.
Extracted from wikipedia:
http://en.wikipedia.org/wiki/Archipelago_of_San_Andrés,_Providencia_and_Santa_Catalina
San Andrés (island) is a coral island among the Colombian islands in the Caribbean Sea. Historically tied to Colombia, and politically part of Colombia,"[1] San Andrés and the nearby islands of Providencia and Santa Catalina form the department of San Andrés, Providencia and Santa Catalina.[2][3] San Andrés, in the southern group of islands, is the largest of the department. The official languages of the department are Spanish, English, and Creole.

The postage is only $1.00 not $10.00. I will just be mailing you the band endorsement and continental endorsement and the prefix endorsement stickers. The certificate will come from CQ in New York in 2 – 3 months – you do not have to pay for postage for that.

Just send me $17.00 US via Paypal.

Steve

Budi

Welcome to the CQ WPX Award Program

I have received your application for the CQ WPX SSB award via LoTW. All is in order.

The attached invoice lists the CQ award fees for this award. You may pay with PayPal to sbolia@... or send cash to my QRZ.com address.

If you are a CQ subscriber please email me your subscription number from a recent label and you can deduct $6.00 for each Award certificate.

I will order your certificate upon receipt of payment. Please verify that the address on the letter is your correct mailing address for your awards.

CQ Prefix Award (WPX)
ARRL is pleased to announce that Logbook of The World will now handle CQ WPX awards. However, please note that ARRL will not be the administrator for CQ awards. We are simply providing a method for Logbook of The World account holders to apply confirmed QSOs in your LoTW account to the CQ WPX award.
Any fees paid through your LoTW application are for the use of LoTW. CQ will add their usual application fee to your award as well as any charges for plaques, pins, postage, etc.

Budi

The postage is only $1.00 not $10.00. I will just be mailing you the band endorsement and continental endorsement and the prefix endorsement stickers. The certificate will come from CQ in New York in 2 – 3 months – you do not have to pay for postage for that.

Just send me $17.00 US via Paypal.

Steve

Budi

Welcome to the CQ WPX Award Program

I have received your application for the CQ WPX SSB award via LoTW. All is in order.

The attached invoice lists the CQ award fees for this award. You may pay with PayPal to sbolia@... or send cash to my QRZ.com address.

If you are a CQ subscriber please email me your subscription number from a recent label and you can deduct $6.00 for each Award certificate.

I will order your certificate upon receipt of payment. Please verify that the address on the letter is your correct mailing address for your
awards.

CQ Prefix Award (WPX)
ARRL is pleased to announce that Logbook of The World will now handle CQ WPX awards.
However, please note that ARRL will not be the administrator for CQ awards. We are simply providing a method for Logbook of The World account holders to apply confirmed QSOs in your LoTW account to the CQ WPX award.
Any fees paid through your LoTW application are for the use of LoTW. CQ will add their usual application fee to your award as well as any charges for plaques, pins, postage, etc.

Pak Busan,

Misale aku apply

WPX CW
WPX SSB

Bayarnya brp?
17 x 2 = 34
Atau
17 + 1 = 18 (utk 2 sertifikat CW+SSB basic)
Boleh ndak ya?

OM Busan
ini hanya bayar yang ke CQ nya, tapi yg bayar ke ARRL LoTW, masih ada yaitu USD 0.25 per lembar, tergantung berapa yg di endorsed, hehehe, makanya jadi mahal. Kecuali Steve N8BJQ, akan memintas dng melihat langsung LoTW kita, dan issued tanpa sepengetahuan LoTW, wah bisa gegeran nanti mrk, soalya persiapan khusus server utk WPX per April 2012, juga makan banyak tenaga dan biaya..

Tnx info

Budi

The postage is only $1.00 not $10.00. I will just be mailing you the band endorsement and continental endorsement and the prefix endorsement stickers. The certificate will come from CQ in New York in 2 – 3 months – you do not have to pay for postage for that.

Just send me $17.00 US via Paypal.

Steve

Budi

Welcome to the CQ WPX Award Program

I have received your application for the CQ WPX SSB award via LoTW. All is in order.

The attached invoice lists the CQ award fees for this award. You may pay with PayPal to sbolia@woh.rr.com or send cash to my QRZ.com address.

If you are a CQ subscriber please email me your subscription number from a recent label and you can deduct $6.00 for each Award certificate.

I will order your certificate upon receipt of payment. Please verify that the address on the letter is your correct mailing address for your
awards.

Pak Busan,

Misale aku apply

WPX CW
WPX SSB

Bayarnya brp?
17 x 2 = 34
Atau
17 + 1 = 18 (utk 2 sertifikat CW+SSB basic)
Boleh ndak ya?

Cara cara spt ini apakah sdh seizin ARRL ???? Kalau ketahuan ARRL nantinya bisa berabe... Hahhahaahaha.. Bukan ke kita yg apply cqwpx award tapi mungkin bisa saja cqwpx award program di hapus dari LoTW...

Kalau sdh begitu... Kumpulin Kartu lagi deh... Hhahhahahhahaha..

Rupanya ada terobosan baru betul. We don't have to apply via LoTW, just give your LoTW username and password to N8BJQ, as long as you have minimum requirement QSOs..

Bejo nya OM Busan nih hehehehe...

Salam dani

Budi The postage is only $1.00 not $10.00. I will just be mailing you the band endorsement and continental endorsement and the prefix endorsement stickers. The certificate will come from CQ in New York in 2 – 3 months – you do not have to pay for postage for that. Just send me $17.00 US via Paypal. Steve

Budi

Welcome to the CQ WPX Award Program

I have received your application for the CQ WPX SSB award via LoTW. All is in order.

The attached invoice lists the CQ award fees for this award. You may pay with PayPal to sbolia@....com or send cash to my QRZ.com address.

If you are a CQ subscriber please email me your subscription number from a recent label and you can deduct $6.00 for each Award certificate.

I will order your certificate upon receipt of payment. Please verify that the address on the letter is your correct mailing address for your awards.

73

Steve Bolia, N8BJQ
CQ WPX Award Manager

OM Joy,
Kalo mau cepat kirimnya ke OM Steve Busono, bukan OM Steve Boila.

CQ bulan Mei 2013 sudah diterima blm ? Koq penampakan Juni 2013 sudah ada yg Mei saya blm terima ya. Payah CQ - baru bulan kemarin saya kirim email apreciate bisa datang lebih awal - ternyata sekarang telatnya banget2. ;-(

Waduh gimana tuh ya CQ.

Majalahnya 2 bulan = 2 nomor belum sampai ke Sorong padahal YB9WZJ juga sudah bayar duluan.
Kalo saya yang May 2013 yg belum sampai, kalo yang Juni sih iyalah walopun buat QST Juni sudah lama sampai.

Eh, award untuk Makassar juga belum sampai.
Tapi sabar saja OM Fadly, karna khan tinggal tunggu kiriman award dari sana - sedangkan untuk saya malahan CQ nya (award managernya) masih tunggu kiriman aplikasi dari saya, HI HI
Belum cukup px nya, jadi blm kirim aplikasi.

WPX SSB/DIGITAL Award malah dari bln 12/2012 belum terima padahal pembayaran sudah lunas.
Malah stiker duluan tiba,,

Om Hendro.

Saya juga belum terima.
Sudah 2 bulan,

Ada masalah mungkin??

OM Joy,
Kalo mau cepat kirimnya ke OM Steve Busono, bukan OM Steve Boila.

CQ bulan Mei 2013 sudah diterima blm ? Koq penampakan Juni 2013 sudah ada yg Mei saya blm terima ya. Payah CQ - baru bulan kemarin saya kirim email apreciate bisa datang lebih awal - ternyata sekarang telatnya banget2. ;-(

Hello DXers,

Sy jg sdh apply n resmi melalui LOTW untuk 400 Prefix. Karna sy ikut beli majalah CQ melalui online, maka dapat diskon dari Om Steve. Sekarang lg nungguin Award nya dikirim dari NY. Sdh nungguin 2 bln blm dapat juga. Mudah mudahan dalam waktu dekat.

Demikian infonya dan mudah mudahan bermanfaat.

Salam,
Joy / YB0NSI.

OM Zen, ikutan aja nih.. HI.

Kalo OM Eddy baru 2 bulan klaim "award" sih belum lama lah OM - itu tuh OM Fadly sudah 6 bulan sedangkan kalo saya & OM Joni itu majalah CQ nya yg belum datang.
Tadi tukang pos datang mengantar 1 QSL card dari T30PY.

Sayangnya progres CQ award ini gak bisa kita ikuti/monitor ya - gak seperti DXCC yg bisa kita lihat online.

OM Joy,
Saya agak kesulitan kalo baca artikel panjang di layar komputer apalagi yg cilik, apalagi bahasa inggris, wah.

Mangkanya kadang beberapa artikel yang saya peroleh via internet, saya cetak baru bisa saya baca2 dengan nyaman dan santai.

OM Joy, jangan lupa - Kalo mau dapat diskon dari OM Steve N8BJQ jangan salah tulis namanya ya.
Tulisnya : Stephen D. Bolia/N8BJQ - kalo salah tulis nama keluarganya jadi BIOLA bukan dapat diskon malahan kena denda/penalty.

Sayang kurang lengkap.
Biasanya juga ada OM Bobby (YB2BBY), OM Adhi (YB3MM), OM Imam (YB4IR), OM Joni (YB9WZJ) atau rekan dari Bali, NTT/NTB.

Kalo pas muncul dari semua call area, banyak yg suka karena bisa lengkap.

Oh iya, zero koq gak ada ya.
BiasanyaOM Arief memang yg aktif kadang OM Ndut, beberapa waktu juga OM Hotang (YC0IEM).
Lihat di cluster juga OM Arief sudah kontak dengan Chile - padahal kuping sudah saya tempelin headphone gak kedengaran signalnya Chile.

http://www.ybdxc.net/2013/06/vk9dac-christmas-island-2013.html

http://vk9dac.coffeecup.com/

On the 24 June 2013 I will be travelling to Perth Western Australia for the WIA Annual General Meeting. On Tuesday 28th following the WIA Annual General meeting I will travel to Christmas Island for some rest and relaxation. The main reason for the visit is bird watching. Christmas Island has some unique bird species and is a very interesting location for beautiful scenary and wildlife. It would be impossible to travel to such a unique radio location without taking some radio equipment along on the trip. It is not a DX holiday but it does give the opportunity to make some contacts from this location. Christmas Island is a beautiful location off the north west coast of Australia between the Australian mainland and Indonesia , http://www.christmas.net.au/

From May 28 until June 4 2013, I will be on the island, and will be operating as VK9DAC. Christmas Island has the Amateur Radio stauts of a DXCC recognised country with a VK9 prefix. The continent is OC, ITU 54, CQ 29 and entity code 035. The Yarra Valley Amateur Radio Grooup will be my back up in Australia and the link to their web site is www.yvarg.org.au. If you have any queries please call Steve VK3TSR. See the YVARG web site for contact details

Aduh jangan di 80m dong nggak nyampe ke East Coast hanya west coast dan AS saja nanti.

Gimana kalau buka warung di 40m jangan kemalaman lho kalau sudah lewat jam 10z sudAh sunrise di sini sulit terdengar. Terakhir saya qso yb land di 40m ssb dengn YE30P sekitar jam 09:30z di atas 7.150.

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).
3D2, FIJI
Just a reminder that by the time you read this Harry, AA2WN, will be active as 3D2WN from Fiji until June 7th. The main purpose of the trip is scuba diving, but he will be active when he is not diving. Activity will be mostly on 20 and 17 meters using CW, SSB and possibly some digital modes. He will use an IC706MKII with 100 watts into a dipole. QSL via AA2WN and LoTW.

Sayang kurang lengkap.
Biasanya juga ada OM Bobby (YB2BBY), OM Adhi (YB3MM), OM Imam (YB4IR), OM Joni (YB9WZJ) atau rekan dari Bali, NTT/NTB.

Kalo pas muncul dari semua call area, banyak yg suka karena bisa lengkap.

New Expedition

Activation of Amangeldy peak (4010M)

From 7 to 8 June 2013, a group of «Traveling Radio Amateurs Group», planned travel to the mountains of Zailiysky Alatau.

Expedition «Mountains of Kazakhstan» is the first in Kazakhstan activation mountains «Class E» (peaks altitude from 4000m and more) pursuant to the" Kazakhstan Mountain Award" program.

The goal of the expedition - the activation of the following references:
- WMA/UNM-043 - Amangeldy peak, altitude 4010м above sea level (NEW ONE),
- WFF/UNFF-005 - Ile-Alatau national Park,
- WRA/UNR-048 - river Malaya Almatinka,
- KDA: Q-12 - Karasai district.
- WWLoc.: MN83MC

Sayang kurang lengkap.
Biasanya juga ada OM Bobby (YB2BBY), OM Adhi (YB3MM), OM Imam (YB4IR), OM Joni (YB9WZJ) atau rekan dari Bali, NTT/NTB.

Kalo pas muncul dari semua call area, banyak yg suka karena bisa lengkap.

Di cluster kemarin VK9DAC munculnya dengan entity - Norfolk Island.
Apa karna tidak menggunakan VK9X - ada X di suffix.

Karna ada 2 Christmas Island - jadi lumayan bikin bingung.

1. VK9X.. CQ Zone 29 - yang gak jauh dari pantai jawa barat
2. T32.. CQ Zone 31 - yang di pacific ocean

kalau lihat gambar pulau yg digunakan VK9DAC di http://vk9dac.coffeecup.com/
sepertinya ini yang di Pacific Ocean dg prefix T32..

Nah lho....!!

http://www.ybdxc.net/2013/06/vk9dac-christmas-island-2013.html

http://vk9dac.coffeecup.com/

On the 24 June 2013 I will be travelling to Perth Western Australia for the WIA Annual General Meeting. On Tuesday 28th following the WIA Annual General meeting I will travel to Christmas Island for some rest and relaxation. The main reason for the visit is bird watching. Christmas Island has some unique bird species and is a very interesting location for beautiful scenary and wildlife. It would be impossible to travel to such a unique radio location without taking some radio equipment along on the trip. It is not a DX holiday but it does give the opportunity to make some contacts from this location. Christmas Island is a beautiful location off the north west coast of Australia between the Australian mainland and Indonesia , http://www.christmas.net.au/

From May 28 until June 4 2013, I will be on the island, and will be operating as VK9DAC. Christmas Island has the Amateur Radio stauts of a DXCC recognised country with a VK9 prefix. The continent is OC, ITU 54, CQ 29 and entity code 035. The Yarra Valley Amateur Radio Grooup will be my back up in Australia and the link to their web site is www.yvarg.org.au. If you have any queries please call Steve VK3TSR. See the YVARG web site for contact details

Ya om Uun ,,
Kita sama-sama beruntung,,

Tp yg lebih beruntung adalah H44,
Liat aja H44 ßišª dapat banyak No IOTA..
Kalo kita liat di peta AR.
H44 dan pulau jawa.
Jauh sekali perbandingannya..

Namun untuk pulau-pulau yg kelilingi P. Jawa hanya dapat 1 nomor saja sekarang,,
Sayang ya..
Kemudian di sulawesi juga,,
YB8HZ/P dan YB8RW/P activasi dari no yg sama kemarin,,
Padahal yg 1 di selatan dan yg 1 di utara pulau Sulawesi..hehehehe

Nah..
Mungkin ini tantangan buat ybdxc,,
Siapa tahu melalui ybdxc ßišª bantu klem IOTA komite,,
Dan kedepannya ßišª dapat 1 nomor masing-masing,
Minimal hitungan per propinsi..
Bukan per pulau induk

OM Busan,
Iya seperti kalo dilihat prefix callsignya = VK9 - yg dimaksud Christmas island yg dekat YBland, yg banyak sekali populasi kepitingnya, kalo gak salah juga tempat perjudian.

Tapi gambar pulau yang digunakannya bukan Christmas Island yg VK9, tapi T32 - ini saya lampirkan QSL card dari Christmas Island yang dari T32TV.
Bisa juga lihat bentuk pulaunya liwat google. CMIIW

Subject: Bls: [YBDXC_News] VK9DAC, Christmas Island 2013

Di cluster kemarin VK9DAC munculnya dengan entity - Norfolk Island.
Apa karna tidak menggunakan VK9X - ada X di suffix.

Karna ada 2 Christmas Island - jadi lumayan bikin bingung.

1. VK9X.. CQ Zone 29 - yang gak jauh dari pantai jawa barat
2. T32.. CQ Zone 31 - yang di pacific ocean

kalau lihat gambar pulau yg digunakan VK9DAC di http://vk9dac.coffeecup.com/
sepertinya ini yang di Pacific Ocean dg prefix T32..

Nah lho....!!

Judul: [YBDXC_News] VK9DAC, Christmas Island 2013

http://www.ybdxc.net/2013/06/vk9dac-christmas-island-2013.html

http://vk9dac.coffeecup.com/

On the 24 June 2013 I will be travelling to Perth Western Australia for the WIA Annual General Meeting. On Tuesday 28th following the WIA Annual General meeting I will travel to Christmas Island for some rest and relaxation. The main reason for the visit is bird watching. Christmas Island has some unique bird species and is a very interesting location for beautiful scenary and wildlife. It would be impossible to travel to such a unique radio location without taking some radio equipment along on the trip. It is not a DX holiday but it does give the opportunity to make some contacts from this location. Christmas Island is a beautiful location off the north west coast of Australia between the Australian mainland and Indonesia , http://www.christmas.net.au/

From May 28 until June 4 2013, I will be on the island, and will be operating as VK9DAC. Christmas Island has the Amateur Radio stauts of a DXCC recognised country with a VK9 prefix. The continent is OC, ITU 54, CQ 29 and entity code 035. The Yarra Valley Amateur Radio Grooup will be my back up in Australia and the link to their web site is www.yvarg.org.au. If you have any queries please call Steve VK3TSR. See the YVARG web site for contact details

Ya om Uun ,,
Kita sama-sama beruntung,,

Tp yg lebih beruntung adalah H44,
Liat aja H44 ßišª dapat banyak No IOTA..
Kalo kita liat di peta AR.
H44 dan pulau jawa.
Jauh sekali perbandingannya..

Namun untuk pulau-pulau yg kelilingi P. Jawa hanya dapat 1 nomor saja sekarang,,
Sayang ya..
Kemudian di sulawesi juga,,
YB8HZ/P dan YB8RW/P activasi dari no yg sama kemarin,,
Padahal yg 1 di selatan dan yg 1 di utara pulau Sulawesi..hehehehe

Nah..
Mungkin ini tantangan buat ybdxc,,
Siapa tahu melalui ybdxc ßišª bantu klem IOTA komite,,
Dan kedepannya ßišª dapat 1 nomor masing-masing,
Minimal hitungan per propinsi..
Bukan per pulau induk

dx di echolink or eqso aja deh kalo gitu, propagasi nya lebih stabil kemana2 dan always 599 +++ hehehehe

ngga ada ant buat 80m, kemaren bikin ant quarter wave buat 40 m vertical, kaya nya swr nya belon pas, jadi perlu di tune lagi :)

Hi Om Steve,

Siap Om !! Siap di 40M.. Biasanya ak "Hang Out" di sekitar 7.140-7.150 Mhz dari pukul 12.00 UTC sampai 15.00 UTC.. Anten awalnya ke Timur n pelan2 ke Utara Timur. Biasanya banyak ketemu stsn dari East Coast. Terus ak rag chewing bersama rekan2 di seluruh Nusantara sampai jm 16.00 UTC di 7.070 - 7.090.

Hope to c u on The Air soon om Steve yg non Bule.. Hehehe..

Salam Hangat,
73, de JOY/ YB0NSI

Hello Om Uun,

Thanks Om atas feedback nya.. Radio FT-901 DM tsbt dah di QSY kan ke Om Nyoman di Bali..hehehe Kebetulan saya ada cangkulan minggu ini di Bali n sekalian di bawa. Beratnya 20 Kg !!! Langsung tiba di Bali, perut laper bngt n langsung menuju ke Warung Made di Legian untuk mengisi energi kembali..hehehe..

Besok malam rencananya mau ke cafe Om Made, YB9DEB di Ground Zero, Kuta n mau cicipi Nasi Goreng ala Bali khas Cafe Om Made.. Mudah mudahan beliau ada di tempat.. Hehehe..

Good DX Om Uun, hope to catch you on the air soon..

Salam,
JOY/YB0NSI.

.....Setuju...

Maaf bagi teman - teman anggota di group YBDXC, kami menggaggu, minjam room web yah boss ? boleh kan ?

Om Joni..... de YB8RW/0

Kemaren aku On Air di Pulau Bunaken, tujuan selain rekreasi, refreshing, sudah lama gak go to the island...he he he,
sekalian misi pembinaan, merekrut dan membagi pengalaman kepada teman-teman yang baru dan belum mengenal bagaimana DXing dan DXpedition itu.... mana tau akan muncul para DXer baru di Sulawesi Utara pada khususnya dan Indonesia pada umumnya...
Dibalik itu ada kesempatan, ada sponsor, juga ada kemauan...serta support organisasi.

Dengan upaya apa adanya yg di dampingi oleh Bpk. Teddy Setiady YC1BPO/8 dan di bantu dari jauh oleh YB9BU (Kadek Kariana), bersama 12 orang operator baru ternyata banyak pengalaman yg mereka temui antara lain :
- Kebersamaan, Kesabaran, Tatacara berkomunikasi (OP),
- Mereka bisa mengukur kemampuan dan keberadaan sendiri sebagai seorang AR,
- Semakin tahu bahwa AR itu bukan hanya di lokal, Daerah, Nasioanal saja,
- Merasakan dalam menghadapi tantangan baik di darat, dilaut dan diudara (propagasi),
- Bereksperimen membuat antenna dan memperbaiki peralatan yg rusak di lokasi dalam kondisi darurat jika di suatu tempat terpencil seperti di pulau (peralatan apa adanya).

Pokoknya banyak hal tentang AR yg teman2 yang baru pertama kali ikut kegiatan ini merasa sangat tertarik dan bangga.
Ini satu hal yg tidak mudah dilakukan, namun rasanya bagi Din merupakan kewajiban saya untuk teman2 yg berminat dan mau maju....
Din sangat senang terhadap kemauan dan semangat teman2 ku dari sulawesi utara kemaren.

Om Joni, soal kembali ke Pulau yang punya nomor IOTA yg sama, bagi Din NO PROBLEM selain utk kembali memperbaiki Nama Pulau Bunaken yg pernah Valid 2 x (red. gak usah di ceritakan) itu pun dgn on the air hanya 2 hari 3 malam saya bersama 12 New operator dalam propagasi sulit masih bisa mengumpulkan 2 ribuan QSO. itu pun bagi Din sudah lebih dari cukup sebagai kesempatan belajar dan membina para DXer baru dari Sulawesi Utara sebelum meraih IOTA New Number jika nanti masih ada.

Di suatu kelak jika Din sudah tidak punya waktu lagi untuk ber DXing / DXpeditioner, kan teman2 ku dari Sulawesi Utara sudah ada dan mereka sudah ada pengalaman.... yang pasti tanpa Din, mereka bisa berjalan dan action sendiri....he he he,

Hasil Bunaken Island kemaren .....MENGESANKAN dan MENYENANGKAN !!!

Thank's om Joni, slam keluarga,

Ir. Syariefudin Syah - YB8RW/0

Rekan2 di YB land
Masalah ini sudah lama menjadi bahan perbincangan dan diskusi serius dengan Roger G3KMA boss IOTA program krn ada bbrp aktivis IoTA dari YB land yang mempetisikan IOTA baru yaitu dengan memisahkan IOTA group yg sudah ada. Spt Pulau pesisir Sulawesi semua 236 yg di utara dan selatan yang di timur barat dan tenggara. Tidak spt di Kalimantan dan Sumatra pulau2 pesisir berbeda nomor. Dan juga ada kasus2 lain.

Pada dasarnya semua ditolak karena jumlah pulau dalam IoTA program ada limit maksimummya yaitu 1200. Dan YB adalah yg terbanyak saya rasa dari OC, ada 59 IOTA numbers. 5 masih perawan. Go yb iota activators !

utk kembali memperbaiki Nama Pulau Bunaken yg pernah Valid 2 x (red. gak usah di ceritakan) itu pun dgn on the air hanya 2 hari 3 malam saya bersama 12 New operator dalam propagasi sulit masih bisa mengumpulkan 2 ribuan QSO. itu pun bagi Din sudah lebih dari cukup sebagai kesempatan belajar dan membina para DXer baru dari Sulawesi Utara sebelum meraih IOTA New Number jika nanti masih ada.
>
> Di suatu kelak jika Din sudah tidak punya waktu lagi untuk ber DXing / DXpeditioner, kan teman2 ku dari Sulawesi Utara sudah ada dan mereka sudah ada pengalaman.... yang pasti tanpa Din, mereka bisa berjalan dan action sendiri....he he he,

HI OM Joy
stn apa saja dari East Coast yg masuk di 40M SSB seteleah jam 12z, (jam 8 pagi di sini, 2 jam setelah sunrise!!) saya mau tau callsignnya dan check out qrz.com mereka, pakai antenna apa mereka, kok bisa masih dengar Asia/OC sesiang itu??
Kalau dari midwest dan west tidak heran kan mereka 3 jam lebih awal...

Hi Om Steve,

Siap Om Steve !! Tar sy kembali di Jakarta n cek di Log Book.. Biasanya ada Om Tim dari FL n Om Greg cs. Mereka juga kadang buka Warung di 7.163..

Salam,
Joy/YB0NSI.

Waktu saya ke Balisekitar tahun 2008, bersama rombongan sempat meninjau tempat kerajinan gelas kaca.
Di tempat itu juga sempat saya lihat ada papan callsign anggota ORARI, tapi lupa CSnya.

Semoga masih eksis dan malahan tambah maju.

hen

Hello Om Uun,

Thanks Om atas feedback nya.. Radio FT-901 DM tsbt dah di QSY kan ke Om Nyoman di Bali..hehehe Kebetulan saya ada cangkulan minggu ini di Bali n sekalian di bawa. Beratnya 20 Kg !!! Langsung tiba di Bali, perut laper bngt n langsung menuju ke Warung Made di Legian untuk mengisi energi kembali..hehehe..

Besok malam rencananya mau ke cafe Om Made, YB9DEB di Ground Zero, Kuta n mau cicipi Nasi Goreng ala Bali khas Cafe Om Made.. Mudah mudahan beliau ada di tempat.. Hehehe..

Good DX Om Uun, hope to catch you on the air soon..

Salam,
JOY/YB0NSI.

OM,
Pagi tadi saya cek LoTW ada konfirmasi/QSL dari 5T0SP untuk QSO di 15M - tapi koq QSO sebelumnya yang di 10M belum ada ya.
Semoga cuma terlambat/belakangan saja mereka upload ke LoTW - masalahnya sesuai ClubLog kedua QSO saya dengan 5T0SP sudah logged.

Untuk Mauritania ini sebenarnya saya sudah confirmed lama dengan 5T5NU di 15M, kalo saja yg belum QSL itu yang 15M mungkin saya tenang2 saja tidak dumba2.
Tapi kalo ternyata gak ada konfirmasi utk. 10M - sedih dong.

Om Hendro

5T0SP punya QSL sudah terima??
Saua OQRS belum dapat balasan
Ga tahu sudah ada yg terima balasnya ??

Kasus om Hendro sama dengan P5/4L4FN
Di QSL saya confirm 15m dan 10m
Tp di Lotw cuma 15m saja..

Begitu juga N8S swains island,
Ada 4 QSO di 80m 40m 15m dan 10m
Namun yg muncul di Lotw tidak ke 4 band,,
Untuk N8S kalo search di online log ada 4 QSO sih,,

Mungkin data QSO kita tidak match pada jam dan tanggal hehehe

OM Joni,
Saya gak request QSL utk 5T0SP ini - cuma mengharap dari LoTW saja.
Saya tadi juga sempat berpikir mungkin waktunya/jamnya yang tidak matched dengan log mereka.
Maksimal selisih berapa menit ya, supaya bisa matched ?

DXpedition yang menggunakan online log enaknya kita bisa check/recheck apakah sudah logged, jangan sampai kita kirim QSL card - baliknya dg catatan not on the log.tau kalo belum log mungkin masih ada kesempatan utk mencoba QSO ulang.

OM Zen,
Gak gundah gulana, gak juga galau. HI
Mungkin ini cuma soal waktu - tapi bukan waktu di log kami yg gak match tapi mereka baru punya waktu upload sebagian log nya ke LoTW.

QSL card saya baru dipulangin tadi pagi sama Bill Moore dari DXCC Desk, ditambah sticker kecilnya 200. Alhamdulillah.

Hello,
the ARI Versilia 10 to 16 June 2013 is organizing the 3rd High Competition Antonio Meucci.
Enclosed you will find the rules and the sketch of the Award, this year printed on the original
pennant.
All proceeds will be donated to Children's Hospital of Florence Meyer.
Hoping to hear from many, I extend my best 73.

Hi Om Steve,

Siap Om !! Siap di 40M.. Biasanya ak "Hang Out" di sekitar 7.140-7.150 Mhz dari pukul 12.00 UTC sampai 15.00 UTC.. Anten awalnya ke Timur n pelan2 ke Utara Timur. Biasanya banyak ketemu stsn dari East Coast. Terus ak rag chewing bersama rekan2 di seluruh Nusantara sampai jm 16.00 UTC di 7.070 - 7.090.

Hope to c u on The Air soon om Steve yg non Bule.. Hehehe..

Salam Hangat,
73, de JOY/ YB0NSI

Subject: Encyclopedia of Ham Radio is ready!

Hello
friends,
Many
thanks for your participation!
After six
years and more than 7,000 hours spent in cooperation with you and another 500
fine hams, I´m proud to be able to say, the project, “Encyclopedia of Ham
Radio” is now ready to be presented!
I am now beginning
to send the final version with its 2.686 pages.
Please
let me know if you would like to have it and you will get it in just a few
days.
It will
be sent via a system called Sprend as a 190 MB PDF-file and you will get a
message that the file is ready to be downloaded and opened.
When you
have received the file OK, I would appreciate $ 8 (via PayPal to sm7wtstan@gmail.comor in
an envelope) to cover my costs for advertising and other costs
related to the project.
Please
note, I don´t want any money until I know you have received the file and opened
it OK!
The

chapters contain:
Chapter 1 Rescue
Operations
Chapter 2 Hams
Helping Hams (DXpeditions and more)
Chapter 3 Getting
Youngsters Interested in Amateur Radio
Chapter 4 The
history of Amateur Radio since 1912
Chapter 5 Friends
Gone, but not forgotten (SK)
Chapter 6 Contest
Operation
Chapter 7 500
Personal Presentations on 1,819 pages

You will find several unique stories only told here!
True stories like these:
The ham who built and flies his own gyrocopter with
his only arm.
Why did King Hussein become a ham?
What happened when the Army tried to take over the command
from the hams?
Why did a ham get married at the age of 95?
A ham who managed the fighter pilot test in the
simulator – at the age of 88!
Why did hams behind the Iron Curtain lose their
licenses?
The ham who had to transmit on 7.9 MHz to stop the soldiers
from entering the mine field.
If you like Encyclopedia of Ham Radio, please tell
your friends about itor show it to them. If they would like a copy, I will appreciate $ 8
from them.
Any
questions, just let me know!
Thank you
all for your support and friendship!

Hello
friends,
Many
thanks for your participation!
After six
years and more than 7,000 hours spent in cooperation with you and another 500
fine hams, I´m proud to be able to say, the project, “Encyclopedia of Ham

Radio” is now ready to be presented!
I am now beginning
to send the final version with its 2.686 pages.
Please
let me know if you would like to have it and you will get it in just a few
days.
It will
be sent via a system called Sprend as a 190 MB PDF-file and you will get a
message that the file is ready to be downloaded and opened.
When you
have received the file OK, I would appreciate $ 8 (via PayPal to sm7wtstan@... in an
envelope) to cover my costs for advertising and other costs
related to the project.
Please
note, I don´t want any money until I know you have received the file and opened
it OK!
The
chapters contain:
Chapter 1 Rescue
Operations
Chapter 2 Hams
Helping Hams (DXpeditions and more)
Chapter 3 Getting
Youngsters Interested in Amateur Radio
Chapter 4 The
history of Amateur Radio since 1912
Chapter 5 Friends
Gone, but not forgotten (SK)
Chapter 6 Contest
Operation
Chapter 7 500
Personal Presentations on 1,819 pages

You will find several unique stories only told here!
True stories like these:
The ham who built and flies his own gyrocopter with
his only arm.
Why did King Hussein become a ham?
What happened when the Army tried to take over the command
from the hams?
Why did a ham get married at the age of 95?
A ham who managed the fighter pilot test in the
simulator – at the age of 88!
Why did hams behind the Iron Curtain lose their
licenses?
The ham who had to transmit on 7.9 MHz to stop the soldiers
from entering the mine field.
If you like Encyclopedia of Ham Radio, please tell
your friends about itor show it to them. If they would like a copy, I will appreciate $ 8

SB PROP @ ARL $ARLP023
ARLP023 Propagation de K7RA ZCZC AP23
QST de W1AW
Propagation Forecast Bulletin 23 ARLP023
From Tad Cook, K7RA
Seattle, WA June 7, 2013
To all radio amateurs SB PROP ARL ARLP023
ARLP023 Propagation de K7RA Solar activity seems to dip back into the doldrums again, with the
average sunspot number for the past week (72) lower than any
reporting week since Propagation Forecast Bulletin ARLP013, which
was for the week of March 21-27. You can go through the recent
bulletins at http://www.arrl.org/w1aw-bulletins-archive-propagation and note that two
weeks ago we had twice that number, when the
average daily sunspot number was 144. From last week, the average
dropped more than 12 points from 94.3. Average daily solar flux was
down more than 10 points to 107.6.

YEØEDAM

WLOTA NO.2749 EXPEDITION 2013

ISLAND ON THE AIR - IOTA - OC-177

DAMAR ISLAND - INDONESIA
JUNE 27 - 30 , 2013
Latitude -5.956588 (5° 57' 23'' S)
Longitude 106.842642 (106° 50' 33'' E)
Grid Square OI34kb
Sunrise 22:55:06 UTC

Sunset 10:43:59 UTC

Also called Damar Island, one of the islands in the Thousand Islands cluster which is also referred to as the Big Island of Damar. Jakarta people called Monkey Island. Located not far from Tanjung Priok. On this island stands erect a lighthouse called Vast Licht as high as 65 meters. This lighthouse was built according to historical records in 1879, with the permission ZM Willem II. The lighthouse can be seen from far away, even from an airplane window is about to land in Cengkareng Airport.

Mantap nih...

- IC-718 (biasanya sudah dilengkapi DSP) = USD 350
- MFJ 4125 power supply 25A = USD 50

Total IC-718 + MFJ 4125 di bawah Rp 4 juta belum termasuk ongkos kirim.

> I have an IC718 for sale. The radio is functionally and cosmetically in excellent shape. I am asking $350 for the radio, complete with hand microphone (Chinese made but modified), power supply cable and manual. I'll throw in an MFJ 4125 power supply for an additional $50. This is including ground shipping in CONUS. Please contact me off list. With the power supply all you need is an antenna and you are on the air. Please contact me off list.

OM Hen,

Harga tsb sudah termasuk ongkos kirim, 'This is including ground shipping in CONUS.'
Tapi buat CONUS (Continental United States) aja hehehe

Suruh kirim ke YB land kali dia mau, ngga bilang CONUS ONLY ngomongnya, coba aja di tanyain.

Btw MFJ 4125 itu buat 110v ONLY.

OM Iwan,

Kalo untuk dikirim ke luar W-land berarti harganya FOB (Free On Board) - sampe dibawa ke "TIKI"nya.
Plus ongkir plus BM jangan2 jadinya lebih mahal daripada beli disini (padahal gak tau juga harga disini berapa).

Hello Rekan2,

Jangan lupa tuk barang impor dengan nilai lebih dari USD50, dikenakan pajak2, yaitu pajak impor, bea masuk n of course PPn.. Total kurang lebih 30% dari total impor berikut shipping n dipotong $50 yg bebas pajak..

Contoh Soal;

IC-718 USD300,
PSU MFJ USD100 n
Shipping to Jkt via USPS Priority Int'l USD150

Total cif sbs USD550 (hampir Rp5.5jt).
Dipotong nilai Bebas Pajak USD50

Nilai yg akan dikenakan pajak2 sbs $550-$50 = $500 dikalikan kurang lebih 30% = $150 atau hampir Rp1.5jt bea masuk n PPn..

Jadi total doku yg harus dikeluarkan dari kantong sbs hampir Rp7jt (5.5 + 1.5 bea masuk).. Belum lagi kalo kita bayar pake Western Union atau bank transfer, dikenakan lagi Rp300-400 rb biaya2.. Atau pake kartu kredit dikenakan kurs jual beli yg tidak menguntungkan bagi pembeli...hehehe..

Artinya kalo barang yg umum seperti IC-718, lebih menguntungkan beli disini saja, misalnya di bekas.com. Kecuali barang2 antik yg susah dapat disini baru kita hunting diluar pagar.. ;)

Demikian info n mudah mudahan bermanfaat..

Salam,
JOY/YB0NSI.

Kepada Yth Rekan2 di milist ini,

Sebagai info tentang rencana DXpedition WLOTA n IOTA ke pulau Damar Besar yang akan diselenggarakan oleh Lokal Kebun Jeruk sebagai Koordinator Utama bersama dengan beberapa Lokal di DKI yg lain nya, perlu diperjelas bahwa Program Ekspedisi ini masih dalam tahap perencanaan n pengurusan administrasi nya di tahap Final.

Maka, perlu kami sampaikan bahwa pada saatnya, Pihak Penyelenggara akan mengumumkan secara Resmi kepada seluruh komunitas Radio Amatir di luar maupun di dalam Negeri dan Pengumuman akan dilakukan saat seluruh Dokumentasi dan Approval sdh lengkap n sudah kami dapat di tangan secara resmi n tertulis dari pihak yg berwewenang.

Maka, untuk sementara ini, informasi yang beredar di beberapa Web site maupun di media electronik lain nya kami anggap TIDAK RESMI, dan kami TIDAK bertanggung jawab atas isinya atau ketepatan isi informasi di dalamnya.

Mohon maklum dan atas kerja sama rekan2, kami ucapkan terima kasih.

Salam Hormat,

Atas nama Ketua Lokal Kebun Jeruk, Jakarta Barat, OM Rashid / YC0SGA

Tarunodjojo (JOY) / YB0NSI.

Thanks OM Joy,

Jatuhnya bisa lebih mahal dong ya ?
Lalu perhitungan pajaknya angkanya dari mana kalo barang bekas yang gak ada invoice dll nya.
Kalo ditembak sama petugasnya bisa jadi malahan lebih besar biayanya ya.

Ya udah gak jadi deh.
Gak jadi apa ?
Gak jadi mimpi, punya cadangan IC-718. HI

Hello Rekan2,

Jangan lupa tuk barang impor dengan nilai lebih dari USD50, dikenakan pajak2, yaitu pajak impor, bea masuk n of course PPn.. Total kurang lebih 30% dari total impor berikut shipping n dipotong $50 yg bebas pajak..

Contoh Soal;

IC-718 USD300,
PSU MFJ USD100 n
Shipping to Jkt via USPS Priority Int'l USD150

Total cif sbs USD550 (hampir Rp5.5jt).
Dipotong nilai Bebas Pajak USD50

Nilai yg akan dikenakan pajak2 sbs $550-$50 = $500 dikalikan kurang lebih 30% = $150 atau hampir Rp1.5jt bea masuk n PPn..

Jadi total doku yg harus dikeluarkan dari kantong sbs hampir Rp7jt (5.5 + 1.5 bea masuk).. Belum lagi kalo kita bayar pake Western Union atau bank transfer, dikenakan lagi Rp300-400 rb biaya2.. Atau pake kartu kredit dikenakan kurs jual beli yg tidak menguntungkan bagi pembeli...hehehe..

Artinya kalo barang yg umum seperti IC-718, lebih menguntungkan beli disini saja, misalnya di bekas.com. Kecuali barang2 antik yg susah dapat disini baru kita hunting diluar pagar.. ;)

Demikian info n mudah mudahan bermanfaat..

Salam,
JOY/YB0NSI.

OM Joy,

Kalo ngirim ke sini jangan pake priority mail, mahal pasti ....
Pake Express Mail International, 3-5 days cuma sekitar $70-$80 tergantung insurance yg di minta dan dari zip code mana dikirim nya.
Kalo dikirim dari QTH W2FB jelas lebih mahal dari pada dari QTH WW6WWW.

73,

Iwan

Subject: Re: [YBDXC_News] YEØEDAM, WLOTA NO.2749 EXPEDITION 2013

Kepada Yth Rekan2 di milist ini,

Sebagai info tentang rencana DXpedition WLOTA n IOTA ke pulau Damar Besar yang akan diselenggarakan oleh Lokal Kebun Jeruk sebagai Koordinator Utama bersama dengan beberapa Lokal di DKI yg lain nya, perlu diperjelas bahwa Program Ekspedisi ini masih dalam tahap perencanaan n pengurusan administrasi nya di tahap Final.

Maka, perlu kami sampaikan bahwa pada saatnya, Pihak Penyelenggara akan mengumumkan secara Resmi kepada seluruh komunitas Radio Amatir di luar maupun di dalam Negeri dan Pengumuman akan dilakukan saat seluruh Dokumentasi dan Approval sdh lengkap n sudah kami dapat di tangan secara resmi n tertulis dari pihak yg berwewenang.

Maka, untuk sementara ini, informasi yang beredar di beberapa Web site maupun di media electronik lain nya kami anggap TIDAK RESMI, dan kami TIDAK bertanggung jawab atas isinya atau ketepatan isi informasi di dalamnya.

Mohon maklum dan atas kerja sama rekan2, kami ucapkan terima kasih.

Salam Hormat,

Atas nama Ketua Lokal Kebun Jeruk, Jakarta Barat, OM Rashid / YC0SGA

Tarunodjojo (JOY) / YB0NSI.

7830. QSLing

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-06-11 16:09:14 UTC
From: hendro s.joedho
Topic: 7830 Message: 7830

OM cuma mau cerita.

Tanggal 09/03/2012 saya worked dengan satu station radio di africa, yang operatornya dari eropa.
Tanggal 03/04/2012 saya kirim QSL card plus 2 GS langsung ke alamatnya di EU.

Beberapa bulan kemudian confirmed via LoTW.
Saat itu saya tetap mengharapkan kedatangan paper QSL (gak mau rugi dong), tapi setelah satu tahun paper QSL gak kunjung datang, tgl. 06/05/2013 saya kirim email ke ybs.

Tgl. 12/05/2013 datang balasan email tapi bukan dari ybs melainkan dari AR lain yg mengatakan bahwa balasan QSL sudah dikirimkan tgl. 03/05/2012 dan kalo mau akan dikirimkan lagi via buro.
Ada yg saya kurang teliti, dia menjawab sdh membalas tgl. 03/05/2012 berarti selang sebulan setelah saya kirim kesana - tapi saya kira 03/05 tahun 2013 itu dia kirim ulang.

Jadi saya masih tunggu sebulan ini, sampai saya terima QSL card dari negara EU yg sama yg stempel posnya tgl. 27/05/2013 dan tiba di rumah saya tgl. 10/06/2013 (14 hari).

Kemarin saya kirim email lagi ke operator ybs (DXpeditioner) dan AR yg mengurus QSLing (sebenarnya saya gak bilang QSL manajernya karena memang tdk disebutkan di QRZ.com maupun korespondensi email).
Saya bilang sampai hari ini blm terima QSLnya dan berhubung saya perlu, maka saya tanya apakah punya PayPal account, saya akan kirim biaya pos via PP.

Yg menjawab si Manajer, cuma memberikan link-nya dan waktu saya buka ternyata OQRS dan gak menyebut besarnya berapa yg harus dikirim. Saya kirimlah USD 2 kesana via PP.

Gak lama setelah konfirmasi dari PP, masuk lagi email dari PP bahwa pembayaran saya ditolak/dikembalikan dan catatan dari "manajer", minimal donasi USD 5.
Wah gak deh kalo gitu - toh sudah confirmed via LoTW ini, semula saya diamkan saja tapi koq iseng saya tulis email lagi ke kedua alamat itu (dxpeditionernya & manajernya) bahwa cancel aja permintaan paper QSLnya - mahal.
Manajer menjawab lagi bahwa kalo saya kirim via buro negaranya akan dikirim juga - gratis.

Eh, barusan masuk email lagi langsung dari si operator/dxpeditioner nya sendiri, tanya data QSO dan dia bilang akan kirim langsung ke saya. Alhamdulillah kalo gitu.

Saya mau tanya, minta pendapat dari rekan2 nih - apakah korespondensi saya semacam itu masih bisa dibilang etis, atau apakah "bikin malu" YB-land, pake nagih2 QSL card segala.

Ya Etis saja Om Hen.
Kan kalau kita dxpedition sudah sewajarnya siap membalas qsl.

Date: 2013-06-11 16:53:35 UTC
From: Imam YB4IR
Topic: 7830 Message: 7832

Dear OM Hendro,
Tadi saya ada kirim via japri salah satu contoh pembicaraan saya dengan stasiun dari F6** melalui email yang intinya bahwa dia bertanya ke saya mengeni QSL card dari saya.

Pertama dia meminta QSL card saya melalui OQRS dan sebagaimana saya beritahukan via email bahwa QSL Card sudah saya kirim berikut saya infokan pula data tanggal sewaktu saya kirim.

Semua data QSL sent ada pada software logsheet (saya pakai logger32).

Karena kiriman pertama saya tidak dia terima maka saya kirim kan lagi untuk kedua kalinya juga via direct dan bukan via biro.

Andaikan untuk kedua kalinya dia masih belum juga terima maka:
1) saya tidak mungkin menuduh dia untuk menipu (pura-pura belum terima)
2) sayapun juga tidak mau dituduh sebagai penipu (seolah-olah sudah balas)
3) solusinya bahwa kedua belah pihak harus bersedia untuk mengirim dan menerimanya mealui biro jika ternyata memang sudah tidak lagi mampu untuk membalas via japri (masalah biaya perangko)

Jadi, kesimpulannya bahwa Kita harus sellu berpikiran positif bahwa setiap amatir radio itu adalah jujur, baik yang mengirim dan yeng menerima.

Jadi, jika kita bertanya via email itu tidaklah masalah, namun jika sudah dijawab maka Hindarilah kalimat seolah-olah kita memaksa dan apalagi ada unsur kita merasa tidak percaya /merasa ditipu, dan Jika memungkinkan maka kitapun harus bersedia untuk dibalas melalui biro (jangan bicara hitung rugi).

Thanks OM Steve,

Tapi masalahnya mereka sudah membalas katanya dan saya minta kirim ulang dg kirim biaya perangko.
Nah waktu dibilang bayar lagi USD 5, saya gak mau - gak jadi deh. HI HI.

Pernah kejadian lain, saya juga kirim QSL + 2GS ke Poland, confirmed via LoTW - karna paper QSL gak sampai saya tanya via email.
Dijawab sudah balas dan kalo minta kirim ulang supaya kirim lagi ke alamat yg baru (dikasih alamat baru), bukan alamat yg sebelumnya.
Akhirnya setelah saya kirim ulang - saya terima juga balasannya.

Kemarin2 ini ada yg cerita, lupa saya OM Joni/YB9WZJ atau OM Uun/YB1UUN - bahwa sudah 2 kali kirim blm dapat balasan.

Ada satu kebiasaan yg selalu saya lakukan, bahwa setelah menerima QSL card - selalu saya informasikan bahwa QSL cardnya sudah terima. Toh kirim email - gratis tapi bisa sedikit melegakan orang lain. HI

OM Imam,
Saya berusaha berfikir positif utk masalah QSLing ini - karna kalo saya berfikir negatif tentu saya gak akan pernah sama sekali mengirim QSL direct.
Saya akan selalu kirim via buro atau bila saya sangat membutuhkannya mungkin setelah punya acount PP akan selalu saya gunakan PP.

Tapi pada kenyataannya, banyak complain yg saya dengar baik dari cerita rekan2 juga dari komentar di DX Cluster adanya AR yg nakal.
Memang YB4IR sebagai QSL manager dari YB6N - saya salut kepada OM Imam yang bersedia mengirimkan QSL card ulang ketika ada yg belum menerimanya.
Mau angkat topi - tapi topi katanya baru mau diserahkan OM Busan di jatinegara tgl. 15 Juni nanti.

Ada salahsatu AR dari Jerman yg QRV di Madeira, waktu saya tanya apakah beliau LoTW user dia bilang sebelumnya semua operationnya di luar Jerman tidak dimasukkan ke LoTW tapi sekarang dia sedang mengurus LoTW utk semuanya.
Saat itu juga dia bilang gak terlalu mengurusi QSL card utk callsign waktu QRVnya itu - kecuali hanya membalas QSL yg diterima - jadi dia gak koleksi QSL card dan "gak butuh" QSL card dari YC0QR yg cerewet ini.h saya terima.
Ya sudah daripada kalo saya kirim QSL card disana dibuang plus resiko gak sampai ke ybs maka saya tanya PP accountnya utk saya bayar biaya perangko.
Tapi malahan dia jawab gak usah, dia akan kirim QSLnya langsung - dan alhamdulillah sudah saya terima.

Ya ini mungkin juga salahsatu seni utk QSLing setelah seni ber QSOnya.

Hello Om Dani, Om Hen n Rekan2,

Terima kasih atas dukungan nya.. Mudah mudahan Ekspedisi ini dapat berjalan dengan rencana. Kami akan coba mancar di All Band tuk HF (incl. WARC) n tuk lokal Jakarta n sekitarnya via VHF.. Logging will be real time online. Memang agak ambisius tapi mimpi kan gratis..hehehe..

We hope to work u n all DXers on this list from Pulau Damar Besar..

Salam,
Joy/YB0NSI.

Ham radio operators hope to put North Korea on the air

A group of amateur radio operators are hoping to get permission from the North Korean government for a month-long trip to the country during which they'll set up a ham radio operation.

If they manage to pull off the plan, they'll have succeeded where few have before.

North Korea has no amateur radio operators and government-sanctioned transmissions by foreigners in the country are extremely rare. This makes North Korea the rarest country for contacts in the amateur radio world.

The project is still in the planning phase but is being led by operators with experience of both North Korea and operating in usually closed countries. One of the members, David Flack (AH6HY), has been to the DPRK several times and other members helped organize similar trips to Kurdistan, South Sudan and Yemen.

Two of the group are planning to travel to Pyongyang in June and seek permission to bring in two teams of 12 operators and the necessary radios, antennas, power supplies and amplifiers.

Hello Om Dani, Om Hen n Rekan2,
Terima kasih atas dukungan nya.. Mudah mudahan Ekspedisi ini dapat berjalan dengan rencana. Kami akan coba mancar di All Band tuk HF (incl. WARC) n tuk lokal Jakarta n sekitarnya via VHF.. Logging will be real time online. Memang agak ambisius tapi mimpi kan gratis..hehehe..
We hope to work u n all DXers on this list from Pulau Damar Besar..
Salam,Joy/YB0NSI.

Kepada Yth Rekan2 di milist ini,
Sebagai info tentang rencana DXpedition WLOTA n IOTA ke pulau Damar Besar yang akan diselenggarakan oleh Lokal Kebun Jeruk sebagai Koordinator Utama bersama dengan beberapa Lokal di DKI yg lain nya, perlu diperjelas bahwa Program Ekspedisi ini masih dalam tahap perencanaan n pengurusan administrasi nya di tahap Final.
Maka, perlu kami sampaikan bahwa pada saatnya, Pihak Penyelenggara akan mengumumkan secara Resmi kepada seluruh komunitas Radio Amatir di luar maupun di dalam Negeri dan Pengumuman akan dilakukan saat seluruh Dokumentasi dan Approval sdh lengkap n sudah kami dapat di tangan secara resmi n tertulis dari pihak yg berwewenang.
Maka, untuk sementara ini, informasi yang beredar di beberapa Web site maupun di media electronik lain nya kami anggap TIDAK RESMI, dan kami TIDAK bertanggung jawab atas isinya atau ketepatan isi informasi di dalamnya.
Mohon maklum dan atas kerja sama rekan2, kami ucapkan terima kasih.

Salam Hormat,
Atas nama Ketua Lokal Kebun Jeruk, Jakarta Barat, OM Rashid / YC0SGA

7840. DX Code Of Conduct I

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-06-12 02:33:31 UTC
From: Yb land Dx club
Topic: 7840 Message: 7840

http://www.ybdxc.net/2012/01/dx-code_4277.html

http://www.dx-code.org/

DX Code Of Conduct

I will listen, and listen, and then listen again before calling.
I will only call if I can copy the DX station properly.
I will not trust the DX cluster and will be sure of the DX station's call sign before calling.
I will not interfere with the DX station nor anyone calling and will never tune up on the DX frequency or in the QSX slot.
I will wait for the DX station to end a contact before I call.
I will always send my full call sign.
I will call and then listen for a reasonable interval. I will not call continuously.
I will not transmit when the DX operator calls another call sign, not mine.
I will not transmit when the DX operator queries a call sign not like mine.
I will not transmit when the DX station requests geographic areas other than mine.
When the DX operator calls me, I will not repeat my call sign unless I think he has copied it incorrectly.
I will be thankful if and when I do make a contact.
I will respect my fellow hams and conduct myself so as to earn their respect.

#1 I will listen, and listen and then listen again before calling.
  This seems so obvious but it is the most vital thing to do. Careful listening rather than rushing to transmit will get the DX into your log. You must listen to find out whether the DX is working split and if so, where is he listening? Then you need to listen to the calling stations in order to determine what the DX station is doing. For example, he may be working gradually up or down the pile-up frequency range – and you need to find the best spot to call. And it may be time to ask yourself: “Do I really need to work this bit of DX, right now? Can I wait a while for the pile-up to subside?”

#2 I will only call if I can copy the DX station properly.
  You also need to listen carefully to determine how well you can hear the DX station to be sure you will hear his reply to your call and to avoid causing interference by transmitting at the wrong time. It is extremely frustrating for a DX station to return a call to a station that is unable to hear him, thereby causing incessant QRM.

#3 I will not trust the Cluster and will be sure of the DX station’s callsign before calling.
  Cluster spots often show the wrong call sign. Before you log a station, you should hear the station’s callsign on the air – don’t trust spotting networks. The DX operator should send his call sign at regular intervals. Unfortunately, not all operators do this!

#4 I will not interfere with the DX station or anyone calling and will never tune up on the DX frequency or in the QSX slot.
  Sadly, this covers a multitude of operators, employing poor operating practices. We are

frequently afflicted with “Policemen,” people who repeatedly jump in to tell callers that “the DX is listening up” – often adding a gratuitous insult. The rule is quite simple: never, ever transmit on the DX frequency for any purpose whatsoever.

#5 I will wait for the DX station to end a contact before calling.
If you transmit before a QSO is over, you are likely to interfere with the exchange of information, lengthening the QSO and slowing the process. It may seem clever to “nip in” as the previous contact is ending but many DX stations don’t like it, as such operating may break the pattern of the operator, which is what helps everyone to know when to transmit.

#6 I will always send my full call sign.
This is essential for CW and SSB, because incomplete calls lead to an extra transmission, slowing the operator’s progress with the pileup. If the operator is responding to partial call signs, it may appear that you should call with only several letters. Generally, this is not the case. Always use your full call sign.

#7 I will call and then listen for a reasonable interval. I will not call continuously.
Continuous calling is selfish and arrogant. With a computer or memory keyer, it is easy to send continuously. Unfortunately, it prevents you from listening and knowing what is taking place. In addition, it raises the QRM floor greatly, making life difficult for the DX station and everyone else.

#8 I will not transmit when the DX operator calls another callsign, not mine.
Perhaps this is intuitively obvious, but it is a common occurrence. If it is clear that the station is not calling you, do not transmit.

#9 I will not transmit when the DX Operator queries a call sign, not like mine.
In life outside amateur radio it would simply be considered rude to answer when someone else is asked a question! How do you know if the station is calling you? Perhaps the DX operator has a partial version of your call. Is it me? “The timing is right!” Yes, the timing may seem right, but it may also be “right” for many other stations. If the DX is actually calling you and hears nothing, he will call you again. Then you can call. Only one letter from your call sign is NOT enough, however. Calling when not being addressed raises the floor level of QRM and slows progress dramatically.

#10 I will not transmit when the DX operator requests geographic areas other than mine.
You must recognise and accept that when an operator is calling for a specific geographic area (e.g. NA for North America, AS for Asia), you must not call until the operator’s instructions change. Even if his choice appears incorrect, you must follow his instructions. The DX operator is in control. Here’s an important point: If a DX operator is working, some area, perhaps North America , and he fails to say so between QSOs, do not begin calling immediately. Call only when it is clear that the operator’s instructions have changed. To do otherwise is impolite and simply slows the process.

#11 When the DX operator calls me, I will not repeat my callsign unless I think he has copied it incorrectly.
If you repeat your call sign, the DX station may think that he has your call sign wrong. He might then listen very carefully – again – thus slowing the process. A DX operator will generally log what he has if you say nothing further.

#12 I will be thankful if and when I do make a contact.
There should certainly be a pride of accomplishment when you get a QSO with a guy in a far-away entity. But before you start basking in the glow of accomplishment, think about

the help you received from your partners, perhaps Mr. Icom, Mr. Alpha, and Mr. Force 12. If your ego still feels a need to take ALL the credit, try again. But this time turn off your amplifier and connect your rig barefoot to a dipole. If you get through the pile up this time, then YOU, as the operator, can take more of the credit.

You should also acknowledge that you would not have had the contact without the skill of the operator at the other end who undoubtedly made sacrifices to be there for you. So be thankful for all this help you received.

#13 I will respect my fellow hams and conduct myself so as to earn their respect.

Respect is about behaving well toward others. DXing is very competitive. If you operate otherwise, you may acquire a bad reputation. DXing will be the most fun for everyone if we all behave with politeness, mutual respect and even a bit of humility!

DXpeditioners' Code of Conduct

This DXpeditioners' Code is to help maximize the fun for all participants. As the DX operator, you play a critical role in pileups: you are "in charge". Dealing with an unruly pileup of discourteous operators who have forgotten about ethical behavior is NOT fun. So it makes sense to plan and train ahead of time on how best to deal with the situation.

Good operators at the DX end and courteous behavior at the other end of the QSO can greatly increase the total number of QSOs logged. It has been demonstrated that pileups can be kept reasonably under control if the DX operator follows certain 'rules'. Luckily, some top operators have given us the benefit of their experience. Please peruse these suggestions.

It is also important that you tell the thousands of hams who want a QSO that you expect them to operate ethically in accordance with the DX Code of Conduct. If your DXpedition has a website or just a page at QRZ.com, please consider posting a notice on your website.

As a starter, consider posting our mascot with a link to this site. You may be as creative as you like. You might consider posting the Code itself on your website, just copy and paste . Whatever suits you. For further assistance, click here. For an example of how this might look, click here.

We also hope that you will tell us that you have linked to us so and we can publish your DXpedition and website at this site. More important, we hope that this initiative will play a positive role in making sure that you enjoy your trip.

NOTE: This page is organized as a Table of Contents. Click on each topic to go to a section of the document that explains it further. Some sections have links to a third page with even more details and links to various resources we think may help. Enjoy!

Do your Homework
Keep the DX community informed
Check TX frequency AND the RX range before starting up
You are the Boss and You are in Charge
Announce Your Callsign Frequently
Use Split Operation
Establish and Maintain a Rhythm
Work and log dupes, it's quicker
Give QSY/QRT information before leaving the pile-up
Establish a "Friendship" with the Pileup

Avoid working by numbers, continents are OK
Repeat corrected callsigns so everyone is sure of being safely logged
Be a role model

#1 Do your homework
Edison famously said, "Genius is one percent inspiration and ninety-nine percent perspiration. In DXpeditioning, success is ninety percent preparation.

Before traveling, read "DXpeditioning Basics ” by N7NG.This freely available publication is a must read for every DXpeditioner. Another good resource is "DX-peditioning Behind the Scenes" by Neville Cheadle, G3NUG & Steve Telenius-Lowe, G4JVG. You can order directly from the author by clicking on the title.

Study the propagation before you travel. There are three important population centers in the world: Europe, North America and Asia . From wherever you are, two are likely to be easy. The third one is the most difficult to work from your destination location so it becomes your “target area.” Make sure that you work the target area any time any band is open to that area.

Practice your QSO technique. Pick out the weaker stations. Provide training to your less-experienced operators in the finer points of both SSB and CW operating.

#2 Keep the DX community informed
The DX community appreciates a well organized website, some of which are works of art. If your operation is smaller and you do not plan to have a "full service" website, at least set up a QRZ.com page that states your location, dates of operation, and QSL information. Even with a complete website, a QRZ.com page with a link to your main website makes you easier to find.

#3 Check TX frequency AND the RX range before starting up
Always check for a clear TX frequency and find a clear RX range before starting up on a band. As a DXpeditioner, you have powerful tools to control the frequencies you use. If you have previously announced your frequencies, try to stick with them. However, conditions might demand a change. You may have to select your pileup RX place in a spot other than the busiest part of the band.

#4 You are the Boss and You are in Charge
In order to maintain control of the pileup you must operate in such a manner as to make control possible. It is easy to lose control of a pileup, and if you do, it may be your fault. Maintain good QSO mechanics. Use the same general pattern for every QSO. Select a callsign from the pile and stay with it until a satisfactory QSO results. If it is not possible to finish a QSO, solicit QSOs again. NEVER select another callsign without soliciting QSOs – QRZ, CQ, etc.

Issue clear instructions to the pileup and stick to them – always. For example, if you catch only part of someone’s call and give the partial out, do not work anyone else until you have completed with that station. If you call “NO EU,” DO NOT work any European callers. Ignore rude callers. Breaking your own rules just creates chaos. Stay in charge, but never shout to nor lecture the crowd.

#5 Announce Your Callsign Frequently, like (almost) every QSO
You should give you callsign often enough so that no one has to ask. If you don't give

your call often enough, some callers will just log whatever callsign was last spotted on a DXcluster (right or wrong) and some will ask for your call. That wastes time, interrupts your flow, and energizes the ever present frequency cops. Once per QSO is not too often.

If you are blessed with a real long callsign such as SV9/ON4ZZZZ/P, that's a lot to mention after every QSO so just be alert. If you hear someone asking “QRZ” or “What’s the DX?” on your TX frequency, you have waited too long.

#6 Use Split Operation

Assuming that you have gone to some relatively rare entity, you can start out by assuming that you will be dealing with a pileup. Don't wait until you have a large number of callers. Start out by operating split immediately. As soon as you are spotted on a DXcluster, the whole world will descend on you and you might as well be ready.

#7 Establish and Maintain a Rhythm

Standardize your transmitted messages as much as possible. For instance send a QSL or TU message at the end of every QSO and maintain a consistent pattern to help callers synchronize with you. That reduces the amount of out-of-turn calling. This is a well established technique for controlling a pileup. It gives the callers solid guidance in determining when and when not to call.

#8 Work and log dupes, it’s quicker

Work and log dupes: it is quicker than telling the duplicate callers that they are dupes, and it may be that they were unsure of a previous QSO. Use your website to announce your policy on duplicates, for example “Please work us only once on each band/mode slot to give others a chance for a new one.”

#9 Give QSY/QRT information before leaving the pileup

When you are about to leave the pileup, say what you are doing. Announce if you will QSY to another band/mode, perhaps giving out your new TX frequency. If you are going QRT for a while, give out your QSL information and website address. Don’t say, “QRX 5” unless you definitely are going to come back within 5 minutes as this just extends the band pollution unnecessarily.

if you don’t know how long you will be, it is better to say, “QRT,” but then come back on later when you are ready. When you get tired, slow down and take extra care over accuracy. If you start making too many mistakes, take a break and maybe a short sleep, whatever suits your body’s natural rhythm.

#10 Establish a “Friendship” with the Pileup

This is called the conversational style of pileup operating. This is perhaps one step beyond being friendly and not lecturing. It helps control the nature of the situation. Rather than have a group of antagonistic hounds, you put the callers at ease, and in the end give them confidence that you are fully interested in making a QSO with each of them. This style of operating is NOT a substitute for poor operating procedure, however.

Also remember the many operators who are not regular CW operators. They want a QSO too but may be able to copy code at, say, 20 wpm. DXpedition operators are sometimes whizzing along at 40 wpm. So keep an ear out for the guy who is calling at 20 wpm and respond to him at a speed he can copy easily. You will make another grateful friend.

Also remember that many operators have 100 watts and wire antennas. After the big guns all have their QSOs, work these guys because they are the backbone of the amateur radio

community.

#11 Avoid working by numbers, continents are OK

When possible, try to avoid subdividing a pileup by numbers. Depending on propagation, try working a whole continent or several continents, or NOT working a particular continent. At times only working by numbers will work, however. Whatever method you choose, be sure to inform the pileup after every QSO.

Don't break your own rule by working your pals in NA if you are asking for "Eu."

#12 Repeat corrected callsigns so everyone is sure of being correctly logged

A valid QSO is when both stations have copied content and have logged it correctly. It is unrealistic to think that you will copy 100% of all callsigns the first time. On CW do not send a “question mark,” as in “ABC?” when returning to a partial callsign. For some obscure reason many (undisciplined) pileup callers take a 'question mark' as the sign to start transmitting again, although the partial callsign does not resemble their callsign.

So when you respond to a call with a partial as “ABC 5nn” and W5ABC responds, “W5ABC W5ABC 5nn TU,” it is proper that you respond “W5ABC QSL TU” That way W5ABC knows he is in the log and does not have to call again later to make sure.

If you made a mistake with someone’s call, he may keep calling you. Repeat his call or work them again, using “TU”, “QSL”, “CFM” or “You’re in the log” to let them know for sure that they are safely logged. This is even more important if you do not have an online log with daily updates.

#13 Be a role model

Standardize your transmitted messages as much as possible. For instance send a QSL or TU message at the end of every QSO and maintain a consistent pattern to help callers synchronize with you. That reduces the amount of out-of-turn calling. This is a well established technique for controlling a pileup. It gives the callers solid guidance in determining when and when not to call.

Conclusion

A number of people contributed to this document. It is thus a compendium of the work of others, here presented in a format that hopefully has included the best of what experienced DXpeditioners have had to say about this topic.

In the end, if DXpeditioners are better prepared, insist on good operating behavior from those calling them, and if those at the other end adhere to the DX Code of Conduct, everyone will have more fun. And that’s what it’s about.

Contesters' Code of Conduct

• The primary aim of a contest QSO is to exchange only the essential QSO information (normally callsigns, reports and contest-specific information such as zones number, state or serial number) as efficiently (meaning quickly and yet accurately) as possible. In most contests, anything further (greetings, QTH or station details etc.) is superfluous, slows down the QSO rate and reduces the achievable score

• If you hear a contest in progress and want to join in, look up the contest rules to find out what information to
send and whether you are eligible to participate. Check out the contest calendar and links to contest websites at http://www.hornucopia.com/contestcal/weeklycont.php

• Listen carefully before calling a contest station, ensuring that you have their callsign correct and haven’t already worked them. There are good logging programs that will help eliminate duplicate QSOs that waste valuable time.

• Consciously avoid causing interference, for example by transmitting an over modulated signal or CQing on a
frequency that is already in use Remember, listen first and listen hard and try calling "QRL?" before operating.
Don’t operate ‘split’ unless it is absolutely necessary.

• Call a contest station that is CQing at just the right instant, giving your full callsign once. That is usually enough. Most stations leave only a few brief seconds between their CQ calls so it is important to synchronize your call with their listening periods. Good stations get a rhythm going and it will help if you get in tune with that rhythm.

• Stand by for a moment if they go back to someone else. You shouldn’t have to wait very long. If they are really busy, make a note of their frequency and spend a few minutes hunting for other stations to work, then come back for another call.

• If they send your correct callsign plus a report and contest information, respond with just a report and contest information. However, if they send your callsign incorrectly, hesitate briefly just in case they are working someone else, but if you are certain they are working you, respond by sending just your full callsign again, once or twice but with no report until they get your callsign correctly.

• Do your level best to log their callsign and exchange information accurately, and to ensure they have all your
information correct (e.g. - repeating the essential information if conditions are marginal). Sometimes several
repeats are needed to complete the QSO but this is necessary to claim the points and avoid penalties.

• Having met the primary aim, you will both be grateful for the efficient QSO and points. It is polite for the CQ station to send “Thank you“ or “TU” to confirm the QSO has been logged. This reduces unnecessary duplicate QSOs due to not knowing whether the QSO was complete, and is the cue to move on to the next QSO.

• Remain courteous at all times, even when you are stressed or tired. If another station encroaches onto the
frequency you are using, use your filters, turn your antenna, ask them politely to move a little HF or LF as
appropriate and/or shift your frequency a little to reduce mutual interference, or take this as an opportunity to go searching for new QSOs on the same or another band.

• Respect other amateurs who are not in the contest, for instance by obeying ‘contest-preferred' frequencies and avoiding frequencies used by beacons, nets, DXpeditions and other modes. Keep the WARC bands a contest-free safe haven for those who do not enjoy contests.

• If you are using a club or another amateur’s station for the contest, be a good guest, for example by being
careful with the equipment, tidying up afterwards and not annoying other people in the house.

• Play fair. For example, if you are using DX Cluster to find new multipliers, spot multipliers for other contestants too.

• Comply fully with the rules of the contest both in letter and in spirit. Don’t even bend them.

• Take as much pride in your station and operating techniques as in the contest certificates and plaques hanging on your shack wall. Learn to take advantage of the propagation and make the effort to listen for weak callers.

Most of all, be polite, efficient and friendly and stick to the rules to earn the respect of your fellow amateurs.

The Code of Conduct for Using the DXcluster

• The clue is in the name. Only ‘spot’ genuine DX, ie relatively rare or exotic calls on that band, mode and time.

• ‘Spot’ DX stations that are ‘lonely’ but don’t ‘spot’ those who have been found the "proper" way, by operators who actually listen for DX. Give them a chance to get their QSO because the mob will decend on them as soon as they are spotted.

• Dont 'spot' stations that are already very busy or struggling to control their pile-ups – give them a break! Real DXers will probably be in the pile-up, if not in the log already. Repeatedly spotting’ huge pile-ups is showing off and merely encourages yet more QRM from those who are too lazy or incompetent to find DX for themselves.

• Avoid ‘spotting’ stations that have just been ‘spotted’ by someone else, unless you have useful additional information to pass on. Definitely don’t ‘spot’ a station that has just been ‘spotted’ by a million others, no matter how excited you are.

• It is impolite to ‘self-spot’ (‘spot’ your own callsign) unless you are desperately trying to start activity on an open but quiet band – and even then it is preferable to ‘spot’ a real DX station with a comment to the effect that the band is open.

• Never ‘self-spot’ in a contest; that is definitely cheating. Posting the ‘spot’ under a friend’s callsign or a fake call doesn’t make it any more ethical.

• Please do not ‘spot’ the exact QSX frequency for DX stations operating split – it just makes the pile-up on that frequency even more difficult for them to handle. It is also unnecessary; “Up” or “Down” is reminder enough because real DXers will of course listen first!

• Get the DX call and frequency right, double-check the information before ‘spotting’ and treblecheck
after ‘spotting’. Correct your mistakes promptly and apologetically, and learn the lesson.

• Respect the DX station’s wishes regarding ‘spotting’ if they indicate (whether on the air or on their QRZ page or website) that they do, or do not, want to be ‘spotted’.

• Use your own call (remembering that your IP address is logged automatically) and be polite.

• Never insult anyone via DXcluster; it is only a hobby – and we know your IP address.

• Do not post pseudo-spots begging for QSOs, QSYs, new modes or whatever. DXcluster is not e-mail. Assume the DX is either not monitoring the cluster, or is too busy to respond.

• Do not post lame ‘non-spots’ saying you cannot hear someone. Nobody but you really cares. (Telling us that you cannot hear the DX on your 18 element 160 metre yagi at 600 feet is fine though because we will all be laughing at you for playing ‘chequebook radio’.)

• Do not post brag spots (“Worked with 3mW!”, “Yipeee!!”, “Easy on my 24 ele quad” and “Thanks for DXCC#678”).

• Do not create and ‘spot’ fake callsigns just to test your software; ‘spot’ the station TE1ST as the DXcluster network doesn’t circulate spots with that call. (Definitely avoid ‘spotting’ fake calls starting with exotic prefixes (such as P5) as that is guaranteed to excite those who have DXcluster alarms set for their last few DXCC countries.)

• Do not try to make, complete or arrange DX QSOs via DXcluster. It is unsporting, cheating even.

• Do post helpful comments eg IOTA reference, QSL information etc.

• Configure the DXcluster filters appropriately. If you get annoyed at VHF spots, ANN/ALL announcements or beacon spots, just cut out the QRM using the DXcluster filtering facilities.

• Hint: while you may enjoy the challenge of mastering the DXcluster’s somewhat obscure and limited filtering commands, software such as VE7CC’s CC User and logging programs such as Logger32 make spot filtering much easier and more flexible. Another excellent program is DX Monitor at http://ve3sun.com/

DX Code Of Conduct

Best Practices for DXpedition Operating

"The nature of a DXpedition pileup mirrors the skill of the DXpedition operator" - OH2BH. A carefully managed pileup will run with little disruption to the band and lots of fun for the DXers. Here are some suggestions that will help you make the most of the pileups. (Click the link for more information.)

1. Check transmit and receive frequencies before starting.
2. Use split operation from the beginning.
3. Maintain a rhythm of regular transmissions – no long silences.
4. Do not use excessive speed on CW. Slow down when signals are weak.
5. Reduce speed further on CW to pass information to the pileup.
6. Sign our call sign at least every minute.
7. Issue calling instructions after every QSO, for example 'UP5 EU' on CW or 'NA UP 5-10' on SSB.
8. Minimize Pileup Width: Suggest Max 5-8 kHz CW and 10-15 kHz SSB.
9. Move receive frequency in a generally regular pattern.
10. Repeat corrected call signs so everyone is confident of being correctly logged.
11. Work and log dupes, it’s quicker.
12. Don't leave the pile-up hanging. Keep the callers informed about QRT/QSY, etc.
13. Maintain a moderate, but “in-charge” attitude.

Best Practices for Courteous and Efficient DXing

1.Know the DX callsign and the location of the pileup by listening carefully to the DX station and the pileup before calling.
2.Beware of erroneous spots: Copy the DX station’s call sign yourself.
3.Be careful never to transmit on the DX frequency – learn how to use your radio properly.
4.Never interfere with an existing exchange of information.
5.Always send your full callsign.
6.Call once and then listen. Then call again, if appropriate. Try not to call during an existing QSO.
7.Respond only if the DX operator calls you. One letter or number of your call is NOT enough reason to call.
8.If the DX operator has sent your call correctly, do not repeat it unless required by licensing regulations.
9.Do not call if the DX operator asks for other geographic areas.
10. To encourage the most courteous and efficient operation, operate in the way that you would expect others to operate.

Best Practices for DXpedition Operating

"The nature of a DXpedition pileup mirrors the skill of the DXpedition operator" - OH2BH. A carefully managed pileup will run with little disruption to the band and lots of fun for the DXers. Here are some suggestions that will help you make the most of the pileups. (Click the link for more information.)

1. Check transmit and receive frequencies before starting.
2. Use split operation from the beginning.
3. Maintain a rhythm of regular transmissions – no long silences.
4. Do not use excessive speed on CW. Slow down when signals are weak.
5. Reduce speed further on CW to pass information to the pileup.
6. Sign our call sign at least every minute.
7. Issue calling instructions after every QSO, for example 'UP5 EU' on CW or 'NA UP 5-10' on SSB.
8. Minimize Pileup Width: Suggest Max 5-8 kHz CW and 10-15 kHz SSB.
9. Move receive frequency in a generally regular pattern.
10. Repeat corrected call signs so everyone is confident of being correctly logged.
11. Work and log dupes, it’s quicker.
12. Don't leave the pile-up hanging. Keep the callers informed about QRT/QSY, etc.
13. Maintain a moderate, but “in-charge” attitude.

Yth Rekan2 DXers,

Selamat Pagi n Salam Sejahtera dari Kebon Jeruk, Jakarta Barat.

Saya cuma ingin memberikan a quick update tentang rencana lokal Kebon Jeruk beserta lokal DKI lain nya dalam melakukan DXpedition ke Pulau Damar Besar (d/h Edam Island) di akhir bulan Juni 2013 yang akan datang.

Semalam kami sdh memberikan presentasi kepada rekan2 di ORDA yang diwakili oleh Om Triadi YB0KVN, Om Sugiyanto YB0BUI, Om Bambang YE0YE beserta Om Irwan, Om Andi dan staf di ORDA lain nya.

Alhamdullilah, semuanya berjalan lancar. Kami juga diberikan banyak masukan yang sangat positif dan produktif dari Om Triadi dan Om Sugiyanto yang sudah mengantongi segunung pengalaman dalam segi DXpedition.

Pengajuan call sign sepertinya juga sudah tidak ada halangan dan mudah mudahan tim Ekspedisi kami bisa dapat menggunakan call sign YE0D (Damar).

Durasi ekspedisi selama 5 hari dari tgl 27 Juni s/d 1 Juli 2013. Namun tim teknis akan mendarat terlebih dahulu sehari sebelumnya untuk mempersiapkan perlatan komunikasi, logistics n yg paling penting Defogging nyamuk !! Hehehe..

Dalam waktu dekat, kami akan meluncurkan website resmi dimana rekan2 dapat menyimak informasi yg lebih detail tentang rencana operations kami, terutama daftar tim inti, tim teknis dan tim operator. Ada juga informasi tentang antena yg akan disetup dan yang paling penting Jadwal TX, Band dan Mode TX. Informasi lain nya seperti logging software dan radio system yg akan dipergunakan juga dapat disimak di website yg sebentar lagi akan kami luncurkan. Pengalaman sehari-hari berikut foto-foto menarik n seru tentang pulau Damar Besar dan sekitar nya akan kami masukan juga di website supaya rekan2 dapat ikuti perjalanan DXpedisi ini.

Demikian informasi tambahan yg kami dapat berikan dan mohon Doa nya dan Dukungan rekan2 DXers sepenuhnya.

Terima kasih atas attensi nya.

Sampai jumpa di frekuensi.

Salam Hangat,
JOY/YB0NSI

7844. Nicaragua DXpedition 2013

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-06-13 01:55:00 UTC
From: Yb land Dx club
Topic: 7844 Message: 7844

http://www.ybdxc.net/2013/06/nicaragua-dxpedition-2013.html

http://nicaragua2013.com/

Nicaragua, officially the Republic of Nicaragua , is the largest country in the Central American isthmus, bordering Honduras to the north and Costa Rica to the south. The country is situated between 11 and 14 degrees north of the Equator in the Northern Hemisphere, which places it entirely within the tropics.

The Pacific Ocean lies to the west, and the Caribbean Sea to the east. The country's physical geography divides it into three major zones: Pacific lowlands; wet, cooler central highlands; and the Caribbean lowlands. On the Pacific side of the country are the two largest fresh water lakes in Central America—Lake Managua and Lake Nicaragua. Surrounding these lakes and extending to their northwest along the rift valley of the Gulf of Fonseca are fertile lowland plains, with soil highly enriched by ash from nearby volcanoes of the central highlands. Nicaragua's abundance of biologically significant and unique ecosystems contribute to Mesoamerica's designation as a biodiversity hotspot

Subject: Re: [YBDXC_News] YEØD, WLOTA NO.2749 EXPEDITION 2013

Yth Rekan2 DXers,

Selamat Pagi n Salam Sejahtera dari Kebon Jeruk, Jakarta Barat.

Saya cuma ingin memberikan a quick update tentang rencana lokal Kebon Jeruk beserta lokal DKI lain nya dalam melakukan DXpedition ke Pulau Damar Besar (d/h Edam Island) di akhir bulan Juni 2013 yang akan datang.

Semalam kami sdh memberikan presentasi kepada rekan2 di ORDA yang diwakili oleh Om Triadi YB0KVN, Om Sugiyanto YB0BUI, Om Bambang YE0YE beserta Om Irwan, Om Andi dan staf di ORDA lain nya.

Alhamdullilah, semuanya berjalan lancar. Kami juga diberikan banyak masukan yang sangat positif dan produktif dari Om Triadi dan Om Sugiyanto yang sudah mengantongi segunung pengalaman dalam segi DXpedition.

Pengajuan call sign sepertinya juga sudah tidak ada halangan dan mudah mudahan tim Ekspedisi kami bisa dapat menggunakan call sign YE0D (Damar).

Durasi ekspedisi selama 5 hari dari tgl 27 Juni s/d 1 Juli 2013. Namun tim teknis akan mendarat terlebih dahulu sehari sebelumnya untuk mempersiapkan perlatan komunikasi, logistics n yg paling penting Defogging nyamuk !! Hehehe..

Dalam waktu dekat, kami akan meluncurkan website resmi dimana rekan2 dapat menyimak informasi yg lebih detail tentang rencana operations kami, terutama daftar tim inti, tim teknis dan tim operator. Ada juga informasi tentang antena yg akan disetup dan yang paling penting Jadwal TX, Band dan Mode TX. Informasi lain nya seperti logging software dan radio system yg akan dipergunakan juga dapat disimak di website yg sebentar lagi akan kami luncurkan. Pengalaman sehari-hari berikut foto-foto menarik n seru tentang pulau Damar Besar dan sekitar nya akan kami masukan juga di website supaya rekan2 dapat ikuti perjalanan DXpedisi ini.

Demikian informasi tambahan yg kami dapat berikan dan mohon Doa nya dan Dukungan rekan2 DXers sepenuhnya.

Terima kasih atas attensi nya.

Sampai jumpa di frekuensi.

Salam Hangat,
JOY/YB0NSI

Yth Rekan2 DXers,

Selamat Pagi n Salam Sejahtera dari Kebon Jeruk, Jakarta Barat.

Saya cuma ingin memberikan a quick update tentang rencana lokal Kebon Jeruk beserta lokal DKI lain nya dalam melakukan DXpedition ke Pulau Damar Besar (d/h Edam Island) di akhir bulan Juni 2013 yang akan datang.

Semalam kami sdh memberikan presentasi kepada rekan2 di ORDA yang diwakili oleh Om Triadi YB0KVN, Om Sugiyanto YB0BUI, Om Bambang YE0YE beserta Om Irwan, Om Andi dan staf di ORDA lain nya.

Alhamdullilah, semuanya berjalan lancar. Kami juga diberikan banyak masukan yang sangat positif dan produktif dari Om Triadi dan Om Sugiyanto yang sudah mengantongi segunung pengalaman dalam segi DXpedition.

Pengajuan call sign sepertinya juga sudah tidak ada halangan dan mudah mudahan tim Ekspedisi kami bisa dapat menggunakan call sign YE0D (Damar).

Durasi ekspedisi selama 5 hari dari tgl 27 Juni s/d 1 Juli 2013. Namun tim teknis akan mendarat terlebih dahulu sehari sebelumnya untuk mempersiapkan perlatan komunikasi, logistics n yg paling penting Defogging nyamuk !! Hehehe..

Dalam waktu dekat, kami akan meluncurkan website resmi dimana rekan2 dapat menyimak informasi yg lebih detail tentang rencana operations kami, terutama daftar tim inti, tim teknis dan tim operator. Ada juga informasi tentang antena yg akan disetup dan yang paling penting Jadwal TX, Band dan Mode TX. Informasi lain nya seperti logging software dan radio system yg akan dipergunakan juga dapat disimak di website yg sebentar lagi akan kami luncurkan. Pengalaman sehari-hari berikut foto-foto menarik n seru tentang pulau Damar

Besar dan sekitar nya akan kami masukan juga di website supaya rekan2 dapat ikuti perjalanan DXpedisi ini.

Demikian informasi tambahan yg kami dapat berikan dan mohon Doa nya dan Dukungan rekan2 DXers sepenuhnya.

Terima kasih atas attensi nya.

Sampai jumpa di frekuensi.

Attachments: 1 described; binary payloads are missing from this source WARC

Dear All,

K7UA couldn’t put it more simply, “Listening is the key to successful DXing.” It’s not watching the DX clusters, or reading DX bulletins. It’s listening.

K7UA maintains that an important skill for a DXer is persistence. You have to be in your shack when the DX is on the air. As the author says, “You can’t work them if you are not there!”

Although K7UA concedes that CW is perhaps the most efficient mode, he also says, “SSB might well now be the DXer’s primary mode.” I’m not so sure about that. All of the recent DXpeditions and many, if not most, DX stations operate CW.

OM Joni, OM Sueb,
Utk tahun lalu special call HUT RI ke 67 pengajuannya melalui Orlok Kebumen, utk ORDA Jateng, dan dibantu operator dr teman2 YBDXC, utk tahun ini, kami tdk mengajukan lagi krn informasi dulu dr Orpus yg akn menghandle kegiatan special call semacam ini, yg sifatnya nasional.

Semoga bs dimengerti oleh teman2, Kondisi ini hehehehe

Salam
Dani

BOREALIS LIVECAM LONGYEARBYEN 360

QRV FROM 25.SEPTEMBER TO 2.OKTOBER 2013

Longyearbyen is the administrative centre of Svalbard. The town hosts a broad range of public services, shops and cafés. Longyearbyen has changed from being a one-sided industrial settlement into becoming a multi-sided community where tourism and science have gained central roles. Longyearbyen is a good starting point for activities in the Isfjorden area.

Teman-2
Menginformaskan, bahwa kami di Kebumen, kedatangan tamu dari Australia, Mr. Geoff Booney (VK4GI) yang atas sepengtahuan ORDA Jateng, malam ini, Selasa 18 Juni 2013, sekitar pukul 19:00 (12:00 UTC)-plus minus akan ON AIR dari Station YB2TJV dengan meggunakan reciprocal callsign YB2/VK4GI.

Rencana QRV di 15m dan 20m Band. bagi rekan-2 yang ingin ber QSO, sangat diharapkan partisipasinya.
Beliau akan didampingi juga oleh teman-2 dari Orlok Kebumen, sebagai ajang pembelajaran DX-ing secara langsung.

Demikian info, semoga bermanfaat dan semoga propagasi bersahabat.

salam
Dani, YB2TJV

Kiribati yang akan hilang dalam 60 tahun
Kiribati terdiri dari rangkaian 33 atoll dan pulau yang hanya beberapa meter di atas permukaan laut dan tersebar di samudera yang kosong. Dengan ancaman kenaikan permukaan laut, Presiden Kiribati Anote Tong sudah memprediksi bahwa negaranya tak akan bisa lagi dihuni dalam 30-60 tahun karena
pencemaran sumber air bersih dan intrusi air laut.

Waduh belum dapat Central Kiribati nih...!!
Tapi masih lama koq 30-60 tahun lagi - masih punya harapan ada yg dxpedition ke central kiribati (T31).

Iye gak OM Arief..??

COMING SOONER THAN EXPECTED – VIVORILLOS NA-223

Just received word that Dan is leaving Swan Island today and heading straight forVivorillos NA-223. This is a bit of a deviation from the original plans, but as we all know his travel is dependant on the Honduran Navy's schedule.

With these changes Dan is only going to be able to take one antenna, so he will most likely be active on either 20m or 15m. As it stands right now he will be on Vivorillos for 1 or 2 days only — he is at the mercy of the Honduran Navy for transportation and their needs come first. The Navy will bring him back in July for the full planned operation from NA-223.

Dan will then return to Swan Island but not sure as to how long he will be there. Hopefully he will get a little more operating time before he has to return to main land Honduras.

YBDXC pada Jatinegara Amateur Radio Gathering 2013

Oleh:
YB0NDT, Karsono Suyanto

Sekitar akhir bulan April 2013, saya memonitor frekwensi repeater 146.860 Mhz, saya mendengar bahwa akan di laksanakan kegiatan Jatinegara Amateur Radio Gathering. Kebetulan om Jeffry YCØLOU dan ketua Orari Lokal Jatinegara, om Syaiful YBØPUL setiap hari selalu stand by di frekwensi tsb.

Menurut informasi dari om Jeffry, Jatinegara Amateur Radio Gathering akan di selenggarakan tanggal 15-16 Juni 2013 di kampus Universitas Darma Persada, Duren Sawit Jakarta Timur.

Saya sangat antusias untuk hadir di kegiatan tersebut, saya sempat mendatangi om Jeffry di studio Scout Radio Cibubur untuk memberitahukan bahwa saya dan kawan-kawan dari YB Land DX Club akan hadir di kegiatan tersebut. Bahkan pada kegiatan kali ini, panitia menyediakan slot khusus untuk acara sarasehan “Bincang-bincang mengenai DX ing” .

YBDXC juga ikut berpartisipasi dengan membuka stand di arena, dan stand tersebut adalah donasi dari Om Made YB9AY, terima kasih om Made.

Selain itu YB Land DX Club juga ikut menjadi donatur pada kegiatan Jatinegara Amateur Radio Gathering 2013 kali ini. Banner sponsorship YBDXC pun ada di arena.

.Ada juga banner club Station Lokal saya …. YBØZAF hehehehehhehehe

Ada juga stand dari Scout Radio FM 107.7 Mhz

Dari kiri ke kanan : Mbak Jilly – YB1JYL, Om Djoko – YB1TJ, Om Mustafa – YCØISE, Om Imam YB4IR & Om Hen YCØQR

Dari Kiri-Kanan: Mbak Jilly YB1JYL, Om Adri YD1CSV, Mbak Ina YD1NAA dan Om Budi YF1AR

Om Made YB9AY dan Om Wayan YB9BEC

 Tepat jam 13:00 WIB, acara Sarasehan Bincang – bincang tentang DX ing di mulai, Om Imam YB4IR menjadi pembicaranya.

Dalam sarasehan materi yang di bahas adalah bagaimana memulai Dx ing, perhatikan tentang Band Plan, Selain itu di bahas juga tools apa saja yang di pergunakan saat Dx ing seperti logger, dx cluster, dsb. Juga di bahas tentang QSL ing yang sedang di gandrungi saat ini karena kemudahan, murah, dan valid untuk melakukan claim award bergengsi seperti DXCC, CQWPX Award, Worked All State Award. QSL ing yang di maksud adalah Logbook of The World atau LoTW.

Foto bersama di ruang sarasehan
Dari kiri-kanan: Om Djoko YB1TJ, Om Ramli YB8BRI, Mbak Ina YD1NAA, Mbak Jilly YB1JYL, OM

Adri YD1CSV,
Om Hen YCØQR, dan om Imam YB4IR

Hari kedua, Om Syarif YB1FWO – JG1WCT, datang ke lokasi dan mengunjungi stand YBDXC, Terima kasih om Syarif yang sudah datang jauh-jauh dari Tokyo.

Om Dadang YBØTD dan Om Syarif YB1FWO

Om Dadiet YB2DDT juga hadir ... Terima kasih om oleh-oleh Serabinya.

Dari kiri-kanan: Om Ramli YB8BRI, Om Dadiet YB2DDT, dan om Wayan YB9BEC

Hari Minggu tepat jam 16:00 saya dan kawan-kawan meninggalkan lokasi Jatinegara Amateur Radio Gathering, Om Ramli, Om Imam dan Om Made &XYL saya antar ke airport Soekarno Hatta. Sangat berkesan sekali event Jatinegara Amateur Radio Gathering 2013 ini. Sampai jumpa pada event yang lain.

YB0D, PULAU DAMAR BESAR - WLOTA-2749 IOTA-OC177

YB0D
PULAU DAMAR BESAR

WLOTA DXpedition June 27th to July 1st, 2013

Sponsored by the Kebon Jeruk Branch, West Jakarta Radio Club, Radio Clubs throughout Jakarta and the Indonesian Amateur Radio Organization (ORARI).

Damar Besar Lighthouse on Pulau Damar Besar (Damar Besar Island) - WLOTA No.2749

Pulau Damar Besar or Damar Besar Island is an uninhabited island that was once known as Edam Island during the colonial Dutch Rule. It is one of the island in the Thousand Islands cluster (Kepulauan Seribu) under the North Jakarta jurisdiction. The locals call it the Monkey Island. It is located about fifteen (15) nautical miles North of Jakarta's modern Tanjung Priok harbour.

On this island stands erect a majestic Lighthouse called Menara Suar Damar Besar or simply known as Damar Besar Lighthouse (Vast Licht as the Dutch used to call it). It stands tall at about 56 meters above sea level. The Lighthouse itself is about 52 meters high.

According to historical record, this lighthouse was built in 1879 by King Z.M. Willem III of Holland to safely navigate ships moving in and out of one of the busiest seaport of Batavia. Batavia is what Jakarta was formerly known as in the 1800s during the Dutch Colonial Rule.

The Lighthouse can be seen from miles away, even from an airplane during its final approach towards Jakarta's Sukarno Hatta International Airport in Cengkareng, Banten, West Java.

DAMAR BESAR ISLAND - INDONESIA WLOTA Number: 2749 and IOTA - OC 177

PJ5/K3TRM St. Eustatius 2013

Date: June 23-July 6, 2013
Grid: FK87ml
IOTA: NA-145
Zone: CQ-08, ITU-11

I will be returning to St. Eustatius, a Dutch West Indies island in the Caribbean, between June 23 - July 6, 2013. I will be active as PJ5/K3TRM on HF+6M SSB, CW and RTTY.

Despite the number of past operations, St. Eustatius remains in the Top 100 of several Most Wanted DXCC lists since becoming a new entity on October 10, 2010. Additionally, no other 6M operation has occurred at the summer E-skip peak since PJ6D in 2011. Therefore, my efforts will be focused on 6M, as well as the more difficult HF paths and higher bands.
Equipment
Rigs:
n 2x Icom IC-706MkIIG
n Elecraft KPA-500

Antennas:
n Spiderbeam 5-band (10-20m)
n G5RV
n M² 6M5X

QSL Information
QSL cards can be sent direct or through the bureau to my home callsign. Direct requests must include an SASE or SAE with either an IRC or $2US for return postage. Additional details can be found on my QSL Information page.

Online QSL Request Service (OQRS) for both direct and bureau is available through ClubLog.

Full logs will be uploaded to LoTW shortly after completion of this operation.
Accomodations
We will be staying at the Keli Keli rental home located on the northern slope of The Quill. The terraces provide amazing views of the Caribbean Sea and Atlantic Ocean with clear takeoffs to Oceania, Central & North America, Asia, Europe and Africa. Keli Keli has hosted several DXpeditions, including PJ5/K3TRM & PJ5J in 2012 and PJ5/SP6EQZ & PJ5/SP6IXF in 2010 & 2011.

JT9 – JT65 on steroids?

Posted on May 4, 2013 by g6nhu

A few months ago I heard about a new data mode from Joe Taylor, K1JT called JT9. I looked into it and even tried calling CQ a few times on 40m using it but with no replies and no sign of any activity. I quickly gave it up as a bad job but before long I started seeing twitter posts and blog entries about this new mode. It seems that when I first looked at it, the only way to get a QSO was by sked because it was so new and there were so few people using it.

JT9 has some similarities with JT65A – It’s designed for LF and HF work and will decode very weak signals. However JT9 in the most common mode will decode signals 2dB weaker than JT65 and it uses just 15.6Hzbandwidth which is less than 10% of the bandwidth that JT65 uses. JT65 users will appreciate that this is very good as it can often be difficult to find a clear spot to operate due to the popularity of this new mode.

JT9 has five different modes, the fastest allowing a QSO to be completed in six minutes, the same as JT65 and the slowest taking up to 30 minutes per transmission period (up to three hours for a single QSO) and using just 0.4Hz bandwidth. Most QSOs will be made using the fastest mode.

I tried JT9 again just over a week ago and I was making QSOs straight away – In one session I counted over 12 stations all showing in the waterfall at the same time so there’s a lot more activity than when I first started.

It’s well documented in my blog that my first ever QSO to VK land was using JT65 on 40m so I was very pleased to work VK7BO (same operator, different callsign) on 20m JT9 on just my fifth day of using the mode with nice big signals each way. With JT65 I normally ran 10-20 watts but I’m keeping my power down to 5w for all JT9 QSOs.
Working VK7BO on 20m JT9

The JT9 mode is implemented in the WSJT-X software which can be downloaded from here. I thoroughly recommend you have a good read of the user guide before you start using it as everything you need to know is in that guide. It’s very similar in operation to JT65 as can be seen above.

OM Zen,

Saya sudah ampir sebulan pake JT9, ya lantaran namanya new mode, calling cq cq setengah jam paling cuma dapet 2 contacts doang hehehehe
Belum banyak yg pake sih...

Soal simple ngga nya, ya ampir sama dgn JT65, cuma power dan nada pancaran nya yg beda
Cukup 5 watt (baca very high power) udah lebih dari cukup ... malah di anjur kan untuk QRPp ...
Kalo JT65 kaya suara music ngga karuan (kata bule music setan hehehe), kalo JT9 kaya org lagi tuning selama 48 detik

Sangat di anjur kan pake Ham Apps nya Laurie VK3AMA untuk mempermudah logging nya sama seperti JT65.

Settingan ke radio, kalo anda pake HRD, sangat mudah sekali, 2 kali click langsung beres ... kalo buat settingan ke radio pake program lain or stand alone, perlu waktu untuk trial and error ...

Seperti untuk JT65, sync time computer ke UTC server juga sangat penting .... so kalo sudah pernah install NTP software buat JT65, ngga perlu install ulang lagi ...

73,

Iwan

om iwan,
kalau saya install berarti, cukup JT9 aja ya? ga perlu tambahan software
lainnya.

Om Zen,
Saya sudah install JT9.5-nya, tapi masih belum tau mulai komunikasinya dari mana, karena tidak terlihat call sign yg sedang onair.....
Hanya FileID;Sync;DB;DT:DF dan W, tidak seperti di JT65,
Saya coba pindah ke Mode JT65A juga demikian, tidak ketahuan siapa yg sedang komunikasi.
Apa mungkin masih salah settingnya ya Om Iwan....???

Salam,
Martin

OM Zen,

Di website yg aslinya ada link buat download WSJTX (JT9), yg di posting disini bisa jalan ngga tuh link nya?

Download itu software nya dan Ham Apps nya juga perlu di upgrade, 1 upgrade tapi nanti secara automatic sewaktu di install ntar jadi 2 program yg 1 JT-Alert buat JT65-HF dan yg satu lagi jadi JT-ALert WSJTX.

Cuma itu aja, NTP nya bisa pake yg terdahulu yg anda pake buat JT65, jadi ngga perlu install lagi ....

OM Martin,

Koneksi dari pesawat radio ke computer sudah jalan lancar? Kalo sudah jalan dgn baik di layar JT65 or JT9 pasti semua noise masuk, keliatan disitu .... nah kalo itu jalan anda bisa coba monitor di 14.076 buat JT65 dan di 14.078 buat JT9

JT65 suara tone nya naik turun, untuk JT9 suaranya kaya tone org lagi tuning.

Kalo semua settingan anda sudah benar nanti yg Sync, DT, DF, etc terisi automatically ... Kalo yg JT9 harus sabar, karena ini mode baru yg main di seluruh dunia masih sedikit OM Martin .. jadi ngga setiap saat ada yg on air .. sekali lagi suara transmisi JT9 kaya org lagi tuning selama 48 detik, jadi kalo anda monitor di detik 49 sampe 59 ngga bakal ada suara apa2, sama dgn JT65..

Kalo ada problem yg lain, silakan japri ke saya OM Martin: w7nz at arrl dot net, mudah2an saya bisa bantu ...

PJ5/K3TRM confirmed by LoTW on 10M/15M - SSB.

Hope will work with him on other mode. HI

73 gud dx
hen-yc0qr

Dari: Yb land Dx club <ybdxc@...>
Kepada: "ybdxc_news@yahoogroups.com" <ybdxc_news@yahoogroups.com>
Dikirim: Minggu, 23 Juni 2013 16:44
Judul: [YBDXC_News] PJ5/K3TRM St. Eustatius 2013

PJ5/K3TRM St. Eustatius 2013

Date: June 23-July 6, 2013
Grid: FK87ml
IOTA: NA-145
Zone: CQ-08, ITU-11

I will be returning to St. Eustatius, a Dutch West Indies island in the Caribbean, between June 23 - July 6, 2013. I will be active as PJ5/K3TRM on HF+6M SSB, CW and RTTY.

Despite the number of past operations, St. Eustatius remains in the Top 100 of several Most Wanted DXCC lists since becoming a new entity on October 10, 2010. Additionally, no other 6M operation has occurred at the summer E-skip peak since PJ6D in 2011. Therefore, my efforts will be focused on 6M, as well as the more difficult HF paths and higher bands.
Equipment
Rigs:
n 2x Icom IC-706MkIIG
n Elecraft KPA-500

Antennas:
n Spiderbeam 5-band (10-20m)
n G5RV
n M² 6M5X

QSL Information
QSL cards can be sent direct or through the bureau to my home callsign. Direct requests must include an SASE or SAE with either an IRC or $2US for return postage. Additional details can be found on my QSL Information page.

Online QSL Request Service (OQRS) for both direct and bureau is available through ClubLog.

Full logs will be uploaded to LoTW shortly after completion of this operation.
Accomodations
We will be staying at the Keli Keli rental home located on the northern slope of The Quill. The terraces provide amazing views of the Caribbean Sea and Atlantic Ocean with clear takeoffs to Oceania, Central & North America, Asia, Europe and Africa. Keli Keli has hosted several DXpeditions, including PJ5/K3TRM & PJ5J in 2012 and PJ5/SP6EQZ & PJ5/SP6IXF in 2010 & 2011.

OM Hendra,
Saya kuatirnya seperti kejadian di beberapa teman yg sebelumnya FBnya macet.
Ternyata ada yg hack - lewat chatting dia minta pulsa ke teman2 - ada juga yang jadinya jualan barang elektronik tapi ternyata penipuan.

Yang punya kun FB sebenarnya - malahan gak tahu sama sekali, wong lagi diblok.

tnx
hen-yc0qr

Subject: Bls: [YBDXC_News] TOLONG

OM Hendra,
Saya kuatirnya seperti kejadian di beberapa teman yg sebelumnya FBnya macet.
Ternyata ada yg hack - lewat chatting dia minta pulsa ke teman2 - ada juga yang jadinya jualan barang elektronik tapi ternyata penipuan.

Yang punya kun FB sebenarnya - malahan gak tahu sama sekali, wong lagi diblok.

tnx
hen-yc0qr

Teman2,

Barusan saya buka Facebook saya - ternyata ter/di BLOCKED.

Tolong kalo ada macam2 dari Facebook itu, saya diinfokan via email, jadi parno nih.

salam

Ya, kalo cuma harus puasa utk tidak buka FB sih gak masalah ya, tapi kuatir itu saja.
hahaha, minta pulsa, minta IRC, minta greenstamps, juga minta QSL card tanpa QSO lagi.

Kang Hendra habis makan jeroan kali ya atau habis makan apa, sampe kholesterol naik.
Semoga cepat sembuh.

OC-177. A team of nine YB operators will be active as YB0D from Damar Besar Island (LH 2749) between June 27th and July 1st. Activity is sponsored by the Kebon Jeruk Branch, West Jakarta Radio Club, Radio Clubs throughout Jakarta and the Indonesian Amateur Radio Organization (ORARI). Operators mentioned are Fachmi/ YB0MF, Joy/YB0NSI, Dicky/YB0JZS, Rachmat/YB0ORR, Syaiful/YB0PUL, Agus/YB0BDC, Handry/YB0NCS, Jeffrey/YC0LOU and Ben/YC0NDN. Activity will be on 160/80/40/20/15/10 meters and 2m using CW, SSB and the Digital modes. QSL via YB0JZS only direct and LoTW (6 months later). NO eQSL and NO Bureau. For more details and updates, visit their YB0D Web page at:

7927. LoTW, Quick Start & Initial Setup

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-06-24 12:29:24 UTC
From: Yb land Dx club
Topic: 7927 Message: 7927

QUICK-START
==========

In Windows, once the software is installed you'll find the programs TQSLCertand TQSL under the Start/Programs/TrustedQSL menu. (Unless you selected a different menu during installation.) The installer also lets you place shortcuts to these programs on your desktop.

To install on Mac OS X, open the disk image file (.dmg) and drag theTrustedQSL folder to your Applications folder. If you are replacing an existing installation of TrustedQSL, you should choose "Replace All" when prompted if the existing files should be replaced. You could also drag the existing TrustedQSL folder to the trash first as no user data will be lost.

On a Mac OS X 10.8 or later system, you may need to grant permission forthe applications to run. To do that, right click on the application icon, then choose Open. You will receive an "Are you sure" dialog box. Click the "Open" button to permit the application to open. You will only need to do this once for a given TQSL release.

Instructions for installing on Linux can be found in the INSTALL document included with the source code.

Initial Setup
==========

IT IS NOT NECESSARY TO PERFORM THE FOLLOWING STEPS IF YOU ARE SIMPLY
UPGRADING TO A NEW VERSION OF THE SOFTWARE.

1) CREATE A CERTIFICATE REQUEST. Run TQSLCert. You'll get a message reporting that you have no certificates and asking if you want to request one. Say YES. Then proceed through the request wizard, saving the request into a file.

a) The request wizard will ask you to supply a call sign. Use your present call sign -- without any portable identifiers.
b) The QSO start date is the first date for which you'll enter QSO records into the system using the call sign you supply. Normally this is the issue date for your license. Leave the QSO end date blank for a license that is current.

c) For US call signs, your mailing address should agree with the address in the FCC database. If your address is different, you must register your new address with the FCC.

d) The request wizard includes a page that allows you to digitally sign the certificate request. On your initial request, you must choose "unsigned" since you have no certificate with which to sign.

e) Remember where on your computer you save the certificate request file for the next step!

2) SUBMIT THE CERTIFICATE REQUEST. Send the .TQ5 file created in step 1 as an attachment in an email message to lotw-logs@..., or upload it via the Web (https://www.arrl.org/lotw/). If you are a US licensee, you will then receive a post card in the mail with further instructions. (The post card will be sent to the address you have in the FCC database, so make sure that's correct!) If you are a non-US licensee, you must submit proof of license and identity to receive your certificate. See http://www.arrl.org/lotw/ for details.

NOTE! IT IS IMPORTANT that you do NOT delete the certificate request (the red-lined icon) from TQSLCert once it has been sent. Each certificate request is unique and must match the certificate that will be returned to you by the issuer. If you delete the certificate request from TQSLCert, you will NEVER be able to load or use the received certificate!

3) LOAD THE CERTIFICATE. Once your certificate has been issued it will be sent as a .TQ6 file to the email address you entered into the certificate request during step 1. You should be able to double-click the attachment in the received message to launch TQSLCert to load the .TQ6 file. If that doesn't work, save the attachment to disk, run TQSLCert and use its File menu's "Load Certificate File" command to find and load in the .TQ6 file. Once that's done, TQSLCert should show your certificate in its certificate list with a gold emblem next to your call.

4) SAVE THE CERTIFICATE. This step is strongly recommended. If you do not perform this step and later lose your certificate (due to a hard-drive crash or system reinstall, for example), your certificate will be unrecoverable. Click on the certificate in the certificate list to select it, then choose the Certificate menu's Save command. Save the certificate file onto a floppy disk or other off-line medium.

5) REQUEST ADDITIONAL CERTIFICATES. Logbook of the World treats a call sign with a portable identifier (e.g. NU1AW/4 or KP2/W1AW) as a separate call sign. To submit log data using such a call sign, you need a certificate with that call sign in it. Once you have received your certificate for your present call sign, repeat the process above, but in step 1d, sign the request with the certificate for your present call sign.
This will speed the process of getting the certificate and will ensure that all of your certificates appear under your Web site user account.

6) CREATE A LOG FILE. If you have a logging program that can produce log files in ADIF or Cabrillo format, you can use those files directly. If you just want to enter a few QSOs into a log file, you can run TQSL and choose the File menu's "Create New ADIF file" command.

7) CREATE A STATION LOCATION. In TQSL, select "Station/Add Location" from the menu. Step through the wizard to specify the location of the station used to make the contacts you'll be submitting. At the end of the wizard, enter a name to use for this station location, e.g., "Home" or "Portable in EM29."

8) CREATE A SIGNED LOG SUBMISSION. In TQSL, select "Sign existing ADIF or Cabrillo file" from the File menu. In the resulting "Select Station Location" dialog, select the station location and click "Ok." You'll then be asked to select the log file (a file in ADIF or Cabrillo format) to sign. Finally, you'll be asked to name the file and select the location (directory) where TQSL will save the .TQ8 (signed log) file.

9) SEND THE SUBMISSION. Send the .TQ8 file created in step 8 as an attachment via email to lotw-logs@.... You will receive an email response. (More than one file can be attached to an email message.) Or you can upload the file at https://www.arrl.org/lotw/

10) Visit the LOTW Web site at https://www.arrl.org/lotw/ to view your submitted data and confirmations and apply for award credits. Submit any bug reports to lotw-help@....

Kepada Yth. Rekan Rekan DXers,

Mohon Dukungan dan Doanya supaya rencana kita ini dapat berjalan dengan Baik dan mulus.

Ekspedisi ini dapat berlanjut dari hasil gabungan tenaga dan keringat para rekan rekan dari Lokal-Lokal se DKI dalam rangka merayakan HUT Jakarta yg ke 486.

Mohon partisipasi rekan2 DXers dari seluruh Nusantara.

Untuk rekan-rekan yang ingin mengunjungi Pulau Damar Besar di hari Sabtu tgl 29 Juni atau hari Minggu tgl 30 Juni 2013 pukul 8:00 WIB dan kembali pada pukul 13.00 di hari yang sama, kami menyediakan transpor dari Muara Angke ke Pulau Damar Besar dengan biaya sebesar Rp250.000 PP termasuk makan siang yang sederhana yg disediakan oleh Istri dari Penjaga Mercu Suar. Silakan email langsung ke saya di yc0nsi@yahoo.com untuk informasi tambahan atau email ke yb0damar@...

Website kami dapat disimak di www.damarbesardxpedition.com

Terima kasih atas perhatian nya.

Salam hangat,
JOY/YB0NSI
Operator Coordinator Officer

Hi OM Joni,
CQ yg paling terlambat, edisi May 2013 & June 2013 sampai saat ini saya belum terima, sedangkan QST yg biasanya terima minggu III bulan sebelumnya, edisi July 2013 yang belum diterima (yg ini masih wajarlah).

Jadi nasib kita utk yang CQ Mag. masih sama terakhir terima yg edisi April 2013, sedangkan QST edisi June 2013 saya sudah terima.

Semoga hari ini Mr Postman baa semua majalah2 itu (plus QSL card).

Hi All

Mohon info untuk rekan-rekan yang berlangganan majalah CQ atau QST..
Apakah lancar terima majalahnya..
Saya terima CQ magazine terakhir edisi April dan QST edisi Mei..
Jangan-jangan jatah buat saya di sorong tidak sampai bin hilang,,

Halo OM Jony,

Saya berlanggan QST terakhir yang saya terima edisi bulan Juni 2013 kira-kira sebulan yang lalu. Saat ini sedang menunggu edisi July 2013 yang biasanya sudah datang tetapi belum kelihatan juga diantar oleh pak Pos.

Semoga segera datang lancar kembali untuk area Papua. Saya di Salatiga Jawa tengah di kaki gunung merbabu dari kantor pos cuma berjarang 2 km.

Salam dari kami 73

Om Hendro
Om Tono

Semoga kabarnya baik ya om.

Tnx infonya..
Untuk QST edisi Juni belum saya terima sampai hari ini..
Biasa sebelum masuk bulan tsb,,
Majalahnya sudah sampai..
Ini rada aneh..

Terus untuk CQ magazine.
Pernah 1x majalahnya salah antar oleh petugas pos.
Kdarna alamat penerima agak kecil tercetak di sudut kiri bawah majalah,
untungnya diantar ke teman amatir radio juga,,
Kebetulan namanya beliau Yani Salim.. Hehehehe
Kalo tidak ya kehilangan 1 edisi deh,,

Iya OM Joni,
Kalo CQ alamat kita di cetak langsung di kotak putih/kosong kiri bawah dan kecil, sedangkan kalo QST ditulis di selembar kertas lain.

OM Joni,

Ada choice lain, eQST lebih cepet sampe nya, yg saya sudah terima dari awal bulan ini untuk yg edisi July 2013.

Kalo saya terima hard copy kewalahan, di gudang sudah ada beberapa dus yg edisi lama, di rumah OM Lukas W7XYB juga ada beberapa dus, maka nya saya ganti ke eQST aja biar ngga makan banyak tempat, considering saya akan terima QST ini sampai saya SK dan dapet di lanjut kan oleh XYL saya kalo perlu, sampe SK juga hehehe

So, go green lebih bagus, save some trees, bisa di print kok kalo mau hard copy nya :)

OM Iwan,
Memang lebih praktis yg edisi digital, tapi salahsatu kelemahan saya adalah baca atau lihat gambar di layar komputer.
Sebenarnya juga lebih hemat, karena isinya khan juga banyak iklan diulang2. HI.
Beberapa hasil download dari internetpun harus saya cetak dulu, seperti artikel/ presentasi yang pernah diberikan OM Iwan ke saya dulu.

Kalo gak salah (cmiiw) edisi digital utk QST juga dikirimkan ke pelanggan semuanya, tapi khusus CQ Mag. dibedakan.

Kalo OM Joni cuma kesulitan dalam akses internet jadi lambat atau malah susah utk download, tapi saya walaupun di Jakarta yg akses internetnya lebih mudah & cepat - kesulitannya pada CPU di otak saya yang masih Pentium 1. Un-upgrade-able. HI HI
Masih primitif sekali, susah utk ikuti perkembangan jaman padahal sekarang sudah banyak juga eBook yg relatif murah dan mudah.

Yang sama adalah alasan "bisa dibaca/dilihat di mana saja" - tanpa perlu punya iPad yg mahal.
Padahal betul kata OM Iwan : "Go Green - Save the Trees" (for hang your antenna up)

http://www.ybdxc.net/2013/06/a-beginners-guide-to-making-cw-contacts.html

http://www.netwalk.com/~fsv/CWguide.htm

A Beginner's Guide to Making CW Contacts
by Jack Wagoner WB8FSV

There are dozens of specialities or activities under the broad banner of Amateur Radio. Amateur radio is also known as ham radio, why, nobody knows for certain. From working DX, to building radios from scratch, to satellite communications, to slow-scan TV, to just plain rag chewing(or talking) with new and old friends all over the world; there is something for everybody.
As a true ham radio fanatic, my personal favorite ham activity is yakking with other hams in Morse Code, also called CW(for continuous waves). Morse Code has a mystique to it, it is an extremely cool method with which to communicate. In this Beginner's Guide to Making CW Contacts I am going to try and give those hams new to CW a better idea of how to start. How to find someone to talk with, what to talk about, how to deal with QRM, how to end a CW contact, how to get lots and lots of QSL cards, and much more useful and practical information.
I wrote this Guide from the perspective of hams in the United States. Many of my references, for example to frequencies and to radio propagation, pertain to amateur radio in North America, although most of the CW operating techniques I discuss apply to worldwide CW operation.

The ARLHSWheelhouse

It's been quite a while since we have contacted you or sent a newsletter. As most of you probably know, Jim, K2JXW (the President and general manager) was diagnosed with cancer a few months ago. We are happy to report that the surgery went well, and he is now in recovery with no chemotherapy required. This has now allowed him limited activity and he is now trying to catch up on hundreds of small details that were neglected in his absence. No one seems to have asked that members keep their dues up to date, and most have let their memberships expire. This is not crucial and really has no effect on your individual memberships, but now is the time to catch up! If you are receiving this message, there is a good chance that it's time to renew at the old rate of only US $20 / year. This can be made by sending your check (drawn on a US bank only please) or or send US$20 cash to:
ARLHS
Membership Dept.
114 Woodbine Ave
Merchantville, NJ
08109-1854

Oh yeah, considering how many months have gone by, take a look at the membership list and particulary at your individual listing. Is it OK? Let us know ASAP if you find any mistakes. The member list is on the web site at http://arlhs.com/members.html Our e-mail address is K2JXW@...

73, the ARLHS Membership Committee

Amateur Radio Contesting FAQ
See the end of this document for copyright and contact information.

The top three teams receive their trophies at the
World Radiosport Team Championship 2002 (photo: Marijan Miletic S56A)

Contents

1. Why take part in contests?
2. How is the winner determined?
3. How are points scored?
4. What is a "multiplier"?
5. What sort of things count as multipliers?
6. What is a DXCC Entity?
7. What is a CQ Zone?
8. What bands can be used during contests?
9. What are the "WARC" bands?
10. Can I work the same station more than once?
11. What if I work a station more than once on the same band and mode?
12. Why are there different entry categories?
13. What sorts of entrance categories are provided?
14. What do "SOLP", "SOHP", "SOAB", "SOSB", "M/S", "M/2" and "M/M" mean?
15. What is the "DX Cluster"?
16. What category should I enter?
17. Do I need a computerized logging program?
18. What logging program should I get?
19. What should I look for in a contest logging program?
20. What is the "Cabrillo" log-file format?
21. How do I connect the computer to my rig?
22. Do I need a beam to enter contests?
23. Do I need an antenna farm to enter contests?
24. What is a "little pistol"?
25. What sort of rig do I need to enter a contest?
26. What is "QSK", and do I need it?
27. What is the alternative to QSK?
28. What is a "fill"?
29. I have a limited budget. What should I spend it on?
30. How good does my CW have to be to enter a CW contest?
31. Why do contesters only exchange reports and other numbers, not name and QTH?
32. Why are reports in contests always send as "5NN"?
33. What are "cut numbers"?
34. What does it mean when I hear a station send "TEST ZS1AN" or "ZS1AN TEST" during a CW contest?
35. How should I reply to such a call?

36. What sort of reply should I expect, and what does it mean?
37. How do I send my report?
38. What then?
39. How do I ask you to repeat the zone or serial number?
40. What does it mean if I call a station and get the reply "DUP" or "B4"?
41. Could you give an example of a complete contest QSO?
42. What is a serial number?
43. What is a "pass"?
44. What is "running"?
45. What is "search and pounce"?
46. What is "Single Operator Two Radio" contesting?
47. What is a "Sprint"?
48. What is the exchange format for a Sprint?
49. What is a "QTC"?
50. What should I do before a contest?
51. What do I do after the contest?
52. What should I not do after the contest?
53. How long do I have to wait for the results?
54. What is a "busted call"?
55. What should I do if I'm not sure whether I copied a callsign correctly?
56. What is a "UBN report"?
57. What is "NIL"?
58. What are these unusual callsigns I hear in contests?
59. Should I QSL my contest QSOs?
60. What is the "World Radiosport Team Championships"?
61. How do I find out what contests are on?
62. Where can I get more information?
63. May I reproduce this FAQ?

Questions & Answers

1. Why take part in contests?

Everyone has their own reasons. Some of mine are: to sharpen my operating skills, to learn to get the most I can out of my equipment, to compete against my peers, to be a part of the community of contesters.

2. How is the winner determined?

The winner in each category is the station which gets the most points in that category.

3. How are points scored?

Each QSO will score a certain number of points. The number of points scored for a QSO may depend on the location of the station contacted - for example in the CQ Worldwide DX contest stations on the same continent as yourself count 1 point each, stations on a different continent count 3 points and contacts between two stations both located in North America count 2 points. In other contests, QSOs for certain stations may count for more points than QSOs with others - for example, in the ARRL 10m contest, contacts with stations holding Novice or Technician Plus class licenses count more than contacts with other license classes. In contests which allow you to work in different modes (for example, CW and SSB) the number of points may also depend on the mode.

4. What is a "multiplier"?

As well as getting points for each QSO, most contests allow you to get multipliers from certain QSOs. For example, you might get a multiplier for every different country (DXCC

entity) you work on each band during the contest. Your final score for the contact will then be calculated by multiplying the total of all your QSO points by the number of multipliers you worked. For example, if you worked 100 stations at 2 points per QSO and 20 multipliers, then your total QSO points would be 100 x 2 = 200, and your multiplier is 20, so your final score would be 200 x 20 = 4000 points.

5. What sort of things count as multipliers?

That depends on the particular contest, so I will give a few examples:

* In the CQ Worldwide DX contest, countries (DXCC entities) and CQ zones both count as multipliers. So if you work 100 countries in 20 zones, you would have a total of 100 + 20 = 120 multipliers.
* In the IARU HF World Championships, ITU zones and IARU member society headquarter stations and IARU officials worked count as multipliers.
* In the ARRL International DX Contest, for stations in North America each country (DXCC entity) worked is a multiplier. For stations located outside North America, every American or Canadian state worked is a multiplier.

6. What is a DXCC Entity?

Entities correspond roughly to countries and administrative territories, but they also may be islands and even reefs if they meet criteria set by the ARRL, which administers the DX Century Club (DXCC) award and decides what qualifies as an "entity".

7. What is a CQ Zone?

The world is divided into 40 "CQ Zones" which are used as multipliers for some contests. Get further information and a map showing the different zones at www.cq-amateur-radio.com/wazmain.html.

8. What bands can be used during contests?

That depends on the particular contest. Some contests are limited so a single band - for example, the ARRL 10m contest is (not surprisingly) for 10m only. Many contests allow operation on all the pre-WARC HF bands - that is: 160m, 80m, 40m, 20m, 15m and 10m. Other contests are for VHF bands only. However note that contesting is never permitted on the WARC bands: 30m, 17m and 12m. This is so that amateurs who do not enjoy contesting can take refuge on the WARC bands during contests.

9. What are the "WARC" bands?

The WARC bands are the 30m, 17m and 12m bands. They were named after the World Amateur Radio Conference in 1979 at which these bands were allocated for amateur use. The WARC bands may not be used for contesting.

10. Can I work the same station more than once?

Generally you can only work a station once on each band and mode that is allowed during the contest. For example, in an SSB-only contest, you can only work a station once on each band. In a contest that allows both CW and SSB, you may be able to work a station twice on each band, once on CW and once on SSB. But read the rules - the ARRL Sweepstakes, for instance, allows only one contact per station, period.

11. What if I work a station more than once on the same band and mode?

If you claim points for both contacts, then you will lose both the points claimed and additional points as a penalty for your error. It is fine to work a station multiple times if you only claim points for one of the contacts (usually the first one), although this is a waste of time and won't do your score any good.

12. Why are there different entry categories?

Different contesters have different preferences and budgets. Some like to work on their own, others prefer to be part of a team. Some can afford high-power stations, others prefer to compete with a "barefoot" or QRP transceiver. By dividing a single contest into a number of different entry categories, all contesters can share the fun and contribute to the contest, while competing against similarly equipped stations in the same category.

13. What sorts of entrance categories are provided?
That depends on the contest, but the entrance categories for the CQ Worldwide DX contest are a good example of a fairly extensive list of possibilities:
* Single Operator High - a single operator, maximum power 1.5 KW, no DX alerting assistance (for example, DX cluster spots) allowed.
* Single Operator Low - a single operator, maximum power 100W, no DX alerting assistance allowed.
* Single Operator QRPp - a single operator, maximum power 5W, no DX alerting assistance allowed.
* Single Operator with DX Spotting Net (also called "Single Operator Assisted") - a single operator, maximum power 1.5 KW, passive use of spotting nets allowed.
* Multi-Operator, Single Transmitter (also called "multi single" or "MS" for short) - any number of operators, but only one transmitted signal allowed at any time. The additional operators will often be listening for new multipliers, and passing the information on to the one transmitter operator.
* Multi-Operator, Two Transmitter (also called "multi two") - Any number of operators, but only two transmitters. In CQWW, both transmitters may work any stations. In some other contests there are strict restrictions on what the second transmitter may do - for example, it may only be allowed to work new multipliers.
* Multi-Operator, Multi Transmitter (also called "multi multi") - Any number of operators, operating any number of stations, but with only one transmitted signal on each band at any time. In many cases a "multi-multi" station will have a dedicated transmitter for each of the contest bands.
Note that in CQWW, single operator entries can choose to be all-band, or only to work a single nominated band.
14. What do "SOLP", "SOHP", "SOAB", "SOSB", "M/S", "M/2" and "M/M" mean?
These are all abbreviations for contest entry categories:
* SOLP - Single Operator Low Power
* SOHP - Single Operator High Power
* SOAB - Single Operator all band
* SOSB - Single Operator Single Band, often includes the band, e.g. "SOSB/80" for a single band entry on 80m
* M/S - Multi/Single - Many operators but only a single transmitter
* M/2 - Multi/Two - Many operators with two transmitters
* M/M - Multi/Multi - Many operators with many transmitters
15. What is the "DX Cluster"?
It is a worldwide computer system on which DX stations are reported ("spotted"). It can be accessed via Packet Radio or on the Internet at www.dxsummit.com. You are only allowed to make use of DX Cluster spots if you are entered in an "assisted" class. No matter what class you are entered in you may not enter your own station into the DX cluster, this is called "self spotting" and is illegal in all contests. Don't do it. K1TTT will get you if you do.
16. What category should I enter?
If you don't have a kilowatt linear, then single operator low power is an attractive option since you don't have to compete with all the kilowatt-plus signals in the high power category. If you are an experienced QRP operator, then by all means choose QRPp instead, but if you are not a QRP operator then you may find this category a bit frustrating at first as you will have to learn how to make your QRP signal heard while learning the ropes of contesting at the same time. If your antenna system is limited then you may want to enter single-band or, like me, enter all-band anyway 'cause it's more fun and just live

with a less competitive score.
17. Do I need a computerized logging program?
To make a serious attempt at an international contest, yes. Most of the smaller stations that enter a contest spend much of their time answering other stations that are calling CQ. This is known as "search and pounce" - you search for a station you need, and then pounce on it by replying to its call. However since you can only work a station once on each band and mode, before you reply to the CQ, you need to know whether you have worked the station before, and unless you have a photographic memory a computer logging program is by far the best way to do this. Contesters are a very friendly bunch, but calling the same station five or six times on the same band during a major international contest will test the patience of even the most saintly participant. Of course if you are fortunate enough to be even moderately rare DX (ZS for example), then you can get by with calling CQ yourself and waiting for a reply, log this on paper and later remove the
duplicates ("de-dup" the log) by hand. This is what I did in my first major contest, but after manually de-duping 475 QSOs, which took me a whole day, I went out and bought a logging program.
Note that for many of the smaller state or national contests, you can get by without a logging program as there are few enough entrants that you can remember who you have worked or look it up on your paper logs. These contests can be great fun and are excellent practise for the "big ones".
18. What logging program should I get?
There are many different, some commercial ones, which you have to pay for, and some which are free. Popular commercial programs include WriteLog for Windows, TRLog and SD. Writelog has a Windows graphical user interface. Although originally written for DOS, TRLog will also run under most versions of Windows. SD is available in two versions, one which runs character-mode under Windows, and one for DOS. Free contest logging software includes CT, also originally designed for DOS, and the open-source N1MM logger for Windows. You can read user reviews of these and other programs at www.eham.net.
19. What should I look for in a contest logging program?
First, be aware that logging programs come in two different flavours - general logging programs designed to maintain a normal station log, and specialized contest logging programs. The difference is that contest logging programs have contest scoring rules "built in" for major contests, so they will automatically keep track of your score, tell you whether you can work a particular station for the contest, and other contest-specific time saving features. Needless to say, you want a program designed for contest logging. Then make sure it supports the contests you want to enter, since having the contest programmed into the software for you is a real time saver. If you don't know exactly which contests you want to enter, then at least see how many contests it supports. Also consider the ease of adding new contests yourself if you have to. Some programs, like WriteLog for Windows, require programming skills to do this while with others, like TRLog, you can add
new contests by editing a configuration file. Also look for a program that can interface with the rig(s) you use or are likely to use. Having the logging program automatically pick up the band and mode your rig is set to is a great time saver and eliminates a common source of costly errors. Many logging programs can also turn your beam automatically for you to point at the station you are working, so if you want to use this feature then make sure the program is compatible with the rotator(s) you are using. Finally, make absolutely sure that the logging program can export the log file in the standard "Cabrillo" format, which is used to submit logs for most contests. All decent logging programs can interface to your rig's key jack to send CW automatically. This is a great feature as it allows you to send exchanges while capturing information into the logging program.
20. What is the "Cabrillo" log-file format?

Cabrillo is a standard format for submitting log files to contest organizers so they can be checked and scored by computer. Although different logging programs store the log files in different formats, most have the ability to export to Cabrillo format for submission.
21. How do I connect the computer to my rig?
There are a couple reasons to connect your computer to your rig. First, so it can send CW automatically and/or PSK31 or RTTY depending on the contest. Some logging programs also provide a "voice keyer" which allows you to record messages and then replay them over the air. This is great for calling "CQ" in a phone contest, for example. For this you need a computer soundcard interface with support for CW keying. A simple example can be found on my web site. The second reason is so the logging program can keep track of the band and mode of your transceiver. This may require a proprietary interface from the transceiver manufacturer. Many of these interfaces will also allow the computer to control the transceiver, so for example you can change frequency simply by typing the new frequency on your computer.
22. Do I need a beam to enter contests?
No but it will help significantly! I have spent my first year of contesting using only wire antennas, and I have learned a lot and had plenty of fun. I even made first place single operator in our local field day contest, which only allows single-element antennAs. But I know that I won't be even vaguely competitive in the major international contests until I have at least a triband beam. That said, I wouldn't have been competitive in my first year if I had stacked monoband beams on all bands, since I did not (and still don't) have enough experience. So there's still a lot to be gained from entering contests, even if you don't have a beam.
23. Do I need an antenna farm to enter contests?
No but it will help significantly :) Actually, at least one major contest - the CQ Worked All Prefixes (WPX) contest - now has an entry category where stations are limited to using a single triband beam on 10, 15 and 20m and single-element antennas on all other bands. So there is hope for us "little pistols".
24. What is a "little pistol"?
The high power multi-multi (multi operator multi transmitter) stations are often called "big guns". The "little pistols" are all us low power, single operator stations.
25. What sort of rig do I need to enter a contest?
Just the rig you use every day. That's not to say that some rigs aren't better for contesting than others, but just about any rig will do to start. If you plan to buy a new rig for contesting, then look for one with a "strong" receiver which can receive weak signals in the presence of very strong signals without overloading. The "blocking dynamic range", "intermodulation dynamic range", "third order intercept" and "phase noise" specifications found in most technical reviews are important indicators of this.
Also, note that it is a good idea to have your commonly used functions such as filter selections, if width and shift (if available), notch filter, attenuator, RF gain, mode, and band switch available on the front panel, to avoid having to wade through a menu system in the heat of battle. This means that the compact transceivers designed primarily for mobile operation may not be the best choice in a contest. The ability to interface the rig to your computer so the logger can automatically enter the correct band and mode is another useful feature that is found on most modern rigs. A narrow (250 or 500 Hz) filter is almost essential for CW contests.
Amongst current production HF transceivers the Elecraft K2, Icom IC-756 Pro 2, Ten-Tec Orion and Yaesu Mk V FT-1000 MP are some of the best. However note that these are not beginner's radios (with the possible exception of the K2, but this must be constructed from a kit and so is best suited to someone with prior construction experience), so if you have

no prior operating experience it may be better (not to mention cheaper) to start off with an entry-level or mid-range radio. There are also some excellent radios available at very reasonable prices second-hand, such as the ICOM IC-765, Kenwood TS-850S, Ten Tec Omni VI Plus and the Yaesu FT-990 as well as earlier versions of the FT-1000 (both the FT-1000D and the original 'MP are excellent radios) and the IC-756 Pro.

26. What is "QSK", and do I need it?

QSK or "full break-in keying" means that the transceiver switches into receive mode as soon as it has finished transmitting a Morse code dot or dash. This means that you can hear other stations operating on your receive frequency between the dots and dashes that you are transmitting. Whether or not to use QSK is a matter of personal preference. I often use QSK as a single operator station with only a single radio when I am calling CQ ("running") as it allows me to hear if another station calls me as I start another CQ call, so I can stop calling CQ and instead just send "?" to ask who is calling me. However when the band is noisy I often turn QSK off as it can be very fatiguing listening to band noise between every dot and dash! SO2R operators do not generally use full break-in keying, as while their "run" station is calling CQ, they will search-and-pouncing on another band, so the last thing they want is to hear the band noise from the "run" station as well. Note that some station equipment such as linear amplifiers may not support full break-in, so please check your manuals before operating QSK.

27. What is the alternative to QSK?

The best alternative is to have your logging computer, which is also generating CW, switch the rig from receive to transmit and back using the external T/R control line found on most radios. Most logging programs will allow you to specify the delay between switching the rig to "transmit" and sending the first dot or dash, which avoids hot-switching accessories such as your linear amplifier. This way has the big advantage that your rig can be switched back to receive immediately the last character has been sent, without any unnecessary delays. (Note that for this to work correctly if you use a paddle to send "fills" then the paddle should also be connected to the computer, with the logging program generating the actual dots and dashes, so that the computer can switch the rig into transmit mode when sending a fill.)

If your rig does not provide an external T/R line then you can use "semi-break-in" keying. This means that the first transmitted dot or dash will switch the rig into transmit mode, and it will remain in transmit mode some period of time after each dot or dash is transmitted, in case there is another character on its way. This delay is usually adjusted so that it is just long enough to avoid switching back into receive mode between words. The disadvantages of semi-break-in keying as compared to computer-controlled T/R switching are (a) the necessary delay depends on keying speed, so you may have to adjust the delay when working a slower operator; (b) it will result in an unnecessary delay before switching back to receive after the last dot or dash, as the rig does not know that there are no more characters coming (although the computer does!); and (c) many rigs do not support a configurable time delay between switching into transmit mode and sending the first character, which makes it difficult to avoid hot-switching your accessories. For these reasons, computer-controlled T/R switching is preferable.

28. What is a "fill"?

In a computerized CW contest station, the logging program will automatically generate most of the Morse code. However occasionally you may need to send something that is not pre-programmed into the logging program. This is known as a "fill". Some operators send fills by typing the text into the logging program, while others prefer to have a paddle handy to send fills manually. In this case the paddle must either be connected to the computer so the computer can generate the Morse code, or it must be connected to a keyer and the keying line from the keyer must be connected in parallel with the computer keying

line so that both the computer and the paddle can key the rig. One of my pet gripes is that on some rigs with an internal keyer such as the Mark V FT-1000MP, even though there are two keying jacks it is not possible to configure one keying jack to operate through the internal keyer and the other to accept a "straight key" type input from the computer.
29. I have a limited budget. What should I spend it on?
Assuming you already have a basic station, then I would suggest you first purchase a computer (which does not have to be new, especially if you are happy to use DOS) for logging; then upgrade your antennas; then upgrade your rig if necessary; and save the linear for last since most contests have a 100W category. If your plan to enter CW contests, then you might want to invest in a narrow filter (maximum 500 Hz) for your existing rig in the meantime, even if you plan to buy a new contesting rig in a year or two. Other people's opinions will differ.
30. How good does my CW have to be to enter a CW contest?
That depends very much on the contest. For many of the "local" contests, i.e. state or national contests of small countries, you can get by with 10 w.p.m. or so. For the big international contests you probably need to be able to copy callsigns reliably at 20 w.p.m. (Note this is not the same as being able to ragchew at 20 w.p.m., copying callsigns is easier than ragchewing). Many of the QSOs in international contests take place at 25-30 w.p.m, but if you can copy callsigns at 20 w.p.m. then you should be able to get a faster callsign after a couple of tries. Practise makes perfect!
31. Why do contesters only exchange reports and other numbers, not name and QTH?
The object is to make as many QSOs as possible in a limited time, so "QSO rate" - the number of QSOs per hour - is (almost) everything. Hence all "unnecessary" parts of the QSO are omitted, leaving only the required essentials - call signs, 599 signal reports and a serial number or zone number if required by the rules. Be sure to check the rules to see what the required exchange is for each contest you enter.
32. Why are reports in contests always send as "5NN"?
Although the rules normally specify that the exchange must include a signal report, no-one actually cares much what the real signal report is. So to simplify things, contesters just send 599 reports even if the signal is barely intelligible. However the number "9" is replaced by the letter "N" because it is faster to send. "Shortened" numbers, like "N" instead of "9" are known as "cut numbers".
33. What are "cut numbers"?
In Morse code, all numbers consist of five dots and/or dashes, which takes a fairly long time to send. "Cut numbers" provide an alternative way of representing numbers using (mostly) shorter Morse sequences that are faster to sent. The actual sequences used are:
Number
Normal Morse
"Cut" number
Equivalent character
0 dah-dah-dah-dah-dah dah T
1 di-dah-dah-dah-dah di-dah A
2 di-di-dah-dah-dah di-di-dah U
3 di-di-di-dah-dah di-di-di-dah V
4 di-di-di-di-dah di-di-di-di-dah 4
5 di-di-di-di-dit dit E
6 dah-di-di-di-dit dah-di-di-di-dit 6
7 dah-dah-dit-dit-dit dah-dah-dit G
8 dah-dah-dah-di-dit dah-di-dit D
9 dah-dah-dah-dah-dit dah-dit N
Note that for all numbers except "5", the "cut" numbers simply replace all the dashes in

the usual Morse representation of the number with a single dash. This is an easy way to remember the cut numbers. By far the most common in practise are "T" for "0" and "N" for "9", so you should be familiar with at least these.
34. What does it mean when I hear a station send "TEST ZS1AN" or "ZS1AN TEST" during a CW contest?
This is a shortened CQ call - in other words, the operator wants other stations (specifically stations participating in the contest) to reply to his or her call. "TEST" is short for "CONTEST", and a full CQ might be "CQ CONTEST DE ZS1AN K". However, in the spirit of omitting everything that is not absolutely essential, the "CQ" and "DE" are often omitted, leaving just "TEST ZS1AN" or sometimes "ZS1AN TEST".
35. How should I reply to such a call?
Just send your callsign - once if conditions are good, twice if they are poor. Don't send "ZS1AN ZS1AN DE N1XXX N1XXX N1XXX K" - I know who I am, and the timing of your reply will clue me in to the fact that you are replying to me, not to someone else. And better not to send your callsign too many times, a competent contest operator should get it first time. So instead you just send "N1XXX" and wait for the reply.
36. What sort of reply should I expect, and what does it mean?
Your callsign, an abbreviated signal report and a zone or serial number depending on the contest. For example, "N1XXX 5NN38". "5NN" is the abbreviated "599" report using "cut numbers", and "38" is in this case my CQ Zone, which is required for the CQ Worldwide DX contest. In other contests I might send you a serial number instead of my CQ Zone, for example "N1XXX 5NNTT5 TT5", which "TT5" stands for "005" again using the "cut number" equivalent for "0". In this case I have repeated the serial number, giving you a second chance if you missed it the fist time. Note that the leading zeros (or Ts using cut numbers) on the serial number or zone may not be required, so some contesters would send simply "N1XXX 5NN 5". Check the contest rules to see if they specify how many digits the serial number must contain, if not then it is perfectly acceptable to omit the leading zeros.
37. How do I send my report?
You can just send the report followed by the zone or serial number. For example, "599T5". Here you are sending the CQ zone "5" as "T5", with "T" replacing the "0". It is not necessary to send your callsign again if the station you called has got it right. If they got your callsign wrong, then you should send it again a couple of times with your report - for example, "N1XXX N1XXX 599T5".
38. What then?
I'll send "TU ZS1AN" - thank you for the QSO, and my callsign so if another station is waiting for me then she/he can call immediately without having to wait for my next "TEST ZS1AN" call. Note that this is the end of the QSO - don't prolong it unless you missed some important information, like the zone or serial number. "MY NAME IS ANDREW ANDREW QTH CAPE TOWN CAPE TOWN PSE UR NAME ES QTH" won't go down too well in a major contest!
39. How do I ask you to repeat the zone or serial number?
"NR?" is sufficient, and I will respond with something like "NR 38 38 BK". Assuming you got it this time, you can just send "TU" (thank you) and move on.
40. What does it mean if I call a station and get the reply "DUP" or "B4"?
This means that the station you are calling has (or thinks he or she has) worked you already on this mode and band. "B4" stands for "before". Don't stop to argue about it - find another station to work and move on.
41. Could you give an example of a complete contest QSO?
Sure. Here ZS1AN is calling CQ ("running") and N1XXX responds. The callsign in the square brackets is the callsign of the station which transmits the information that follows. The callsign in the square brackets is not actually transmitted. This example is from CQWW:

[ZS1AN] TEST ZS1AN An abbreviation for "CQ CONTEST DE ZS1AN"
[N1XXX] N1XXX You respond with your callsign
[ZS1AN] N1XXX 5NN38 I send my exchange "599" and my CQ zone "38"
[N1XXX] 5NNT5 You reply with your "599" report and zone "05"
[ZS1AN] TU ZS1AN Thank you, and I'm waiting for the next caller so please don't reply
The following example shows what happens if the called station gets your callsign wrong:
[ZS1AN] TEST ZS1AN
[N1XXX] N1XXX
[ZS1AN] N1XX 5NN38 Oops I got your callsign wrong...
[N1XXX] N1XXX N1XXX 5NNT5 ...so you send it again with the exchange
[ZS1AN] N1XXX TU ZS1AN and I acknowledge the correction
42. What is a serial number?
Many contests require that, in addition to the signal report, you send a serial number as part of the report. This is simply a number, starting from 1, which you increment with each successive contact. Serial numbers are usually send as 3 or 4 digit numbers, with the letter "T" (a single dash) being sent in place of leading zeroes. For example, "T23" for "23". Most contests require that you use a single sequence on all bands if you are a single operator (so for example, if you send "23" to the last station you work on 20m, and then move to 15m you would send "24" to the first station worked there). Multi-operator stations are often required to use a separate sequence on each band. Check the rules to be sure.
43. What is a "pass"?
A "pass" is when you work a station on one band, and he or she asks you to give him/her a call on another band. This most often happens if you are a multiplier which the other station still needs on the other band. Should you accede to the request? Well, that is up to you. If the station making the request is a multiplier that you still need on the other band, then it may be worthwhile. But if you already have that country or zone on the other band, then the time end effort to change to the correct frequency probably isn't worth it for a single contact (which you may not get anyway if the path isn't working on the other band). Often the station requesting the "pass" is a multi-multi station, and they are just giving you the frequency that their operator on that band is already working, so it's no skin off their nose to change bands.
44. What is "running"?
When a station can stay on one frequency calling CQ and working station after station, this is known as "running". If you can do it then it is a very effective way to make lots of QSOs, although often they will be from the same area so you may not accumulate as many multipliers as you could if you were "searching and pouncing" on needed multipliers. In order to "run" successfully, you need either to have a good signal, or to be a moderately rare multiplier, in order to attract sufficient callers and hold on to your frequency. You also need to be fairly competent at recognizing callsigns, whether CW or Phone, which may be buried in a pile-up. Nobody minds if you take 4 or 5 tries to figure out the callsign of a station when you are search and pouncing and the other station is calling CQ, since you can just listen to his or her CQ call 4 or 5 times without disturbing anyone, and only your own score will suffer. However if you call CQ and then take four or five attempts to get the callsign of the station coming back to you correct, then you had better be a very rare multiplier!
45. What is "search and pounce"?
Search and Pounce (S&P) means tuning around the band listening for stations calling CQ (or "TEST" as the case may be) and then calling them. It is the easiest way of operating for a beginner, as you can take your time to copy the callsign if necessary without any pressure (except the knowledge that time is points). Depending on band conditions, it may be

worthwhile calling everyone you hear, or you may only want to call multipliers that you have not worked already. In either case, listen for the weaker signals that might get lost next to the strong stations (a narrow filter can do wonders), to make sure you don't miss out on a valuable multiplier just because there was a string local station 500 Hz away.
46. What is "Single Operator Two Radio" contesting?
Although it is not a separate entry class in most contests, some single-operator entrants will use two radios when they contest. This is known as "single operator two radio" or SO2R for short. Typically one radio is used to "run" on a band, while a separate radio - with separate antennas and amplifier if necessary - is used to "search and pounce" on a different band. (The bands need to be different to prevent the transmission from one radio from damaging the receiver in the other.) Most contest rules specify that a single operator may only transmit one signal at a time, so a SO2R operator must be careful to ensure that both radios cannot transmit simultaneously. Some sophisticated hardware is available from contesters like Bernie ZS4TX to interface the components of a SO2R station.
47. What is a "Sprint"?
A sprint is a contest where a station that initiates a QSO (for example, by calling "CQ") must change frequency immediately after the QSO, without working any other station on the same frequency. The reason for this is that in normal contests, high powered and rare stations can get a significant advantage by "running" - calling "CQ" and then working stations one after another on the same frequency, which can result in a very high QSO rate. By forcing the station to change frequency, the "sprint" format prevents stations from "running" and evens the odds for the smaller station. Note that the change frequency rule only applies to the station that initiated the qso; the other station is allowed to initiate a second QSO on the same frequency before he or she must also change frequency. Sprints are harder for beginners than normal contests, because you can't listen to several QSOs by the same station in order to get it's callsign right - you pretty much have to get the callsign right first time.
48. What is the exchange format for a Sprint?
Of course that depends on the rules for the particular contest, but generally you will find that both stations' callsigns are sent during the exchange. This is because the station that initiated the QSO is going to have to change frequency immediately after the QSO, so there is no chance for the other station to "wait around" to confirm the callsign. There is a convention that the station initiating the QSO sends his or her callsign before the rest of the exchange, while the station responding to the CQ sends his/her callsign after the exchange. This helps to indicate to other listening stations which of the two participants will stay on frequency (remember, only the station who responds to the CQ can remain on frequency) and so can be called next. For example, the following exchange is taken from the EU (European) Sprint, where the exchange must consist of: your callsign, the other station's callsign, a serial number and the operator's name or nickname. Note that a signal report is not required. My thanks to Dave Lawley G4BUO for the following example:
[I2UIY] CQ CQ I2UIY I2UIY TEST I2UIY calls CQ
[G4BUO] G4BUO G4BUO replies
[I2UIY] G4BUO I2UIY 013 PAOLO I2UIY sends his exchange. Note that he sends his callsign before the rest of the exchange to indicate that he is the initiator
[G4BUO] I2UIY 008 DAVE G4BUO G4BUO sends his exchange, sending his callsign at the end to indicate that he will remain on frequency
[I2UIY] R I2UIY acknowledges receipt ("R" means "Received everything you sent correctly") and must now change frequency
[OK2FD] OK2FD OK2FD heard the end of the exchange, so he knows that G4BUO is now on frequency

[G4BUO] OK2FD G4BUO 009 DAVE G4BUO sends his exchange
[OK2FD] G4BUO 011 KAREL OK2FD OK2FD sends his exchange, ending with his callsign - he now temporarily "owns" the frequency
[G4BUO] R G4BUO acknowledges and changes frequency
[OK2FD] TEST OK2FD TEST Nobody calls OK2FD, so he calls CQ
[DL6RAI] DL6RAI DL6RAI answers the CQ
[OK2FD] DL6RAI OK2FD 012 KAREL OK2FD sends his callsign before the exchange to indicate that he will be leaving the frequency
[DL6RAI] OK2FD 003 BEN DL6RAI DL6RAI sends his callsign after the exchange as he now "owns" the frequency
[OK2FD] R OK2FD acknowledges and moves to another frequency
As you can see, it is an intricate dance. Careful practice is called for if you are to avoid treading on your partner's toes!
49. What is a "QTC"?
Some contests - notably the European HF DX Contest - allow stations to exchange information about contacts they have made with other stations for additional points. These reports of contacts with other stations are known as QTCs.
50. What should I do before a contest?
Read the contest rules and decide which category you will enter. Test your station and antennas. Have a look at the expected propagation and draw up an operating schedule showing when you expect to operate on which bands, and where your beam will be pointing. (This schedule will change during the contest as conditions unfold, but you should at least have an initial plan.) Stock up on fast food - microwave meals are my favourite. Set up your computer, check that the logging program is interfacing with the PC correctly, and ensure that you select the right contest in the logging program. Try to get as much sleep before the contest starts as possible so you can work long hours during the contest itself. Feed your pets. Read the contest rules (again) and make sure you understand the exchange format, multipliers, sequence numbers, entry categories, power restrictions etc. Accurately set your computer clock so the QSOs will be logged at the correct time.
51. What do I do after the contest?
In order to be listed in the results, you will need to submit your log to the contest organizers. Most of the major contests these days prefer electronic logs, usually in Cabrillo format, as they can be automatically checked and scored. Smaller (e.g. national) contests may prefer paper logs. In most cases if you have not used computer logging then paper logs will be accepted. However many contests will not accept paper logs printed by a computer logging program. After all if you have the log on computer then they don't want to have to type it in again. The address for submitting your logs can be found in the contest rules.
52. What should I not do after the contest?
"Massaging your log" - for example, checking callsigns in a callsign database and then correcting those found to be in error - is generally frowned upon by contesters, although it may not be strictly illegal.
53. How long do I have to wait for the results?
The official results often take a couple of months. However there is an unofficial email reflector called "3830" on which contesters post their claimed scores. To subscribe, send an email to 3830-request@... with the word "subscribe" in the body of the message (not the subject line). You can post your claimed score directly to the group by sending an email to 3830@..., but it is more convenient to submit scores via the web form at http://www.hornucopia.com/3830score/. This also ensures that the score will be posted in a format which makes it easy for it to be included in the regular summaries which are

posted to the mail reflector.
54. What is a "busted call"?
A "busted call" is a call which you captured incorrectly during the contest. You will generally lose points for busted calls or incorrectly logged serial numbers.
55. What should I do if I'm not sure whether I copied a callsign correctly?
If you are responding to a CQ, then wait for the station to call CQ again so you can copy the call correctly. If you are cvalling CQ, then send "CL?" and the other station will repeat his or her callsign. If conditions are poor, then you may have to ask a couple of times, but this is much better than getting the callsign wrong - which will cost you penalty points for the contest - or not entering the QSO in your log file, which is very unfair to the other station and will cost him or her penalty points. Note that although some programs (e.g. WriteLog) have the ability to mark a QSO as "unclaimed",
the Cabrillo format used to submit contest entries has no such mechanism, so QSOs marked as "unclaimed" in the log file will just not be included in the Cabrillo file. It is very bad karma to do this unless you are absolutely sure that the other station knows they are not in your log, otherwise they might submit the QSO and be penalised for it.
56. What is a "UBN report"?
It is a report from the contest committee showing errors and possible errors in the log you submitted for a contest. The main errors are abbreviated as follows:
* U (Unique callsign) - you claimed credit for a callsign which nobody else claimed credit for. This may indicate that you made a mistake with the callsign. However since it is also possible that you did really work a unique station, you generally won't lose any points for this.
* B (Bad callsign) - you claimed credit for a callsign that definitely wasn't in the contest. This may mean that the callsign is illegal or has not been allocated, although there are many other possible reasons as well. You will lose credit for this contact and will probably also be penalized some further points.
* N (Not in log) - you claimed credit for a callsign which was active in the contest, but you are not in his or her log. You will lose the points for this contact and will probably also be penalized some further points. (This is why it is so important to report all the QSOs you make during a contest.
The report get its name from the abbreviations U, B and N used for these errors.
57. What is "NIL"?
NIL is an abbreviation for Not In Log, meaning you have claimed to have worked a particular callsign, but you are not in the other station's log.
58. What are these unusual callsigns I hear in contests?
You hear unusual callsigns during contests for two reasons. First, some administrations reserve special short or unusual callsign sequences specifically for use during contests. For example, in Britain callsigns with a single letter in the suffix like "M5A" or "GM1A" are reserved for contest use. In France, the prefix "TM" is allocated to contest stations rather than the more usual "F" prefix, for example "TM6X". A short callsign gives the station an advantage because it is faster to send and less likely to be copied incorrectly. Unusual prefixes are attractive because in some contests like the CQ Worldwide WPX (Worked all Prefixes) contest, each unique prefix counts as a multiplier, so the more unusual prefixes will attract more calls. That happens in other contests as well. The first time I heard a "TM" station I was convinced I had found some rare DX, and was somewhat disappointed when I discovered it was located in mainland France.
Some countries have even issued callsigns without a digit following the national identifier. For example, the callsign "D4B" is issued by Cape Verde which has the national identifier "D4", so there is no digit following the national identifier - the "4" is part of the national identifier. However Article 19 of the ITU Radio Regulations was amended by

the World Radio Conference 2003 (WRC-03) making it mandatory to have a digit following the national identifier, so it is likely that such callsigns will be phased out.
Another reason for unusual prefixes is that many stations operate temporarily from a foreign country, usually to make themselves more sought after in the contest. For example, American stations are two a penny in most contests, but an American visiting the Bahamas is an attractive multiplier. Operators visiting a foreign country may be allocated a "normal" callsign for the country they are visiting, but will often use their home call either preceded or followed by the country (and possibly region) prefix of the country they are visiting. For example, KD4D operating from South Africa would use the callsign ZS/KD4D, while the same station operating from Canada would use a callsign like KD4D/VE3. Note that the Morse code for the "/" symbol is "dah-di-di-dah-dit", and it is pronounced "stroke" on phone.
Unfortunately there is no standard as to whether the national identifier of the country being visited should precede or follow the home call. The CEPT agreement, which is the largest reciprocal licensing arrangement covering Europe, North America and some other countries, specifies that the national prefix should precede the home call. However other reciprocal agreements, like the one between the United States and Canada, specify that the national identifier should follow the home call and even within the CEPT agreement there is one exception (Peru).
Also note that following WRC-03 it is now legal for amateur callsigns to have a suffix of up to four characters (even more for special event stations), and the suffix may use both letters and digits provided that the last character is a digit. So in future contests you may hear callsigns like "ZS1234A" or even "22222A"! The latter would be from Britain, which has been allocated the national prefix "2".
So the best advice on callsigns is to expect the unexpected, and log each callsign exactly as received.
59. Should I QSL my contest QSOs?
If you are using Logbook of the World then by all means. If you are using QSL cards then this is likely to take a lot of time and money due to the number of contacts made in a contest. My policy is that in contests I only QSL on request, which normally means the other station sending me a direct QSL with a self-addressed envelope. This differs from my normal non-contest policy which is to QSL every contact via the bureau unless otherwise agreed. But whatever you decide, please don't enquire about QSLs on air during the contest. If you work a station you need, then QSL direct with a dollar bill or IRC after the contest.
60. What is the "World Radiosport Team Championships"?
The World Radiosport Team Championship (WRTC) is the "Olympics of Amateur Radio". It brings the top two-person contesting teams from around the world together in the same geographic area and with similar antennas and "anonymous" callsigns in order to eliminate some of the extraneous variables (such as propagation and who has the most friends) and emphasize the skill of the teams. Each team consists of two operators from the same country, so there is a "national" dimension to the contest, although the participating teams are decided in part on previous contest results so there may be m any teams representing the same country in the championship. It was first held as part of the Goodwill Games in Seattle (1990). Since then the WRTC has been held in San Francisco (1996), Slovenia (2000) and Finland (2002). The winning team in WRTC 2002 was Jeffrey Steinman N5TJ and Daniel Street K1TO from the USA. The next WRTC will be held in Brazil (2006). The WRTC
is a sub-contest that is held within the IARU HF World Championships, which gives the (relatively few) teams competing in the WRTC a large number of contest stations to contact. The rules for WRTC teams are somewhat different from those for other participants in the IARU International HF World Championship, and they are usually restricted to 100 W and to a

triband beam for 20, 15, and 10 metres and a wire antenna for the low bands.
61. How do I find out what contests are on?
Visit the Contest Calendar website maintained by Bruce Horn WA7BNM.
62. Where can I get more information?
See the following websites:
* Contesting.com
* Contesting.info
* SM3CER Contest Service
* RadioContesting.net
* RSGB HF Contesting Guide
63. May I reproduce this FAQ?
Only with my permission. However I am generally happy to give permission for it to be reproduced in printed format, or as part of a club newsletter, or any other non-Web format. I just want you to ask so I know where it is being reproduced. I generally won't permit copies of the HTML FAQ to be posted on other sites, since the FAQ is constantly changing and I have no way of keeping it up to date if it's posted on many web sites. In any case, the Web gives you a simple alternative - just link to it atwww.qsl.net/zs1an/contesting_faq.html. You can even use frames to "embed" the FAQ within your web site without having to make a copy of it. One exception to this is if you use mirroring software which automatically updates your mirrored copy when changes are made to the original, in which case I will happily allow you to mirror the FAQ (but please ask first). If you have any questions please email me at zs1an@....

http://www.mdxc.org/bangladesh2013/

Bangladesh History

Bangladesh , officially the People’s Republic of Bangladesh, is a country in South Asia. It stradlles the fertile Ganges-Brahmaputra delta and forms part of the ancient and historic region of Bengal. The name Bangladesh means “Country of Bengal” in the official Bengali language. To its south lies the Bay of Bengal, while it is bordered by the Republic of India on the north, west and east, and Burma (Myanmar) to the southeast. It is separated from Nepal and Bhutan by India’s narrow Siliguri corridor and is situated in geographical proximity to China. With a population of over 160 million people, Bangladesh is the world’s eighth most populous country as well as one of the world’s most densely populated countries. It is the third most populous nation in the Muslim world. The present-day borders of the country were established during the partition of the British Indian Empire in 1947, when eastern Bengal became part of the newly formed nation of Pakistan. However, it was separated from West Pakistan by nearly 1,500 km (about 900 mi) of Indian territory. Due to political exclusion, ethnic and linguistic discrimination and economic neglect by the politically dominant western wing, popular agitation and civil disobedience lead to the Bangladesh Liberation War in 1971. After independence, the new state endured poverty, famine, political turmoil and military coups. The restoration of democracy in 1991 has been followed by relative calm and economic progress. Founded as a secular democracy in 1971, Bangladesh is a unitary multiparty parliamentary republic with an elected national assembly called the Jatiyo Sangshad.[6] It is a member of the United Nations, the Commonwealth, the OIC, NAM, the Developing 8 Countries and BIMSTEC. A long-standing proponent of regional engagement in South Asia, Bangladesh pioneered the creation of SAARC. Its armed forces are among of the world’s largest contributors of United Nations peacekeeping forces. Bangladesh continues to face a number of major challenges, including poverty, corruption, political instability, overpopulation and vulnerability to climate change. However, it has been praised by the international community for its significant progress on the Human Development Index.[7] Through various acclaimed Bangladeshi public and NGO-led social programs, the country is improving living standards and life expectancy, promoting education and women empowerment, stemming population growth, achieving self-sufficiency in food production and building healthcare infrastructure.[8][9][10] The country is also undergoing rapid industrialization, with globally competitive industries in textiles, shipbuilding and pharmaceuticals.[11] Dhaka and Chittagong, the country’s two largest cities, have been the driving force behind much of the recent growth. Bangladesh has been identified as a Next Eleven emerging economy.

7962. How I handle a pile-up

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-07-01 09:31:11 UTC
From: Yb land Dx club
Topic: 7962 Message: 7962

http://www.dx.to/general/how-i-handle-a-pile-up

How I handle a pile-up

Every operator that handles a pile-up does it based on his own experience, knowledge and training. That is the reason why it takes different techniques to work a DX-station. I will try to explain my policy and operating practice in working the pile-up during my expeditions and in particular the ST2X operation.

Since I'm not running expeditions or contests regularly, I first need to catch up and adjust myself to work the pile-up again. On the other hand, the ST2X pile-ups were quite heavy at certain times which needed other techniques from my side.

I normally start working split as soon as possible. So in the ST2X case only 1 or 2 QSO were made transceive and then switching to split operation. During most of my former operations I worked just a few kHz up but now the pile-ups were so fierce that I had to spread the crowd a little bit more. However, I did not want to cause too much trouble on the bands and limited myself to a maximum of 5 kHz up.

Normally I try not to constantly change my split frequency as this will reduce the QSO-rate. These means working for some time on the same split frequency and next change a bit up or down and remain for some time on that spot.

This worked quite well many years back but with the introduction of the packet clusters with the possibility of announcing the listening frequency of the DX stations, it takes only a short moment before many stations calling on exactly the same frequency. So this is calling for other techniques from the DX station to keep up to speed. So as long as the number of callers is moderate, this works fantastic.

Using filters
In general I prefer not to use a small CW filter but listen on the SSB filter. This creates a broad spectrum of audio signals from which you can select a station based on the pitch that peaks best for reasons I cannot explain (some time high, some times low). This also makes it possible to switch instantly to another pitch without turning the VFO. This practice works to a certain level. When the pile-up became too fierce I had to use the CW (250 Hz) or DSP filter (60 Hz) which needed constant tuning and slows down the QSO rate. Working fast can help to avoid the building up of too many callers on the same spot. After some time, I always tried to switch back to the SSB filter and see if that worked well again.
An other category of callers seem to have a different approach. They chose a fixed spot in the 5 kHz up segment and simply call and wait until I come across them. I know that some of them have spent quite some time before being successful with this tactic.

The right rhythm
In order to achieve a high QSO rate, one should show the audience how the game has to be played in order to be eligible for a contact. This requires the DX station to show clearly how the work is done and even more important, to do this consistently. My practice is to

call a station, exchange the reports and conclude the contact with R TU. This is the sign that the crowd can call again. In case a station makes a correction on his/her call during the exchange of reports, I will repeat the corrected call sign followed by R TU.

Cooperation
Once I have started to work a station, I'm committed to finalize that QSO. This sometimes led to continuous requests to QRX and standby in order to complete the QSO. As a result, we lost time and the opportunity to give others a chance but most important, we were able to complete a QSO that was initiated and shows all the other that it was useless to interfere or steal a QSO. In other situations I had to ask the Europeans to standby and to give JA, VK/ZL or US a chance. On a few occasions I was about to stop the operation for a while due to the lack of cooperation but in general I'm really quite satisfied about the cooperation of the European stations. The problem was that I knew that I worked 80% Europe and had to give a chance to the rest, but the audience didn't know.

http://www.ybdxc.net/2013/07/yb9y-oc-276-bras-island-mapia-islands.html

http://yb9y.com/

New IOTA Activation

After succeeded with DXpedition at OC-221 Ohoiew island in March 2012 – YB8Y, now we are preparing YB9Y for QRV at OC-276 which NEW for IOTA chasers.

Further information will be updated soon as now everything is still under preparation

Bras Island

Brassi (Bras) island is part of the Mapia atoll, the most outer islands of Indonesia, located in the Pacific Ocean and the countries bordering with Palau. Bras island is part of the government area Noemfoor Biak, Papua province under Supiori regency.

The island is located about 300 KM in the north of the city of Manokwari with coordinates 00 ° 54 ’30.6 “N, 134 ° 19′ 31.2″ East.

Brassi island is a cluster of islands which bordering with Republic of Palau. The distance between Mapia islands with Babelthuap Island (Republic of Palau) is about 390 miles.

Mapia cluster of islands consists of 3 major islands, namely Brassi (Bras), Pegun,and Fanildo.

The islands territory is guarded by a unit of the Navy who have post at Brassi & Fanildo Island and the island is included in the administrative area of the district of West Supiori, Supiori regency, Papua province.

The high diversity of marine biota and natural ecosystems in the Mapia islands provide the prospective opportunities for tourism industry, cultural and historical legacy of the World War II era.

Date: 2013-07-04 04:17:06 UTC
From: ybdxclub
Topic: 7965 Message: 7965

http://oc255.blogspot.com.au/

<http://2.bp.blogspot.com/-CpQ3JD3-lbo/UdTj6Rl8lnI/AAAAAAAAD8k/Ch9R3HqkM9c/s936/vk5ce.jpg>

Next IOTA DXpedition announced – October 16-21<http://oc255.blogspot.com.au/2013/07/next-iota-dxpedition-announced-october.html>

For all of my previous IOTA DXpeditions there have been some inhabitants or facilities on the island. For instance Magnetic Island was a popular tourist island with a daily ferry service, Fitzroy Island had a resort on it with an almost daily Fast Catamaran service and Horn Island had a pub and motel with a daily flight there. Then I started to get a little more adventurous, Bremer Island had accommodation there but it needed a charter boat for the visit and Flinders Island also had accommodation but it needed a single engine charter plane to get there.

It was time to draw inspiration from my collection of DXpedition DVDs by K4UEE and 9V1YC, etc and go somewhere that was totally uninhabited, that was in a very remote part of Australia and was in high demand and hadn't been activated for a long time. OC-255 fitted these criteria. Red Island is totally uninhabited, is off the far north tip of Queensland, is claimed by only 15.4% of IOTA claimants and was only ever activated once for four days back in 2002.

http://www.rsgbcc.org/hf/rules/2013/riota.shtml

<http://www.rsgbcc.org/wp-content/uploads/2012/12/100_logo_colour-90px.gif>

RSGB Centenary Islands on the Air (IOTA) Contest 2013

**
RSGB Centenary Celebrations, 1913 - 2013

There will be special awards for entrants in VHF Field Day and in the RSGB IOTA Contest, to celebrate 100 years since the founding of the Radio Society of Great Britain.
Here<http://www.rsgbcc.org/hf/rules/2013/CentenaryAwards.shtml> is an explanation of how to get these awards.

Please note that there is no World Multi-Operator category, and that Island Multi-Operator stations must follow rules on band changes and Run/Multiplier identification.

Visit the IOTA Contest Section <http://www.rsgbcc.org/hf/iota.shtml> for previous results, record scores, trophy list and online log submissions.

New contesters? See the Guide for newcomers<http://www.rsgbcc.org/hf/iotahelp.shtml> for the RSGB IOTA Contest

1. GENERAL

The aim of the contest is to promote contacts between stations in qualifying IOTA island groups and the rest of the world and to encourage expeditions to IOTA islands. The General Rules for RSGB HF Contests do not apply to this event.

2. WHEN

1200UTC Saturday 27th July to 1200UTC Sunday 28th July 2013. The contest always takes place over the last FULL weekend of July.

3. BANDS AND MODES

3.5, 7, 14, 21 and 28MHz, CW and SSB. IARU band plans must be observed, with CW contacts being made only in the recognised CW ends of the bands (see RSGB Yearbook and similar sources, for recognised IARU band plans). Contest-preferred segments on 80m and 20m must be observed, so no operation must take place on 3500-3510, 3560 - 3600, 3650 - 3700, 14060 - 14125 and 14300 - 14350kHz.

photos<http://laurentiadewi.com/mercusuar-sembilangan-bangkalan-tua-cantik>
shows
evidence of recent restoration work. Located on Semibilangan island off the
extreme western tip of Madura, this is both a landfall light and the rear
light of a range guiding ships into the channel between Madura and Java to
approach the port of Surabaya. Accessible by road from Bangkalan, Madura.
Site open, tower
open<http://nikkiputrayana.multiply.com/photos/album/5/Mercusuar_Sembilangan_Vuurtoren_Sembilangan>
although
we do not know the schedule. ARLHS IDO-079; Admiralty K1158.2; NGA 23624.

Mercusuar Sembilangan or Sembilangan Lighthouse, is located in District
Socah, 6 km from the center of Bangkalan capital. This tower has 78 meters
high and was build by the Dutch and it inaugurated by Z.W. Williem III in
1879. At that time, this tower was use to guide the ships that went to
Tanjung Perak harbor.

This tower has 17 floors building and the range of lights about 20 miles.
While the total land area of this lighthouse is about 1 hektar. There are 3
navigators in this tower to maintain the tower, they live around the
complex of the tower.

The function of the navigation lasts until 1999. Stepping in 2000, the
lighthouse finally allowing the local people to get into the building of
the lighthouse. This become the attraction of the citizens and become an
alternative destination when we go to Madura island, especially to
Bangkalan to enjoy the sceneries from the top of the lighthouse

Madura <http://en.wikipedia.org/wiki/Madura> is a large island off the
northeastern coast of Java. The island, roughly 130 km (80 mi) long east to
west and up to 35 km (22 mi) wide, is separated from Java by the Madura
Strait. At its western end, the strait is quite narrow and is crossed by
the 5.4 km (3.4 mi) long Suramadu
Bridge<http://en.wikipedia.org/wiki/Suramadu_Bridge>.
On the south side of Madura, however, the strait is a broad sound up to 80
km (50 mi) wide. Madura has a population of roughly 4 million.

In 1624, Sultan Agung <http://en.wikipedia.org/wiki/Sultan_Agung> of Mataram<http://en.wikipedia.org/wiki/Mataram_Sultanate> conquered Madura and the island's government was brought under the Cakraningrats<http://en.wikipedia.org/w/index.php?title=Cakraningrat&action=edit&redlink=1>, a single princely line. The Cakrangingrat family opposed Central Javanese rule and often conquered large parts of Mataram.

Following the First Javanese War of Succession between Amangkurat III<http://en.wikipedia.org/w/index.php?title=Amangkurat_III&action=edit&redlink=1> and his uncle, Pangeran Puger<http://en.wikipedia.org/w/index.php?title=Pangeran_Puger&action=edit&redlink=1>, the Dutch gained control of the eastern half of Madura in 1705. Dutch recognition of Puger was influenced by the lord of West Madura, Cakraningrat II who is thought to have supported Puger's claims in the hope that a new war in central Java would provide the Madurese with a chance to interfere. However, while Amangkurat was arrested and exiled to Ceylon, Puger took the title of Pakubuwono I<http://en.wikipedia.org/w/index.php?title=Pakubuwono_I&action=edit&redlink=1> and signed a treaty with the Dutch that granted them East Madura.

The Cakraningrats agreed to help the Dutch quash the 1740 rebellion in Central Java after the Chinese massacre in 1740. In a 1743 treaty with the Dutch, Pakubuwono I ceded full sovereignty of Madura to the Dutch, which was contested by Cakraningrat IV<http://en.wikipedia.org/w/index.php?title=Cakraningrat_IV&action=edit&redlink=1>. Cakraningrat fled to Banjarmasin <http://en.wikipedia.org/wiki/Banjarmasin>, took refuge with the English, was robbed and betrayed by the sultan, and captured by the Dutch and exiled to the Cape of Good Hope<http://en.wikipedia.org/wiki/Cape_of_Good_Hope>
.

The Dutch continued Madura's administrative divisions of four states each with their own regent. The island was initially important as a source of colonial troops and in the second half of the nineteenth century it became the main source of salt for Dutch-controlled territories in the archipelago

Explore Madura, in Indonesia, famous for its Bull racing, music and culture.

Madura is an Indonesian island off the northeastern coast of Java. The island comprises an area of approximately 4,250 km. Madura is administered as part of the East Java province. It is separated from Java by the narrow Strait of Madura.

Madura is famous for is bull-racing competitions, where a jockey, usually a young boy, rides a simple wooden sled pulled by a pair of bulls over a course of about 100 meters in ten to fifteen seconds. Several towns on the island hold races in August and September of each year, with a large final for the Presidential Trophy held in Pamekasan in late September or October.

Music and theater

Several forms of music and theater are popular on Madura, particularly among poorer people for whom they provide an inexpensive form of entertainment and community-building. The topengtheater, which involves masked performances of classical stories such as the Ramayana and Mahabharata, is the Madurese performance art best known outside the island, due to its role as a representative Madurese art form at exhibitions of regional cultures from all over Indonesia. However, performances of it are rare on Madura, and are generally restricted to entertainment at large official functions. The less formalloddrok theater, where performers do not wear masks and perform a wider range of themes, is more popular on the island.

The gamelan orchestra, best known as a classical Javanese instrument, is also played on Madura, where several of the former royal courts, such as at Bangkalan and Sumenep, possess elaborate gamelans. Tongtong music, more exclusive to Madura, is played on several wooden or bamboo drums, and often accompanies bull-racing competitions

.

Equipment

*
*Radio Yaesu FT 450 with tuner FC 707 power 100W

Antenna 3 el Yagi 15m band and GroundPlane fullsize 40m band for 10m - 40m band

Mode mainly on Phone and spare time on CW n Digital

Here we are at the Summer Solstice for the Northern Hemisphere, which was at 0504 UTC today, June 21. If you are west of the Central time zone, to you it was last evening. Today is the longest day of the year, but the length of your day varies considerably depending on your latitude. In San Diego, the sunrise is at 5:48 AM, and it sets 14 hours later at 7:53 PM. In Seattle the Sunrises today at 5:21 AM and sets at 9:01 PM, 15 hours and 40 minutes later. But in Fairbanks, Alaska, the Sun rises today at 3:39 AM and doesn't set until tomorrow at 12:06 AM, 20 hours and 27 minutes later!

QST de W1AW
Propagation Forecast Bulletin 26 ARLP026
From Tad Cook, K7RA
Seattle, WA June 28, 2013
To all radio amateurs

SB PROP ARL ARLP026
ARLP026 Propagation de K7RA

Conditions were good for Field Day weekend last week. Only
unsettled geomagnetic conditions (even quiet at times) affected us,
no big flares or geomagnetic storms, and sunspot numbers also
cooperated by peaking at 135 and 137 on Friday and Saturday.
Geomagnetic instability was caused by a brisk solar wind, which was
over by June 24.

At K7RA I used the ARRL Field Day Locator map
athttp://www.arrl.org/field-day-locator to contact a few club groups
earlier in the week to see if they could use another CW operator.
I've found in years past that with so many newer licensees who were
not required to learn Morse code, that CW ops can be in demand at
some sites. Not only are CW operators wanted at many Field Day
locations, but the newer licensees are fascinated to see Morse code
in action. I really don't think that some of us old-timers who worry
about some imagined demise of CW have much to worry about.

9A - Croatia is set to become the 28th member state of the European Union on 1 July. To celebrate the accession, the Radio Club Grada Zaboka has been active as 9A28EU for about three months and will continue until the end of the year. Also, Croatian amateurs can apply for "28" to be added to their ordinary prefixes, and use these special prefixed callsigns (9A280AAA-9A289ZZZ) between 1 July and 31 December: for instance, 9A2AA will become 9A282AA. [TNX 9A2AA]

YB - A team of 25 operators will be active as YB9Y from Pulau Brassi (OC-276, new one for IOTA) on 15-21 October. They will operate CW, SSB and digital modes on 160-6 metres. QSL via YB1GJS, direct and bureau. The website for the expedition is up and running at http://yb9y.com/

OPDX Bulletin 1118 July 1, 2013

The Ohio/Penn Dx PacketCluster
DX Bulletin No. 1118
BID: $OPDX.1118
July 1, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, NG3K & ADXO, WU2D, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, KH6BZF, N6PSE, K8GI, K8YSE, NE8Z/HC1MD, W8GEX & 60m News, W9ILY, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, EA5RM, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, G3SWH, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK7JWX, LZ1BJ, Mediterraneo DX Club, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, PG5M, RSGB IOTA Web Site, Sixitalia Weekly, SM1TDE, UN6QC, UT2AB, VA3RJ & ICPO, and the VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT
According to the AR-Cluster Network for the week of Sunday, 23rd/June, through Sunday, 30th/June there were 221 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5N, 5R, 5T, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H3, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T5, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8 VE, VK, VP2E, VP2V, VP8, VP9, VQ9, VR, VU, XE, XU, XW, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

** PLEASE NOTE:* The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

13 COLONIES (Special Event)
Just a reminder that the annual "13 Colonies Special Event" will take place

between 1300z, July 1st and 0400z July 6th. There will be at least two stations from each on the 13 colonies on the air, as well as Super contest stations, multi-operator Club stations and OM and XYL teams.

The U.S. original 13 colonies are CT-DE- GA-MA-MD-NC-NH-NJ-NY-PA-RI-SC-VA. Special events stations mentioned are: K2A (NY), K2B (VA), K2C (RI), K2D (CT), K2E (DE), K2F (MD), K2G (GA), K2H (MA), K2I (NJ), K2J (NC), K2K (NH), K2L (SC), K2M (PA) and WM3PEN.

The theme for 2013 will be "Banners of the Revolution". The certificate is printed on heavy card stock. Stations working one state, or as many as all 13, will be eligible for the certificate. A "Clean Sweep" indicator will be affixed for those lucky enough to "Q" all 13. A special endorse- ment will be attached for stations contacting their sister operation, WM3PEN, in Philadelphia, PA.

All HF bands will be in play except the WARC bands and 60 meters. 2 meters and 6 meter simplex are encouraged. All modes of operation should be represented - SSB, CW, RTTY, Digital, and the Satellites. The mode of operation is up to the individual colony state station. For more details on the stations, suggested frequencies, QSL info and on how to obtain the special certificate, see:**
http://www.13colonies.info

3D2 & 3D2/R, FIJI AND ROTUMA ISLANDS
Operators Stan/LZ1GC and Rocky/ 3D2DD will be active from Fiji and Rotuma between September 20th and October 15th. Their schedule is as follows:

September 20-26th - Callsigns 3D2GC (Stan) and 3D2CC (Rocky); from the "Club Fiji Resort", Nadi, Fiji Republic, Viti Levu Island (OC-016, WW. Loc. RH82QF). Activity will be on 160-6 meters using CW and SSB, with the following equipment: Kenwood TS-480 SAT + linear amplifier ACOM 1010/ACOM 1000. The antennas: EXP. GP 40-10m, 80/160 meters INV-L and GP.

September 27th-October 11th - Callsigns 3D2GC/P and 3D2DD/P; from Rotuma Island (OC-060). Activity will be on all HF bands. Stan CW/SSB and Rocky only on SSB.

October 12-15th - Callsigns 3D2GC and 3D2CC again from Fiji Republic. On October 16th, Stan, LZ1GC, will go back to Bulgaria.

QSL 3D2GC and 3D2GC/P via LZ1GC, direct or by the Bureau (see details on QRZ.com or the Web page below). QSL 3D2DD and 3D2DD/P via info on QRZ.com. For more details and updates, see:*http://3d2gc.com*

7Q, Malawi:
7Q7DFC will leave Malawi in the next days and return to the USA.
QSLs will still be available through his manager OE4VIE (now also
OQRS). During the last months David managed to make a significant
number of QSOs with Europe on 6m.

NEW HF OPERATORS - THINGS TO DO

There is a new way to enter the CQ World Wide Contest this fall if youhas have been licensed for three years or less. The Rookie Overlay category is a great opportunity for new operators to compete with others who are also learning. Rookie-category operators have the same opportunity to compete in the CQ WPX Contest, building their skills each year and making significant efforts in their final year of eligibility. Check out the news item about updated CQ WW rules below!

BULLETINS

The only bulletins in this issue are to wish my fellow Americans a happy Independence Day and our northern neighbors a happy Canada Day.

BUSTED QSOS

No particularly noteworthy errors in the last issue, either.

CONTEST SUMMARY

OM,

Lepas dari benar atau kurang benarnya bahasa inggris saya, OM Rei-DL6DQW ngerti bahwa maksud email saya adalah menginfokan bahwa QSL card yg dikirimnya sudah saya terima dan saya mengucapkan terima kasih.

Hal kecil, remeh, gratis yg bisa kita lakukan karena via email - bisa memuaskan hati yg mengirimkan QSL card kepada kita.
Memuaskan & menyenangkan hati orang - berpahala lho. HI

7985. Netiket atau Nettiquette

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-07-06 13:44:12 UTC
From: Yb land Dx club
Topic: 6051 Message: 7985

http://forum.anugrahpratama.com/dunia-internet/netiket-ber-e-mail

NETIKET Ber-e-mail
======
Netiket atau Nettiquette, adalah etika dalam berkomunikasi melalui e-mail. Seperti halnya berkomunikasi melalui surat atau bertatap muka, berkomunikasi dengan e-mail membutuhkan tatacara tersendiri.

Ada kalanya memang sangat menyebalkan, jika kita menerima pesan e-mail yang pengirimnya menggunakan huruf kapital seluruhnya, mengirim kembali seutuhnya pesan-pesan yang kita kirimkan, atau menjawab pertanyaan panjang kita, dengan ucapan, "saya kira begitu", atau "betul."

Nah, untuk mencegah hal itu terjadi, ada baiknya kita mengetahui beberapa di antaranya:

1. Hindari mengirim surel (surat elektronik) yang bersifat spam, surat berantai, atau promosi MLM.

2. Hargailah privasi orang lain.
Jangan mengirimkan e-mail yang belum pasti benar ke mailinglist. Ingat, e-mail Anda akan dibaca oleh banyak orang dan bukan tidak mungkin akan di-forward lagi ke e-mail/mailinglist lain.

3. Hargai hak cipta/karya intelektual orang lain.
Kalau mengutip sesuatu, cantumkanlah sumbernya.

4. Hindari menggunakan kata-kata vulgar (misalnya bagian tubuh tertentu manusia) karena tidak sopan.

5. Hapus bagian yang tidak perlu saat membalas e-mail.
Fasilitas Reply dari sebagian besar program e-mail biasanya akan mengutip pesan asli yang Anda terima secara otomatis ke dalam isi surat Anda. Jika harus mengutip pesan seseorang dalam jawaban e-mail, usahakan menghapus bagian-bagian yang tidak perlu, dan hanya menjawab bagian-bagian yang relevan saja. Pesan yang terlalu panjang memakan file yang besar, yang mengakibatkan banyaknya bandwidth terpakai untuk mengirimnya. Akibatnya, proses pengambilan e-mail tersebut akan menjadi lambat dan lama sehingga berpengaruh terhadap biaya yang harus dikeluarkan (khususnya untuk yang menggunakan koneksi dialup atau koneksi 3G berbasis volume).

6. Bila sama sekali tidak berhubungan atau tidak ditujukan kepada anggota milis yang lain, silahkan kirim e-mail langsung ke alamat yang Anda tuju lewat japri (jalur pribadi).

7. Hindari mengirim e-mail yang hanya berisi satu baris saja (one-liner).
One-liner = menanggapi/reply posting sebelumnya hanya sebaris dua, sama sekali tidak menambah nilai/isi dari yang ditanggapi). Hindari mengirim e-mail dengan sepatah dua patah kata saja semacam ini.

8. Bila harus mem-forward sebuah e-mail ke milis, harap lakukan penyuntingan/ perbaikan seperlunya. Misalnya dengan mengurangi banyaknya tanda > . Jangan lupa periksa dulu, apakah e-mail semacam itu sudah pernah dikirim sebelumnya ke milis.

9. Hindari memancing debat kusir atau flame war yang tidak berguna, dan jangan sampai terpancing dengan upaya-upaya untuk menghidupkan flame war. Misalnya ada posting "Yang suka nonton film itu bodoh", harap jangan dibalas dengan "Yang tidak suka lebih bodoh". Ini tidak akan mendatangkan faedah apa-apa.

Jika ada posting yang menyinggung/ memancing debat kusir, jangan hiraukan. Sebaliknya coba hubungi langsung pengirimnya, untuk mencegah penuhnya milis oleh percekcokan.

10. Saat menulis e-mail, gunakan subyek e-mail yang mencerminkan isi.
Beberapa orang umumnya menyeleksi e-mail yang akan dibaca berdasarkan subyek. Yang tidak menarik langsung dihapus. Jadi kalo kebetulan Anda membuat subyek e-mail secara asal-asalan, (misalnya "nanya" atau "tolong dong"), jangan marah jika tidak ada yang menanggapi.

11. Hindari mengirim tes posting.
Mengirim e-mail yang hanya berisi kalimat "sorry ngetes" itu sangat tidak sopan dan menghabiskan bandwidth yang mahal. Jika akan melakukan pengujian/tes pengiriman e-mail, setidaknya kirimkan sesuatu yang memiliki nilai informatif (bertanya sesuatu atau menjawab pertanyaan atau berbagi tips).

12. Perlakukan e-mail secara pribadi.
Jika seseorang mengirim informasi atau gagasan kepada Anda secara pribadi, Anda tidak sepatutnya mengirimnya ke forum umum, seperti kelompok grup, atau mailing-list. E-mail pada dasarnya adalah alat komunikasi personal.

13. Hindari menggunakan huruf kapital untuk seluruh isi e-mail.
Dalam tata krama berkomunikasi dengan e-mail/chat, penggunaan huruf besar untuk seluruh kata dalam e-mail biasanya dianggap berteriak. Karena itu hindari penggunaan huruf kapital untuk semua kata dalam e-mail Anda.

14. Hindari membicarakan orang lain dalam milis.
Hindari membicarakan orang atau pihak lain, apalagi kejelekan-kejelakan nya dalam milis.

15. Hindari menggunakan tembusan/cc (carbon copy).
Jika Anda ingin mengirim mail ke sejumlah orang (misalnya ke mailing-list) , hindari mencantumkan alamat-alamat pada kolom cc. Jika Anda melakukan hal itu, semua orang yang menerima e-mail Anda akan bisa melihat alamat-alamat e-mail orang lain. Umumnya orang tidak suka bila alamat e-mail-nya dibeberkan di depan umum. Selalu gunakan tembusan buta/BCC (blind carbon copy). Dengan cara ini setiap orang hanya bisa melihat alamat e-mailnya sendiri.

16. Jika Anda ingin mencantumkan informasi kontak (berupa alamat surat atau telepon atau situs Web), usahakan agar informasi tersebut dibuat singkat.

17. Tanggapi setiap posting milis secara obyektif dan rasional, Percayalah: membaca dan menulis email sambil tersenyum biasanya menghasilkan e-mail yang lebih baik daripada dalam keadaan emosi.

Selamat beraktivitas dalam milis.

YB0D, PULAU DAMAR BESAR - WLOTA-2749 IOTA-OC177

YB0D
PULAU DAMAR BESAR

WLOTA DXpedition June 27th to July 1st, 2013

Sponsored by the Kebon Jeruk Branch, West Jakarta Radio Club, Radio Clubs throughout Jakarta and the Indonesian Amateur Radio Organization (ORARI).

Damar Besar Lighthouse on Pulau Damar Besar (Damar Besar Island) - WLOTA No.2749

Pulau Damar Besar or Damar Besar Island is an uninhabited island that was once known as Edam Island during the colonial Dutch Rule. It is one of the island in the Thousand Islands

cluster (Kepulauan Seribu) under the North Jakarta jurisdiction. The locals call it the Monkey Island. It is located about fifteen (15) nautical miles North of Jakarta's modern Tanjung Priok harbour.

On this island stands erect a majestic Lighthouse called Menara Suar Damar Besar or simply known as Damar Besar Lighthouse (Vast Licht as the Dutch used to call it). It stands tall at about 56 meters above sea level. The Lighthouse itself is about 52 meters high.

According to historical record, this lighthouse was built in 1879 by King Z.M. Willem III of Holland to safely navigate ships moving in and out of one of the busiest seaport of Batavia. Batavia is what Jakarta was formerly known as in the 1800s during the Dutch Colonial Rule.

The Lighthouse can be seen from miles away, even from an airplane during its final approach towards Jakarta's Sukarno Hatta International Airport in Cengkareng, Banten, West Java.

DXCC COUNTRY/ENTITY REPORT
According to the AR-Cluster Network for the week of Sunday, 30th-June, through Sunday, 7th-July there were 214 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5R, 5T, 5W, 5Z, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9V, 9Y, A3, A4, A5, A6, A7, A9, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FH, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J6, J7, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V4, V5, V7, V8, VE, VK, VP2E, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS, ZS8

** PLEASE NOTE:* The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2M, SCOTLAND (Satellite/Low Band Op)
Paul, 2E1EUB, will once again be active as 2M1EUB for 14 days beginning August 5th. He will be driving around Scotland for anyone looking for new grids or grids they have not worked yet. Activity will be on 160m, 80m, and the satellites (mostly AO-7 B/A mode), as well as 2m SSB. He does accept E-mails and will arrange skeds to work him at *2e1eub@...*. Check out *QRZ.com <http://www.qrz.com/>* under 2M1EUB for more info and updates.

OC-166. Adhi, YB3MM, will be active as YB3MM/7 from *Derawan Island* between July 26-28th. Activity will include the RSGB IOTA Contest (July 27-28th). QSL via IZ8CCW, direct or via the OQRS. Log will be on ClubLog. see: * http://www.yb3mm.com/* <http://www.yb3mm.com/>

OC-237. Budi, YF1AR, will be active as YF1AR/3 from the Sembilangan Lighthouse (ARLHS IDO-076, Admiralty K1158.2, NGA 23624), on *Madura Island* between
July 25-29th. Activity will be on 40-10 meters using mainly SSB but with some CW and Digital modes. His operation also includes an entry in the RSGB IOTA Contest (July 27-28th) as a Single-Op/All-Band/Low-Power entry. Equipment is a Yaesu FT-450 with 100w into a 3 element yagi and full size GP. QSL via N2OO. Log will be on ClubLog. For more details and updates, see: * http://www.yf1ar.com/2013/07/yf1ar3-sembilangan-lighthouse-madura.html*<http://www.yf1ar.com/2013/07/yf1ar3-sembilangan-lighthouse-madura.html>

7990. CR2F, Ilheus Formigas 2013 Expedition

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-07-08 02:30:56 UTC
From: ybdxclub
Topic: 7990 Message: 7990

http://www.ybdxc.net/2013/07/cr2f-ilheus-formigas-2013-expedition.html

http://www.to-mk.com/ct3fn/

<http://www.to-mk.com/ct3fn/images/cr2v.jpg>

Ilheus Formigas 2013 Expedition<http://www.to-mk.com/ct3fn/index.php?option=com_content&view=article&id=55:ilheues-formigas-2013-expedition&catid=16&Itemid=101>

For the first time the lighthouse on Ilheus Formigas will be activated. It is a difficult and expensive operation because the chartered vessel ANTARES, which sails the team and material from Vila do Porto, Santa Maria island to Formigas and back, will stay all times anchored nearby the Ilheus Formigas to ensure a quick evacuation of the team and equipment in case of sudden weather changes. Station and accommodation will be within the LH so that the operation also counts for the ARLHS award.
As the landing on Ilheus Formigas is very difficult and as the antenna erection around the lighthouse can only be effected at WX with low winds and waves, date can vary by a couple of days. All depends on the WX. Please monitor this page for latest minute information.

Call: CR2F
Date: +/- 30.-31. July 2013
QSL: via HB9CRV, lotw and bureau are OK
Team members: CU3EJ, CU8AS, DL2HYH, HB9AHL, HB9CRV/CT3FN
IOTA: EU-003
Locator: HM77og
WLOTA: LH 4293
ARLHS: AZO 001
WWFF and DPRN award: CTFF-039
DFP: new number!
Coordinates: 37°16.0N 024° 47.0W
Distance from Sta. Maria: 37 km North East
More information about the Ilheus Formigas can be found here:
http://de.wikipedia.org/wiki/Formigas

*ARLHS Awards Program *

The complete booklet of the ARLHS Awards Program, including requirements and application forms for each award, is available in Adobe PDF format. It is free for download by clicking HERE. <http://arlhs.com/awards/awards.pdf>It is also available in a printed booklet of 32 pages for $25.00 USA currency. (NOTE: Price is $35 if sent to a DX address or to nonmembers of the ARLHS), Mail your request with payment to ARLHS, 114 Woodbine Ave, Merchantville, NJ 08109. Be sure to include your full name and mailing address, as well as your ARLHS member number if a member.

Page numbers cited in the text that follows refer to pages in that booklet.

INTRODUCTION

The Amateur Radio Lighthouse Society (ARLHS) sponsors many categories of operating achievement awards for the lighthouse/lightship enthusiast in the Amateur Radio community. Lighthouse awards chasing is a good way to learn about the geography, history, or culture of lighthouses and lightships and places near and far. This Awards Program booklet provides a brief summary of what the ARLHS has to offer. The general rules and requirements specific to an individual award are included with the description of each individual award. Each award is administered by a volunteer manager who provides applicants with the award rules, application forms, certification of applicant's submission, and issuance of appropriate award or endorsement. All ARLHS awards except the Activator Award are available to SWL's on a "heard basis." Note that although the term "lighthouse" is used most frequently throughout, for award purposes, we include lightships in this category. For the ARLHS official list of lights and their ARLHS numbers, please see the official"ARLHS World List of Light."<http://arlhs.com/page10.html>

http://www.ybdxc.net/2013/07/purposes-of-arlhs.html<http://www.ybdxc.net/2013/07/purposes-of-arlhs.html>

http://arlhs.com/page1.html

<http://1.bp.blogspot.com/-Plxd34GuMSo/UdvDQbZc76I/AAAAAAAAD9E/Psc061U0YAA/s1600/arlhs.jpg>

Purposes of the ARLHS:

The purposes for which this society is formed are:
To promote public awareness of the role ham radio and light beacons have played in assisting and maintaining safety at sea.

To preserve the heritage and history of lighthouses and lightships
To aid in preserving those lights in danger of destruction or decay
To recognize the keepers of the lights as maritime heroes
To foster camaraderie within the ham fraternity
To provide fellowship amongst nations and members of the Amateur Radio Lighthouse Society

*Membership: *
Subscription to membership in the Amateur Radio Lighthouse Society includes a membership certificate, an embroidered ARLHS logo 3-inch shoulder patch*, and a subscription to the electronic online newsletter that is published somewhat sporadically throughout the year.

Member subscribers are assigned a unique, life-time member number that is used in various on-the-air events, and they are entitled to use the Society's logo on envelopes, QSL's, and stationery as long as their membership remains active.

Membership in the ARLHS will also automatically enroll you in theInternational Lighthouse-Lightship Organization (ILLW) <http://illw.org/>at NO CHARGE. Your ARLHS member number will be part of your ILLW registration and you will be listed in the ILLW database for ILLW events.

For legal reasons, we assume you agree to the usual terms of membership described in the "User Agreement."
<http://arlhs.com/contract/ARLHS-Contract.html>

Application for membership is on Page 4. Inquire about charter franchises by sending an e-mail to weidner [at] waterw.com. Terms of subscription may be changed at any time without notice.
---
*Note: Sorry, we don't provide a cap or T-shirt with the patch. But see our on-line store. <http://www.cafepress.com/arlhs>

OM Budi-YB5OUB,
Wassalamu'alaikum wr wb,

Kalo yang dimaksud itu ACC connector yang 13 pin, di Glodog ada satu toko yg menjual pin tsb.
Tokonya persis di seberang OK, yg jual mantan anggota ORARI juga - Koh Asiong.
Harganya sekitar 35.00-45.000 lupa saya.

Tapi sayangnya gak ada yg chassis mounted - jadi semuanya harus ke kabel.

Semoga membantu

Om Djoko n rekan2,

Cuma bukan di kontes saja.. Kadang di rag chewing jg bnyk seperti itu.. Contoh di 40 M band saja.. Bnyak stsn diluar Jawa Barat yg ak terima 30 Db over S-9 dengan modulasi super jelas.. Pas ak tanya perangkat nya apa, di jwb nya cuma menggunakan radio sejuta umat, mic standar n running 40 W.. Anten wire dipole dicantol ditiang listrik..Hehehe.. Ya sdh lah ane percaya saja lah..

Salam,
Joy/YB0NSI

Om Joy... Saya lihat score beberapa contest dunia.. Khusus utk record Indonesia yang low power... Kadang saya ketawa sendiri.. Ada record yg low power nilainya lbh tinggi dari record nilai yg High power... Hahhahahahahahha

Bener gak low power ??? 100 watt... ???

Sbg contoh ... Saat ini nilai rawscore Jidx 2012 sdh di bisa di lihat di website jidx.org.. Saya ikut di band 40m HP... Sewaktu contest saya tahu.. Bahwa record Oceania low power utk 40m di pegang oleh Joni Salim YB9WZJ dgn nilai yg msh di bwh saya.

Andai saja saya curang dan memasukkan logsheet saya di kateggori 40m band low power , maka sdh di pastikan YB0NDT akan memecahkan record Oceania 40m band LP yg pernah di buat oleh Joni Salim..

Saya membayangkan Bgm perasaan Joni Salim yg membuat record tsb..murni hanya menggunakan antena dipole dan power 100 watt, recordnya di pecahkan oleh saya yg menggunakan TL 922, antena 40m 4 element...

Dan Betapa malunya saya setiap melihat piagam Jidx atau plakatnya selalu terbayang dlm benak saya bahwa saya telah menipu panitia contestnya...

Regards: Ndut...

Halo teman semua ,,,,
Halo om Joy - om Ndut

Aku jadi tertarik ingin ikut nimbrung disini karena ada Kalimat yg sangat aku hormati yaitu " Kejujuran " .

Aku pikir jika Kejujuran selalu muncul dipermukaan pasti akan ada Bahagia menyertai.

Akan berbeda jika ada Amatir Radio berpenampilan Low Profile dalam kehidupan sehari hari ,, padahal beliau itu adalah orang yg berkecukupan dalam banyak hal .

Tapi ,,,,,,,,

Akan berbeda jika Ada Amatir Radio ikut Kontes berpenampilan Low Profile ,,,, ?dengan QRP .

Padahal ,,,,, dah pake 922 dll.

Semua orang akan tertawa karena lucu
Hahaha...Hahaha.. ☐\=D/˘•˘=)) haa˘°˘haa˘°˘haa =))˘•˘

Dulu yg aku Tau ,,, Kejujuran itu murah harga nya ,,,

Sekarang kayaknya ,,,, Mahal kalee ya ???

Capek juga ya nulis ,,,,, pegal neh tangan.

Salam manis utk semua nya !!

73 - YE6YE

Drive your system into the future

Om Djoko n rekan2,

Cuma bukan di kontes saja.. Kadang di rag chewing jg bnyk seperti itu.. Contoh di 40 M band saja.. Bnyak stsn diluar Jawa Barat yg ak terima 30 Db over S-9 dengan modulasi super jelas.. Pas ak tanya perangkat nya apa, di jwb nya cuma menggunakan radio sejuta umat, mic standar n running 40 W.. Anten wire dipole dicantol ditiang listrik..Hehehe.. Ya sdh lah

ane percaya saja lah..

Salam,
Joy/YB0NSI

Yth Om-Om n YL para DXers,

Bener kejujuran dah jadi barang langka, hehehe.. Kadang karna pengen menang semua cara di halalkan ;(

Klo ikut kontes QRP lebih baik pake CB perawan saja yg bisa di 10 meter.. Dah pasti QRP karna Definisi QRP adalah 10W pep tuk ssb n 5W tuk CW..

Yg grey area adalah sbb: pas panggil CQ Contest TL-922 posisi on.. N pas dah pile up TL-922 nya OFF.. Terus dimasukin LP.. Gimana tuh ?

Sama saja dengan yg DX hunting.. Pas mengalami pile up, PW-1 on n pas dah nembus, PW-1 off.. Terus dengan bangganya membroadcast atau pamer sbb; wah ane dpt tuh stsn DX langka dengan barefoot.. Alamaaaak !!! Hehehe..bingungin ga tuh.. Kt yg bener2 pake barefoot ga dpt dpt stsn tsbt...

Salam,
Joy /YB0NSI

OM Feri,
Minggu2 ini saya juga beberapa kali monitor YC5OO - signal lumayan kuat ke Jakarta tapi memang kedengarannya cuma barefoot - 57/58.
Saya pernah receive teman dari sumatera utara - signalnya sampai 30dB
Kadang kalo yang pakai "sepatu" suka terdengar bunyi yang khas, seperti bunyi relaynya mungkin. CMIIW.

Kalo kita DX hunting sih mungkin gak masalah kalo QRO sampai batas yg diperbolehkan >100 watt - tapi masalahnya di kontes khan ada pembagian kategori utk powernya. Kategori mana yang kita ikuti, itu yg aturannya kita ikuti. HI

Selamat ya, OM Feri banyak worked dengan station dari rare entity.

Dear DXer

berikut saya copykan hasil contest ZL3IO berikut break down nya.

kalau dilihat station ZL3IO dengan *hex beam dan Vertikal antenna* (lihat penggalan LOGnya) hasilnya luar biasa banget, lebih tinggi dari category HP yang dia ikuti tahun 2011

kemungkinan lokasinya sangat menguntungkan ketinggian 320m dpl, lokasi dekat dengan laut, South Pasific Ocean.

mungkin dapat menjadi pertimbangan untuk yang mau membuat contest station, papua (khususnya bagian utara) mungkin lebih baik untuk lokasi contest station.

di qrz.com ada foto antennanya tapi tidak kelihatan antenna vertcalnya, kelihatan 2 antenna hex beam dan 6L for 10m facing USA, apakah ini yang menyebabkan score yang tinggi di 10m ngak tahu juga hehehe, luar biasa perolehan contactnya 906.

bagaimana pun juga saya, tabek sama beliau pak Holger Hannemann-
ZL3IO merupakan
operator yang handal dan susah dikalahkan untuk Oceania.

Dear om Tije... Saya sdh balas emailnya.. Saya infokan bahwa sponsorship plakat adalah YB Land DX Club.. Dan saya beritahukan bahwa ucapan terima kasihnya yg dia kirim via email ke saya akan saya forward ke milist YBDXC...

ZL3IO juga operator team contest ZM4T. ZM4T berhasil menjadi OC leader pada multi multi category di CQWW SSB Contest 2012 yg lalu.

Saya juga tabek sama om Tije yg sdh berjuang sekuat tenaga dgn betul betul murni tanpa power amp saat cqwpx ssb 2012 yang lalu. Mudah2an thn 2014 nanti om Tije meraih keberhasilan...

Dear DXer

berikut saya copykan hasil contest ZL3IO berikut break down nya.

kalau dilihat station ZL3IO dengan *hex beam dan Vertikal antenna* (lihat penggalan LOGnya) hasilnya luar biasa banget, lebih tinggi dari category HP yang dia ikuti tahun 2011

kemungkinan lokasinya sangat menguntungkan ketinggian 320m dpl, lokasi dekat dengan laut, South Pasific Ocean.

mungkin dapat menjadi pertimbangan untuk yang mau membuat contest station, papua (khususnya bagian utara) mungkin lebih baik untuk lokasi contest station.

di qrz.com ada foto antennanya tapi tidak kelihatan antenna vertcalnya, kelihatan 2 antenna hex beam dan 6L for 10m facing USA, apakah ini yang menyebabkan score yang tinggi di 10m ngak tahu juga hehehe, luar biasa perolehan contactnya 906.

bagaimana pun juga saya, tabek sama beliau pak Holger Hannemann-ZL3IO merupakan

operator yang handal dan susah dikalahkan untuk Oceania.

OM Feri,
Minggu2 ini saya juga beberapa kali monitor YC5OO - signal lumayan kuat ke Jakarta tapi memang kedengarannya cuma barefoot - 57/58.
Saya pernah receive teman dari sumatera utara - signalnya sampai 30dB
Kadang kalo yang pakai "sepatu" suka terdengar bunyi yang khas, seperti bunyi relaynya mungkin. CMIIW.

Kalo kita DX hunting sih mungkin gak masalah kalo QRO sampai batas yg diperbolehkan >100 watt - tapi masalahnya di kontes khan ada pembagian kategori utk powernya. Kategori mana yang kita ikuti, itu yg aturannya kita ikuti. HI

Selamat ya, OM Feri banyak worked dengan station dari rare entity.

Ya Om Jo,
Beda , ini kaos YE2R versi 2013 @ 125 ribon per lembar?
Beli brp lembar hayo?
Sdh termasuk ongkir ke seluruh Indo lho.
Ukurannya skalian ya

Nuwun

8027. RE: [orari-news] Prosedur untuk memanggil CQ

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-07-15 10:37:12 UTC
From: bam yb0ko soetrisno
Topic: 8027 Message: 8027

Dear All,

Kumentar sy: Wadouw ... !!!

[mestinya pakai sub-judul: pembinaan-pembinaan-pembinaan ..]

(tp dlm hati msh "ngarep" jg sih, semoga aja OM Andries ZS6WAW salah meng-copy call sign yg tsb di postingnya yg bertajuk: "Ragchewing and QRM YB8HI calling on top of v5 station" di QRZ.forum tsb.)

==========

BTW, bli K . kendati sy bersetuju dg response OM Fir (ex) YB4KL, quote: . "Ucapan prosedur yg dimaksud kan mungkin kalimat QRL (apakah frekuensi di pergunakan/sedang sibuk) dan bukan kalimat QRZ (adakah yg memanggil saya)... QRL.. is this frequency in used..? (kalau CW mode cukup ketuk QRL ?)" unquote, dan sy jg setuju dg butir 2 comment OM Bill KB4QAA yg di-quotenya, I'd say TNX FR ur input .

Sy copas some few lines dr posting OM Andries ZS6WAW tsb (yg harap maklum klo bhs Inggrisnya "ya kaya' gitu lah", kan ZS-landers setau sy memang lbh "akrab" dg bhs. Olanda/Hollandsche taal ketimbang English) bwt mrk yg blm sempat 'mbuka sndr lead yg anda berikan - biar lbh banyak yg tahu apa yg lg kita "gunjingkan" ;-):

. "Like ragchewing alot with my friend from namibia and other fellows around the world but what is 20m becoming to alot of qrm.
Guys never ask if they ask it is maybe for 2 sec's . msot people are "aligators" how many use the real 1.5kw that is alot in southern africa alot less, then they splatter all over the band, the station YB8HI was calling cq suddenly when my friend is namibia was on 14225mhz with soembody in south africa suddently after he relase the mic and band conditions was going down suddently there where alot of guys calling the above callsign .."

73,

[bam]

Subject: [orari-news] Prosedur untuk memanggil CQ

Hal kecil, namun secara prosedural seharusnya:

"QRZ is this frequency in use?"
"QRZ is this frequency in use?"

"CQ CQ CQ DE YB#XXX calling cq...."

http://forums.qrz.com/showthread.php?398346-Ragchewing-and-QRM-YB8HI-calling-on-top-of-v5-station

Beliau (YB8HI) bukan yg pertama melakukan qrm kaya gitu, ada YB8 yg lain yg saya dengar sendiri di 20m a few months ago ...rag chewing dgn lokalan nya, right on the top of the dxpedition calling freq nya ..dan mereka tau ada dxpedition di freq tsb ...

Iwan

PS: OM Ketut, are you ready? :)

Baru saja saya mendapat berita bahwa ada team dxpedition yg beberapa bulan lagi melakukan dxpedition di wilayah Indonesia Timur ... Mengajak serta amatir radio yang kebetulan member YBDXC.

Itu merupakan hal yang sangat baik untuk menambah pengetahuan.

Tetapi Salah satu anggota team tsb mengajukan syarat, jika mau ikut DX pedition tsb syaratnya harus out dari YBDXC.

Ternyata kita harus bersyukur bahwa rekan kita tsb (yg nama dan callsign nya tidak saya sebutkan) msh memilih utk tetap menjadi member YBDXC...

Demikian yg bisa saya sampaikan... Mohon tanggapan kawan kawan ybdxc

Lho .....
yg mengajukan syarat keluar dr ybdxc itu anggota ybdxc ga?

Jangan jangan anggota HDC,
(Harley Davidson Club) lha ya pantes lah kalo dia keberatan kalo mau expedition pake Harley Davidson ya mestinya cocoknya jadi anggota HDC, klo jadi anggota YBDXC ya ga betul, salah alamat.

Eeh, bener ga sih komentarku?

Hehehe.. Om Seno bisa saja..

Saya rasa mungkin cuma ada kesalah pahaman tentang masalah ini dan tidak perlu di besar besarkan..

Saya juga anggota YBDXC dan juga salah satu sponsor Damar Besar DXpedition 2013. Kami juga dapat FULL Support dari ORPUS n ORDA. Bahkan salah satu sponsor besar kami adalah 103.4 D FM.

Dah kita having fun saja cari2 DX stasiun yg langka n ikut kontesting saja..

Salam hangat,
JOY/YB0NSI.

Om Parto ini ada broadcast dari Blackberry :

Kalo ada orang bicara mengenai kita di belakang, itu adalah tanda bahwa kita sudah ada DI DEPAN.

Saat orang bicara merendahkan mengenai kita, itu adalah tanda bahwa kita sudah berada di tempat yg LEBIH TINGGI

Dan saat orang bicara dengan nada iri mengenai kita, itu adalah tanda bahwa kita sudah jauh LEBIH BAIK dari mereka

Apalagi saat orang bicara buruk mengenai diri kita, itu adalah tanda bahwa kehidupan kita sebenarnya LEBIH INDAH daripada mereka.

Regards: Ndut

http://www.dxcoffee.com/eng/2013/07/15/dxcc-time-39-years-later/

DXCC All Time New One – 39 Years Later!

2013 is my 40th year as an Amateur Radio Operator. On January 1, I made honor roll by working Father Monk Apollo, SV2ASP/A – on 40M SSB and then 17M CW.

An even more amazing thing happened this year – ATNO #336 appeared out of the past – as a QSL and 39 years after the QSO was made! It sure brings back memories that intertwine ham radio and my career, and turn this into a great 40th anniversary celebration.

I received my Novice license (WN2QHN) on my 14th birthday in March, 1973 in Newton, New Jersey. I had a very simple Novice station – a Hallicrafters HT-40 CW only transmitter, which was 75 watts, (crystal controlled), and a Heathkit SW-717 general coverage receiver that I built myself. They were controlled by a Dow Key T-R (transmit – receive) switch – which was a single tube relay, and my antenna was a 40 Meter dipole that worked on 15 Meters as well.

Home

After our very successful 7P8D dx-pedition to Lesotho in 2012 resulted in over 32,000 QSO's, the same core group brings you the excitment of another sort after DX pedition. Botswana is high on the wanted list for both CW and RTTY, and even though we will do SSB, our aim will be to work as many deserving DX'ers on CW and RTTY as we can.

As of July 8, 2013, our licence has been approved and our callsign allocated.
We subscribe to the DX'ers Code of Conduct.
Online Logs, Blogs etc will be activated soon.
Watch this space!

OM NDuT.....

Saya cuma prihatin aja kok ada "pelarangan" (melepaskan keanggotaan) pada threats sebelumnya pada suatu kegiatan yang notabene dapat memperkokoh persatuan dan mempromosikan negeri tercinta lewat effort kita masing-masing di "Amateur Radio".

TNX, 73 de yb2cpo

8047. Cheating?

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-07-16 09:57:05 UTC
From: w7nz
Topic: 8047 Message: 8047

From http://dx-code.org/cluster.html, point #6:

Never `self-spot' in a contest; that is definitely cheating. Posting the `spot' under a friend's callsign or a fake call doesn't make it any more ethical.

Anybody did that during the contest last week?

Iwan

Yang gak boleh khan self spot ya, tapi bagusnya kalau ada yg self spot kita gak langsung bilang itu cheat - mungkin ada peserta kontes yg belum membaca keseluruhan rule yang ada, masih baru. Lain lagi kalo yg udah bolak-balik ikut kontes.

Tapi kalo self spot yang nyaru/nyamar pakai callsign palsu atau callsign orang lain, ini mah sudah niat cheating - HI HI

Kalo stasiun DX yg spotting, di luar kendali kita - mungkin gak apa2 ya. cmiiw

(Berusaha positive thinking, HI)

Here is a this short video for Field day and how to use the logging program N1MM as an operator in Peterborough Ontario ARES Field Day event. It is partly directed to new hams or to those new to field day and give some basic description of field day but mostly gives a tutorial on how to use use N1MM logging for this event.

8059. NCCC webinars

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-07-17 02:22:56 UTC
From: Yb land Dx club
Topic: 8059 Message: 8059

http://www.nccc.cc/webinars.html

NCCC is a pioneer in utilizing web-based tools for training NCCC members. NCCC has spearheaded a number of online "Webinars" during the last year, covering a variety of important topics related to Contesting. Each webinar was recorded, and is downloadable for personal viewing. See "Previous Webinars" below for more information.

* July 8, 2009: "How to set up a Microham keyer", Ira (K2RD) -- Recording available here (62 MB)
* July 22, 2009: "Homebrewing a micro based (SO2R) station controller", Jack (KF6T) -- Recording available here
* August 12, 2009: "N1MM: How To Configure And Operate", John (K6MM) -- Recording available here (173 MB)
* August 26, 2009:"WriteLog: How To Configure And Operate", Mark (K6UFO) -- Recording available here (108 MB)
* September 2, 2009: "A 160m Helically Wound Vertical", John (K6MM) -- Recording available here (50 MB)
* September 24, 2009: "Hints and Kinks for Using HFTA", Dean (N6BV) -- Recording available here (137 MB)
* October 14, 2009 (NCCC/PVRC Joint Webinar): "A 160m Helically Wound Vertical", John (K6MM) -- Recording available here (95 MB)
* December 9, 2009: "RTTY For Newbies", (Fred, K6DGW; John, K6MM; Dean, N6DE; Iain, N6ML) -- Recording available here (115 MB)
* February 2, 2010: "How to Operate the CW Sprint", (Bob, N6TV) -- Recording available here (38 MB)
* June 7, 2010: "Tactical Use of Propagation Predictions for HF Contesting", (Dean, N6BV) -- Recording availablehere (83 MB). PDF version of the presentation available here.
* November 23, 2010: "HF Propagation and Sporadic-E, a Case Study: WRTC 2010", (Dean, N6BV) -- Recording available here (50 MB). PDF version of the presentation available here.
* August 30, 2011: "Improving Your CW Contest Speed", (Dean, N6DE) -- Recording available here (19 MB).
* September 22, 2011: "Contesting Basics", (Bob, K6XX) -- Recording available here (137 MB).
* October 18, 2011: "Antennas For Contesting", (Dean, N6BV) -- Recording available here (185 MB).
* October 25, 2011: "Logging Accuracy: Error Control For SS", (Tom, ND2T) -- Recording available here (130 MB).
* November 15, 2011: "Recording & Using Voice Messages", (Jim, K9YC) -- Recording available here (340 MB)
* February 11, 2013: "General Meeting" -- No recording available -- technical difficulties
*

About

Andrea, IZ2LSC

Hi Folks,

I’m going to spend my summer holidays in Mexico and as usual, when the location deserves ham radio interest, I will bring with me a barefoot equipment to be active on HF bands (see my past activities on myQRZ.com page).

This is not a Dxpedition, but only an holiday style operations. However I will try to be active as much as I can, without taking too much time from my family, to give to everyone the opportunity of a QSO.

I will spend two weeks touring around the mainland and a week on the “Isla Mujeres”. If the accomodation will allow it I will try to setup a vertical antenna also from the mainland, but primary goal is to be active from the island, as it counts for IOTA award and seems to be enough demand. According to RSGBIOTA website the Island has been credited to only 31.6% of participants.

I have a good location, on the beach on the Caribbean side of the island, so I hope to catch all of you on the frequiency and put a lot of QSOs in the log.

You can get in touch with me using the contact form.

If you like this and feel to give me a little contribution, here there is the donation page

vy 73

Andrea, IZ2LSC

P.S. Contribute to the media section of this website by sending your recordings (see here).

Topic: 8065 Message: 8065

http://www.ybdxc.net/2013/07/yp13s-mare-island-sacalinu-eu-183.html

http://www.amatoradio.ro/amatoradio/ro/home.php

MARE ISLAND SACALINU

Sacalin Island is a newly formed island in the Black Sea Romanian coast a short distance from the right arm of the Danube Delta St. George. Originally Sacalin Island consisted of two smaller islands: Sacalinu Great and Small Sacalinu. But with time the two came together and formed a mass of soil per unit area of 21,410 hectares.

Romanian Government declared a Biosphere Reserve and prohibited populating the island since 1938. Currently access is prohibited and tourists.

The island is a great variety of birds, mammals and reptiles. Here are found the largest colonies of the sandwich tern and Dalmatian Pelican, the island is the main area nesting, feeding and wintering of the species. The island has been reviewed a number of 229 species of birds. The island's waters are rare fish, sturgeon, and rare plants such as marsh sprouts large canary.

There are two areas where progress occurs mainly Delta. One starts from St. George to Sakhalin Island and perhaps in ten years will close, forming a new lake, and the other is north of Sulina.

Hello Dani (YB2TJV),
Nice to meet you.
I am Tak/JA7DHJ.
I saw your call sign on the NUSANTARA AWARD home page.
I worked the 8A2OTA in 1993,but I did not received the QSL card.
I sent to e-mail QSL manager YB2FRR,but no reply.
Do you know any information YB2FRR or 8A2OTA member?
I need 8A2OTA's QSL card.
Thanks for your help.

8072. The 21st Russian Radiosport Team Championship

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-07-19 22:58:40 UTC
From: Yb land Dx club
Topic: 8072 Message: 8072

http://www.ybdxc.net/2013/07/the-21st-russian-radiosport-team.html

http://srr.ru/CONTEST/ozchr_12_eng.php

The 21st Russian Radiosport Team Championship
About the contest

The Russian Radiosport Team Championship (RRTC) is an annual head to head "Field Day" style competition which is organized by the Russian Amateur Radio Union (Soyuz Radiolyubitelei Rossii – SRR), originating in the USSR in 1980. In 2012, twenty five teams will be invited, which represent the many different regions of the Russian Federation.
The distance between team positions is roughly 0.5 kilometer, so the antennas of the nearest two or three teams will be visible from each operating position. Organizers will supply teams with identical tents, tables, chairs, 220 V gas generator and gasoline, output power indicator, 10m-high steel sectioned tower and a triband antenna. Teams are required to bring their own 100 W (limited) transceivers, computers and peripherals, 40m-band InvV dipole, antenna switching devices, filters etc. Participants of Russian Radiosport Team Championship are also responsible for base camp set-up, as well as all antenna assembly & tower assembly/raising.
Participants can make QSOs among themselves and the rest of the world, so everybody is invited to the party. Usually the basic activity on the bands is generated by Russian radio amateurs; to raise QSO rates, the teams use new callsigns and exchanges every two hours. On average, 1300 QSOs by the top teams are not uncommon during the eight-hour contest. There is no limitation on band or mode changes, although only one signal can be transmitted at one time.
Every team will be accompanied by an official contest referee, who will monitor all actions, power output & the audio signals. Each referee will be assigned to teams from a pool of qualified referees provided by teams. The rules for the teams are complete in detail, any deviation from the published rules is strictly prohibited. During the contest period, an audio recording will be made for each team. Online scores will be made available via the internet. After the competition ends, email logs will accepted from around the world during a four hour period immediately following the end of the contest. After that, computer checking of the logs will commence, and the final results will be ready the following morning.

OPDX Bulletin 1120 July 22, 2013
The Ohio/Penn Dx PacketCluster
DX Bulletin No. 1120
BID: $OPDX.1120
July 22, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Web Page and Letter, K1XN & GoList, NJ1Q & W1AW, W2GB, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4XP, K6VVA, KH6BZF, N6PSE, W6SZN, K8GI, K8YSE, W8GEX & 60m News, WB8YJF, W9ILY, 5B4MF, 9M6DXX, AT International, CT2HPM, DK8JB & The DX News Letter, DL1MGB, DL1SBF, DxCoffee.com, DX-World.Net, E21EIC, E77E, ES1CW, F4FVI, F5NQL, F6AJA & Les Nouvelles DX, G3SWH, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK7JWX, IZ2LSC, JA1DFK, OH2BH, ON4CAS, ON4RO, ON5NT, OZ6OM & 50 MHz DX News, PA3GEO, PA8AD, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, UT5UY, VA3RJ & ICPO, VK3MEG, the VHF-DX-Portal (MMMonVHF), YO5OHO ZS6RJ for the following DX information.
DXCC COUNTRY/ENTITY REPORT
According to the AR-Cluster Network for the week of Sunday, 14th-July, through Sunday, 21st-July there were 208 countries active. Countries available: 3A, 3B8, 3B9, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C9, CE, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, F, FG, FK, FM, FO, FP, FR, FS, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J3, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PY, PY0F, PZ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T33, T5, T7, TA, TF, TG, TI, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VP2E, VP2V, VP8, VP8/h, VP9, VR, VU, XE, XU, XW, YA, YB, YI, YL, YN,
YO, YS, YU, YV, Z3, ZA, ZB, ZD7, ZD8, ZF, ZL, ZP, ZS
* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).
3DA0, SWAZILAND
Roger, ZS6RJ, informs OPDX that there will be a 3DA0ET DXpedition to Swaziland taking place between November 18-27th. He mentions that the team will be finalized sometime next month after everyone over on the EU side is back from their holidays. This will include their roles etc... along with the Web site and QSL information. Roger did provide the aims of the DXpedition, which are:
* To participate in the CQWW DX CW Contest (November 23-24th) as a Multi-2 category contestant.
>* To give as many folk as possible a new entity or band/mode slot, providing CW, RTTY and SSB.
>* To address the often-neglected need for digital modes via a full time dedicated RTTY/PSK

station running from the start for the entire duration of the DXpedition.
>* To operate 160 meters through 6 meters.
>* Equipment:
>Rigs - 2X Kenwood TS-590's, 1X Yaesu FTDX3000D, & 1 or 2X Elecraft K3's
>Linears - 4X Expert (3X 1K and 1X 2K FA's) linear amplifiers, sponsored by Expert Amps USA
>Antennas - 3X KIO Hexagonal Beams, 1X 75 foot vertical for 160, 80 and 40 meters TX, 1X 2 element 30 meter wire beam, 1X 160/80 meter RX antenna with preamp.
>* QSL Policy/Website/Log: - They will be announcing a Web site address shortly.
>- They will be using ClubLog for band-slot chasers and for online log checking.
>- They will be updating both Clublog and LoTW a couple of times each day during the operation.
>- They will be providing QSL cards via both Bureau and direct.
Any queries can be directed to Roger, ZS6RJ.

http://www.ybdxc.net/2013/07/colvin-award.html

http://www.arrl.org/colvin-award-grants

Colvin Award

Terms of Reference

The Colvin Award is funded by an endowment established by Lloyd D. Colvin, W6KG (SK). Approximately $6,000 in annual investment income is available.

Consistent with Mr. Colvin’s wishes and with the policies of the ARRL Board, the Colvin Award is conferred in the form of grants in support of Amateur Radio projects that promote international goodwill in the field of DX. To minimize overhead costs and the time required to review applications, the Grants Committee consists of three senior members of the ARRL Headquarters staff [at the present time, the Executive Vice President and Membership and Volunteer Programs Manager] located in Newington, Connecticut.

8076. Log Type Rule Contest N1MM

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-07-23 11:58:10 UTC
From: Gunarso
Topic: 8076 Message: 8076

Dear All,

Sambil ngabuburit mencoba bikin Log Typ eRule Contetst untuk N1MM, rekan2 yang mau mencoba silahkan download nama filenya AIDXC.UDC
(AIDXC = All Indonesian DX Contest, kenapa dikasih nama itu, awalnya coba2 bikin nama Log N1MM untuk Gedebage CW dan Phone Contest tahun 2013), ga usah di protes entar di ganti aja....

http://yb1za.ampr.org/contest/

setelah di download taruh file di Folder .../N1MM Logger/UserDefinedContests/
kemudian jalankan Aplikasi N1MM seperti biasa,
pilih File> New Database... (silahkan kasih nama apa aja) kemudian
pilih File> New Log In Database :

Pada Log Type pilih AIDXC (klik OK), silahkan ber Contest ria.....

Rule ini dibuat masih sangat sederhana,

setiap QSO dengan semua Stasiun (baik dalam dan luar negeri) mendapat score 2 Point
Setiap QSO dengan Praffix baru mendapat Multiplier 2
kalau QSO dengan YB1LZ dapat score 10 (ha..ha..ha..ha..ha.., namanya juga nyoba...entar di ganti dengan Callsign khusus, kalau perlu)
total Score adalah Jumlah Point x Multiplier
Kayaknya kita sudah bisa membuat International Contest, kebetulan Log Checker dan Cabrillo Analyzer juga sudah di install, jadi tinggal kemauan aja ya....
Rule ini tinggal dikembangkan maunya seperti apa untuk mendapatkan score dan multiplier.

selamat mencoba, kalau mau tolong diisi seolah2 lagi kontes tapi cukup max 20 stasiun aja, biar ga pusing trus kirim ke email yb1lz@... mau di analisa seperti apa rulenya apakah sudah berjalan dan bisa dinilai dengan Cabrillo Analyzer.

terima kasih, salam hangat

Gunarso - YB1LZ

Even in summer, DXCoffee is the Dxer’s daily ritual

Dear DxCoffee friends and readers,
The entire editorial staff wishes you a safe and happy summer holiday. We will continue tokeep you up to date, during this time of year as well, with the best and most exciting storiesof DXpeditions, contests, propagation and a little of everything else when it comes to DX.
If you’re headed on vacation, remember to take a radio and antenna with you for some simple holiday style operation and, of course, don’t forget to tell us about it: info@...
or make your way tohttp://www.dxcoffee.com/eng/join-us/logo/
We’ll look for your information prior to departure, your pictures while operating and your articles upon returning home telling us of your summertime adventures while on the air.
http://www.dxcoffee.com/eng/join-us/
Of course, if you feel so inclined, use the DxCoffee logo on your QSLs. We’d then feel obliged to publish them for all the world to see!
http://www.dxcoffee.com/eng/join-us/logo/
73 and happy trails from the entire editorial staff of DxCoffee
(special thanks to Miss Igne, model for DxCoffee)
translation Mark W0BG

IZ8IYXJournalist and Director of DxCoffee.com - I wrote DX articles for: The DX Magazine (USA), CQ Ham Radio (Japan), DX Magazine 59 (Japan), Radio Amateur CQ (Spain), Radio Rivista (Italy), MDXC Book Italy, CQ Elettronica (Italy).

Mantab Bro.... !

usul :
untuk indonesia durasi kontesnya ga usah lama-lama,
cukup max 2 jam aja, (partisipan di Indo paling banter +/- 200 partisipan), dan cq-ing tidak usah dibatasi.
alasannya :
* pasti akan jarang didengar , "lima sembilan nol nol satu disini, lima sembilan nol nol dua disana, salam buat teman-teman seorganisasi (kapan nyampaikannya?) "
salam keluarga , gut lak for de kontes, salam tetek bengek segala macam .....
* pasti akan jarang terdengar : " aku pinjam frequensinya ya ? ini sudah 10 menit nih ....
* pasti akan jarang terdengar partispan yg sedang cq-ing diserobot partisipan lainnya
* pasti akan lebih menyulitkan partisipan yang akan menggunakan fasilitas band 900MHz / 1800 MHz
* Band yang digunakan pasti akan lebar, misal 7040 - 7200 (ssb) bisa penuh.

OM Seno.....bisa aja nich.
Untuk durasi waktu 2 jam, mungkin bisa dilonggarkan OM, kawatir ada yang lagi undangan, entar keburu2 hi..hi..hi..
yang lain cocok dech...
salam buat keluarga, temen2 seorganisasi, sekampung halaman....wkwkwkwkw...
cuman rule itu dibuat pengennya untuk AIDXC (All Indonesian DX Contest), kayaknya di Indonesia belum ada Intl Contest, bia ngajak peserta di luar.

Thx

Gun

Om Zen ,,
Yg Kordinir om Djoko YB1TJ,,
Saya cuma membantu aja om.
Kebetulan teman lokal mau cetak,,

1x jalan musti 9 slot,,
1 slot 1000 lembar,,
Sangat murah harganya..
QSL warna dan 2 sisi..

Yg lalu kalo tidak salah 1 slot 300rb diluar ongkir,,

Soal gbr boleh nanti om Zen kirim ke Om Djoko aja..

Nah sudah ada 3 slot..
YB9WAN , YF4FJ , YB0MZI/4..

OM Joni,

Untuk QSL Cardnya
1 halaman full color laminating glossy.
1 halaman B/W
Quantity nya 2000lbr.
Harganya aku check dulu ya, tapi pastinya ngak mahal.

Foto untuk backgroundnya bebas OM Zen.

Tambah satu orang lagi OM, YB1UUN mau.

Tnx 73

http://www.m0mvb.co.uk/uploads/1/6/5/2/1652155/usmc-antenna-hb.pdf

USMC Antenna Handbook

A radio antenna is the crucial link in any receiving or transmitting station whether it is used for ham radio, short wave listening, or for commercial or professional use. The overall performance of the radio station depends upon the performance of the radio antenna. A good radio antenna will enable the performance of the whole radio communications station to be maximised, whereas a poor antenna will degrade the capabilities of the transmitter and receiver regardless of how good they are.

Radio stations used for professional or commercial applications have a large degree of flexibility and they will site antennas where they will give a suitable level of performance. However for ham radio enthusiasts and short wave listeners it is necessary to install the best antenna around the house. Very few ham radio operators are able to utilise a field or other large area, and often the radio antenna will be something of a compromise. Nevertheless, by following a few guidelines, it is possible to make the best of any radio antenna installation and ensure that its performance is as good as it possibly can be. In addition to this it is worth mentioning that it is usually necessary to undertake some experimentation to find out what type of radio antenna works best for a given location and style of radio operation.

Some hints and tips are given below, but these can only be general guidelines, and they are not exhaustive. However they form a good starting place when thinking of installing a ham radio antenna system

General antenna situation One of the most important aspects of setting up any radio antenna is its location. The location of the antenna will govern many aspects of its operation, and therefore the location of the antenna must be determined along with the type of antenna to be used. A number of points associated with the antenna should be considered:

Subject: Re: [YBDXC_News] Cetak QSL

OM Joni,

Untuk QSL Cardnya
1 halaman full color laminating glossy.
1 halaman B/W
Quantity nya 2000lbr.

Harganya aku check dulu ya, tapi pastinya ngak mahal.

Foto untuk backgroundnya bebas OM Zen.

Tambah satu orang lagi OM, YB1UUN mau.

Tnx 73

Djoko

Om Zen ,,
Yg Kordinir om Djoko YB1TJ,,
Saya cuma membantu aja om.
Kebetulan teman lokal mau cetak,,

1x jalan musti 9 slot,,
1 slot 1000 lembar,,
Sangat murah harganya..
QSL warna dan 2 sisi..

Yg lalu kalo tidak salah 1 slot 300rb diluar ongkir,,

Soal gbr boleh nanti om Zen kirim ke Om Djoko aja..

Nah sudah ada 3 slot..
YB9WAN , YF4FJ , YB0MZI/4..

Maksudnya anggota ORARI?
Anggota RAPI pun boleh,
Bahkan anggota ARRL pun boleh, atau anggota Amatir Radio dari negara manapun boleh,
kasi contoh logonya dan formatnya ke Pak Djoko,

SWL-card juga bisa.

Pak Djoko ..... !
Aku sdh bantu promosi lho,
Jgn lupa komisinya nanti ditansfer ya.
Hehehehehe

OM Joni,

Untuk QSL Cardnya
1 halaman full color laminating glossy.
1 halaman B/W
Quantity nya 2000lbr.
Harganya aku check dulu ya, tapi pastinya ngak mahal.

Foto untuk backgroundnya bebas OM Zen.

Tambah satu orang lagi OM, YB1UUN mau.

Tnx 73

Saya rasa bukan anggota aja, yg bukan anggota YBDX mungkin juga boleh.
Bukan begitukah Om. Joni.

Topic: 8083 Message: 8107

Om Zen

Benar sekali

Ybdxc saya kira hanya sebuah sarana bagi anggota ORARI yg senang lakukan salah satu kegiatan ORARI yaitu DX..

Dimana dalam sarana ini kita ßišª bertukar pikiran , menberikan infomasi , saling bantu (contoh cetak QSL) dan lain-lain tentang DX.

Intinya kita tetap adalah anggota syah ORARI..
Logo YBDXC aja kan ada logo ORARI didalamnya.

Forum ini terbuka bagi siap aja..
Jadi saya kira siapa saja boleh ikutan untuk cetak QSL.
Kebetuan dalam hal ini , om Djoko membantu kita dengan senang hati.

Dari 4 yg terdaftar untuk cetak QSL , 2 diantaranya : YB9WAN dan YF4FJ kan bukan member ybdxc..

Namun jika kita mau jadi anggota ybdxc syaratnya minimal ßišª punya QSL 5 benua (tidak masuk OC) atau Piagam DX.
Kemudian yg pasti saya kira adalah anggota syah ORARI (dimana IAR nya masuh berlaku)

Apa demikan om Zen

8109. YE2R

Yahoo group: YBDXC_News (2013-05 — 2013-12)
Date: 2013-07-24 10:20:30 UTC
From: Martinus Jap
Topic: 4272 Message: 8109

YE2R DI
CQ WW SSB 2013
Sebagaimana
di tahun-tahun yang lalu maka di tahun 2013 ini YE2R rencananya akan kembali
berpartisipasi di ajang Kontes Internasional CQ WW SSB. Pada kesempatan ini
pula YB2LSR dan YB2DX selaku koordinator akan menyampaikan sekilas
pandang mengenai sejarah
terbentuknya YE2R, Operator dan team pendukung yang terlibat, Prestasi yang
telah dicapai serta segala sesuatu yang berkaitan dengan operasional team YE2R.

A. Apa itu YE2R :

Cerita
singkat mengenai sejarah YE2R,

1.
Tahun 2002,
Awalnya Call-sign YE2R muncul itu digunakan
untuk kegiatan IOTA-DXpedition Pulau Karimun Jawa OC-186 di
tahun 2002 oleh YB2MTA (sekarang YE3AA).

2. Tahun 2009,
Pada pertengahan Maret 2009 YB2LSR dan YB2DX menghadapYB2AA (SK) mengusulkan kepada beliau
selaku Ketua ORDA Jawa Tengah untuk
membentuk Team Kontes berskala
Internasional,beliau
sangat mendukung sekali dan setuju akan ide tersebut dan akhirnya
terbentuklah Team
Kontes YE2R dan secara lisan mempercayakan YB2LSR sebagai koordinator kegiatan
ini dan stasiun yang dipergunakan untuk team Kontest ini adalah stasiunnya
YB2DX di Grobogan.
Melalui ORDA Jateng maka IAR yang diajukan untuk dipergunakan team kontes ini adalah YE2R
dan
inilahpertama kali Team YE2R ikut dalam kontes
international CQWW-SSB 2009.
**(masa berlakunya IAR YE2R2009adalah selama
berlangsungnya kontes tersebut).
Partisipasi
YE2R di dalam kontes International ini, team dengan operator dari ORARI Daerah-2 (Dua
) itu
sendiri juga didukung oleh Guest Operator dari beberapa ORARI Daerah lainnyaantara lain :
YB2DX, YB2LSR, YB2ECG, YB2TJV, YB2VTO, YB2BOB, YB2CPO,
YB2OBL, YB2SSB, YB3MM, YB3PXF, YC2BBY, YC2JKG, YC2JVX, YC2KME, YC2PQW, YD2DNA

3.
Tahun 2010, 2011, 2012

Team DX
kontes YE2R kembali mengajukan IAR oleh YB2LSR kepada Ketua ORDA Jawa
Tengah YB2AA (SK) untuk kembali dipergunakan di kegiatan CQ WW SSB di tahun 2010.
** (masa berlakunya IAR YE2R adalahselama
berlangsungnya kontes tersebut)
Adapun team operator YE2R yang terlibat di kontes ini seperti pada tahun sebelumnya dari
Daerah 2 (dua) sendiri dan dari anggota beberapa ORARI Daerah lainnya : YB1TJ, YB1WR,
YB2CPO, YB2DX, YB2ECG, YB2LSR, YB2TJV, YB2VTO, YB3KM, YB3PXF,
YB3MM, YB9WZJ, YC2BBY
Begitu
juga di tahun 2011, IAR YE2R kembali diajukan oleh YB2LSR kepada Ketua ORDA Jawa
Tengah YB2AA (SK)
untuk kembali dipergunakan di kegiatan CQ WW SSB di tahun 2011
**(masa berlakunya IAR YE2R adalahselama
berlangsungnya kontes tersebut)
danoperator yang terlibat di kontes ini antara
lain adalahsama seperti tahun sebelumnya dari ORARI Daerah 2 dan dari anggota beberapa
ORARI Daerah lainnya : YBØAI, YB1AR, YB1HK, YB1TJ, YB2BBY, YB2DX, YB2ECG,
YB2LSR, YB2TET, YB2TJV, YB2VTO, YB3KM, YB3PXF, YB3MM, YB4IR, YB9WZJ

Ditahun 2012, YB2LSR atas nama Team YE2R kembali mengajukan IAR untuk YE2R dansupaya
diperoleh masa berlakunya
selama 5 tahun dan biaya perpanjangan IAR tersebut diambilkandari swadana Team YE2R
sendiri.
Team
operator yang terlibat CQWW-SSB 2012 adalah:KR7O, W7NZ, YBØNSI, YB1TJ, YF1AR, YB2DX,
YB2WB,
YB2BBY, YB2LSR, YB2TET, YB2TJV, YB2VTO, YC2WBF, YB3KM, YB3MM, YB3PXF, YB4IR.
Di tahun yang sama 2012, Team YE2R mengikuti pula kegiatan CQWW-160m-SSB
2012, dengan team operator :
YBØAI, YB2DX, YB2LSR, YB2TJV, YB2BBY, YB2VTO, YB2TET,
YB3MM, YB3PXF, YC2FAJ, YC2PQW, YB2WB, YC2WBF

4.
Tahun 2013.
YB2LSR dan YB2DX ditunjuk
secara tertulis berupa Surat Tugas sebagai Koordinator untuk pelaksanaan Kontes
CQWW-SSB 2013 mendatang
oleh Pj.Ketua Orda Jateng (YB2JNZ). Ini pertama kalinya Surat
Tugasdiperoleh secara tertulis
dimana di tahun-tahun sebelumnya hanya penunjukan secara lisan oleh YB2AA (SK) kepada
YB2LSR untuk mengkoordinir Team YE2R.

B. Prestasi Team YE2R :
*
CQWW-SSB 2009, Katagory : Multi Operator-Two Transmitter
Juara
#1, Indonesia
Juara #5, Oceania
Score :
2.254.593

*
CQWW-SSB 2010, Katagory : Multi Operator-Two Transmitter
Juara
#1, Indonesia
Juara
#4, Oceania
Score :
4.999.390(New ZoneRecord)
*
CQWW-SSB 2011, Katagory : Multi Operator- Multi Transmitter
Juara
#1, Indonesia (New Indonesia Record)
Juara
#3, Oceania
Score :
7.621.077
*
CQWW-SSB 2012, Katagory : Multi Operator- Multi Transmitter
Juara
#1, Indonesia (New Indonesia Record)
Juara
#3, Oceania
Score :
8.343.880
*
CQWW-160m DX Contest, Katagory : Multi Operator
Juara
#1, Oceania
Score :
12

C. Sertifikat / AWARD
atas nama YE2R
1.
Certificate CQWW-SSB 2009 (Asli)
dipersembahkan oleh Team YE2R ke ORDA
Jateng untuk di-arsip
2. Certificate
CQWW-SSB 2010 (Asli)
dipersembahkan oleh Team YE2R ke ORDA
Jateng untuk di-arsip
3. Certificate
CQWW-SSB 2011 (Asli)
dipersembahkan oleh Team YE2R ke ORDA
Jateng untuk di-arsip
4.
Certificate CQWW-SSB 160m 2012 (Asli)
dipersembahkan oleh Team YE2R ke ORDA
Jateng untuk di-arsip
5.

DXCC-Phone Award #41,345 (Asli)
dipersembahkan oleh Team YE2R (biaya klaim Award adalah Swadana Team YE2R) ke ORDA Jateng untuk di-arsip
6.DXCC-
40m Phone Award (Asli)
dipersembahkan oleh Team YE2R (biaya klaim Award
donasi dari YB3MM), ke ORDA Jateng untuk di-arsip

D. Dedikasi
Kami persembahkan Sertifikat / AWARD YE2R, untuk
:
1. INDONESIA
2. ORARI DAERAH JAWA TENGAH
3. YB2AA, TIM HADI DHANUWIDJAJA (SK)
Sekapur Sirih :
Prestasi
demi prestasi yang telah yang telah dicapai semua itu karena hasil dari Team Work yang baik, dukungan dari
Organisasi, dan dukungan dari temen-temen baik material maupun spiritual yg
belum sempat disebut satu-persatu, Semua itu bukan untuk Team YE2R sendiri, melainkan untuk INDONESIA dan tentunya untuk Organisasi yang kita
cintai "ORARI" dimata dunia.

73

Om Joni,
Sorry baru balas, sbb lg cari gambar buat QSL card.
Betul sekali Om Joni, YBDXC ga beda Club Fox Hunting yg senang foxhunting, Club Morse yang seneng Morse, Club Homebrew yang senang Homebrew dan Club Contest yang senang Contest.
YBDXC Club DX yang senang DX hunting Award dan Contest.

Yang Penting kan Bendera kita tetap ORARI.

Subject: [YBDXC_News] YE2R

YE2R DI
CQ WW SSB 2013
Sebagaimana
di tahun-tahun yang lalu maka di tahun 2013 ini YE2R rencananya akan kembali
berpartisipasi di ajang Kontes Internasional CQ WW SSB. Pada kesempatan ini
pula YB2LSR dan YB2DX selaku koordinator akan menyampaikan sekilas
pandang mengenai sejarah
terbentuknya YE2R, Operator dan team pendukung yang terlibat, Prestasi yang
telah dicapai serta segala sesuatu yang berkaitan dengan operasional team YE2R.

A. Apa itu YE2R :

Cerita
singkat mengenai sejarah YE2R,

1.
Tahun 2002,
Awalnya Call-sign YE2R muncul itu digunakan
untuk kegiatan IOTA-DXpedition Pulau Karimun Jawa OC-186 di
tahun 2002 oleh YB2MTA (sekarang YE3AA).

2. Tahun 2009,
Pada pertengahan Maret 2009 YB2LSR dan YB2DX menghadapYB2AA (SK) mengusulkan kepada beliau
selaku Ketua ORDA Jawa Tengah untuk
membentuk Team Kontes berskala
Internasional,beliau
sangat mendukung sekali dan setuju akan ide tersebut dan akhirnya
terbentuklah Team
Kontes YE2R dan secara lisan mempercayakan YB2LSR sebagai koordinator kegiatan
ini dan stasiun yang dipergunakan untuk team Kontest ini adalah stasiunnya

YB2DX di Grobogan.
Melalui ORDA Jateng maka IAR yang diajukan untuk dipergunakan team kontes ini adalah YE2R dan
inilahpertama kali Team YE2R ikut dalam kontes
international CQWW-SSB 2009.
**(masa berlakunya IAR YE2R2009adalah selama
berlangsungnya kontes tersebut).
Partisipasi
YE2R di dalam kontes International ini, team dengan operator dari ORARI Daerah-2 (Dua) itu
sendiri juga didukung oleh Guest Operator dari beberapa ORARI Daerah lainnyaantara lain :
YB2DX, YB2LSR, YB2ECG, YB2TJV, YB2VTO, YB2BOB, YB2CPO,
YB2OBL, YB2SSB, YB3MM, YB3PXF, YC2BBY, YC2JKG, YC2JVX, YC2KME, YC2PQW, YD2DNA

3.
Tahun 2010, 2011, 2012
Team DX
kontes YE2R kembali mengajukan IAR oleh YB2LSR kepada Ketua ORDA Jawa
Tengah YB2AA (SK) untuk kembali dipergunakan di kegiatan CQ WW SSB di tahun 2010.
** (masa berlakunya IAR YE2R adalahselama
berlangsungnya kontes tersebut)
Adapun team operator YE2R yang terlibat di kontes ini seperti pada tahun sebelumnya dari
Daerah 2 (dua) sendiri dan dari anggota beberapa ORARI Daerah lainnya : YB1TJ, YB1WR,
YB2CPO, YB2DX, YB2ECG, YB2LSR, YB2TJV, YB2VTO, YB3KM, YB3PXF,
YB3MM, YB9WZJ, YC2BBY
Begitu
juga di tahun 2011, IAR YE2R kembali diajukan oleh YB2LSR kepada Ketua ORDA Jawa
Tengah YB2AA (SK)
untuk kembali dipergunakan di kegiatan CQ WW SSB di tahun 2011
**(masa berlakunya IAR YE2R adalahselama
berlangsungnya kontes tersebut)
danoperator yang terlibat di kontes ini antara
lain adalahsama seperti tahun sebelumnya dari ORARI Daerah 2 dan dari anggota beberapa
ORARI Daerah lainnya : YBØAI, YB1AR, YB1HK, YB1TJ, YB2BBY, YB2DX, YB2ECG,
YB2LSR, YB2TET, YB2TJV, YB2VTO, YB3KM, YB3PXF, YB3MM, YB4IR, YB9WZJ

Ditahun 2012, YB2LSR atas nama Team YE2R kembali mengajukan IAR untuk YE2R dansupaya
diperoleh masa berlakunya
selama 5 tahun dan biaya perpanjangan IAR tersebut diambilkandari swadana Team YE2R
sendiri.
Team
operator yang terlibat CQWW-SSB 2012 adalah:KR7O, W7NZ, YBØNSI, YB1TJ, YF1AR, YB2DX,
YB2WB,
YB2BBY, YB2LSR, YB2TET, YB2TJV, YB2VTO, YC2WBF, YB3KM, YB3MM, YB3PXF, YB4IR.
Di tahun yang sama 2012, Team YE2R mengikuti pula kegiatan CQWW-160m-SSB
2012, dengan team operator :
YBØAI, YB2DX, YB2LSR, YB2TJV, YB2BBY, YB2VTO, YB2TET,
YB3MM, YB3PXF, YC2FAJ, YC2PQW, YB2WB, YC2WBF

4.
Tahun 2013.

YB2LSR dan YB2DX ditunjuk
secara tertulis berupa Surat Tugas sebagai Koordinator untuk pelaksanaan Kontes
CQWW-SSB 2013 mendatang
oleh Pj.Ketua Orda Jateng (YB2JNZ). Ini pertama kalinya Surat
Tugasdiperoleh secara tertulis
dimana di tahun-tahun sebelumnya hanya penunjukan secara lisan oleh YB2AA (SK) kepada
YB2LSR untuk mengkoordinir Team YE2R.

B. Prestasi Team YE2R :
*
CQWW-SSB 2009, Katagory : Multi Operator-Two Transmitter
Juara
#1, Indonesia
Juara #5, Oceania
Score :
2.254.593
*
CQWW-SSB 2010, Katagory : Multi Operator-Two Transmitter
Juara
#1, Indonesia
Juara
#4, Oceania
Score :
4.999.390(New ZoneRecord)
*
CQWW-SSB 2011, Katagory : Multi Operator- Multi Transmitter
Juara
#1, Indonesia (New Indonesia Record)
Juara
#3, Oceania
Score :
7.621.077
*
CQWW-SSB 2012, Katagory : Multi Operator- Multi Transmitter
Juara
#1, Indonesia (New Indonesia Record)
Juara
#3, Oceania
Score :
8.343.880
*
CQWW-160m DX Contest, Katagory : Multi Operator
Juara
#1, Oceania
Score :
12

C. Sertifikat / AWARD
atas nama YE2R
1.
Certificate CQWW-SSB 2009 (Asli)

dipersembahkan oleh Team YE2R ke ORDA
Jateng untuk di-arsip
2. Certificate
CQWW-SSB 2010 (Asli)
dipersembahkan oleh Team YE2R ke ORDA
Jateng untuk di-arsip
3. Certificate
CQWW-SSB 2011 (Asli)
dipersembahkan oleh Team YE2R ke ORDA
Jateng untuk di-arsip
4.
Certificate CQWW-SSB 160m 2012 (Asli)
dipersembahkan oleh Team YE2R ke ORDA
Jateng untuk di-arsip
5.
DXCC-Phone Award #41,345 (Asli)
dipersembahkan oleh Team YE2R (biaya klaim Award adalah Swadana Team YE2R) ke ORDA Jateng untuk di-arsip

Subject: [orari-news] YE2R

YE2R DI
CQ WW SSB 2013
Sebagaimana
di tahun-tahun yang lalu maka di tahun 2013 ini YE2R rencananya akan kembali
berpartisipasi di ajang Kontes Internasional CQ WW SSB. Pada kesempatan ini
pula YB2LSR dan YB2DX selaku koordinator akan menyampaikan sekilas
pandang mengenai sejarah
terbentuknya YE2R, Operator dan team pendukung yang terlibat, Prestasi yang
telah dicapai serta segala sesuatu yang berkaitan dengan operasional team YE2R.

A. Apa itu YE2R :

Cerita
singkat mengenai sejarah YE2R,

1.
Tahun 2002,
Awalnya Call-sign YE2R muncul itu digunakan
untuk kegiatan IOTA-DXpedition Pulau Karimun Jawa OC-186 di
tahun 2002 oleh YB2MTA (sekarang YE3AA).

2. Tahun 2009,
Pada pertengahan Maret 2009 YB2LSR dan YB2DX menghadapYB2AA (SK) mengusulkan kepada beliau
selaku Ketua ORDA Jawa Tengah untuk
membentuk Team Kontes berskala
Internasional,beliau
sangat mendukung sekali dan setuju akan ide tersebut dan akhirnya
terbentuklah Team
Kontes YE2R dan secara lisan mempercayakan YB2LSR sebagai koordinator kegiatan
ini dan stasiun yang dipergunakan untuk team Kontest ini adalah stasiunnya

YB2DX di Grobogan.
Melalui ORDA Jateng maka IAR yang diajukan untuk dipergunakan team kontes ini adalah YE2R dan
inilahpertama kali Team YE2R ikut dalam kontes
international CQWW-SSB 2009.
**(masa berlakunya IAR YE2R2009adalah selama
berlangsungnya kontes tersebut).
Partisipasi
YE2R di dalam kontes International ini, team dengan operator dari ORARI Daerah-2 (Dua) itu
sendiri juga didukung oleh Guest Operator dari beberapa ORARI Daerah lainnyaantara lain :
YB2DX, YB2LSR, YB2ECG, YB2TJV, YB2VTO, YB2BOB, YB2CPO,
YB2OBL, YB2SSB, YB3MM, YB3PXF, YC2BBY, YC2JKG, YC2JVX, YC2KME, YC2PQW, YD2DNA

3.
Tahun 2010, 2011, 2012
Team DX
kontes YE2R kembali mengajukan IAR oleh YB2LSR kepada Ketua ORDA Jawa
Tengah YB2AA (SK) untuk kembali dipergunakan di kegiatan CQ WW SSB di tahun 2010.
** (masa berlakunya IAR YE2R adalahselama
berlangsungnya kontes tersebut)
Adapun team operator YE2R yang terlibat di kontes ini seperti pada tahun sebelumnya dari
Daerah 2 (dua) sendiri dan dari anggota beberapa ORARI Daerah lainnya : YB1TJ, YB1WR,
YB2CPO, YB2DX, YB2ECG, YB2LSR, YB2TJV, YB2VTO, YB3KM, YB3PXF,
YB3MM, YB9WZJ, YC2BBY
Begitu
juga di tahun 2011, IAR YE2R kembali diajukan oleh YB2LSR kepada Ketua ORDA Jawa
Tengah YB2AA (SK)
untuk kembali dipergunakan di kegiatan CQ WW SSB di tahun 2011
**(masa berlakunya IAR YE2R adalahselama
berlangsungnya kontes tersebut)
danoperator yang terlibat di kontes ini antara
lain adalahsama seperti tahun sebelumnya dari ORARI Daerah 2 dan dari anggota beberapa
ORARI Daerah lainnya : YBØAI, YB1AR, YB1HK, YB1TJ, YB2BBY, YB2DX, YB2ECG,
YB2LSR, YB2TET, YB2TJV, YB2VTO, YB3KM, YB3PXF, YB3MM, YB4IR, YB9WZJ

Ditahun 2012, YB2LSR atas nama Team YE2R kembali mengajukan IAR untuk YE2R dansupaya
diperoleh masa berlakunya
selama 5 tahun dan biaya perpanjangan IAR tersebut diambilkandari swadana Team YE2R
sendiri.
Team
operator yang terlibat CQWW-SSB 2012 adalah:KR7O, W7NZ, YBØNSI, YB1TJ, YF1AR, YB2DX,
YB2WB,
YB2BBY, YB2LSR, YB2TET, YB2TJV, YB2VTO, YC2WBF, YB3KM, YB3MM, YB3PXF, YB4IR.
Di tahun yang sama 2012, Team YE2R mengikuti pula kegiatan CQWW-160m-SSB
2012, dengan team operator :
YBØAI, YB2DX, YB2LSR, YB2TJV, YB2BBY, YB2VTO, YB2TET,
YB3MM, YB3PXF, YC2FAJ, YC2PQW, YB2WB, YC2WBF

4.
Tahun 2013.

YB2LSR dan YB2DX ditunjuk
secara tertulis berupa Surat Tugas sebagai Koordinator untuk pelaksanaan Kontes
CQWW-SSB 2013 mendatang
oleh Pj.Ketua Orda Jateng (YB2JNZ). Ini pertama kalinya Surat
Tugasdiperoleh secara tertulis
dimana di tahun-tahun sebelumnya hanya penunjukan secara lisan oleh YB2AA (SK) kepada
YB2LSR untuk mengkoordinir Team YE2R.

B. Prestasi Team YE2R :
*
CQWW-SSB 2009, Katagory : Multi Operator-Two Transmitter
Juara
#1, Indonesia
Juara #5, Oceania
Score :
2.254.593
*
CQWW-SSB 2010, Katagory : Multi Operator-Two Transmitter
Juara
#1, Indonesia
Juara
#4, Oceania
Score :
4.999.390(New ZoneRecord)
*
CQWW-SSB 2011, Katagory : Multi Operator- Multi Transmitter
Juara
#1, Indonesia (New Indonesia Record)
Juara
#3, Oceania
Score :
7.621.077
*
CQWW-SSB 2012, Katagory : Multi Operator- Multi Transmitter
Juara
#1, Indonesia (New Indonesia Record)
Juara
#3, Oceania
Score :
8.343.880
*
CQWW-160m DX Contest, Katagory : Multi Operator
Juara
#1, Oceania
Score :
12

C. Sertifikat / AWARD
atas nama YE2R
1.
Certificate CQWW-SSB 2009 (Asli)

dipersembahkan oleh Team YE2R ke ORDA
Jateng untuk di-arsip
2. Certificate
CQWW-SSB 2010 (Asli)
dipersembahkan oleh Team YE2R ke ORDA
Jateng untuk di-arsip
3. Certificate
CQWW-SSB 2011 (Asli)
dipersembahkan oleh Team YE2R ke ORDA
Jateng untuk di-arsip
4.
Certificate CQWW-SSB 160m 2012 (Asli)
dipersembahkan oleh Team YE2R ke ORDA
Jateng untuk di-arsip
5.
DXCC-Phone Award #41,345 (Asli)
dipersembahkan oleh Team YE2R (biaya klaim Award adalah Swadana Team YE2R) ke ORDA Jateng untuk di-arsip
6.DXCC-
40m Phone Award (Asli)
dipersembahkan oleh Team YE2R (biaya klaim Award
donasi dari YB3MM), ke ORDA Jateng untuk di-arsip

D. Dedikasi
Kami persembahkan Sertifikat / AWARD YE2R, untuk
:
1. INDONESIA
2. ORARI DAERAH JAWA TENGAH
3. YB2AA, TIM HADI DHANUWIDJAJA (SK)
Sekapur Sirih :
Prestasi
demi prestasi yang telah yang telah dicapai semua itu karena hasil dari Team Work yang baik, dukungan dari
Organisasi, dan dukungan dari temen-temen baik material maupun spiritual yg
belum sempat disebut satu-persatu, Semua itu bukan untuk Team YE2R sendiri, melainkan untuk INDONESIA dan tentunya untuk Organisasi yang kita
cintai "ORARI" dimata dunia.

Ok...
Saya melihatnya begini: bahwa YE2R adalah station cukup kuat dan sangat menantang untuk dikalahkan. Kalau di F1 seperti mau mengalahkan Sebastian Vettel. Team yang kuat (station) dan driver dengan skill
(operators). Saya yakin di YBland ini ada yang mampu membuat station seperti OM Budi, YB2DX. Kalau mengumpulkan operators untuk phone mungkin tidak susah. Skill bisa diasah, yang penting ada leadernya di situ yang berpengalaman bisa ngajarin. Kalau saya monitor di 40m banyak yang signalnya gede-gede, dan modulasinya bagus-bagus tapi setiap on-air testing transmission terus... Salah satu cara nyata untuk mengetahui kemampuan station kita adalah bertarung di kontes, masak sih dari 2009 cuman YE2R saja yang paling jago untuk SSB di YBland???

Hallo OM Ricky,

Heheheheh,
Itu mah kebetulan aja, faktor keberuntungan lah,
Di kita ga ada yg istimewanya,
Perangkat juga jadul-jadul, antena juga seadanya, hanya karena semangat dari para operator aja yg jadi modal kami.

Akan terasa istimewa sekali apabila OM Ricky bisa gabung kali ini di YE2R, bagaimana?

Untuk :
YB0NDT, YB0MZI, YF1HDF
Thanks ya atas doa restunya
Amin

OM Djoko,

Saya mau ikut 1 slot QSL Card kalau masih tersedia.

Designnya ikut dengan teman2 aja, mungkin backgroundnya aja yang dari saya (kalau bisa?)

Salam,
Jimmy-YB7KNV

OM Seno bisa aja..
Low profile. hihihi.
Kalau berani tampil di multi-multi terus station-nya gak mumpuni ya bablas lah... :)

Terimakasih undanganya, boss. Kepingin melihat superstation di Grobogan kalau ada waktu.
Untuk kategori phone saya musti belajar banyak sama Anda dan teman-teman di YE2R.

Salam,
yb7xo

Malam om Jonathan

Apa kabar??
Senang ßišª ketemu kemarin waktu di Luwuk dan makan malam bersama di rumahnya om Amir.
Sayang hanya sesaat saja..karna kami harus lanjuti perjalanan ke Palu..
Perjalanan yg sunguh melelahkan heheheh..
Karna sore baru kami tiba di Palu.. 24 jam perjalanan mulai dari Salakan , P.Peleng - Luwuk - Palu..

USMC Antenna Handbook

A radio antenna is the crucial link in any receiving or transmitting station whether it is used for ham radio, short wave listening, or for commercial or professional use. The overall performance of the radio station depends upon the performance of the radio antenna. A good radio antenna will enable the performance of the whole radio communications station to be maximised, whereas a poor antenna will degrade the capabilities of the transmitter and receiver regardless of how good they are.

Radio stations used for professional or commercial applications have a large degree of flexibility and they will site antennas where they will give a suitable level of performance. However for ham radio enthusiasts and short wave listeners it is necessary to install the best antenna around the house. Very few ham radio operators are able to utilise a field or other large area, and often the radio antenna will be something of a compromise. Nevertheless, by following a few guidelines, it is possible to make the best of any radio antenna installation and ensure that its performance is as good as it possibly can be. In addition to this it is worth mentioning that it is usually necessary to undertake some experimentation to find out what type of radio antenna works best for a given location and style of radio operation.

Some hints and tips are given below, but these can only be general guidelines, and they are not exhaustive. However they form a good starting place when thinking of installing a ham radio antenna system

General antenna situation One of the most important aspects of setting up any radio antenna is its location. The location of the antenna will govern many aspects of its operation, and therefore the location of the antenna must be determined along with the type of antenna to be used. A number of points associated with the antenna should be considered:

USMC Antenna Handbook

A radio antenna is the crucial link in any receiving or transmitting station whether it is used for ham radio, short wave listening, or for commercial or professional use. The overall performance of the radio station depends upon the performance of the radio antenna. A good radio antenna will enable the performance of the whole radio communications station to be maximised, whereas a poor antenna will degrade the capabilities of the transmitter and receiver regardless of how good they are.

Radio stations used for professional or commercial applications have a large degree of flexibility and they will site antennas where they will give a suitable level of performance. However for ham radio enthusiasts and short wave listeners it is necessary to install the best antenna around the house. Very few ham radio operators are able to utilise a field or other large area, and often the radio antenna will be something of a compromise. Nevertheless, by following a few guidelines, it is possible to make the best of any radio antenna installation and ensure that its performance is as good as it possibly can be. In addition to this it is worth mentioning that it is usually necessary to undertake some experimentation to find out what type of radio antenna works best for a given location and style of radio operation.

Some hints and tips are given below, but these can only be general guidelines, and they are not exhaustive. However they form a good starting place when thinking of installing a ham radio antenna system

General antenna situation One of the most important aspects of setting up any radio antenna is its location. The location of the antenna will govern many aspects of its operation, and therefore the location of the antenna must be determined along with the type of antenna to be used. A number of points associated with the antenna should be considered:

USMC Antenna Handbook

A radio antenna is the crucial link in any receiving or transmitting station whether it is used for ham radio, short wave listening, or for commercial or professional use. The overall performance of the radio station depends upon the performance of the radio antenna. A good radio antenna will enable the performance of the whole radio communications station to be maximised, whereas a poor antenna will degrade the capabilities of the transmitter and receiver regardless of how good they are.

Radio stations used for professional or commercial applications have a large degree of flexibility and they will site antennas where they will give a suitable level of performance. However for ham radio enthusiasts and short wave listeners it is necessary to install the best antenna around the house. Very few ham radio operators are able to utilise a field or other large area, and often the radio antenna will be something of a compromise. Nevertheless, by following a few guidelines, it is possible to make the best of any radio

antenna installation and ensure that its performance is as good as it possibly can be. In addition to this it is worth mentioning that it is usually necessary to undertake some experimentation to find out what type of radio antenna works best for a given location and style of radio operation.

Some hints and tips are given below, but these can only be general guidelines, and they are not exhaustive. However they form a good starting place when thinking of installing a ham radio antenna system

General antenna situation One of the most important aspects of setting up any radio antenna is its location. The location of the antenna will govern many aspects of its operation, and therefore the location of the antenna must be determined along with the type of antenna to be used. A number of points associated with the antenna should be considered:

OM
Prapto … idem kok, di tempat sy bisa dibuka, diunduh dan disimpan (Save) dg
baik dan benar.
(kaya'nya SBLM-nya buku ini sdh prnh diunggah ke group ini juga,
krn seingat sy prnh bbrp bagian sy "uraikan" utk melengkapi bahan paparan sy
ttg HF Emcomm, trtm HF/NVIS, a.l. utk melengkapi Quiz sy: "kenapa antena whip
yg terpasang di panser, tank, Humvee dll selalu dimiringkan (klo perlu diikat)
saat digunakan?")

Ini buku bagus lho (total file size 2+ Mb), apalagi dr "sumber yg layak dipercaya (US
Marine Corps)
